and partly without the state, or is operated as a part of a system extending beyond the state, the gross transportation receipts of the railroad line or system over its whole extent within and without the state were to be divided by the total number of miles operated to obtain the gross receipts per mile, and the gross receipts in the state were to be taken to be the average gross receipts per mile multiplied by the number of miles operated within the state. The supreme court held the tax to be an excise tax upon the corporation for the privilege of exercising its franchise within the state of Maine, and it is said in the opinion that the privilege of exercising the franchise of a corporation within a state is generally one of value, and often of great value and the subject of earnest contention, and that as the granting of the privilege rests entirely in the discretion of the state, whether the corporation be of domestic or foreign origin, it may be conferred upon such conditions, pecuniary or otherwise, as the state in its judgment may deem most conducive to its interest and policy; and it may require the payment into its treasury each year of a specific sum, or may apportion the amount exacted according to the value of the business permitted as disclosed by its gains or receipts of present or of past years. And further, that the erroneous ruling of the lower court to the effect that the tax in question was a regulation of interstate and foreign commerce, was founded upon the assumption that a reference by the statute to the transportation receipts and adopting a certain percentage of the same for determining the amount of the excise tax, was in effect the imposition of the tax upon such receipts, and therefore an interference with interstate and foreign commerce; whereas the resort to the stated methods was not an interference with transportation, domestic or foreign, over the road of the railroad company or any regulation of commerce consisting in such transportation; and there being no levy by the statute on the receipts themselves, either in form or fact, they constituting merely the means of ascertaining the value of the privilege conferred. The case is assimilated by the court to that of *Home Ins. Co. of New York v. New York*, 134 U. S. 594, 33 L. ed. 1025, where a portion of the capital stock of the company was invested in bonds of the United States, and by an act of the legislature of New York it was declared that certain classes of companies with certain exceptions, incorporated under the laws of that state or of any other state or country and doing business in New York, should be subject to a tax on its corporate franchise or business to be computed at a varying percentage on its capital stock according as its dividends thereon should be more or less, or there should be no dividend, as stated in the act. The company resisted the payment of the tax, asserting that it was one upon the capital stock of the company, and that consequently there should be deducted from the amount of the tax a sum bearing the same ratio thereto that the amount invested in government bonds, which were exempt from taxation, bore to its capital stock,

4 INTER S.

and that the law requiring a tax, without such reduction, was unconstitutional and void. It was held, however, that the tax was not on the capital stock nor upon any bonds of the United States composing a part thereof, but upon the corporate franchise or business of the company, and that reference was only made to the stock and dividends for the purpose of determining the amount of the tax to be enacted each year.

In 1879 the legislature of Pennsylvania enacted a statute to the effect, as far as it need be stated, that no foreign corporation, except insurance companies, that did not invest and use its capital in that commonwealth, should have an office or offices therein for the use of its officers, stockholders, agents, or employes, unless it should have first obtained from the auditor general an annual license so to do, and for such license pay into the state treasury annually one fourth of a mill on each dollar of capital stock that it was authorized to have, such payment to be made before the license could issue. This statute has been before the Supreme Court of the United States in the case of *Pembina Consol. Silver Min. & Mill. Co. v. Pennsylvania*, 125 U. S. 181, 31 L. ed. 650, 2 Inters. Com. Rep. 24, and in *Norfolk & W. R. Co. v. Pennsylvania*, 136 U. S. 114, 34 L. ed. 394, 3 Inters. Com. Rep. 178. In the former case it appeared merely that the appellant company, a corporation organized under the laws of Colorado, for the purpose of carrying on a general mining and milling business in that state, with its principal office there, had an office in the city of Philadelphia, Pennsylvania, for the use of its officers, stockholders, agents and employes, and not having complied with the law, an action was brought to recover of it the tax and penalty authorized by the statute. The tax was sustained by the Supreme Court of the United States as not in conflict with the commerce clause of the Constitution; and Judge Field speaking for the court said of the statute that it imposed no prohibition upon the transportation into Pennsylvania of the products of the corporation or upon their sale in the commonwealth, but exacted only a license tax from the corporation when it has an office in the commonwealth for the use of its officers, stockholders, agents or employes; and it is also observed by him, that the only limitation upon the power of a state to exclude a foreign corporation from doing business within its limits, or hiring officers for that purpose or to exact conditions for allowing it to do business or have offices there, arises where the corporation is in the employ of the Federal government, or where its business is strictly commerce interstate or foreign; that the control of such commerce being in the Federal government, is not to be restricted by state authority. In the second case there was a different state of facts. The road of the railroad company, a corporation existing under the laws of Virginia and West Virginia, though entirely within the two states named, was a link in a through line of railroad by which passengers and freight were carried into Pennsylvania from other states, and from that state to other

states; and it kept its office in Philadelphia for its stockholders, officers, agents, and employes for the "furtherance of its business interests in the matter of its commercial relations," and did not "exercise or seek to exercise any privilege or franchise not immediately connected with interstate commerce, and required for the purpose thereof." The Pennsylvania courts held that the company was subject to the tax imposed by the statute, but the Supreme Court of the United States decided that the office was maintained because of the necessities of the interstate business of the company, and for no other purpose, and that a tax upon the company was therefore a tax upon one of the means or instrumentalities of the company's interstate commerce, and as such was in violation of the commerce clause of the Constitution.

In *McCall v. California*, 136 U. S. 104, 34 L. ed. 392, the appellant was an agent in the city and county of San Francisco for the New York, Lake Erie & Western Railroad Company, a railroad corporation having its principal place of business in Chicago, and operating a continuous line of road between Chicago and New York; and as such agent his duties consisted in soliciting passenger traffic in that city and county over such road. He did not sell tickets to passengers over that or any other road, but took the passengers to the Central Pacific Railroad Company where tickets were sold them. The only duty he was required to perform for such company was to induce people who contemplated taking a trip east to be booked over the line he represented, he neither receiving nor paying out any money or other valuable consideration on account thereof. An ordinance of San Francisco prescribed certain rates of license, and, among others, "for every railroad agency, twenty-five dollars per quarter," and made any violation of the ordinance a misdemeanor. McCall was convicted by the state court upon the above state of facts and the further circumstance that he had not complied with the ordinance. The tax was exacted of him as a condition precedent to carrying on the business. "It is admitted," says the opinion of the Supreme Court of the United States, reversing the state court, that "the travel which it was his business to solicit was not from one place to another within the state of California. His business therefore as a railroad agent had no connection direct or indirect with any domestic commerce between two or more places within the state. His employment was limited exclusively to inducing persons in the state of California to travel from that state into and through other states to the city of New York." The conclusion was, the business of the agent was interstate commerce, and that the tax was forbidden by the federal organic law.

In *Pullman Palace Car Co. v. Pennsylvania*, 141 U. S. 18, 35 L. ed. 613, 3 Inters. Com. Rep. 595, the decision was that a state statute imposing a tax on the capital stock of all corporations engaged in the transportation of freight or passengers within the state, under which a corporation of another state engaged in running railroad cars into, through, and out of the state, and having at all times

a large number of such cars within the state, is taxed by taking as the basis of assessment such proportion of its capital stock as the number of miles of railroad over which its cars are run within the state bears to the whole number of miles in that and other states over which its cars are run, does not, as applied to such a corporation, violate the interstate commerce provision of the Federal Constitution. In the opinion of the court, by Judge Gray, it is said, citing *Moran v. New Orleans*, 112 U. S. 69, 28 L. ed. 653; *Pickard v. Pullman Southern Car Co.* 117 U. S. 34, 29 L. ed. 785; *Robbins v. Shelby County Taring Dist.* and *Leloup v. Port of Mobile*, *supra*, that much reliance was placed by the plaintiff in error upon the cases in which it has been decided that citizens or corporations of one state cannot be taxed by another state for a license or privilege to carry on interstate or foreign commerce within its limits, and is then observed that in each of those cases the tax was not on the property employed in the business, but upon the right to carry on the business at all, and was therefore held to impose a direct burden on the commerce itself.

In *Robbins v. Shelby County Taring Dist.* 120 U. S. 489, 30 L. ed. 694, 1 Inters. Com. Rep. 45, a Tennessee statute enacted that "all drummers and all persons not having a regular licensed house of business in the taxing district offering for sale or selling goods, wares, or merchandise therein, by sample, shall be required to pay to the county trustee the sum of \$10 per week or \$25 per month for such privilege, and no license shall be issued for a longer period than three months." Robbins, according to the agreed statement of facts, was a citizen and resident of Cincinnati, Ohio, and was engaged in the taxing district of Shelby county, Tennessee, in the business of drumming—soliciting trade by the use of samples—for the firm of Rose, Robbins & Co., doing business at Cincinnati, all the members thereof being citizens and residents of Cincinnati, for which firm he worked as a drummer, the firm being engaged in the selling of paper and other articles used in the book stores of the stated taxing district. Robbins was arrested for drumming in the district without a license. There was judgment against Robbins, and on appeal it was affirmed by the supreme court of Tennessee, from which court the case was carried to the Supreme Court of the United States, where the judgment was reversed on the ground that the legislation, in so far as it applied to cases like that then under consideration, was a regulation of commerce among the states, and unconstitutional. In *Ficklen v. Shelby County Taring Dist.* 145 U. S. 1, 36 L. ed. 601, 4 Inters. Com. Rep. 79, Ficklen and Cooper & Co. were respectively commercial agents or brokers having an office in the district, and in 1887 took out licenses for their said business under a statute of Tennessee which provided that "every person or firm dealing in cotton or any other article whatever, whether as factor, broker, buyer or seller, on commission or otherwise, \$50 per annum, and in addition every such person or firm shall be taxed *ad valorem* ten

cents on every hundred dollars of amount of capital invested or used in such business.

And provided further that if the person or persons taxed in this subsection have no capital invested they shall pay two and one half per cent on their gross year commissions, charges, or compensation for said business, and at the time of taking out said license they shall give bond to return said gross commissions, charges, or compensation to the trustee at the end of the year, and at the end of the year they shall make return to said trustee accordingly and pay him the said two and one half per cent." During the year for which they took out license all the sales negotiated by Ficklen were made on behalf of principals residing in other states, and the goods so sold were at the time of the sale in other states to be shipped to Tennessee as sales should be effected. During the same time at least nine tenths of the commissions of Cooper & Co. were derived from similar sales. They had no capital invested in their business. At the expiration of the stated year they applied for a renewal of their license for 1888, tendering each the tax and fee therefor, but as they had made no return of their commissions and no payment of the percentage on their commissions, the application was denied. Thereupon they filed a bill to restrain the collection of the percentage tax for the past year, and also to restrain any interference with their current business, claiming that the tax was a tax on interstate commerce. The Supreme Court of the United States held that if the tax could be said to affect interstate commerce in any way, it did so incidentally and so remotely as not to amount to a regulation of it; and that under the circumstances the complainants could not resort to the court simply on the ground that the authorities had refused to issue a new license without the payment of the stipulated tax. Speaking here for all the court, except Harlan, J., who dissented, there being, however, one vacancy, *Chief Justice* Fuller said of the Robbins case, *supra*, that the question involved there was, in the language of *Judge* Bradley, who wrote the opinion of the court: "Whether it is competent for a state to levy a tax or impose any other restrictions upon the citizens or inhabitants of any other state for selling or seeking to sell their goods in said state before they are introduced therein," and that it was decided that it was not; yet that it was conceded that commerce among the states might be legitimately incidentally affected by state laws when they, among other things, provided "for the imposition of taxes upon persons residing within the state or belonging to its population and upon avocations and employments pursued therein, not directly connected with foreign or interstate commerce, or with some other employment or business exercised under authority of the constitution and laws of the United States." That in Robbins case the tax was held in effect not to be a tax on him, but on his principals, while in the Ficklen case it was clearly levied upon the parties in respect of the general commission business they conducted, and their property engaged therein or their

profits realized therefrom. "No doubt," he further says, "can be entertained of a right of a state legislature to tax trades, professions, and occupations in the absence of inhibition in the state constitution, and where a resident citizen engages in general business subject to a particular tax, the fact that the business done chances to consist for the time being wholly or partially in negotiating sales between resident and nonresident merchants of goods situated in another state, does not necessarily involve the taxation of interstate commerce, forbidden by the constitution." Referring to what was said in *Lyng v. Michigan*, 135 U. S. 161, 166, 34 L. ed. 150, 153, 3 Inters. Com. Rep. 143, he observes, but here the tax is not laid on the occupation or business of carrying on interstate commerce, or exacted as a condition of doing any particular commission business, and that the complainants voluntarily subjected themselves thereto in order to do a general business. And as to *Wiggins Ferry Co. v. East St. Louis*, 107 U. S. 365, 27 L. ed. 419, where an annual license fee was imposed on a ferry company by the city of East St. Louis, Illinois, the company having been chartered by that state and being domiciled in the city, but its boats plying between there and St. Louis, Missouri, he quotes from the opinion therein as follows: "The exaction of a license fee is an ordinary exercise of the police power by municipal corporations. When, therefore, a state expressly grants to an incorporated city as in this case the power to 'license, tax and regulate ferries,' the latter may impose a license tax on the keepers of ferries, although their boats ply between lands lying in two different states, and the act by which this section is authorized will not be held to be a regulation of commerce;" and of *McCall v. California*, *supra*, he says that the decision was because the business of the agency was carried on with the purpose to assist in increasing the amount of passenger traffic over the road, and was therefore a part of the commerce of the road, and hence of interstate commerce; and of *Philadelphia & S. Mail SS. Co. v. Pennsylvania*, 122 U. S. 326, 30 L. ed. 1200, 1 Inters. Com. Rep. 308, he remarks that the specific gross receipts were taxed as such, taxed "not only because they are money or its value, but because they were received for transportation." Referring to *Maine v. Grand Trunk R. Co.* *supra*, he says, since a railroad company engaged in interstate commerce is liable to pay an excise tax according to the value of the business done in the state, ascertained as it was there, it is difficult to see why a citizen doing a general business at the place of his domicile should escape payment of his share of the burdens of municipal government because the amount of his tax is arrived at by reference to his profits. "This tax is not on the goods, or on nonresident merchants, and if it can be said to affect in any way it is incidentally and so remotely as not to amount to a regulation of such commerce." What position they would have occupied if they had not undertaken to do a general commission business, and had taken out no license therefor, but has simply transacted business for

nonresident principals, is an entirely different question which does not arise on this record."

The present case is also clearly distinguishable from *Pickard v. Pullman Southern Car. Co.* 117 U. S. 34, 29 L. ed. 785, where a Tennessee statute imposing a privilege tax of \$80 per annum on every sleeping car or coach used or run over a railroad in that state, and not owned by the railroad on which it should be run or used, was held void in so far as it applied to interstate transportation of passengers carried over railroads in Tennessee into or out of or across that state in sleeping cars owned by a corporation of another state and leased by it for transportation purposes to Tennessee railroad corporations, the latter receiving the transit fare and the former the compensation for the sleeping accommodations. In the opinion it is said: "The car was equally a vehicle of transit as if it had been a car owned by the railroad company and the special conveniences or comforts furnished to the passenger had been furnished by the railroad company itself. As such vehicle of transit, the car, so far as it was engaged in interstate commerce, was not taxable by the state of Tennessee; because the plaintiff had no domicile in Tennessee, and was not subject to its jurisdiction for purposes of taxation; and the cars had no situs within the state for purposes of taxation; and the plaintiff carried on no business within the state, in the sense in which the carrying on of business in a state is taxable by way of license or privilege." Here the express company has, as is well known, its local offices and local agents throughout the state, and is doing business as personally here, and enjoying the protection of our government and laws over that business as much as any person in the state.

The statute now before us is clearly distinguishable from those involved in many of the preceding decisions. It does not impose any tax upon the value of the property of the company within the state, assessed either upon the principle adopted by the legislatures of Massachusetts and Pennsylvania, in the cases of *Western U. Teleg. Co. v. Atty. Gen. of Massachusetts*, and *Pullman Palace Car Co. v. Pennsylvania*, or otherwise; nor does it impose a tax on the mere right to exercise within the state a corporate franchise, estimating the value of such use as in *Maine v. Grand Trunk R. Co.*; again, it is not a tax on a corporation for merely having an office in the state for the use of its officers, stockholders, agents, or employes, as in *Pembina Consol. Silver Min. & Mill. Co. v. Pennsylvania*, in all of which cases the statutes were sustained; nor one where the state has given exclusive right to a domestic corporation, and the question of the validity of that grant to the exclusion of another company which the Act of Congress gave the right to enter the same territory, and constituted a Federal agency, as in *Pensacola Teleg. Co. v. Western U. Teleg. Co.*, where the efficiency of the state grant to exclude the latter company was denied. Our statute is clearly one in which the tax is imposed on the person and for doing the business of an express company.

4 INTER S.

It is an occupational tax, and is not imposed on any corporation because it is a corporation or for exercising its corporate franchise within the state, but it is imposed as are most of the occupational taxes to be found in the act, on any and every person, whether natural or artificial who may do the express business, and simply because of doing such business. It is moreover entirely clear that the statute does not anywhere show any intent to tax interstate or foreign commerce as such, or to tax any one because of doing business that constitutes interstate or foreign commerce, as contradistinguished from local business. That a state cannot tax interstate commerce either directly or otherwise, or that it cannot make the payment of a tax or the taking out of a license a condition precedent to carrying on interstate commerce, we do not deny; nor do we wish to be understood as meaning that a state tax which in effect burdens such commerce wherever it may be carried on, although not laid directly or expressly on interstate commerce, is not offensive to the commerce clause of the constitution, still we do believe that a state tax imposed on any avocation generally, such as those usually imposed on merchants, druggists, dealers in tobacco and others, for doing business in the state, is not itself, nor is the statute imposing it, unconstitutional. That the commerce clause of the constitution exempts from the burden of state taxation those who confine themselves to interstate commerce is a truth of which, at this day, knowledge must be imputed to the law making power of the states, and in the absence of language that clearly connects such an intent with that power, it should not be held that there was a purpose to ignore such truth or violate its principles; but that the doing of express or other business which constitutes interstate commerce along with and as a part of a general business which is also made up in part of business of the same nature that is local to the state, exempts those engaged in such general business from the tax which the law imposes upon it, we do not admit. Of course where such statutes make the payment of the tax, or the taking out of a license, a condition precedent to such general business they are never a bar to any one at any time entering upon or doing interstate commerce business, and as long as any one does only such business he is exempted by the commerce clause from the effect of the statute, and is in our judgment placed beyond the intent of the more general language usually adopted in imposing occupational taxes, but when he does not confine himself to such business, but engages indiscriminately in local and interstate business, he cannot by making the former a feature of that business relieve himself from the taxes, conditions, or regulations to which the latter subjects him. Engaging in the former business does not necessitate his engaging in the latter, and if he does not engage in the latter the former is in nowise burdened or even affected by the tax or the statute, but, on the contrary, he is as free to carry on interstate commerce unaffected by the provisions of this Act, as if it was not on the statute book. He may, if he chooses, keep

his local and interstate business entirely distinct, or carry them on each as a separate business, and if he does so the former will be subject to state taxation and regulation but the latter will be exempt from any legislation regulating or burdening the former. In our judgment it was never the purpose of the commerce clause to interfere with state taxation or state regulation of taxation so long as any regulation of interstate or foreign commerce, or commerce with the Indian tribes, is not interfered with.

It is obvious from several of the decisions cited above that there is a clear distinction between the unconstitutionality of a statute as such or of a specific provision thereof, tested by the commerce clause, and the application of a general provision, like that before us, of a statute to interstate commerce business which, but for the commerce clause, would be within the operation of such general provision. This is illustrated by the case of the Pembina Consolidated Silver Mining and Milling Company, and that of the Norfolk & Western Railroad Company, involving the Pennsylvania statute as to foreign corporations having offices in the state for the use of officers and others. In the former of these cases, where the imposition of the tax was sustained, it was said, and is evident, that the statute proposed no prohibition upon the transportation of the products of the corporation or upon their sale in the state, nor is there in the statute anything that shows an intent to affect interstate commerce in any way, but when it was attempted to subject to that statute a company which was using its offices solely for interstate commerce purposes, and the state court had decided both that the statute applied to offices so used, and that the tax as thus applied was not contrary to the commerce clause, the supreme court reversed the decision, and held that as so applied the tax was unconstitutional. Again in the *McCall* case where it is made prominent that the business of the agent was exclusively interstate in its character, it is entirely plain that it was not the meaning of the court that the statute or ordinance involved in these cases did not stand in full force and effect as to everything except interstate or other commerce falling within the terms of the commercial clause. And in the case of *Western U. Teleg. Co. v. Texas*, where telegrams sent between persons in Texas and those in other states and those sent to government officers were held to be exempted from the general provision of the act, taxing all messages, the former because they were interstate commerce, and the latter because of the character of the company as a governmental agency, it is apparent that telegrams themselves were the subject of taxation by the terms of the act, and those which were held to be exempt were purely interstate or governmental in their character. Again it is shown in the Shelby County Taxing District cases. In one of them (*Robbins' case*) the facts showed nothing but interstate commerce business, pure and simple; there being not a fact in it that makes the decision authority beyond the inability to tax such commerce as such. Of course no one would pretend to

saying that it committed the court to the view that in the doing of a general business of a particular character composed of both interstate and local commerce, the former component would relieve the entire business from a state tax or regulation to which it would be subject if there was no such component, or that the act was not entirely effectual except as to business covered by the commerce clause. In the *Ficklen* case, however, the tax was, as it was imposed by the statute, as general as it was in the *Robbins' case*, and yet because the parties had submitted themselves to the statute as persons intending to do a general business, or, in other words, one indiscriminate as to local or interstate commerce, it was held that they could not either because in the one case only interstate business was done, and in the other mostly such business, and only one tenth of local business, evade the provisions of the statute. We do not understand any case to hold that the protection of the commerce clause is confined to citizens of other states than that whose legislation is complained of. It is as much a shield to the Floridian who in Florida is doing such business with those in other states as it is the Georgian residing in Georgia who may be engaging in business with residents of Florida; the protection is to all interstate commerce.

We are not unmindful of the seeming conflict to those views to be found in the expressions embodied in the *Leloup*, and the *Crutcher* cases, but our judgment is that these expressions are to be viewed with reference to the circumstances under which the Supreme Court of the United States was then speaking. The state courts which it was reviewing had each declared in effect that these statutes were binding upon and effectual as to companies as doers of interstate business, or, in other words, were a bar to their doing interstate business without having complied with their requirements. *Mobile v. Leloup*, 76 Ala. 401; *Crutcher v. Com.* 89 Ky. 7. This construction has become, in so far as the Federal tribunals were concerned, binding upon the Federal court as to the effect of each statute within the state enacting it, as much as if it had been expressly stated in the act. *Pullman Palace Car Co. v. Pennsylvania*, 141 U. S. 18, 21, 35 L. ed. 613, 614, 3 Inters. Com. Rep. 595. This being so, the doing of local business could not affect the question. It gave to the statute the same effect on interstate commerce as if it had had a special clause as to such commerce, like the first clause of the Alabama statute in the case of *Osborne v. Mobile*, *supra*, which decision we regard, in view of that clause, as entirely overthrown by the subsequent decisions of the same tribunal. It cannot be where the state statute does not interfere with interstate commerce, but it can be carried on protected by the state courts against regulation or interference by state authority, that the mere fact that state commerce, if carried on, is regulated or burdened, operates as a regulation of or burden on interstate commerce.

It is not to be doubted that, under our statute, any citizen of the state, or of any other

state, or any body corporate of either, that should enter upon the express business in this state proposing to confine itself to local or state business, or actually doing so, would be subject to all the provisions of this statute; and we cannot see how it can be that an engagement by any such person, natural or artificial, in local business, can be relieved from the provisions of the statute by an engagement at the same time in interstate commerce business, or how his engagement in the latter business can make the statute inapplicable to the other. Is it true that the merchant who may be doing a large local business can exempt himself from the statute by the fact that he may also do a regular business with customers in other states to whom he sells and ships goods? We do not think that anything but interstate and foreign business, or business with the Indian tribes, is protected by the clause in question, or that that clause is the basis either for interfering with a state's dominion over its own commerce, or for prescribing the mere form of its legislation as to its affairs.

Our state statute can have no effect as to any interstate or foreign commerce business which may be carried on by the Southern Express Company, the principal of the plaintiff in error, or by him as its agent, or in fact by any one. So long as he and the company confine their operations to express business constituting interstate or foreign commerce, they are exempt from any interference with them under state legislation. Such commerce is the subject of Federal regulation, and is beyond the jurisdiction of state authority. That the Southern Express Company is engaged in such commerce, is admitted; and that it is engaged in domestic or state commerce, is also admitted, and nothing is clearer than that the right to engage in interstate or foreign commerce freed from any regulation or burden of the same by the states, gives no immunity from state regulation or state taxation of state commerce. The exclusion of state interference in the one case is no more perfect, nor any more essential, than the exclusion of federal interference in the other. In our judgment the Florida statute now under consideration is, in so far as its terms can be construed to apply to interstate or foreign commerce, of no effect, and besides this there is in the Act, in so far as it applies to express companies, nothing that necessarily regulates, or that burdens or interferes with anything that is strictly interstate or foreign commerce, or that, in view of the commerce clause of the Federal Constitution, should or can properly be construed to apply to interstate or foreign commerce. Any person or persons, or body corporate, wishing to engage in the express business, and confine that business to interstate or foreign commerce, can do so, and any effort to apply to or enforce against him the provisions of the statute as to license, license tax, or license fee, must prove futile. The commerce clause of the Constitution of the United States protects him against any such interference. But because such person, or persons, or body corporate, may have this right, he or they have not as an incident to it the right to engage

in state commerce, and the statute as a regulation of state commerce is entirely valid. It is a legal regulation of state commerce, and there is nothing in the Federal Constitution that exempts any person or persons, natural or artificial, from its provisions.

If the person engaging, or proposing to engage, in interstate commerce express business, finds that to engage in express business which is state commerce will or may take some of his interstate commerce express earnings to pay the license taxes and fees of the state commerce business, he has only to refrain from the latter business to avoid incurring such exaction from such earnings. It is undeniable that taxes on property employed in interstate commerce business do not constitute a regulation of such commerce (*Maine v. Grand Trunk R. Co.* and *Western U. Tel. Co. v. Atty. Gen. of Massachusetts*, *supra*, and *Pullman Palace Car Co. v. Pennsylvania*, 141 U. S. 18, 35 L. ed. 613, 3 Inters. Com. Rep. 595) and this must be true notwithstanding that the payment of such taxes cannot be met from the earnings of state or local commerce. It is not sufficient to constitute a regulation of such commerce that the thing complained of affects it indirectly, incidentally and remotely. *Sherlock v. Alling*, 98 U. S. 99, 102, 23 L. ed. 819, 820; *Smith v. Alabama*, 124 U. S. 465, 31 L. ed. 508, 1 Inters. Com. Rep. 804; *Union Pac. R. Co. v. Peniston*, 85 U. S. 18 Wall. 5, 30, 31, 21 L. ed. 787, 791.

II. We fail to discover any uncertainty or obscurity in the statute as to the sums required by it to be paid by express companies as a state license tax, or, we may add, as a county or a city or town license tax. The obvious meaning of the Act, in so far as its provisions relate to these companies, is that each company shall pay a state license tax and take out a state license, when it proposes to do business in any city or town or village having more than fifty inhabitants; the amount of such state license tax being \$200 for cities of fifteen thousand, or more, inhabitants, and \$100 for cities of from ten to fifteen thousand inhabitants, \$75 for cities of from five to ten thousand, \$50 for those of from three to five thousand, \$25 for those of from one to three thousand, and \$10 for towns and villages of more than fifty inhabitants. Where there are in one county several cities, or towns or villages belonging to one or more of these classes, the company must take out a separate state license for each one of them that it may intend to do business in, and pay the tax and fee for the same as stated. It of course takes out no license for any city, town or village that it does not do business in. Any county may impose on a company doing business within its limits a license tax of not more than fifty per cent of the state tax, and thus require the company to pay it not more than fifty per cent of the amount such company has to pay to the state as a license tax for doing business at any city, town or village, within the provisions of the Act. If one company is doing business in, say, three places, one of which belongs to one class, another to another class, and the third to still another, the county may impose a tax

on the company for each of the three places, not exceeding fifty per cent of the amount of the state tax for that place. Likewise any incorporated city or town may impose on any such company doing business within its limits a municipal license tax not exceeding fifty per cent of the state license tax imposed upon it for that place by the statute. Whether or not this construction of the statute will result in rendering it impossible for express companies to carry on within our borders business that is local to the state, is a consideration for the lawmaking power, but it cannot be invoked properly to influence a construction that is contrary to the plain meaning of the statute, made more palpable still by a comparison of it with former legislation as to the same matter. Acts 1872, p. 37; 1881, p. 26; 1891, p. 8. By the legislation cited, the tax was imposed first on the agents, and afterwards changed to the companies, the tax on the companies being confined to simply a state tax payable to the state treasurer, without any license from collectors of revenue, or any county or municipal taxation under the general provisions of the license tax section of the statutes; while now the state tax is payable to the collectors of revenue, and the license is signed and delivered according to the general provisions of the ninth section of the Revenue Law of 1893, just as in the cases of many other if not all the occupations made subject to license by that section; its county and municipal taxation features being likewise applicable to these companies just as they are to merchants, keepers of hotels, liquor dealers and banks, and others too numerous to designate. Upon most deliberate consideration we are satisfied beyond doubt that any other construction of the Act on this point would be strained and inconsistent and contrary to its meaning and the manifest purpose exhibited by the statute. The amount of the tax, if not a matter solely of legislative discretion, is still not shown by this record to be prohibitory or destructive of business; and if there be one or more counties in the state

in which there is not even a village of fifty inhabitants, the fact does not bring the Act in conflict with any provision of our constitution, nor does it impair the uniform operation of the Act throughout the state as to all persons standing in the situation which the act makes the test of taxation. The question of the population of any city, town, or village has, as the petition shows, presented no insuperable difficulty to petitioner or his counsel, nor, as is shown by the stipulation between counsel, any to the state authorities; and, when it shall be made an issue it will be one of fact, and not beyond the power of the courts to deal with successfully; and it is entirely clear, from the case before us, that the law affords a hearing as to the enforcement of the criminal features of the statute, and it would be improper to intimate any opinion as to its provisions that give resort to levy and sale of property, when no such levy has been made.

It cannot be said that the detention of the plaintiff in error is without jurisdiction, and therefore he could or should have been discharged on habeas corpus from the custody in which he was when the writ issued. *Ex parte Prince*, 27 Fla. 196. The plaintiff in error was properly remanded by the circuit judge for a hearing before the criminal court of records of Duval county, upon the charge. That hearing must be conducted on principles consistent with the conclusions we have reached, and particularly with an eye to the fact that our legislation has and can have no effect upon interstate commerce, but is applicable alone to state or local business. The Southern Express Company may carry on any and all business that constitutes interstate or foreign commerce, free from regulation by or under our laws; but business strictly of a state or local character cannot be exempted from our laws or put beyond our authority by its engaging at the same time in interstate or foreign commerce.

The judgment will be affirmed and the cause remanded for proceedings not inconsistent with this opinion.

UNITED STATES CIRCUIT COURT OF APPEALS.

P. M. ARTHUR *et al.*, Intervenor, *Appts.*, v. Thomas F. OAKES *et al.*

1. Equity will not enjoin employes of a receiver of a railroad from quitting his service, although the

NOTE.—The importance of this decision and the popular interest which was manifested by that of *Judge Jenkins* in the lower court make a full representation of both opinions desirable, so the circuit court case is given herewith in full as a footnote.

UNITED STATES CIRCUIT COURT EASTERN DISTRICT OF WISCONSIN.

FARMERS' LOAN & TRUST CO.,

v.

NORTHERN PACIFIC R. CO. *et al.*

(60 Fed. Rep. 803.)

1. An injunction is the appropriate remedy to prevent an unlawful combination and conspiracy
- 4 INTER S.

effect of such action will be to cripple the property, or prevent or hinder the operation of the road.

to interfere with the operation of a railway and paralyze its business, since the injury would be irreparable and compensation could be obtained only through a multiplicity of suits.

2. Punishment for contempt is not such a remedy for a conspiracy to obstruct the business of a railroad in the hands of a receiver as to prevent the remedy of injunction.
3. A combination and conspiracy of the employes of a receiver of a railroad company to quit the service with the object and intent of crippling the property and preventing or hindering the operation of the road is illegal, since it involves the intimidation and oppression of others and the injury to property in their keeping tending to the prejudice of the public.
4. A combination or conspiracy having for its purpose the inauguration of a strike upon the lines of

2. Employees of the receiver of a railroad may lawfully confer together upon the subject of a proposed reduction of wages, and if not restrained by their contract, may withdraw in a body from the receiver's service because of such reduction, although they expect that such action will inconvenience the receiver and the public.
3. Equity will enjoin any combination or conspiracy among the employees of the receiver of a railroad which has for its object and intent the physical injury of the property in the receiver's possession, or actual interference with the regular continuous operation by him of the railroad.
4. Employees of a receiver of a railroad may be enjoined from disabling rolling stock or other property in the receiver's possession, from interfering with its possession or obstructing its management, and from using force, intimidation, threats, or other wrongful methods against the receiver, his agents, or employees, or persons seeking employment.
5. Illegal combinations are not sanctioned in any

degree by the Act of Congress of June 20, 1880, legalizing the incorporation of national trades unions.

6. Trade unions are not prohibited an injunction against illegal combinations of working men.
7. Employees of the receiver of a railroad may be enjoined from combining and conspiring to quit his service with the object and intent of crippling the property in his custody, or embarrassing the operation of the railroad.
8. A strike is not unlawful if it is merely a combination among employees having for its object their orderly withdrawal in large numbers or in a body from their employer's service, to accomplish some lawful purpose.
9. Injunction is a proper remedy to restrain threatened acts of employees of a railroad receiver which would inflict irreparable loss upon the property, and seriously prejudice the interests of the public involved in the regular continuous operation of the road.

Decided October 1, 1894.

APPEAL by intervening petitioners from a decree of the Circuit Court of the United States for the Eastern District of Wisconsin,

denying their motion to strike out certain portions of an injunction restraining employees of the receiver of the Northern Pacific Railway

a railway operated by receivers is unlawful and may be prevented by injunction.

(April 6, 1894.)

MOTION by intervening petitioners to strike out certain portions of the injunction which had been granted to receivers in possession of the Northern Pacific Railroad to restrain a strike which was threatened by the employees of the road. *Motion denied except as to one clause of the injunction.*

The facts sufficiently appear in the opinion.

Jenkins, Circuit Judge, delivered the following opinion:

On the 19th day of December, 1893, the receivers of the defendant company presented to the court their verified petition representing that on the 17th day of August, 1893, and within two days after their appointment, and in view of the insolvent condition of the railroad company, they ordered a reduction varying from 10 to 20 per cent in the salaries of all employees (including the general manager and other general officers of the company) amounting to \$1200 per annum or more, which reduction was acquiesced in by the employees to whom the same applied. On the 25th of August, 1893, in view of the increasing depression in the transportation business, the consequent falling off of earnings, and the necessity of greater retrenchment in operating expenses, the receivers ordered a further reduction in salaries and wages of employees, amounting to 5 per cent on all salaries aggregating \$50 a month and under \$75, and to 10 per cent on all salaries aggregating from \$75 to \$100 per month. This latter order was to take effect immediately, but upon consideration its operation was suspended by the receivers until the entire subject of salaries and wages could be more fully considered, especially with reference to certain schedules covering the pay and employment of certain classes of employees. The receivers informed the court that some of these schedules, which had been in existence for many years, were not justified by conditions now existing; that they had been amended from time to time, and extended so that they had become voluminous, and in some respects obscure, and had produced in operation inequalities and results unjust to the property, and unjust to many employees; that they thereupon revised and rearranged the schedules, and, instead of putting into operation the reduction contemplated by the order of August 25, they determined and ordered on the 28th of October, 1893 (giving general notice thereof

to the employees of the road) that all existing schedules covering the rates of pay of employees should, on the 1st of January then next ensuing, be abrogated, and that certain new schedules prepared by them should take effect on that day; and the general manager was instructed on and after that day to reduce all salaries and wages aggregating \$50 per month and less than \$75 per month 5 per cent, and all salaries and wages aggregating \$75 per month 10 per cent. The revised schedules corrected supposed inequalities between the different classes of employees, and did away with certain obnoxious regulations which were supposed to militate against the proper management of the property. The receivers further represented to the court that the reduction made in salaries and wages was justified in view of the large shrinkage of business, growing out of the financial revulsion throughout the country; that the rates of compensation provided for were fair and just to the employees to whom they related, in view of the then present conditions. It was made to appear to the court that the gross earnings of the property during the year 1893 were continuing to greatly decrease; that the decrease for the month of September, 1893, as compared with the month of September, 1892, amounted to \$758,000; that the decrease for the month of December, 1893, as compared with the month of December, 1892, would amount to \$790,000; decreasing by more than one half the entire estimated gross earnings for the month. That by the revised schedules the average reduction in the rates of compensation to the various classes of employees was about as follows: Engineers, 8 per cent; firemen, 7 per cent; trainmen and freight conductors, 8 per cent; passenger conductors, 10 per cent; telegraphers, 5 per cent. The receivers further advised the court that many of their employees claimed that the schedules and rates in force when the receivers took possession constituted contracts between the several employees and the receivers, terminable only by the consent of the employees, in which view the receivers could not concur; and that discontent and opposition to the enforcement of the schedule were rife among the employees, based upon the assumption that no power existed in the receivers to change the schedule. The receivers further advised the court that some of the employees threatened that, in the event that the revised schedules should be put into operation, they would suddenly quit the service of the receivers, and would compel by threats and force and violence other employees to quit the service; that they would prevent, by an organized effort, and by force and intimidation, others from taking service under the receivers in the place of

Company from interfering with the property in his hands. *Reversed in part.*

The case sufficiently appears in the opinion.

Argued before Harlan, *Circuit Justice*; Woods, *Circuit Judge*, and Bunn, *District Judge*.

Messrs. Charles Quarles, T. W. Spence, and T. W. Harper, for appellants:

An injunction is an extraordinary remedy, to be resorted to only when the end sought can be reached by no other legal process.

The writs of injunction in this case, in so far as they enjoin acts forbidden by law, are superfluous, and unnecessary, and they have no functions to perform, in so far as the writs forbid acts which the law does not forbid the order awarding the writs is erroneous.

The order appointing the receivers and directing them to take possession of the road, and authorizing them to operate it, is an equitable execution.

Davis v. Gray, 83 U. S. 16 Wall. 217, 21 L. ed. 452.

Any interference with the possession of the receivers, or with the operation of the road, is an obstruction to the execution of the mandate of the court.

Secor v. Toledo, P. & W. R. Co. 7 Biss. 521; *King v. Ohio & M. R. Co.* 7 Biss. 532.

The employes of receivers of railroad companies are *pro hac vice* servants of the court, and consequently they are at all times before the court for punishment, by summary process, upon mere citation for contempt.

Re Doolittle, 23 Fed. Rep. 544; *United States v. Kane*, 23 Fed. Rep. 748; *Gluck & B. Corporate Receivers*, § 83.

This is true as to the world at large.

Gluck & B. Corporate Receivers, § 83, and cases.

The remedy for interference is a simple citation to show cause, which would bring the guilty persons before the court.

Re Doolittle and United States v. Kane, *supra*; *Re Higgins*, 27 Fed. Rep. 443.

If two equal rights conflict, it does not and cannot rest with any court to declare which of these shall give way.

No court can subordinate the right of the laborer to the right of the employer, nor can any court declare that capital shall abate any of its rights because of collision with the rights of the laborer.

The assertion of a right cannot be called the "exercise of unbridled will" and liberty cannot be opprobriously stamped as license, merely because the exercise of his right by one man works damage to another man, or to another set of men, or to society.

The right of a man to his services is the same in kind and degree as the right of a man to his property.

Whatever may be the injury that casually results to an individual from the act of another while pursuing the reasonable exercise of an established right, it is his misfortune. The law pronounces it *damnum absque injuria*, and the individual from whose act it proceeds is liable neither at law nor in the form of conscience. And the principal right necessarily

those who might leave such service; and that they would thereby, as the means of forcing the receivers to abandon the proposed revised schedules, disable the receivers from operating the road, and from discharging their duty to the public as common carrier. The receivers further represented to the court that some of the employes threatened, if the revised schedules should be put in operation, to disable locomotives and cars so that the same could not be safely used at all without expensive repairs; that they would take possession of the cars, engines, shops, roadbed, and other property in possession of the receivers, and that they would destroy and prevent the use of the property, and would so conduct themselves with regard thereto as to hinder and embarrass the receivers in the management of the property, in the operation of the trains thereover, and would bring about incalculable loss to the trust property, and inflict great inconvenience and hardship upon the public. The receivers further represented to the court that, unless the parties were restrained by order of the court, they would carry out such threats, and the receivers would be prevented from operating the road, from carrying the mails of the United States thereover, from performing the duties of a common carrier thereon, and that great loss of property and jeopardy to life would ensue; that the parties referred to (whose names the receivers were unable to state) were contriving secretly to perpetrate the acts of violence and wrong described, and to interfere with the possession and operation by the court, through the receivers, of the property; that such combination included not only dissatisfied employes of the receivers, but others not in the service of the receivers, who from a spirit of sympathy or mischief, threaten to join the employes in perpetrating the wrongful acts and things stated; and that they would so do unless restrained by the court. The receivers thereupon asked, among other things, for an order authorizing them to put in operation and maintain on and after January 1, then proximo, the revised schedules in such petition described, and that a writ of injunction might issue as prayed for in the petition.

Upon consideration of the petition the court on that day entered its order authorizing the receivers

to adopt the revised schedules, and directing the issue of a writ of injunction as prayed for in the petition, and directing its delivery to the marshal for execution, ordering him to protect the receivers of the Northern Pacific Railroad in their possession of the property of the railroad, and in their operation thereof; and directing the receivers to file, in the courts wherein they had been appointed receivers of said property upon ancillary bills, petitions similar to that on which the order was based, to the end that the power of each court might be seasonably invoked for the protection of the receivers in the possession and management of the property within its territorial jurisdiction. The writ in question was directed to the officers, agents, and employes of the receivers, engineers, firemen, trainmen, train dispatchers, telegraphers, conductors, switchmen, and all other employes of the receivers, and to all persons, associations, and combinations, voluntary or otherwise, whether employes of said receivers or not, and to all persons generally. The restraining clause of the writ was as follows:

"Now, therefore, in consideration thereof, and of the matters in said petition set forth, you, the officers, agents, and employes of Thomas F. Oakes, Henry C. Payne, and Henry C. Rouse, as receivers of the Northern Pacific Railroad Company, and the engineers, firemen, trainmen, train dispatchers, telegraphers, conductors, switchmen, and all other employes of said Thomas F. Oakes, Henry C. Payne, and Henry C. Rouse, as receivers of the Northern Pacific Railroad Company, and each and every one of you, and all persons, associations, and combinations, voluntary or otherwise, whether employes of said receivers or not, and all persons generally, and each and every one of you, in the penalty which may ensue, are hereby charged and commanded that you, and each and every one of you, do absolutely desist and refrain from disabling or rendering in any wise unfit for convenient and immediate use any engines, cars or other property of Thomas F. Oakes, Henry C. Payne, and Henry C. Rouse, as receivers for the Northern Pacific Railroad Company, and from interfering in any manner with the possession of locomotives, cars, or property of the said receivers, or in their custody.

carries with it also all the means essential to its exercise.

The Eleanor, 15 U. S. 2 Wheat. 345, 4 L. ed 257.

The question presented is this: Whether when the wages of men working under no contract are reduced by their employer on account of small profits, these men may, by concerted action, quit work in order to bring about a restoration of the old scale.

It is not logical to say that a railway is a public highway and owes a duty to the public, and that it must be kept a going concern although it prove unremunerative to the shareholders, and at the same time shift this duty, owed to the public, from the shoulders of the railroad company and its shareholders to the wage-earners, who in no event can have any interest in the profits.

The workmen are not the actors; the receivers are the aggressors; the sole reason for the change is lack of profits to the bondholders.

The judgment of the circuit court is, not that the men must not breach a contract, but that they are obligated to enter into a new contract.

A tort springs out of a contract when there is a breach of a duty which the law, contradistinguished from the contract, has imposed.

Bishop, Non-Cont. L. § 73.

Where contract relations exist, the parties assume towards each other no duties whatever besides those the contract implies.

Cooley, Torts, p. 91.

The class of tortious actions arising out of contract do not arise from a breach of express

provisions thereof; but from a breach of an implied duty arising out of and incident to the contract "and the liability arises out of a duty incident to and created by the contract" of employment, but only dependent upon the contract to the extent necessary to raise the duty. The tort consists in the breach of the duty.

Wood's Addition, Torts, § 27, note.

The terms of the contract, therefore, do not define the duty and cannot be resorted to for that purpose.

The duty spoken of is not to perform the contract, but to do or refrain from doing something which the law says shall or shall not be done by a man who has entered into a certain contract relation.

The question for the court in this case is where this duty of a railroad employé begins and ends.

One of these implied conditions on their behalf was that they would not leave its service or refuse to perform their duties under circumstances, when such neglect on their part would imperil lives committed to its care, or the destruction of property involving irreparable loss and injury, or visit upon it severe penalties.

Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co. 19 L. R. A. 395, 54 Fed. Rep. 746.

It is idle to say that a man has a right to quit, and yet that the law prohibits him from quitting so as to interfere with the convenience of his employer.

In the absence of restrictive contract, workmen have a right, by concerted action, to cease

and from interfering in any manner, by force, threats, or otherwise, with men who desire to continue in the service of the said receivers, and from interfering in any manner, by force, threat, or otherwise, with men employed by the said receivers to take the place of those who quit the service of said receivers, or from interfering with or obstructing in any wise the operation of the railroad, or any portion thereof, or the running of engines and trains thereon and thereover, as usual, and from any interference with the telegraph lines of said receivers or along the lines of railways operated by said receivers, or the operation thereof, and from combining and conspiring to quit, with or without notice, the service of said receivers, with the object and intent of crippling the property in their custody, or embarrassing the operation of said railroad, and from so quitting the service of the said receivers, with or without notice, as to cripple the property, or to prevent or hinder the operation of said railroad, and generally from interfering with the officers and agents of said receivers, or their employes, in any manner, by actual violence, or by intimidation, threats, or otherwise, in the full and complete possession and management of the said railroad, and of all the property thereunto pertaining, and from interfering with any and all property in the custody of the said receivers, whether belonging to the receivers or shippers or other owners, and from interfering, intimidating, or otherwise injuring or inconveniencing or delaying the passengers being transported or about to be transported over the railway of said receivers, or any portion thereof, by said receivers, or by interfering in any manner by actual violence or threat, and otherwise preventing or endeavoring to prevent the shipment of freight or the transportation of the mails of the United States over the road operated by said receivers, until the further order of this court."

On the 22d day of December, 1893, the receivers presented to the court their supplemental petition, setting forth that the employes affected by the new schedules referred to in the former petition, consisted of engineers, conductors, firemen, trainmen, switchmen, operators, and shopmen; that each of said classes of employes had appointed a committee to confer with the operating officers of the receivers, at St. Paul, with reference to the proposed

change in the schedules, and stating the names of the members of those several committees; that such committees had confederated and agreed to co-operate and report to the various classes of employes along the line whom such committee especially represented a joint recommendation,—that is to say, should said committees agree to report and recommend a strike along the line of the railroad, then the separate committees mentioned representing the different classes of employes along the line should report and recommend separately to the employes represented by such committee to strike. The petition further represented to the court that a subcommittee of thirty-two persons had been appointed by the joint committee to confer with the operating officers of the receivers, and to make report and recommendation to the joint committee; and that, should such subcommittee recommend a strike, the general and joint committee would report or recommend a strike, which the separate committees in turn would recommend or report to the different orders or classes of labor to which they belonged upon the lines of the railroad. The receivers further represented that the subcommittee of said general committee intended and was about to recommend and advise the general joint committee to recommend that the employes of the road should strike on or about January 1, 1894, and that the general joint committee and the said several separate committees were about to recommend to the several classes of labor in the employment of the receivers to strike on or about that day. And the receivers further informed the court that, if such committees should recommend a strike, the individual employes along the line of the road would the day recommended join in a general strike, unless the members of the committee were enjoined by the court from issuing any order or recommendation to strike; that the employes of the railroad held themselves bound to obey the order or recommendation of the committee; that almost all of the employes of the road belonged to one of the labor organizations of the engineers, conductors, firemen, trainmen, switchmen, operators, or shopmen, and also to national labor organizations comprising the employes in similar lines on almost all the other lines of railroad in the United States, namely, the Brotherhood of Locomotive Engineers, the Order

work to procure better terms of service, no compulsion being used except that incident to the cessation.

A conspiracy is generally defined, "the combination or agreement of two or more persons to do an act unlawful in itself, or to do a lawful act by unlawful means."

Anderson, Law Dict. title *Conspiracy*.

The case of *Com. v. Carlisle*, Brightly, 36, which was mainly relied upon by counsel for the receivers below, is pronounced by the United States Circuit Court of Appeals, 8th Circuit, to be "a case of questionable authority."

United States v. Trans-Missouri Freight Assn. 24 L. R. A. 73, 58 Fed. Rep. 58, and the cases holding contrary to its doctrine, viz: *Snow v. Wheeler*, 113 Mass. 179; *Bowen v. Matheson*, 14 Allen, 499; *Skravinka v. Scharringhausen*, 8 Mo. App. 522; *Carew v. Rutherford*, 106 Mass. 1, 8 Am. Rep. 287, are approved.

Where a confederacy having no lawful aim tends simply to oppression of individuals or to the prejudice of the public, it will be a conspiracy. But where the aim is lawful, and the means are lawful, the combination will not be a conspiracy, even though inconvenience, discomfort, or prejudice ensue to individuals or to the public.

State v. Donaldson, 32 N. J. L. 151, 90 Am. Dec. 649; *Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co.* 19 L. R. A. 887, 54 Fed. Rep. 788.

Every definition of conspiracy includes and bases it upon a tort.

Adler v. Fenton, 65 U. S. 24 How. 407, 14 L. ed. 696.

Before this court can restrain an act the law must have condemned it.

Wheaton v. Peters, 33 U. S. 8 Pet. 591, 8 L. ed. 1055.

Under the common law, since the abrogation of, or departure from, the old English statutes, which made it a criminal offense for an individual to refuse to work, combinations of workmen for the purpose of improving their condition, increasing their earning power, and enforcing the payment of higher wages by combination, have been held innocent.

Curew v. Rutherford, 106 Mass. 1, 8 Am. Rep. 287; *Snow v. Wheeler*, 113 Mass. 186; *State v. Stewart*, 59 Vt. 285, 59 Am. Rep. 710; *Com. v. Hunt*, 4 Met. 134.

The best American authorities to-day concur in placing labor and capital on the same plane.

State v. Glidden, 55 Conn. 74; *Curran v. Galen*, 2 Misc. 553; *Rogers v. Earls*, 17 N. Y. Supp. 264; *State v. Stewart*, 59 Vt. 289, 59 Am. Rep. 710.

The right of employes to quit work singly, and the right of employes to quit work in a body, has been and is to-day recognized and affirmed by the Federal courts.

Re Doolittle, 23 Fed. Rep. 547; *United States v. Kane*, Id. 748; *Oeur d'Alene Consol. & Min. Co. v. Miners' Union of Wardner*, 19 L. R. A. 382, 51 Fed. Rep. 263; *King v. Ohio & M. R. Co.* 7 Bliss. 533; *United States v. Workingmen's Amalgamated Council of New Orleans*, 54 Fed. Rep. 994.

The Wisconsin statute prohibits persons from combining, associating, agreeing, mutually undertaking, or concerting together for

of Railway Conductors, the Brotherhood of Locomotive Firemen, the Order of Railway Telegraphers, and the Brotherhood of Railway Trainmen. The petition then proceeds to give the names of the executive heads of those organizations, and asserts that the employes will not strike unless such strike is ordered by one or more of the executive heads of the national labor organizations named; and that without an order from the executive head, no assistance would be given to the employes by the national organizations to which they belonged if they should attempt to strike. The petition further alleged that the railway in question was engaged in interstate commerce, and that the strike along the line of the road would not only cause irreparable damage to the trust property, but to a large portion of the country traversed by the Northern Pacific Railroad, because not reached by any other line of road or telegraph line or express company. That there were many communities along the line of the railroad whose entire commercial facilities were furnished by the three departments of the railroad operated by the receivers—the railroad, the telegraph, and the express; and that all classes of business men in large portions of the country traversed by the railroad operated by the receivers were dependent to a very large extent, upon these three departments of service, and that large sections of country are dependent upon the railroad trains operated by the receivers for their necessary daily supply of fuel, provisions, etc. The petition asked for an order granting a writ of injunction restraining these committees and the heads of the national organizations mentioned from ordering or recommending or advising a strike.

Upon consideration of this petition an order was made directing a writ of injunction to issue as prayed in the original petition, and as prayed in the supplemental petition, with a similar direction with respect to the presentation of the order and writ to those courts in which ancillary bills had been filed for like orders from those courts. The writ of injunction issued upon this order was directed to the various persons named, and to their agents, sub-agents, representatives, and employes, and to the officers, agents, and employes of the receivers, and

4 INTER S.

to the engineers, firemen, trainmen, train dispatchers, telegraphers, conductors, switchmen, and all other employes of the receivers, and to all persons, associations, and combinations, voluntary or otherwise, whether employes of said receivers or not, and to all persons generally. It embodied the provisions of the first writ, with the following additional clause:

"And from combining or conspiring together or with others, either jointly or severally, or as committees, or as officers of any so-called 'labor organization,' with the design or purpose of causing a strike upon the lines of railroad operated by said receivers, and from ordering, recommending, approving, or advising others to quit the service of the receivers of the Northern Pacific Railroad Company on January 1, 1894, or at any other time; and from ordering, recommending, advising, or approving by communication or instruction or otherwise, the employes of the said receivers, or any of them, or of said Northern Pacific Railroad Company, to join in a strike on said January 1, 1894, or at any other time, and from ordering, recommending, or advising any committee or committees, or class or classes of employes of said receivers to strike or join in a strike on January 1, 1894, or at any other time, until the further order of this court."

On the 15th day of February, 1894, P. M. Arthur, grand chief engineer and chief executive officer of the Brotherhood of Locomotive Engineers; E. E. Clark, grand chief conductor and chief executive officer of the Order of Railway Conductors; F. P. Sargent, grand chief fireman and chief executive officer of the Brotherhood of Locomotive Firemen; D. G. Hamesy, grand chief telegrapher and chief executive officer of the Order of Railway Telegraphers; S. E. Wilkinson, grand master and chief executive officer of the Brotherhood of Railway Trainmen; and John Wilson, grand master and chief executive officer of the Switchmen's Mutual Aid Association,—in behalf of themselves and of their respective organizations and associations, and the members thereof, and in behalf of such of the employes of the receivers as are members of the said associations and organizations, moved the court to modify the writs of injunction by expung-

the purpose of willfully or maliciously injuring another.

The word "willfully" is ordinarily used to express something like a wicked purpose or an evil or improper motive, or to characterize an act done wantonly.

State v. Preston, 34 Wis. 675; *United States v. 3 Railroad Cars*, 1 Abb. U. S. 196.

The word "maliciously" in the penal statutes is construed as meaning a wicked intent to injure.

Tuttle v. Bishop, 30 Conn. 80; *Com v. Walden*, 3 Cush. 558.

The United States statute prohibiting trusts does not touch the case.

United States v. Patterson, 55 Fed. Rep. 605-641; *United States v. Trans-Missouri Freight Assn.* 24 L. R. A. 78, 58 Fed. Rep. 58.

The phraseology of the injunctive writs is correct or erroneous, according to the idea which their words conveyed to the men addressed, the words being taken in the sense in which those men had the right to construe them.

Unless there be the most decisive reasons which lead us to conjecture the intent was otherwise, words are to be understood in their proper and most known signification, not the grammatical one, which regards the etymology and original of them, but that which is vulgar and most in use: for use is the judge, the law, and rule of speech. Lieber's *Hermeneutics*, Hammond's edition, 299.

All the lexicographers are in accord on the meaning of the word "strike," and therefore

the word "strike" in these injunctions means just what the people who coined the word have made it mean: "A combined effort of workmen to obtain higher wages or other concessions from their employers, by stopping work at a preconceived time."

If the definition given by the learned circuit judge of the word "strike" be correct, then the following sentence, found in McCarthy's "History of Our Own Times," is rank nonsense, or worse.

"Some eminent men, of whom Mr. Mill was the greatest, had long been endeavoring to get the world to recognize the fact that a strike is not a thing which can be called good or bad, until we know its object and its history: that the men who strike may be sometimes right and that they may have sometimes been successful."

And the writer in the *Encyclopedia Britannica*, on the subject "Trade Unions," made a slip when he wrote that a strike was a simultaneous cessation of work to secure a concession.

Memoirs. James McNaugh, John C. Spooner, and George P. Miller for appellees.

Harlan, J., delivered the opinion of the court:

The questions before us relate to the power of a court of equity—having custody by receivers of the railroad and other property of a corporation—to enjoin combinations, conspiracies or acts on the part of the receivers' em-

ing and striking from the writs the parts italicized. The motion was based upon the petition and supplemental petition, and upon the orders of the court directing the issuance of the writs; and at the hearing the constitutions, statutes, and rules of order of the various organizations referred to were presented and considered in argument.

In the discussion of the important and interesting questions presented by this motion it is not within the province of the court to assume part in the contest between capital and labor, which it is asserted is here involved. It may be that the aggregated power of combined capital is fraught with danger to the republic. It may be that the aggregated power of combined labor is perilous to the peace of society, and to the rights of property. It doubtless is true that in the contest the rights of both have been invaded, and that each has wrongs to be redressed. If danger to the state exists from the combination of either capital or labor, requiring additional restraint or modification of existing laws, it is within the peculiar province of the legislature to determine the necessary remedy, and to declare the general policy of the state touching the relations between capital and labor. With that the judicial power of the government is not concerned. But it is the duty of the courts to restrain those warring factions, so far as their action may infringe the declared law of the land, that society may not be disrupted, or its peace invaded, and that individual and corporate rights may not be infringed. It therefore becomes the duty of the court to inquire whether, in respect of the things complained of, there has been threatened violation of the law of the land, and to determine the appropriate remedy, taking care, however, to apply the remedy without usurpation of jurisdiction, or, as remarked by Lord Chancellor Bacon, "to contain jurisdiction within the ancient mere-stones without removing the mark;" and having also constantly in mind the maxim that the province of the court is "*dicere et non dare legem*." In this spirit, as I trust, I proceed to the consideration of the questions involved, taking occasion to express my obligation to counsel, whose able presentation of the law has much relieved the labor of the court, if it could not lighten its responsibility.

If the combination and conspiracy alleged, and the

acts threatened to be done in pursuance thereof, are unlawful, it cannot, I think, be successfully denied that restraint by injunction is the appropriate remedy. It may be true that a right of action at law would arise upon consummation of the threatened injury, but manifestly such remedy would be inadequate. The threatened interference with the operations of the railway, if carried into effect, would result in paralysis of its business, stopping the commerce ebbing and flowing through seven states of the Union, working incalculable injury to the property, and causing great public privation. Pecuniary compensation would be wholly inadequate. The injury would be irreparable. Compensation could be obtained only through a multiplicity of suits against 12,000 men, scattered along the line of this railway for a distance of 4400 miles. It is the peculiar function of equity in such case, where the injury would result not alone in severe private, but in great public, wrong, to restrain the commission of the threatened acts, and not to send a party to seek uncertain and inadequate remedy at law. That jurisdiction rests upon settled and unassailable ground. It is not longer open to controversy that a court of equity may restrain threatened trespass involving the immediate or ultimate destruction of property, working irreparable injury, and for which there would be no adequate compensation at law. It will, in extreme cases, where the peril is imminent, and the danger great, issue mandatory injunctions requiring a particular service to be performed, or a particular direction to be given, or a particular order to be revoked, in prevention of a threatened trespass upon property or upon public rights. I need not enlarge upon this subject. The jurisdiction is beyond question, is plenary and comprehensive. Some of the authorities are assembled by *Judge Taft* in the case of *Toledo, A. & N. M. R. Co. v. Pennsylvania Co.* 54 Fed. Rep. 730, 19 L. R. A. 305, a case in which the court restrained Mr. Arthur, chief of the Brotherhood of Locomotive Engineers, from giving the order and signal for a strike which was intended to result in injury to the complainant's rights. See also, *Blindell v. Hagan*, 54 Fed. Rep. 40, affirmed on appeal, 6 C. C. A. 88, 56 Fed. Rep. 606; *Coeur d'Alene Consol. & Min. Co. v. Miners' Union of Wardner*, 51 Fed. Rep. 200, 19 L.

ployés and their associates in labor organizations which, if not restrained, would do irreparable mischief to such property, and prevent the receivers from discharging the duties imposed by law upon the corporation.

The original bill was filed on behalf of stockholders and creditors of the Northern Pacific Railroad Company, a corporation created by an Act of Congress, and had for its general object the administration under the direction of the court of the entire railroad system, lands and assets of that corporation, and the enforcement of the respective rights, liens, and equities of its preferred and common stockholders, bondholders, and creditors.

The railroad company having filed its answer, receivers were appointed with authority to take immediate possession of its railroads and other property and to exercise its authority and franchises, conduct its business and occupation as a carrier of passengers and freight, discharge the public duties obligatory upon it or upon any of the corporations whose lines of road were in its possession, preserve the property in proper condition and repair so as to be safely and advantageously used, protect the title and possession of the same, and employ such persons and make such payments and disbursements as were needful. The receivers were also authorized to manage all other property of the company at their discretion and in such manner as in their judgment would produce the most satisfactory results consistent with the discharge of the public duties imposed on them, and to fix the compensation of officers, attorneys, managers, superintendents, agents,

and employés in their service. It was further ordered that an injunction issue against the defendant and all claiming to act by, through, or under it, and against all other persons, to restrain them from interfering with the receivers in taking possession of and managing the property.

Subsequently the Farmers' Loan & Trust Company, as trustee for the holders of bonds and collateral trust indentures, filed an original bill in the same court against the Northern Pacific Railroad Company, the individual plaintiffs in the first suit, and the receivers. The relief asked was that the plaintiff as trustee under the mortgages named in the bill be placed in possession of the mortgaged premises, or that receivers of the rights, franchises, and property of the railroad company be appointed with authority to operate its railroads and carry on its business under the protection of the court; that the liens created by the several mortgages be ascertained and declared; and that the mortgaged property, in certain contingencies, be sold and the proceeds applied according to the rights of parties.

The railroad company having appeared in that suit, an order was entered appointing the same persons receivers who were appointed in the first suit, and the two suits were consolidated, to proceed together under the title of the *Farmers Loan & Trust Co. v. Northern Pacific Railroad Company, etc.*

By a writ of injunction dated December 19, 1893, the officers, agents, and employés of the receivers, including engineers, firemen, trainmen, train dispatchers, telegraphers, conduc-

R. A. 382. It would be anomalous, indeed, if the court, holding this property in possession in trust, could not protect it from injury, and could not restrain interference which would render abortive all efforts to perform the public duties charged upon this railway.

It was suggested by counsel that, as improper interference with this property during its possession by the court is a contempt, punishment therefor would furnish ample remedy; and that, therefore, an injunction would not lie. This is clearly an erroneous view. Punishment for contempt is not compensation for injury. The pecuniary penalty for contumacy does not go to the owner of the property injured. Such contempt is deemed a public wrong, and the fine inures to the government. The injunction goes in prevention of wrong to property and injury to the public welfare; the fine, in punishment of contumacy. The authority to issue the writ is not impaired by the fact that, independently of the writ, punishment could be visited upon the wrongdoer for interference with property in the possession of the court. The writ reaches the inchoate conspiracy to injure, and prevents the contemplated wrong. The proceeding in contempt is *ex post facto*, punishing for a wrong effected.

Asserting then, as undoubted, the right of the court by its writ to restrain unlawful interference with the operation of this railway, I turn my attention to the objections urged to particular paragraphs of the writs. It is contended that the restraint imposed by that part of the original writ to which objection is made by this motion is in derogation of common right, and an unlawful restraint upon the individual to work for whomsoever he may choose, to determine the conditions upon which he will labor, and to abandon such employment whenever he may desire. In the determination of this question it is needful to look to the conditions which gave rise to the issuance of the writ. Here was a railway some 4400 miles in length, traversing some seven states of the Union, engaged in interstate commerce, carrying the mails of the United States. This vast property was within the custody of the court, through its receivers, in trust to operate it, to discharge the public duties imposed

upon it, to keep it a going concern until the time should come to hand it over to its rightful owners with all public duties discharged, and with its franchises, rights, and privileges unimpaired. The receivers employed in the operation of this property some 12,000 men. These men are *pro hac vice*, officers of the court, and responsible to the court for their conduct. *Re Higgins*, 27 Fed. Rep. 443. The petition represented to the court—and the facts are confessed by this motion—that some of the men threatened to suddenly quit the service of the receivers, and to compel, by threats and force and violence, other employés, who were willing to continue in the service, to quit their employment; that by organized effort, and by force and intimidation, they would prevent others from taking service under the receivers in place of those who might leave such service, and would thereby, as a means of forcing the receivers to submit to the terms demanded, disable the receivers from operating the road and discharging their duty to the public as a common carrier, and would so conduct themselves by disabling locomotives and cars, and taking possession of the property of the receivers, as to destroy and prevent its use, and hinder and embarrass the receivers in its management, thereby causing incalculable loss to the trust property, and inflicting great inconvenience and hardship upon the public. The restraining portion of the writ complained of, and now under consideration, prohibited these men from combining and conspiring to quit this service with the object and intent of crippling the property of the receivers and embarrassing the operation of the road, and from carrying that conspiracy into effect. The writ was in prevention of the mischief asserted. In no respect, as I conceive, does that portion of the writ interfere with individual liberty. None will dispute the general proposition of the right of every one to choose his employer, and to determine the times and conditions of service, or his right to abandon such service,—to use the expression of Judge Pardee in *Re Higgins*, *supra*.—"peaceably and decently." But it does not follow that one has the absolute right to abandon a service which he has undertaken, without regard to time and conditions. It is absurd to say that one may do as he will with-

tors, switchmen, and all persons, associations, and combinations, voluntary or otherwise, whether in the service of the receivers or not, were enjoined—

From disabling or rendering in any wise unfit for convenient and immediate use any engine, cars, or other property of the receivers;

From interfering in any manner with the possession of locomotives, cars or property of the receivers or in their custody;

From interfering in any manner, by force, threats, or otherwise, with men who desire to continue in the service of the receivers, or with men employed by them to take the place of those who quit;

From interfering with or obstructing in any wise the operation of the railroad or any portion thereof, or the running of engines or trains thereon as usual;

From any interference with the telegraph lines of the receivers along the lines of railways operated by them, or the operation thereof;

From combining and conspiring to quit, with or without notice, the service of said receivers with the object and intent of crippling the property in their custody or embarrassing the operation of said railroad, and from so quitting the service of the said receivers, with or without notice, as to cripple the property or prevent or hinder the operation of said railroad; and, generally,

From interfering with the officers and agents of the receivers or their employés in any manner by actual violence or by intimidation, threats, or otherwise, in the full and complete possession and management of the railroad and

of all the property thereunto pertaining, and from interfering with any and all property in the custody of the receivers whether belonging to them or to shippers or other owners, and from interfering, intimidating, or otherwise injuring or inconveniencing or delaying the passengers being transported or about to be transported over the railway of the receivers or any portion thereof, or by interfering in any manner by actual violence or threat, and otherwise preventing or endeavoring to prevent the shipment of freight or the transportation of the mails of the United States over the road operated by the receivers, until the further order of this court.

This injunction was based on a petition of the receivers, urging in view of the general depression in the business of transportation the necessity of reducing expenses, and representing to the court that many employes were threatening that if their compensation was diminished as indicated in a revised schedule of wages which the receivers had adopted to take effect January 1st, 1894, they would prevent or obstruct the operation of the railroads in the hands of the receivers.

A second writ of injunction was issued December 22, 1893. It was based on a supplemental petition of the receivers, and was in all respects like the former one except that it contained, *in addition*, a clause by which the persons and associations to whom it was addressed were enjoined—

From combining or conspiring together, or with others, either jointly or severally, or as committees, or as officers of any so-called labor

out respect to the rights of others. It is not infringement upon individual liberty to compel recognition of the rights of others. Liberty and license must not be confounded. Liberty is not the exercise of unbridled will, but consists in freedom of action, having due regard to the rights of others. There would seem to exist in some minds a lamentable misapprehension of the terms "liberty" and "right." It would seem by some to be supposed that in this land one has the constitutional right to do as one may please, and that any restraint upon the will is an infringement upon freedom of action. Rights are not absolute, but are relative. Rights grow out of duty, and are limited by duty. One has not the right arbitrarily to quit service without regard to the necessities of that service. His right of abandonment is limited by the assumption of that service, and the conditions and exigencies attaching thereto. It would be monstrous if a surgeon, upon demand and refusal of larger compensation, could lawfully abandon an operation partially performed, leaving his knife in the bleeding body of his patient. It would be monstrous if a body of surgeons, in aid of such demand, could lawfully combine and conspire to withhold their services. It was stated at the argument that this was not a fair illustration of the proposition, because human life was involved. I cannot perceive that the aptness of the illustration is weakened because of that fact. Whether the effect be the destruction of life or the destruction of property, the principle is the same. It would be intolerable if counsel were permitted to demand larger compensation, and to enforce his demand by immediate abandonment of his duty in the midst of a trial. It would be monstrous if the bar of a court could combine and conspire in aid of such extortion by one of its members, and refuse their service. I take it that in such case, if the judge of the court had proper appreciation of the duties and functions of his office, that court, for a time, would be without a bar, and the jail would be filled with lawyers. It cannot be conceded that an individual has the legal right to abandon service whenever he may please. His right to leave is dependent upon duty, and his duty is dictated and measured by the exigency of the occasion. Ordinarily, the aban-

donment of service by an individual is accompanied with so little of inconvenience, and with such slight resulting loss, that it is a matter of but little moment when or how he may quit the service. But, for all that, the principle remains, recognized by every just mind, that the quitting must be timely and decent, in view of existing conditions; and this I take it, was Judge Pardee's meaning by the expression, "peaceably and decently." He had occasionally only to deal with the particular facts he was considering, but the principle asserted is universal in its application. If what I have stated be correct as to individual action, the principle applies with greater force to the case of a combination of a large number of employes to abandon service suddenly, and without reasonable notice, with the result of crippling the operation of the railway and injuring the public. The effect in this particular instance would have proven disastrous. These labor organizations are said to represent three fourths of all the employes upon the railways within the United States—an army of many hundred thousands of men. The skilled labor necessary to the safe operation of a railway could not be readily supplied along 4000 miles of railway. The difficulty of obtaining substitutes in the place of those who should leave the service would be intensified by the fact, asserted and conceded at the argument, that no member of these large organizations would dare to accept service in the place of those who should leave, because such acceptance would be followed by expulsion from their order, and by social ostracism by their fellows. If this conspiracy had proven effective by failure on the part of the court to issue its preventive writ, this vast property would have been paralyzed in its operation, the wheels of an active commerce would have ceased to revolve, many portions of seven states would have been shut off in the midst of winter from necessary supply of clothing, food, and fuel, the mails of the United States would have been stopped, and the general business of seven states, and the commerce of the whole country passing over this railway, would have been suspended for an indefinite time. All these hardships and inconveniences, it is said, must be submitted to, that certain of these men, discontented

organization, with the design or purpose of causing a strike upon the lines of railroad operated by said receivers, and from ordering, recommending, approving, and advising others to quit the service of the receivers of the Northern Pacific Railroad Company on January 1, 1894, or at any other time, and from ordering, recommending, advising, or approving, by communication or instruction, or otherwise, the employes of said receivers, or any of them, or of said Northern Pacific Railroad Company, to join in a strike on said January 1, 1894, or at any other time, and from ordering, recommending, or advising any committee or committees, or class or classes of employes of said receivers, to strike or join in a strike, on January 1, 1894, or at any other time until the further order of this court.

The appellants as chief executive officers respectively of the brotherhood of locomotive engineers, the order of railway conductors, the brotherhood of locomotive firemen, the order of railway telegraphers, the brotherhood of railway trainmen and the switchmen's mutual aid association, appeared in court on behalf of themselves and their respective organizations and associations, as well as on behalf of such employes of the receivers as were members of those associations and organizations or of some of them, and moved that the court modify the orders and injunctions of December 19, 1893, and December 22, 1893—

1. By striking from both writs of injunction these words: "And from combining and conspiring to quit with or without notice the service of said receivers, with the object and intent of crippling the property in their cus-

tody or embarrassing the operation of said railroad, and from so quitting the service of said receivers with or without notice, as to cripple the property or prevent or hinder the operation of said railroad."

2. By striking from the writ of injunction of December 22, 1893, the above clause or paragraph relating specially to "strikes" which was not in the writ issued December 19, 1893.

The motion was in writing and upon its face purported to be based on the petition and supplemental petitions filed by the receivers, on the orders of the court made December 19 and 22, 1893, respectively, and on the above writs of injunction. Beyond the facts set out in those petitions, the only evidence adduced at the hearing of the motion was documentary in its nature, to wit, the constitutions and by-laws of the associations whose principal officers had been permitted to intervene in the cause.

The court upon the hearing of the motion modified the writ of injunction of December 22, 1893, by striking therefrom the above words in italics: "*And from ordering, recommending, approving, or advising others to quit the service of the receivers of the Northern Pacific railroad on January 1, 1894, or at any other time.*"

The grounds upon which these words were stricken from the second writ of injunction are thus stated in the opinion of the court:

"In fairness this clause must be read in the light of the statements of the petition. It was therein asserted to the court that the men would not strike unless ordered so to do by the executive heads of the national labor organizations; and that the men would obey such orders

with the conditions of their service, may combine and conspire, with the object and intent of crippling the property, to suddenly cease the performance of their duties. It is said that to restrain them from so doing is abridgment of liberty and infringement of constitutional right. I do not so apprehend the law. I freely concede the right of the individual to abandon service at a proper time, and in a decent manner. I concede the right of all the employes of this road, acting in concert, to abandon their service at a proper time, and in a decent manner; but I do not concede their right to abandon such service suddenly, and without reasonable notice.

The railway is a great public highway. Its primary duty is to the public. In the interest of the public it must be kept a going concern, although it prove unremunerative to the shareholders. Bondholders and shareholders invest their money in view of the public nature of the enterprise. Their rights and interests are subordinated to the public duty charged upon the road. And so also, employes, in entering the service, assume obligations coextensive in kind with that of the corporation. They may, indeed, sever their relation in a proper and decent manner, but they may not legally resort to obstructive methods to compass their demands. Their rights—as the rights of bondholder and shareholder—are subordinate to the rights of the public, and must yield to the public welfare. This public consideration permeates and controls the whole subject. The reason is forcibly stated by Judge Ricks in the case of *Toledo, A. & N. M. R. Co. v. Pennsylvania Co.*, 54 Fed. Rep. 746, 752, 19 L. R. A. 305; holding that the duties of an employe of a public corporation are such that he cannot always choose his own time for quitting the service. In the following language: "Holding to that employer so engaged in this great public undertaking the relation they did, they owed to him and to the public a higher duty than though their service had been due to a private person. They entered its service with full knowledge of the exacting duties it owed to the public. They knew if it failed to comply with the law in any respect, severe penalties and losses would fol-

low for such neglect. An implied obligation was therefore assumed by the employes upon accepting service from it under such conditions that they would perform their duties in such manner as to enable it not only to discharge its obligations faithfully, but also to protect it against irreparable loss and injuries and excessive damages by any acts or omissions on their part. One of these implied conditions on their behalf was that they would not leave its service, or refuse to perform their duties, under circumstances when such neglect on their part would imperil lives committed to its care, or the destruction of property involving irreparable loss or injury, or visit upon it severe penalties. In ordinary conditions, as between employer and employe, the privilege of the latter to quit the former's service at his option cannot be prevented by restraint or force. The remedy for breach of contract may follow to the employer, but the employe has it in his power to arbitrarily terminate the relations, and abide the consequence. But these relative rights and powers may become quite different in the case of the employes of a great public corporation, charged by the law with certain great trusts and duties to the public. An engineer and fireman who start from Toledo with a train of cars filled with passengers destined for Cleveland, begin that journey under contract to drive their engine and draw the cars to the destination agreed upon. Will it be claimed that this engineer and fireman could quit their employment when the train is part way on its route, and abandon it at some point where the lives of the passengers would be imperiled, and the safety of the property jeopardized? The simple statement of the proposition carries its own condemnation with it. The very nature of their service, involving as it does the custody of human life and the safety of millions of property, imposes upon them obligations and duties commensurate with the character of the trusts committed to them."

In the case under consideration the receivers sought to change the terms and conditions of service. The employes had, of course, the right to decline service upon the terms proposed. Notwithstanding the public character of the service,

instead of following the direction of the court. The clause is specially directed to the chiefs of the several labor organizations. The use of the words 'order, recommend, approve, or advise' was to meet the various forms of expression under which by the constitution or by-laws of these organizations the command was cloaked, as, for instance, in the one organization the chief head 'advises' a strike; in another he 'approves' a strike; in another he 'recommends' the quitting of employment. Whatever terms may be employed the effect is the same. It is a command which may not be disregarded, under penalty of expulsion from the order and of social ostracism. This language was employed to fortify the restraints of the other portions of the writ, and to meet the various disguises under which the command is cloaked. It was so inserted out of abundant caution, that the meaning of the court might be clear; that there should be no unwarrantable interference with this property, no intimidation, no violence, no strike. It was perhaps unnecessary, being comprehended within the clause restraining the heads of these organizations from ordering, recommending, or advising a strike, or joinder in a strike.

"It is said, however, that the clause restrains an individual from friendly advice to the employés as a body, or individually, as to their or his best interest in respect of remaining in the service of the receivers. Read in the light of the petitions upon which the injunction was founded, I do not think that such construction can be indulged by any fair and impartial mind. It might be used as a text for a declamatory address to excite the passions and preju-

dices of men, but could not, I think, be susceptible of such strained construction by a judicial mind. The language of a writ of injunction should, however, be clear and explicit, and, if possible, above criticism as to its meaning. Since, therefore, the language of this particular phrase may be misconceived, and the restraint intended is, in my judgment, comprehended within the other provisions of the writ, the motion in that respect will be granted and the clause stricken from the writ."

Except in the particulars mentioned in the opinion of the circuit court, the motion to modify the injunctions was denied and the injunctions continued in force. Of this action of the court the intervenors complain.

In considering the important questions presented by the record we have assumed, as did the circuit court, the truth of all the material facts set out in the petition and supplemental petition of the receivers. This is the necessary result of the intervenors having based their motion on those petitions, and on the orders of the court directing writs of injunction to be issued. As those orders were based on the petitions of the receivers, it must be taken that the intervenors, although insisting that the injunction should have been modified to the full extent indicated by their motion, concede for the purposes of the motion the facts to be as alleged in those petitions.

It is consequently to be regarded as undisputed in this cause that, at the time the writ of December 19, 1893, was issued, some of the railroad employés were giving it out and threatening that if the revised schedules and rates in question were enforced they would

upon notification of their declination at a time prior to January 1, 1894, reasonable in view of the service in which they were engaged, they had the undoubted right to abandon their employment upon that day. That, however, is not the case presented to and dealt with by the court. Nor does the rectitude of the writ of injunction rest upon any mere right of the employés in good faith to abandon their employment. The restraint imposed was with reference to combining and conspiring to abandon the service with the object and intent of crippling the property. Its office was to restrain the carrying into effect of the conspiracy.

Was such a conspiracy unlawful? So long ago as 1821, Judge Gibson,—"that Judge "of great and enduring reputation,"—in the case of *Com. v. Cartledge*, Brightley, 38 (the case of a combination of employers to depress the wages of journeymen by artificial means, declared that "a combination is criminal when the act to be done has a necessary tendency to prejudice the public or to oppress individuals by unjustly subjecting them to the power of the confederates." He clearly asserts the principle upon which combinations of men may become unlawful as follows: "It will therefore be perceived that the motive for combining, or what is the same thing, the nature of the object to be attained as a consequence of the lawful act, is, in this class of cases, the discriminating circumstance. Where the act is lawful for an individual, it can be the subject of a conspiracy when done in concert only where there is a direct intention that injury shall result from it, or where the object is to benefit the conspirators to the prejudice of the public or the oppression of individuals, and where such prejudice or oppression is the natural and necessary consequence."

The doctrine thus declared is fully established. *State v. Buchanan*, 5 Harr. & J. 817, 9 Am. Dec. 534; *State v. De Witt*, 2 Hill. L. 282, 27 Am. Dec. 371; *State v. Norton*, 23 N. J. L. 38; *State v. Donaldson*, 33 N. J. L. 151, 90 Am. Dec. 649; *State v. Burnham*, 15 N. H. 193; *State v. Gladden*, 55 Conn. 45; *Sherry v. Perkins*, 47 Mass. 212; *Smith v. Peuple*, 25 Ill. 17, 76 Am. Dec. 80; *State v. Stewart*, 59 Vt. 273, 59 Am. Rep. 710; *Re Higgins*, 21 Fed. Rep. 443; *Cœur d'Alene Consol.* &

Mtn. Co. v. Miners' Union of Wardner, 51 Fed. Rep. 280, 19 L. R. A. 382; *United States v. Workmen's Amalgamated Council of New Orleans*, 54 Fed. Rep. 904.

The reason is that the confederacy of numbers to effect an injurious object creates new and additional power to injure, and congregated numbers supply in law the place of actual violence. *State v. Stimpson*, 12 N. C. 504. And therefore, in conspiracy, the unlawful thing proposed, whether as a means or an end, need not be such as would be indictable if proposed to be done by an individual. 2 Bishop, *Crim. L.* 7th ed. § 181. I think the conclusion well summed up by Mr. Wright in his work on "The Law of Criminal Conspiracies," that a combination of men by concerted action, to accomplish some object not criminal, by means which are not criminal, but where mischief to the public is involved; or where neither the object nor the means are criminal, but where injury and oppression are the result,—is a conspiracy condemned by law. That this is the general law of the land, is recognized in those states which, by statute in respect to labor organizations, have changed the general rule. Thus the state of New Jersey passed a statute to this effect: "It shall not be unlawful for any two or more persons to unite, combine, or bind themselves by oath, covenant, agreement, alliance or otherwise, to persuade, advise or encourage by peaceable means any person or persons to enter into any combination for or against leaving or entering into the employment of any person or persons or corporations."

The supreme court of that state, in the case of *Mayer v. Journeymen Stonecutters' Assn.*, 47 N. J. Eq. 519, 581, declared that by that statute "the policy of the law with respect to such combinations was revolutionized, and what before that time would have been held to have been an unlawful combination and conspiracy, became in this state a lawful association, and acts which had been the subject of indictment became inoffensive to any provision of our law." And to the same effect is the case of *Com. v. Sheriff*, 10 Phila. 393, under the Statute of Pennsylvania of June 14, 1872, and the supplemental Act of April 20, 1876.

suddenly quit the service of the receivers; by threats, force, and violence, would compel other employes to quit such service and, by organized effort and intimidation, prevent others from taking the places of those who might quit; would disable locomotives and cars so that they could not be safely used or used only after expensive repairs; would take possession of the cars, engines, shops, and roadbeds in the possession of the receivers, and otherwise prevent their being used; would so conduct themselves with regard to the property in the hands of the receivers as to hinder and embarrass them, their officers and agents in its management and in the operation of trains, and that such dissatisfied employes, and others not in the employ of the receivers, but co-operating with those employes from a spirit of sympathy or mischief, would, unless restrained by the order of court, have carried out their threats, with the result that the receivers would not only have been compelled to abandon the revised schedules and rates proposed to be enforced, but would have been disabled from operating the railroads in their custody, from discharging their duties to the public as carriers of passengers and freight, and from transporting the mails of the United States, bringing thereby incalculable loss upon the trust property, as well as causing inconvenience and hardship to the public, particularly to the people in that part of the country traversed by the Northern Pacific Railroad, who are dependent upon the regular, continuous operation of that road for commercial facilities of every kind, as well as for fuel, provisions, and clothing.

It will be observed that the motion of the intervenors does not question the power of the court to restrain acts upon the part of the employes or others which would have directly interfered with the receivers' possession of the trust property or obstructed their control and management of it as well as attempts by force, intimidation, or threats or otherwise to molest or interfere with persons who remain in the service of the receivers or with others who were willing to take the places of those withdrawing from such service.

But it was contended that the circuit court exceeded its powers when it enjoined the employes of the receivers "from combining conspiring to quit with or without notice, the service of said receivers, with the object and intent of crippling the property in their custody or embarrassing the operation of said railroad, and from so quitting the service of said receivers with or without notice as to cripple the property or prevent or hinder the operation of said railroad."

This clause embodies two distinct propositions: one, relating to combinations and conspiracies to quit the service of the receivers with the object and intent of crippling the property or embarrassing the operation of the railroads in their charge; the other, having no reference to combinations and conspiracies to quit or to the object and intent of any quitting, but only to employes "so quitting" as to cripple the property or prevent or hinder the operation of the railroad.

Considering these propositions in their inverse order, we remark that the injunction

It becomes necessary, then, to consider whether there is any statute, national or state, applicable to the railway in question, which can be deemed to be a modification of the general law of the land. It was asserted at the argument with great confidence that the act of congress entitled "An act to legalize incorporation of national trades' unions" (24 Stat. at L. chap. 587) had entirely changed the common law. I think the confidence of counsel in the assertion of the proposition was born of zeal, not of judgment. The statute provides for the formation of national trades' unions, with power to establish constitution, rules, and by-laws to carry out its lawful objects, and defines the term "national trades' union" to be "any association of working people having two or more branches in the states or territories of the United States for the purpose of aiding its members to become more skillful and efficient workers, the promotion of their general intelligence, the elevation of their character, the regulation of their wages, and their hours and conditions of labor, the protection of their individual rights in the prosecution of their trade or trades, the raising of funds for the benefit of the sick, disabled or unemployed members, or the families of deceased members, or for such other object or objects for which workmen may lawfully combine, having in view their mutual protection or benefit." The most that can be claimed for this statute is that it removes the common law disability of combination to raise the price of labor, and to establish the conditions of labor. It contains no suggestion of any right to combine or conspire with a view to injure or oppress or interfere with the rights of others. The organization of labor for the purpose specified in the statute is lawful and commendable, but the statute does not sanction the use of a lawful organization for an unlawful purpose. Nor does it permit such organization to invade the rights of others. Under this act, labor may organize to regulate wages, the hours of labor, and the conditions of labor, and for the protection of individual rights in the prosecution of labor; but such lawful organization cannot be employed to injure property, or for the oppression of others, or to harm the public welfare. There is nothing in

the statute which sanctions that which the law, as above declared, condemns.

The Statutes of Wisconsin (Sanborn & Berryman, Rev. Stat. § 4466a) render it unlawful for "two or more persons to combine, associate, agree, mutually undertake or concert together for the purpose of willfully or maliciously injuring another in his reputation, trade, business, or profession, by any means whatever, or for the purpose of maliciously compelling another to do or perform any act against his will, or preventing or hindering another from doing or performing any lawful act." By section 4466c it is rendered unlawful for any person, by threats, intimidation, force, or coercion of any kind, to hinder or prevent any other person from engaging in or continuing in any lawful work or employment, either for himself or as wage worker, or to attempt to so hinder or prevent. By section 4488d a punishment is provided for any one who, individually or in association with others, shall willfully injure or interfere with or prevent the running or operation or shall destroy any locomotive engine or cars or machinery. These statutes are declaratory of the common law, and wholly condemn all conspiracies to injure or oppress, or to interfere with the rights of others. Their efficacy is in no degree impaired by any statutory recognition of the right of organization for the purpose of promoting the welfare of labor. I have been referred to no statute in any state traversed by the Northern Pacific Railroad, and have been able to find none, which in any way changes the law in this regard. I think no state has gone so far in modification of the general rule as have the states of New Jersey and Pennsylvania. But there, as elsewhere, all labor organizations must be for lawful objects, to be accomplished by lawful means. If the ostensible purpose be legal, and the means for its accomplishment legal, still, if the real and secret purpose be illegal,—as for example, that purpose be of extortion or of injury to another,—the wrong cannot be shielded under the guise of a lawful organization. And where the object is to be accomplished by violence, intimidation, and the destruction of property, by coercion and by injury to the public, the organization, although formed

against employés so quitting as to cripple the property or prevent or hinder the operation of the railroad was equivalent to a command by the court that they should remain in the active employment of the receivers, and perform the services appropriate to their respective positions, until they could withdraw without crippling the property or preventing or hindering the operation of the railroad. The time when they could quit without violating the injunction is not otherwise indicated by the order of the court.

Under what circumstances may the employés of the receivers of right quit the services in which they are engaged? Much of the argument of counsel was directed to this question. We shall not attempt to lay down any general rule applicable to every case that may arise between employer and employés. If an employe quits without cause and in violation of an express contract to serve for a stated time, then his quitting would not be of right, and he would be liable for any damages resulting from a breach of his agreement, and perhaps, in some states of case, to criminal prosecution for loss of life or limb by passengers or others directly resulting from abandoning his post at a time when care and watchfulness was required upon his part in the discharge of a duty he had undertaken to perform. And it may be assumed for the purposes of this discussion that he would be liable in like manner where the contract of service, by necessary implication arising out of the nature or the circumstances of the employment required him not to quit the service of his

employer suddenly and without reasonable notice of his intention to do so.

But the vital question remains whether a court of equity will, under any circumstances, by injunction, prevent one individual from quitting the personal service of another? An affirmative answer to this question is not, we think, justified by any authority to which our attention has been called or of which we are aware. It would be an invasion of one's natural liberty to compel him to work for or to remain in the personal service of another. One who is placed under such constraint is in a condition of involuntary servitude—a condition which the supreme law of the land declares shall not exist within the United States or in any place subject to their jurisdiction. Courts of equity have sometimes sought to sustain a contract for services requiring special knowledge or peculiar skill, by enjoining acts or conduct that would constitute a breach of such contract. To this class belong the cases of singers, actors, or musicians who, after agreeing for a valuable consideration to give their professional service at a named place and during a specified time for the benefit of certain parties, refused to meet their engagement and undertake to appear during the same period for the benefit of other parties at other places. *Lumley v. Wagner*, 1 De G. M. & G. 604, 617, 5 De G. & S. 485, 16 Jur. 871; *Montague v. Flockton*, L. R. 16 Eq. 189. While in such cases the singer, actor, or musician has been enjoined from appearing during the period named at a place and for parties different from

for an ostensible legal object, is diverted to illegal purposes, and is to that extent unlawful.

Applying the principles of law, as I thus find them established, to the case in hand as presented by the original petition for the writ, it is clear that the facts charged presented to the court the case of an unlawful conspiracy. If it be conceded that the entire force of 12,000 men employed upon this railway had the legal right to abandon the service in a body, that right must be asserted and exercised in good faith. The abandonment of service must be actual not pretentious. The combination cannot be justified on the plea of the lawful exercise of a right when the threatened abandonment of service is a mere pretext, the real intent and design being to cripple the property, and to hinder and prevent the operation of the road; and such was the conspiracy declared to the court,—not denied, but contested by the present motion. It was a conspiracy to compel by intimidation the receivers of the railway against their will to accede to the demands of the conspirators, and, therein failing, to cripple this property, and prevent the operation of the road, the necessary result of which would be to inflict great loss upon the public. The conspiracy disclosed was a conspiracy to extort, and failing to extort, to injure; the pretentious exercise of the right to abandon service being one of the means to effect the object of the conspiracy. If the right to quit service in a body be conceded, the case presented is the ostensible exercise of a lawful right, not in good faith, but for an unlawful purpose, to wit, the intimidation and oppression of others, and the injury to property in their keeping, tending to the prejudice of the public. Such a conspiracy is unlawful. It may also be properly said that the conspiracy was as needless as its results would have been disastrous. This vast property was in the custody of the court, through its receivers. By the schedules which for some years had been in force in the operation of this road, as well as by the new schedules proposed to be adopted by the receivers, a thorough civil service had been established in the management of this railway, recognizing by systematic promotion length of service and skillful and honest performance of labor. The service contemplated was continuous and perma-

nent. No man could be discharged except for cause, of which he was to be informed. The right of a hearing upon such charge was secured to him, with right of successive appeals to the superior officers of the road. The employe, however, had the right to abandon his employment at any time. Thus capital and labor co-operated to assure employment, the reward of skill and faithfulness, and protection from discharge from service, except for justifiable cause. This operated to render the service efficient, conserving the interests of both capital and labor, and advancing the public welfare. It was natural, and to be expected, that in consequence of financial disaster there would arise the question of the reduction of wages. An employe, deeming himself wronged by the action of the receivers in respect thereto, had peaceful remedy. The court was at all times open to him to listen to his complaint, and to redress it, if it should appear to be well founded. Upon such application the receivers would be bound to obey the order of the court in the premises. The employe, nevertheless, not content with the judgment of the court, would have the right to abandon his employment. The case furnishes, as was suggested by counsel, an exceptional instance, where one party to a proceeding in a judicial tribunal is bound by the decision and the other is not. There was, therefore, neither justification nor excuse for a conspiracy to hinder and prevent the operation of this railway, nor necessity for combination for the assertion of any legal right. But, if there were no remedy for the employe except abandonment of service, the law will not sanction a conspiracy, the purpose of which is to extort from the receivers or from the court concessions which they could not properly yield, and, failing to procure them, to hinder and prevent, by the means declared, the operation of this railway, to the injury of the trust, and to the oppression of the public. Such was the combination and conspiracy here disclosed. It was to the prevention of the injury thus contemplated that this writ was directed. Its issuance, in my judgment, is justified by the law.

The second branch of the motion has reference to the writ of injunction issued upon the supple-

those specified in his first engagement, it was never supposed that the court could by injunction compel the affirmative performance of the agreement to sing, or to act, or to play. In *Powell Duffryn Steam Coal Co. v. Taff Vale R. Co.* L. R. 9 Ch. App. 331, 335, Lord Justice James observed that when what is required is not merely to restrain a party from doing an act of wrong, but to oblige him to do some continuous act involving labor and care, the court has never found its way to do this by injunction. In the same case Lord Justice Mellish stated the principle still more broadly, perhaps too broadly, when he said that a court can only order the doing of something which has to be done once for all, so that the court can see to its being done.

The rule, we think, is without exception that equity will not compel the actual, affirmative performance by an employé of merely personal services any more than it will compel an employer to retain in his personal service one who, no matter for what cause, is not acceptable to him for service of that character. The right of employes engaged to perform personal service to quit that service rests upon the same basis as the right of an employer to discharge him from further personal service. If the quitting in the one case or the discharging in the other is in violation of the contract between the parties, the one injured by the breach has his action for damages, and a court of equity will not, indirectly or negatively by means of an injunction restrain the violation of the contract, compel the affirmative performance from day to day or the affirmative

acceptance of merely personal services. Relief of that character has always been regarded as impracticable. *Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co.* 54 Fed. Rep. 730, 740, 19 L. R. A. 395, Taft, J., and authorities cited; Fry, Spec. Perf. Cont. 3d Am. ed. §§ 87, 91, and authorities cited.

It is supposed that these principles are inapplicable or should not be applied in the case of employes of a railroad company which, under legislative sanction, constructs and maintains a public highway primarily for the convenience of the people, and in the regular operation of which the public are vitally interested. Undoubtedly the simultaneous cessation of work by any considerable number of the employes of a railroad corporation without previous notice will have an injurious effect and for a time inconvenience the public. But these evils, great as they are, and although arising in many cases from the inconsiderate conduct of employes and employers, both equally indifferent to the general welfare, are to be met and remedied by legislation restraining alike employes and employers so far as necessary adequately to guard the rights of the public as involved in the existence, maintenance, and safe management of public highways. In the absence of legislation to the contrary, the right of one in the service of a quasi public corporation to withdraw therefrom at such time as he sees fit, and the right of the managers of such corporations to discharge an employe from service whenever they see fit, must be deemed so far absolute that no court of equity will compel one against his will

mental petition of the receivers, restraining any combination or conspiracy having for its purpose the inauguration of a strike upon the lines of the railway operated by the receivers, and from ordering, advising, or approving, by communication or instruction or otherwise, the employes of the receivers to join in a strike. This part of the motion presents the issue whether a strike is lawful. The answer must largely depend upon the proper definition of the term. It has been variously defined. By Worcester, "To cease from work in order to extort higher wages as workmen;" by Webster, "To quit work in a body, or by combination in order to compel their employers to raise their wages;" the *Encyclopedic Dictionary*, "The act of workmen in any trade or branch of industry when they leave their work with the object of compelling the master to concede certain demands made by them, —as an advance of wages, the withdrawal of a notice of reduction of wages, a shortening of the hours of work, the withdrawal of any obnoxious rule or regulation, or the like;" the *Imperial Dictionary*, "To quit work in order to compel an increase or prevent a reduction of wages;" the *Century Dictionary*, "To press a claim or demand by coercive or threatening action of some kind; in common usage, to quit work along with others, in order to compel an employer to accede to some demand, as for increase of pay or to protest against something, as a reduction of wages; as to strike for higher pay, or shorter hours of work;" Bouvier defines it: "A combined effort of workmen to obtain higher wages or other concessions from their employers by stopping work at a preconcerted time." The definition sanctioned by the court of appeals of New York in *Delaware, L. & W. R. Co. v. Bouns*, 58 N. Y. 561, and embodied by Mr. Anderson in his *Law Dictionary*, is: "A combination among laborers, or those employed by others, to compel an increase of wages, change in the hours of labor, a change in the manner of conducting the business of the principal, or to enforce some particular policy in the character or the number of men employed, or the like." Mr. Black in his *Law Dictionary*, defines it to be: "The act of a party of workmen employed by the same master, in stopping work all together at a preconcerted time, and re-

fusing to continue, until higher wages or shorter time or some other concession is granted to them by the employer." Whichever definition may be preferred, —and possibly no one of them is precisely accurate, —there are running through all of them two controlling ideas: First, by compulsion to extort from the employer the concession demanded; second, a cessation of labor, but not the abandonment of employment. The stoppage of work is designed to be temporary, continuing only until the accomplishment of the design, and upon its accomplishment the resumption of employment. The cessation of labor is not a bona fide dissolution of contractual relations and an abandonment of the employment, but is designed as a means of coercion to accomplish the desired result. The cessation of labor is prearranged by the body of men through their organizations, and is to take effect simultaneously at a stated time, for the purpose of preventing the master from continuing his business, and to compel him to submit to the dictation of his servants. The definition of the term proffered to the court at the argument, recognized by the labor organizations of the country, was this: "A strike is a concerted cessation of or refusal to work until or unless certain conditions which obtain or are incident to the terms of the employment are changed. The employé declines to longer work, knowing full well that the employer may immediately employ another to fill his place; also knowing that he may or may not be re-employed or returned to service. The employer has the option of acceding to the demand and returning the old employes to service, of employing new men, or of forcing conditions under which the old men are glad to return to service under the old conditions." This latter definition recognizes the idea of cessation of labor, but not an abandonment of employment. It suggests that the latter may result at the option of the master. It does not, in terms, declare a combination to extort, or to oppress, or to interfere in any way with the business of the employer, except as injury might result as an incident to the cessation of service. If the latter be the correct definition of a strike, society has been needlessly alarmed. I doubt if, in the light of the history of strikes, the

to remain in such service or actually to perform the personal acts required in such employment or compel such managers against their will to keep particular employes in their service. It was competent for the receivers in this case, subject to the approval of the court, to adopt a schedule of wages or salaries, and say to employes: "We will pay according to this schedule, and if you are not willing to accept such wages you will be discharged." It was competent for an employé to say: "I will not remain in your service under that schedule, and if it is to be enforced I will withdraw, leaving you to manage the property as best as you may, without my assistance." In the one case, the exercise by the receivers of their right to adopt a new schedule of wages could not, at least in the case of a general employment without limit as to time, be made to depend upon considerations of hardship and inconvenience to employes. In the other, the exercise by employes of their right to quit in consequence of a proposed reduction of wages could not be made to depend upon considerations of hardship or inconvenience to those interested in the trust property or to the public. The fact that employes of railroads may quit under circumstances that would show bad faith upon their part or a reckless disregard of their contract or of the convenience and interests of both employer and the public, does not justify a departure from the general rule that equity will not compel the actual, affirmative performance of merely personal services, or (which is the same thing) require employes against their will

to remain in the personal service of their employer.

The result of these views is that the court below should have eliminated from the writ of injunction the words "and from so quitting the service of the said receivers, with or without notice, as to cripple the property or prevent or hinder the operation of said railroad."

But different considerations must control in respect to the words in the same paragraph of the writs of injunction, "and from combining and conspiring to quit, with or without notice, the service of said receivers, with the object and intent of crippling the property in their custody, or embarrassing the operation of said railroad." We have said that if employes were unwilling to remain in the service of the receivers for the compensation prescribed for them by the revised schedules, it was the right of each one on that account to withdraw from such service. It was equally their right, without reference to the effect upon the property or upon the operation of the road, to confer with each other upon the subject of the proposed reduction in wages and to withdraw in a body from the service of the receivers because of the proposed change. Indeed, their right as a body of employes affected by the proposed reduction of wages, to demand given rates of compensation as a condition of their remaining in the service was as absolute and perfect as was the right of the receivers representing the aggregation of persons, creditors, and stockholders interested in the trust property, and the general public, to fix the rates they were willing to pay

child would be recognized by this baptismal name. One who has read the history of the strike at Homestead, with its cruel murders and barbarous torture; one who has read of the various strikes on railroads, when cars were fired, rails torn up, engines demolished, and life destroyed; one who has read of the not infrequent summoning of the militia by the authorities of the state to put down riot and turbulence,—the universal concomitants of a strike,—would hardly yield assent to the definition suggested as even faintly conveying the true idea of a strike, as known of all men. The only force suggested is the force of inertia, the compulsion wrought by cessation from labor. Such a strike would be a harmless affair, and generally inoperative to effect the end designed. It could be availing only by the combination of the entire labor force of the country, in the nature of things impracticable. Unless, by other coercive measures, the employer is prevented from obtaining men in the place of those who should cease to work, a strike would be a mere weapon of straw. That is well understood by these organizations. While, according to the definition, the employé knows "full well that the master may immediately hire another to fill his place," he also knows full well that that must, at all odds, be prevented if the strike is to be made successful. Consequently the organizations provide, as confessed at the argument, for the expulsion and social ostracism of all members of the organizations who should not abandon work when the order to strike is given, or who should seek to fill the place of a striking member. Thus one of the most effective engines of compulsion is brought to bear upon unwilling members to effect the design of the combination. With respect to laborers not members and willing to work, other and not less effective means of intimidation must be and are employed in prevention of labor. The history of strikes declares that this intimidation has always taken the shape of threats and personal violence. Constructive violence has failed in large measure to prevent the continuance of operation of business by the master. Naturally, therefore, we find resort to actual violence, the destruction of property, the disabling of railway trains, and the like.

Of the ideal strike, in the definition proposed at the argument, the only criticism, to be indulged in that it is ideal, and never existed in fact. Undoubtedly, in the absence of restrictive contract, workmen have a right by concerted action to cease work to procure better terms of service, no compulsion being used except that incident to the cessation; subject, however, to the qualification, at least with respect to those employments that directly concern the public welfare, that reasonable notice of the quitting should be given. But such is not the strike of history. The definition suggested is misleading and pretentious. To my thinking, a much more exact definition of a strike is this: A combined effort among workmen to compel the master to the concession of a certain demand, by preventing the conduct of his business until compliance with the demand. The concerted cessation of work is but one of, and the least effective of, the means to the end; the intimidation of others from engaging in the service, the interference with, and the disabling and destruction of property, and resort to actual force and violence, when requisite to the accomplishment of the end, being the other, and more effective, means employed. It is idle to talk of a peaceable strike. None such ever occurred. The suggestion is impeachment of intelligence. From first to last, from the earliest recorded strike to that in the state of West Virginia, which proceeded simultaneously with the argument of this motion, to that at Connellsville, Pa., occurring as I write, force and turbulence, violence and outrage, arson and murder, have been associated with the strike as its natural and inevitable concomitants. No strike can be effective without compulsion and force. That compulsion can only come through intimidation. A strike without violence would equal the representation of the tragedy of Hamlet with the part of Hamlet omitted. The moment that violence becomes an essential part of a scheme, or a necessary means of effecting the purpose of a combination, that moment the combination, otherwise lawful, becomes illegal. All combinations to interfere with perfect freedom in the proper management and control of one's lawful business, to dictate the terms upon which such business shall be con-

their respective employes. But that is a very different matter from a combination and conspiracy among employes, with the object and intent not simply of quitting the service of the receivers because of the reduction of wages, but of crippling the property in their hands and embarrassing the operation of the railroad. When the order for the original injunction was applied for it was represented—and the intervenors admit by their motion that it was correctly represented—that unless the restraining power of the court was exerted the dissatisfied employes and others co-operating with them would physically disable and render unfit for use the cars and other property in the possession of the receivers, and by force, threats, and intimidation used against employes remaining in their service and against those desiring to take the places of those quitting, would prevent the receivers from operating the roads in their custody and from discharging the duties which they owed on behalf of the corporation to the parties interested in the trust property, to the government and to the public.

The general inhibition upon combinations and conspiracies formed with the object and intent of crippling the property and embarrassing the operation of the railroad, must be construed as referring only to acts of violence, intimidation, and wrong of the same nature or class as those specifically described in the previous clauses of the writ. We do not interpret the words last above quoted as embracing the

case of employes who, being dissatisfied with the proposed reduction of their wages, merely withdraw on that account, singly or by concerted action, from the service of the receivers, using neither force, threats, persecution nor intimidation towards employes who do not join them, nor any device to molest, hinder, alarm or interfere with others who take or desire to take their places. We use the word "device" here as applicable to cases like that of *Sherry v. Perkins*, 147 Mass. 212, in which it appeared that parties belonging to a labor organization displayed and maintained certain banners in front of the plaintiff's place of business for the purpose of deterring workmen from remaining in or entering his service. As the acts complained of were injurious to the plaintiff's business and were a nuisance, it was held that they could be reached and restrained by injunction. So in *Springhead Spinning Co. v. Riley*, L. R. 6 Eq. 551, equity interfered by injunction to restrain the conduct of parties, officers of a trades union, who gave notice to workmen by means of placards and advertisements that they were not to hire themselves to the plaintiff pending a dispute between the union and the plaintiff. See also *United States v. Kane*, 28 Fed. Rep. 748; *Emack v. Kane*, 34 Fed. Rep. 46; *Casey v. Cincinnati Typographical Union No. 3*, 45 Fed. Rep. 135, 12 L. R. A. 193; *Walker v. Cronin*, 107 Mass. 555.

These employes having taken service first with the company and afterwards with the re-

ducted, by means of threats or by interference with property or traffic or with the lawful employment of others, are within the condemnation of the law. It has well been said that the wit of man could not devise a legal strike, because compulsion is the leading idea of it. A strike is essentially a conspiracy to extort by violence; the means employed to effect the end being not only the cessation of labor by the conspirators, but the necessary prevention of labor by those who are willing to assume their places, and, as a last resort, and in many instances an essential element of success, the disabling and destruction of the property of the master; and so, by intimidation and by the compulsion of force, to accomplish the end designed. I know of no peaceable strike. I think no strike was ever heard of that was or could be successful unaccompanied by intimidation and violence. Counsel at the argument could recall but one which he was willing to indorse as peaceable. That was the strike upon the Lehigh Valley Railroad during the year 1883. The history of that occurrence does not carry out the declaration of counsel. There, as I understand, the running of trains was constantly interfered with, engines and cars disabled and wrecks caused by the violence of the strikers. The president of the company reported to his board of directors that the loss to freight and equipment by reason of the strike—which continued for less than three weeks—was \$77,000, of which amount \$46,000 was for damage done to locomotives alone. And that strike was not successful, the violence being insufficient. The history and legality of strikes has been well told by Mr. Justice Brewer, of the Supreme Court of the United States, in an admirable address before the New York Bar Association in January, 1893, in language that should be taken to heart by every one who has regard to the safety and peace of society, and the protection of our institutions.

"The common rule," says Mr. Justice Brewer, "as to strikes is this: Not merely do the employes quit the employment, and thus handicap the employer in the use of his property, and perhaps in the discharge of duties which he owes to the public, but they also forcibly prevent others from taking their places. It is useless to say that they only advise; no man is misled. When a thousand laborers gather around a railroad track, and say to those who seek employment that they had better not,

and when that advice is supplemented every little while by a terrible assault on one who disregards it, every one knows that something more than advice is intended. It is coercion; force; it is the effort of the many, by the mere weight of numbers, to compel the one to do their bidding. It is a proceeding outside of the law, in defiance of the law, and in spirit and effect an attempt to strip from one that has that which of right belongs to him,—the full and undisturbed use and enjoyment of his own. It is not to be wondered at that deeds of violence and cruelty attend such demonstrations as these; nor will it do to pretend that the wrongdoers are not the striking laborers, but lawless strangers who gather to look on. Were they strangers who made the history of the Homestead strike one of awful horror? Were they women from afar who so maltreated the surrendered guards, or were they the very ones who sought to compel the owners of the property to do their bidding? Even if it be true that at such places the lawless will gather, who is responsible for their gathering? Weir, the head of a reputable labor organization, may open the door to lawlessness, but Beekman, the anarchist and assassin, will be the first to pass through; and thus it will be, always and everywhere.

This is the struggle of irresponsible persons and organizations to control labor. It is not in the interests of liberty; it is not in the interest of individual or personal rights. It is an attempt to give to the many a control over the few,—a step towards despotism. Let the movement succeed, let it once be known that the individual is not free to contract for his personal services, that labor is to be farmed out by organizations, as to-day by the Chinese companies, and the next step will be a direct effort on the part of the many to seize the property of the few."

No word of mine could give added strength to the thought suggested. The strike has become a serious evil, destructive to property, destructive to individual right, injurious to the conspirators themselves, and subversive of republican institutions. Certainly no court should give encouragement to any combination thus destructive of the very fabric of our government, tending to the disruption of society, and the obliteration of legal and natural rights. Whatever other doctrine may be asserted by reckless agitators, it must ever remain the duty of the courts, in the protection of society,

25 L. R. A.

ceivers under a general contract of employment which did not limit the exercise of the right to quit the service, their peaceable co-operation, as the result of friendly argument, persuasion, or conference among themselves, in asserting the right of each and all to refuse further service under a schedule of reduced wages, would not have been illegal or criminal, although they may have so acted in the firm belief and expectation that a simultaneous quitting without notice would temporarily inconvenience the receivers and the public. If in good faith and peaceably they exercise their right of quitting the service, intending thereby only to better their condition by securing such wages as they deem just, but not to injure or interfere with the free action of others, they cannot be legally charged with any loss to the trust property resulting from their cessation of work in consequence of the refusal of the receivers to accede to the terms upon which they were willing to remain in the service. Such a loss, under the circumstances stated, would be incidental to the situation and could not be attributed to employes exercising lawful rights in orderly ways or to the receivers when in good faith and in fidelity to their trust they declare a reduction of wages and thereby cause dissatisfaction among employes and their withdrawal from service.

The combinations or conspiracies which the law does not tolerate are of a different character. According to the principles of the common law, a conspiracy upon the part of two or

more persons with the intent by their combined power to wrong others or to prejudice the rights of the public, is in itself illegal although nothing be actually done in execution of such conspiracy. This is fundamental in our jurisprudence. So a combination or conspiracy to procure an employe or body of employes to quit service in violation of the contract of service would be unlawful, and in a proper case might be enjoined if the injury threatened would be irremediable at law. It is one thing for a single individual or for several individuals each acting upon his own responsibility and not in co-operation with others, to form the purpose of inflicting actual injury upon the property or rights of others. It is quite a different thing in the eye of the law for many persons to combine or conspire together with the intent not simply of asserting their rights or of accomplishing lawful ends by peaceable methods, but of employing their united energies to injure others or the public. An intent upon the part of a single person to injure the rights of others or of the public, is not in itself a wrong of which the law will take cognizance, unless some injurious act be done in execution of the unlawful intent. But a combination of two or more persons with such an intent and under circumstances that give them when so combined a power to do an injury they would not possess as individuals acting singly, has always been recognized as in itself wrongful and illegal.

The general principle is illustrated in *Callan*

and in the execution of the laws of the land, to condemn, prevent, and punish all such unlawful conspiracies and combinations. Of this duty it was forcibly said by Judge Baker, of the district of Indiana, under like circumstances, in the *Lake Erie & Western Cases*: "It may do for men that are reckless of the welfare of human society, who care nothing for its peace and good order, to imperil life, property, and liberty, and the perpetuity of our institutions by teaching such doctrines; but the judge who tolerates it ought to be stripped of his gown, and be driven from the sacred temple of justice."

The wrongs of labor are not to be righted by war upon society, by turbulence and disorder, by oppression and force. Such action alienates sympathy, and provokes resentment. In this land, only by peaceable means in the courts, and through the lawmaking power, can wrongs be redressed, and justice be established. Let combined labor deal with combined capital, but only in ways sanctioned by the law. When this lesson is learned, and becomes the rule of conduct, labor will acquire in a decade greater privileges and surer protection from wrong than could be extorted by a century of violence.

By the Act of Congress of July 2, 1890 (26 Stat. at L. chap. 647), every combination in restraint of trade or commerce among the several states is declared to be illegal. Under this act it was held by Judge Speer in *Waterhouse v. Comer*, 55 Fed. Rep. 149, 19 L. R. A. 408, that a strike, if it ever was effective, can be so no longer; and this view seems to have been held by Judge Billings in the case of *United States v. Workington's Amalgamated Council of New Orleans*, 54 Fed. Rep. 994. On the other hand, Judge Putnam, in *United States v. Patterson*, 55 Fed. Rep. 605, is inclined to the view that the statute has no relation to labor organizations. I do not find it needful to enter into this field of discussion, or to express an opinion upon the subject, being content to rest my conclusion upon the grounds discussed.

One clause of the supplemental injunction has been characterized as wholly unwarranted. That clause is: "And from ordering, recommending, approving, or advising others to quit the service of the receivers of the Northern Pacific Railroad on January 1, 1894, or at any other time." In fairness, this clause must be read in the light of the state-

ments of the petition. It was therein asserted to the court that the men would not strike unless ordered so to do by the executive heads of the national labor organizations, and that the men would obey such orders instead of following the direction of the court. This clause is specially directed to the chiefs of the several labor organizations. The use of the words, "order, recommend, approve, or advise," was to meet the various forms of expression under which by the constitution or by-laws of these organizations the command was cloaked,—as, for instance, in the one organization the chief head "advises" a strike, in another he "approves" a strike, in another he "recommends" the quitting of employment. Whatever terms may be employed, the effect is the same. It is a command which may not be disregarded, under penalty of expulsion from the order and of social ostracism. This language was employed to fortify the restraints of the other portions of the writ, and to meet the various disguises under which the command is cloaked. It was so inserted out of abundant caution, that the meaning of the court might be clear, that there should be no unwarrantable interference with this property, no intimidation, no violence, no strike. It was perhaps unnecessary, being comprehended within the clause restraining the heads of these organizations from ordering, recommending, or advising a strike, or joiner in a strike. It is said, however, that the clause restrains an individual from friendly advice to the employes as a body or individually, as to their or his best interest in respect of remaining in the service of the receivers. Read in the light of the petitions upon which the injunction was founded, I do not think that such construction can be indulged by any fair and impartial mind. It might be used as a text for a declamatory address to excite the passions and prejudices of men, but could not, I think, be susceptible of such strained construction by a judicial mind. The language of a writ of injunction should, however, be clear and explicit, and, if possible, above criticism as to its meaning. Since, therefore, the language of this particular phrase may be misconceived, and the restraint intended is, in my judgment, comprehended within the other provisions of the writ, the motion in that respect will be granted, and the clause stricken from the writ.

In all other respects the motion will be denied.

v. *Wilson*, 127 U. S. 540, 555, 32 L. ed. 228, 228. That was an information in the police court of the District of Columbia charging the defendants Callan and others with a conspiracy to prevent certain named persons, who had been expelled from a local association, a branch of a larger one known as the knights of labor of America, from pursuing their calling of musicians anywhere in the United States. This result, the information charged, was to be effected by the defendants refusing to work as musicians or in any other capacity with the persons so named, or with or for any person, firm, or corporation working with or employing them; by procuring all other members of those organizations, and all other workmen and tradesmen, not to work in any capacity with or for them or either of them or for any firm or corporation that employed either of them; and by warning and threatening every person, firm, or corporation employing such obnoxious persons that if they did not forthwith cease to employ and refuse to employ them, they should not receive the custom or patronage either of the persons so conspiring or of other members of said organizations. The question in the case was whether the accused were entitled to a trial by jury or whether the offense charged was of the class called "petty," for the trial of which a defendant could not at common law claim, of right, a jury. The court held that the offense charged was not a petty or trivial one but one of a grave character, affecting the public at large, and for the trial of which a jury was therefore demandable as of right.

Among the authorities cited in that case were *Com. v. Hunt*, 4 Met. 111, 121, 38 Am. Dec. 846, in which it was said that "the general rule of the common law is that it is a criminal and indictable offense, for two or more to confederate and combine together, by concerted means, to do that which is unlawful or criminal to the injury of the public, or portions or classes of the community, or even to the rights of an individual; *State v. Burnham*, 15 N. H. 396, 401, where it was held that "combinations against law or against individuals are always dangerous to the public peace and to public security; to guard against the union of individuals to effect an unlawful design is not easy, and to detect and punish them is often extremely difficult;" and *Reg. v. Parnell*, 14 Cox, C. C. 508, where the court observed, that "an agreement to effect an injury or wrong to another by two or more persons is constituted an offense, because the wrong to be effected by a combination assumes a formidable character; when done by one alone it is but a civil injury, but it assumes a formidable or aggravated character when it is to be effected by the powers of a combination."

One of the cases cited in *Callan v. Wilson* is *Com. v. Carlise*, Bright. (Pa.) 36, 39, 40, in which Mr. Justice Gibson considered the law of conspiracy with care and among other things said: "There is between the different parts of the body politic a reciprocity of action on each other, which, like the action of antagonizing muscles in the natural body, not only prescribes to each its appropriate state and action, but regulates the motion of the whole. The effort of an individual to disturb

this equilibrium can never be perceptible, nor carry the operation of his interest or that of any other individual beyond the limits of fair competition; but the increase of power by combination of means, being in geometrical proportion to the number concerned, an association may be able to give an impulse, not only oppressive to individuals, but mischievous to the public at large; and it is the employment of an engine so powerful and dangerous that gives criminality to an act that would be perfectly innocent, at least in a legal view, when done by an individual."

There are many other adjudged cases to the same effect. In *State v. Stewart*, 59 Vt. 373, 286, 59 Am. Rep. 710, it was held after an extended review of the authorities that "a combination of two or more persons to effect an illegal purpose, either by legal or illegal means, whether such purpose be illegal at common law or by statute, or to effect a legal purpose by illegal means, whether such means be illegal at common law or by statute, is a common law conspiracy. Such combinations are equally illegal whether they promote objects or adopt means that are *per se* indictable, or promote objects or adopt means that are *per se* oppressive, immoral, or wrongfully prejudicial to the rights of others. If they seek to restrain trade, or tend to the destruction of the material property of the country, they work injury to the whole people." In *State v. Buchanan*, 5 Harr. & J. 817, 852, 355, 9 Am. Dec. 584, the court of appeals of Maryland adjudged that "every conspiracy to do an unlawful act, or to do a lawful act for an illegal, fraudulent, malicious, or corrupt purpose, or for a purpose which has a tendency to prejudice the public in general, is at common law an indictable offense, though nothing be done in execution of it, and no matter by what means the conspiracy was intended to be effected, which may be perfectly indifferent, and makes no ingredient of the crime, and, therefore, need not be stated in the indictment." Again: "There is nothing in the objection, that to punish a conspiracy where the end is not accomplished, would be to punish a mere unexecuted intention. It is not the bare intention that the law punishes, but the act of conspiring, which is made a substantive offense by the nature of the object to be effected." In *State v. Glidden*, 55 Conn. 46, the court said: "Any one man, or any one of several men acting independently, is powerless; but when several combine and direct their united energies to the accomplishment of a bad purpose, the combination is formidable. Its power for evil increases as its number increases. . . . The combination becomes dangerous and subversive of the rights of others, and the law wisely says that it is a crime." In *Reg. v. Kenrick*, 5 Q. B. 49, Chief Justice Denman said that by the law of conspiracy as it had been administered for at least the previous hundred years any combination to prejudice another unlawfully was considered as constituting the offense, and that the offense consisted in the conspiracy and not in the acts committed for carrying it into effect.

See also *Carew v. Rutherford*, 106 Mass. 1, 8 Am. Rep. 287; *Old Dominion SS. Co. v. McKenna*, 30 Fed. Rep. 48; *Cœur d'Alene Canal & Min. Co. v. Miners' Union of Wardner*, 51

Fed. Rep. 260, 287, 19 L. R. A. 382; 3 Whart. Crim. L. 8th ed. §§ 1887 *et seq.*; 2 Archbold, Cr. Pr. & Pl. Pomeroy's ed. 1880, *note*; 2 Bishop, Crim. L. §§ 180 *et seq.*

It seems entirely clear upon authority that any combination or conspiracy upon the part of these employes would be illegal which has for its object to cripple the property in the hands of the receivers and to embarrass the operation of the railroads under their management, either by disabling or rendering unfit for use, engines, cars or other property in their hands, or by interfering with their possession, or by actually obstructing their control and management of the property, or by using force, intimidation, threats or other wrongful methods against the receivers or their agents or against employes remaining in their service, or by using like methods to cause employes to quit or prevent or deter others from entering the service in place of those leaving it. Combinations of that character disturb the peace of society, and are mischievous in the extreme. They imperil the interests of the public, which may rightfully demand that the free course of trade shall not be unreasonably obstructed.

They endanger the personal security and the personal liberty of individuals who, in the exercise of their inalienable privilege of choosing the terms upon which they will labor, enter or attempt to enter the service of those against whom such combinations are specially aimed. And as acts of the character referred to would have defeated a proper administration of the trust estate, and inflicted irreparable injury upon it, as well as prejudiced the rights of the public, the circuit court properly framed its injunction so as to restrain all such acts as are specifically mentioned, as well as combinations and conspiracies having the object and intent of physically injuring the property or of actually interfering with the regular, continuous operation of the railroad by the receivers.

Some reference was made in argument to the Act of Congress of June 29, 1886, legalizing the incorporation of national trades unions. 24 Stat. at L. 86, chap. 567. It is not perceived that this reference is at all pertinent to the present discussion. That act does not in any degree sanction illegal combinations. It recognizes the legal character of any association of working people having two or more branches in the states or territories of the United States, and established "for the purpose of aiding its members to become more skillful and efficient workers, the promotion of their general intelligence, the elevation of their character, the regulation of their wages and their hours and conditions of labor, the protection of their individual rights in the prosecution of their trade or trades, the raising of funds for the benefit of sick, disabled, or unemployed members of the families of deceased members, or for such other object or objects for which working people may lawfully combine, having in view their mutual protection or benefit." Associations of that character are authorized to make and establish such constitutions, rules, and by-laws as they deem proper to carry out their lawful objects. Those objects as defined by congress are most praiseworthy and should be sustained by the courts whenever their power to that end is properly

4 INTER S.

invoked. What we have said about illegal combinations has no reference to such associations, but only to combinations formed with the intent to employ force, intimidation, threats or other wrongful methods whereby the public will be injured, or whereby will be impaired the absolute right of individuals, whether belonging to such combinations or not, to dispose of their labor or property upon such terms as to them seems best.

The principle that a combination or conspiracy of two or more persons to injure the rights of others is illegal, although nothing may have been done in execution of that intent, has been embodied in the statutes of Wisconsin, in which state the present cause is pending. By an act passed April 2, 1887, it was declared that "any two or more persons who shall combine, associate, agree, mutually undertake or concert together for the purpose of willfully or maliciously injuring another in his reputation, trade, business or profession, by any means whatever, or for the purpose of maliciously compelling another to do or perform any act against his will, or preventing or hindering another from doing or performing any lawful act, shall be punishable by imprisonment in the county jail not more than one year or by fine not exceeding five hundred dollars." And by a subsequent act, passed April 25, 1887, it was declared that "any two or more employers who shall agree, combine, and confederate together for the purpose of interfering with or preventing any person or persons seeking employment, either by threats, promises, or by circulating or causing the circulation of a so-called black list, or by any means whatsoever, or for the purpose of procuring and causing the discharge of an employe or employes, by any means whatsoever, shall be deemed guilty of a misdemeanor, and upon conviction shall be punished by imprisonment in the county jail for a period of not more than one year, or by a fine of not less than fifty dollars, or by both." 1 Wis. Laws 1887, pp. 299, 880, chaps. 287, 849; 2 Wis. Rev. Stat. §§ 4466a, 4466b.

This legislation was followed by an act published May 8, 1887, providing: "§ 1. Any person who by threats, intimidation, force or coercion of any kind shall hinder or prevent any other person from engaging in or continuing in any lawful work or employment, either for himself or as a wageworker, or who shall attempt to so hinder or prevent, shall be punished by fine not exceeding one hundred dollars or by imprisonment in the county jail not more than six months, or by both fine and imprisonment in the discretion of the court. Section 2. Any person who shall individually or in association with one or more others, willfully break, injure, or remove any part or parts of any railway car or locomotive, or any other portable vehicle or traction engine, or any part or parts of any stationary engine, machine, implement or machinery, for the purpose of destroying such locomotive, engines, car, vehicle, implement or machinery, or of preventing the useful operation thereof, or who shall in any other way willfully or maliciously interfere with or prevent the running or operation of any locomotive, engine, or machinery, shall be punished by fine not exceeding one thousand dollars or by imprisonment in the county jail

or the state prison not exceeding two years, or by both fine and imprisonment in the discretion of the court." 1 Wis. Laws, chap. 427, p. 462.

It thus appears that combinations and conspiracies by two or more persons, with the intent to injure the rights of others were illegal at common law, and are public offenses in the state where this cause is pending.

For the reasons stated, we are of opinion that the circuit court properly refused to strike from the writs of injunction the words, "And from combining and conspiring to quit with or without notice the service of said receivers, with the object and intent of crippling the property in their custody or embarrassing the operation of said railroad."

We come next to that clause in the writ of injunction of December 22, 1893, expressly relating to "strikes."

What is to be deemed a strike within the meaning of the order of the circuit court? In the opinion of the circuit judge, made a part of the record, we are informed that at the argument below the definition proffered to the court by the intervenors as one recognized by the labor organizations of the country was as follows: "A strike is a concerted cessation of or refusal to work until or unless certain conditions which obtain or are incident to the terms of employment are changed. The employee declines to longer work, knowing full well that the employer may immediately employ another to fill his place, also knowing that he may or may not be re-employed or returned to service. The employer has the option of acceding to the demand and returning the old employee to service, of employing new men, or of forcing conditions under which the old men are glad to return to service under the old conditions."

The learned circuit judge said that a more exact definition of a strike was "a combined effort among workmen to compel the master to the concession of a certain demand by preventing the conduct of his business until compliance with the demand." And he said: "It is idle to talk of a peaceful strike. None such ever occurred. The suggestion is an impeachment of intelligence. All combinations to interfere with perfect freedom in the proper management of one's lawful business, to dictate the terms upon which such business shall be conducted, by means of threats or by interference with property or traffic, or with the lawful employment of others, are within the condemnation of the law. It has been well said that the wit of man could not devise a legal strike, because compulsion is the leading idea of it. A strike is essentially a conspiracy to extort by violence; the means employed to effect the end being not only the cessation of labor by the conspirators, but by the necessary prevention of labor by those who are willing to assume their places, and, as a last resort, and in many instances an essential element of success, the disabling and destruction of the property of the master; and so, by intimidation and by the compulsion of force to accomplish the end designed."

Under this view of the nature and object of strikes the injunction was directed, generally against combinations and conspiracies upon

the part of employes with the design or purpose of causing a "strike" on the lines of railroads operated by the receivers, against the ordering, recommending, advising, approving the employes to join in a "strike," and against the ordering, recommending, or advising any committee or class of employes to "strike" or to join in a "strike."

If the word "strike" means in law what the circuit court held it to mean, the order of injunction, so far as it relates to "strikes," is not liable to objection as being in excess of the power of a court of equity; indeed, upon the facts presented by the receivers and admitted by the motion of the intervenors, it was made the duty of the court to exert its utmost authority to protect both the property in its charge and the interests of the public against all strikes of the character described in the opinion of the circuit judge.

But in our judgment the injunction was not sufficiently specific in respect to strikes. We are not prepared, in the absence of evidence, to hold as matter of law that a combination among employes having for its object their orderly withdrawal in large numbers or in a body from the service of their employers, on account simply of a reduction in their wages, is not a strike within the meaning of that word as commonly used. Such a withdrawal, although amounting to a strike, is not, as we have already said, either illegal or criminal. In *Farrer v. Close*, L. R. 4 Q. B. 602, 612, *Sir James Hannen*, afterwards Lord of Appeal in Ordinary, said: "I am, however, of opinion that strikes are not necessarily illegal. A strike is properly defined as 'a simultaneous cessation of work on the part of the workmen,' and its legality or illegality must depend on the means by which it is enforced and on its objects. It may be criminal, as if it be a part of a combination for the purpose of injuring or molesting either masters or men; or it may be simply illegal, as if it be the result of an agreement depriving those engaged in it of their liberty of action, similar to that by which the employers bound themselves in the case of *Hilton v. Eckersley*, 6 El. & Bl. 47, 66; or it may be perfectly innocent, as if it be the result of the voluntary combination of the men for the purpose only of benefiting themselves by raising their wages, or for the purpose of compelling the fulfillment of an engagement entered into between employers and employes, or any other lawful purpose."

In our opinion the order should describe more distinctly than it does the strikes which the injunction was intended to restrain. That employes and their associates may not unwittingly place themselves in antagonism to the court's authority and become subject to fine and imprisonment as for contempt, the order should indicate more clearly than has been done that the strikes intended to be restrained were those designed to physically cripple the trust property or to actually obstruct the receivers in the operation of the road, or to interfere with their employes who do not wish to quit, or to prevent by intimidation or other wrongful modes, or by any device, the employment of others to take the places of those quitting, and not such as were the result of the exercise by employes in peaceable ways of

rights clearly belonging to them and were not designed to embarrass or injure others or to interfere with the actual possession and management of the property by the receivers.

In our consideration of this case we have not overlooked the observations of counsel in respect to the use of special injunctions to prevent wrongs which, if committed, may be otherwise reached by the courts. It is quite true that this part of the jurisdiction of a court of equity should be exercised with extreme caution and only in clear cases. *Brown v. Newell*, 2 Myl. & C. 558, 570. *Mr. Justice Baldwin*, in *Bonaparte v. Camden & A. R. Co.* 1 Baldw. 205, 217, properly said: "There is no power the exercise of which is more delicate, which requires greater caution, deliberation, and sound discretion, or is more dangerous in a doubtful case, than the issuing an injunction. It is the strong arm of equity that never ought to be extended, unless in cases of great injury where courts of law cannot afford an adequate or commensurate remedy in damages. The right must be clear, the injury impending or threatened, so as to be averted only by the protecting preventive process of injunction: but that will not be awarded in doubtful cases, or new ones not coming within well established principles; for if it issues erroneously an irreparable injury is inflicted, for which there can be no redress, it being the act of a court, not of the party who pays for it. It will be refused till the court are satisfied that the case before them is of a right about to be destroyed, irreparably injured, or great and lasting injury about to be done by an illegal act; in such a case the court owes it to its own suitors and its own principles to administer the only remedy the law allows to prevent the commission of the act." The authorities all agree that a court of equity should not hesitate to use this power when the circumstances of the particular case in hand require it to be done in order to protect rights of property against irreparable damage by wrongdoers. It is, *Justice Story* said, because of the varying circumstances of cases "that courts of equity constantly decline to lay down any rule which shall limit their power and discretion as to the particular cases in which such injunctions shall be granted or withheld." "And," the author proceeds, "there is wisdom in this course; for it is impossible to foresee all the exigencies of society which may require their aid and assistance to protect rights or redress wrongs. The jurisdiction of these courts, thus operating by special injunction, is manifestly indispensable for the purposes of social justice in a great variety of cases, and, therefore, should be fostered and upheld by a steady confidence." *Story, Eq. Jur.* § 959b.

In using a special injunction to protect the property in the custody of the receivers against threatened acts which it is admitted would, if not restrained, have been committed and would have inflicted irreparable loss upon that property and seriously prejudiced the interest of the public as involved in the regular, continuous operation of the Northern Pacific Railroad, the circuit court (except in the particulars indicated) did not restrain any act which upon the facts admitted by the motion it was not its plain duty to restrain. No other remedy was

full, adequate, and complete for the protection of the trust property, and for the preservation of the rights of individual suitors and of the public in his due and orderly administration by the court's receivers. "It is not enough," the court said in *Boyce v. Grundy*, 28 U. S. 3 Pet. 210, 7 L. ed. 655, "that there is a remedy at law; it must be plain and adequate, or in other words, as practical and efficient to the ends of justice, and its prompt administration as the remedy in equity." And the application of the rule that equity will not interfere where there is an adequate remedy at law must depend upon the circumstances of each case as it arises. *Watson v. Sutherland*, 72 U. S. 5 Wall. 74, 79, 18 L. ed. 580, 582. That some of the acts enjoined would have been criminal, subjecting the wrongdoers to actions for damages or to criminal prosecution, does not therefore in itself determine the question as to interference by injunction. If the acts stopped at crime or involved merely crime, or if the injury threatened could, if done, be adequately compensated in damages, equity would not interfere. But as the acts threatened involved irreparable injury to and destruction of property for all the purposes for which that property was adapted, as well as continuous acts of trespass, to say nothing of the rights of the public, the remedy at law would have been inadequate. "Formerly," *Mr. Justice Story* says, "courts of equity were extremely reluctant to interfere at all, even in regard to cases of repeated trespasses. But now there is not the slightest hesitation, if the acts done, or threatened to be done, to the property would be ruinous or irreparable, or would impair the just enjoyment of the property in future. If, indeed, courts of equity did not interfere in cases of this sort, there would (as has been truly said) be a great failure of justice in this country." 2 *Story, Eq. Jur.* § 928. So, in respect to acts which constitute a nuisance, injurious to property, if "the injury is of so material a nature that it cannot be well or fully compensated for the recovery of damages, or be such as from its continuance or permanent mischief might occasion a constantly recurring grievance, a foundation is laid for the interference of the court by way of injunction." *Kerr, Inj.* 1666, chap. 64, and authorities there cited. This jurisdiction, the author says, was formerly exercised sparingly, and with caution, "but it is now fully established, and will be exercised as freely as in other cases in which the aid of the court is sought for the purpose of protecting legal rights from violation."

In the course of the argument some reference was made to the Act of Congress of July 2, 1890, entitled "An act to protect trade and commerce against unlawful restraints and monopolies." It is not necessary in this case to decide whether, within the meaning of that statute, the acts and combinations against which the injunction was aimed would have been in restraint of trade or commerce among the several states. This case was not based upon that act. The questions now before the court have been determined without reference to the above act and upon the general principles that control the exercise of jurisdiction by courts of equity.

For the reasons we have stated the order

complained of is reversed in part and the cause is remanded with directions to sustain the motion to strike out, and modify the injunction, to the extent indicated in this opinion.

UNITED STATES CIRCUIT COURT, DISTRICT OF KENTUCKY.

ANDERSON

v.

LOUISVILLE & NASHVILLE R. CO.

(62 Fed. Rep. 48.)

1. The Kentucky statutes requiring all railroad companies to furnish separate coaches or compartments for colored and white passengers does not violate U. S. Const. 14th Amend. prohibiting discrimination by a state because of race or previous condition of servitude, as it prohibits any discrimination in the quality, convenience or accommodations in the cars and compartments set apart for the different classes of passengers.
2. The Kentucky statute requiring all companies operating railroads within the state to provide separate cars or compartments for white and colored passengers is so broad as to embrace all passengers, including those whose passage commences or ends in other states, and is void as an interference with interstate commerce.
3. The provisions of the Kentucky statute requiring separate compartments or cars for white and colored passengers to be furnished by all railroad companies, operating trains within the state in respect to interstate commerce cannot be separated from those relating to commerce wholly within the state and render the whole act void.
4. The prohibition contained in U. S. Const. 14th Amend. against discrimination by a state because of race or previous condition of servitude, though securing to citizens certain fundamental rights as against state action, does not secure the joint and common enjoyment of such rights.
5. A statute requiring separate cars or compartments to be furnished white and colored passengers upon railroads is valid as a proper exercise of the police power of the state when confined to the intrastate commerce of the state and not applying to interstate commerce.

Decided June 4, 1894.

ON DEMURRER to the complaint in an action brought to recover damages for the alleged wrongful ejection of plaintiff from defendant's train. *Demurrer overruled.*

The facts are stated in the opinion.

Messrs. Wilbur F. Browder and Reuben A. Miller for defendant in support of the demurrer.

Messrs. John Feland & Son and J. H. Lott for plaintiff, *contra*.

Barr, District Judge, delivered the following opinion:

The plaintiff, who is a colored man and a citizen and resident of the state of Indiana, sues the defendant, the Louisville & Nashville Railroad Company, a Kentucky corporation, which is operating, as a common carrier, a railway between St. Louis, Mo., and Nashville, Tenn., and several other railways in the state of Kentucky, for an alleged wrongful act in putting him and his wife off of its trains on two separate occasions. He alleges that he and his wife, who desired to go from Evansville, Ind., to Madisonville, Ky., purchased, at Evansville, two full first class railroad tickets on defendant's road from Evansville to Madisonville, and then entered the defendant's car, at Evansville, usually designated the ladies' car, where they had a right to be, and that this right was recognized by the conductor of the train by taking up their tickets and exchanging them for the usual conductor's check. He alleges that they remained seated in said car undisturbed so long as the train was without the state of Kentucky, but, when the train came into that state, said

conductor required of plaintiff and his wife to give up their seats in said car, and go into a compartment in a car immediately in front, which had been set apart for colored persons exclusively. He alleged that he and his wife refused to occupy said compartment, and thereupon said conductor wrongfully refused to carry them further on said train, and put them off, without right and against their consent. In the second paragraph the plaintiff alleges that on another occasion he and his wife purchased over defendant's railroad two first class tickets from Henderson, Ky., to Madisonville, in same state, and that they entered the defendant's train, and seated themselves in the car designated for white persons exclusively, and that afterwards the conductor of the train took up their tickets and exchanged them for the usual conductor's checks, and then required that they should give up their said seats, and go into a compartment of a car which was and had been designated for colored persons exclusively; but that plaintiff and his wife refused to go into said compartment, and thereupon said conductor refused to carry them any further, and wrongfully put

them off said train at Robard's Station, which was 80 miles distant from Madisonville, the place of his destination. The defendant has demurred to both of these paragraphs of plaintiff's petition, and thus raises the question of the constitutionality of an act of the Kentucky legislature entitled "An act to regulate the travel or transportation of the white and colored passengers on the railroads of this state," approved May 24, 1892. The 1st, 2d, 3d, 5th, 6th, and 7th, sections of that statute are as follows:

"Section 1. Any railroad company or corporation, person or persons, running or otherwise operating railroad cars, or coaches by steam or otherwise, on any railroad line or track within this state, and all railroad companies, person or persons, doing business in this state, whether upon lines of railroads owned in part or whole, or leased by them; and all railroad companies, person or persons, operating railroad lines that may hereafter be built under existing charters, or charters that may hereafter be granted in this state; and all foreign corporations, companies, person or persons organized under charters granted or that may hereafter be granted by any other state; who may be now, or may hereafter be engaged in running or operating any of the railroads of this state, either in part or in whole, either in their own name or that of others, are hereby required to furnish separate coaches or cars for the travel or transportation of the white and colored passengers on their respective lines of railroads. Each compartment of a coach divided by a good and substantial wooden partition, with a door therein, shall be deemed a separate coach, within the meaning of this act, and each separate coach or compartment shall bear in some conspicuous place, appropriate words in plain letters, indicating the race for which it is set apart.

"Sec. 2. That the railroad companies, person or persons, shall make no difference or discrimination, in the quality, convenience or accommodations in the cars or coaches, or partitions, set apart for white and colored passengers.

"Sec. 3. That any railroad company or companies, that shall fail, refuse, or neglect to comply with the provisions of sections 1 and 2 of this act, shall be deemed guilty of a misdemeanor, and upon indictment and conviction thereof shall be fined not less than five hundred nor more than fifteen hundred dollars for each offense."

"Sec. 5. The conductors or managers on all railroads shall have power, and are hereby required, to assign to each white or colored passenger his or her respective car or coach or compartment; and should any passenger refuse to occupy the car, coach or compartment to which he or she may be assigned by the conductor or manager said conductor or manager shall have the right to refuse to carry such passenger on his train, and may put such passenger off the train; and for such refusal, and putting off the train, neither the manager, conductor nor railroad company shall be liable for damages in any court.

"Sec. 6. That any conductor or manager on any railroad, who shall fail or refuse to carry out the provisions of section 5 of this act, shall, 4 INTER 8.

upon conviction, be fined not less than fifty nor more than one hundred dollars for each offense.

"Sec. 7. The provisions of this act shall not apply to employés of railroads, or persons employed as nurses, or officers in charge of prisoners."

This statute makes no discrimination in favor of white passengers, since any discrimination in the quality, convenience, or accommodations in the cars and compartments set apart for white and colored passengers is prohibited. It may be that some of the railroad companies of this state fail to provide equal accommodations for its colored passengers as they provide for white passengers, but this difference is not authorized by this statute, but prohibited. The 14th Amendment to the Constitution of the United States prohibits discrimination by a state because of race or previous condition of servitude, and, indeed, secures to all of its citizens certain fundamental rights as against state action, but it does not secure the joint and common enjoyment of such rights. It is the equality of right which is secured, and not the joint and common enjoyment of such right. *United States v. Stanley*, 109 U. S. 8, 27 L. ed. 836; *United States v. Buntin*, 10 Fed. Rep. 780; *Claybrook v. Owensboro*, 16 Fed. Rep. 297.

The next inquiry is whether this statute is in violation of the commerce clause of the Constitution of the United States, which gives Congress the exclusive right to "regulate commerce with foreign nations, and among the several states." Const. art. 1, § 8. If this statute be construed to include the internal commerce of the state of Kentucky, and not to apply to interstate commerce, it is a proper exercise of the police power of the state, and is constitutional, as has been settled in the case of *Louisville, N. O. & T. R. Co. v. Mississippi*, 2 Inters. Com. Rep. 801, 133 U. S. 587, 33 L. ed. 784. See also *Stone v. Farmers' Loan & T. Co.* 116 U. S. 307, 29 L. ed. 636. The case of *Louisville, N. O. & T. R. Co. v. Mississippi* came to the Supreme Court upon the question whether or not the railroad company was obliged, under the requirements of the statute of the state of Mississippi, to furnish separate cars or compartments for colored passengers whose passage commenced and ended in the state, and a majority of the court did not attempt to decide whether the statute would have been constitutional if it had applied to interstate commerce. There was, however, a dissent by Justices Harlan and Bradley, because they considered that statute as an attempt to regulate interstate commerce. The Kentucky statute has never been construed by the court of appeals of the state, and we must determine whether it includes interstate commerce as well as internal commerce. The title of the act is to regulate the travel or transportation of white and colored passengers on the railroads of this state, and in terms it applies to all companies, corporations, or persons operating railroads, by steam or otherwise, within the state, and to all conductors of trains thus operated; and it requires all such conductors, under penalty of a fine, to assign to each white and colored passenger his or her respective car or compartment. This lan-

guage is so broad and comprehensive that we conclude it must embrace all passengers, whether their passage commences and ends in the state or Kentucky, or commences in a foreign country or another state of this Union, and ends elsewhere than in this state. The act seems to divide all persons traveling on railroads in this state, without regard to the place whence they came or whither they go, into classes, and that on the color line; all white passengers being in one class, and all other passengers in another. If this be the correct construction of the act, the question as to the constitutionality of the entire act arises, as the court cannot separate one part of the act from another, and leave the constitutional part valid and enforceable. Where the provisions of an act are distinct and separate, and the court can determine by construction the constitutional parts of an act from the unconstitutional parts, and can presume the legislature would have enacted the constitutional part of the act without the unconstitutional part, it may declare a part of an act unconstitutional and the other enforceable; but this cannot be done with this act. *Baldwin v. Franks*, 120 U. S. 678, 30 L. ed. 766, and cases cited.

The transportation of passengers is commerce, and the regulation of commerce "with foreign nations and among the several states" is exclusively in Congress; yet there are many state laws that incidentally affect foreign and interstate commerce which have been held constitutional. The Supreme Court has declined to attempt to lay down a definite rule by which may be determined what is a regulation of foreign and interstate commerce, and how far the several states may legislate upon the subject. It is often most difficult to determine the line of demarkation which separates the power of Congress from that of state legislatures, but we think the principle which determines the case under consideration has been decided by the Supreme Court in *Hall v. De Cuir*, 95 U. S. 485, 24 L. ed. 547. In that case the Louisiana statute, as the state court construed it, forbade common carriers of passengers to separate the passengers carried by them on account of race or color while in their charge in that state, and authorized a recovery of exemplary as well as actual damages by any passenger who was thus separated without his or her consent. The Supreme Court held the act unconstitutional as affecting foreign and interstate commerce, although *De Cuir*, who was a woman of color, took passage upon the steamer Governor Allen at New Orleans to Hermitage, which was a landing within the state of Louisiana. She was refused accommodations, on account of her color, in a cabin of the boat specially set apart for white persons, and brought suit therefor, and recovered damages in the state court. *Chief Justice Waite* said:

"If each state was at liberty to regulate the conduct of carriers while within its jurisdiction, the confusion likely to follow could not but be productive of great inconvenience and unnecessary hardship. Each state could provide for its own passengers, and regulate the transportation of its own freight, regardless of the interests of others. Nay, more, it could prescribe rules by which the carrier must be

governed within the state in respect to passengers and property brought from without. On one side of the river or its tributaries he might be required to observe one set of rules, and on the other another. Commerce cannot flourish in the midst of such embarrassments. No carrier of passengers can conduct his business with satisfaction to himself, or comfort to those employing him, if on one side of a state line his passengers, both white and colored, must be permitted to occupy the same cabin, and on the other be kept separate. Uniformity in the regulations by which he is to be governed from one end to the other of his route is a necessity in his business, and to secure it, Congress, which is untrammelled by state lines, has been invested with the exclusive legislative power of determining what such regulations shall be. If this statute can be enforced against those engaged in interstate commerce, it may be as well against those engaged in foreign; and the master of a ship clearing from New Orleans to Liverpool, having passengers on board, would be compelled to carry all white and colored, in the same cabin during his passage down the river, or be subject to an action for damages, 'exemplary as well as actual,' by any one who felt himself aggrieved because he had been excluded on account of his color."

Neither this language nor decision has been modified or changed by the court in *Louisville, N. O. & T. R. Co. v. Mississippi*, 2 Inters. Com. Rep. 801, 133 U. S. 587, 33 L. ed. 784. The court in that case, after quoting a part of the opinion in *Hall v. De Cuir*, *supra*, said:

"So the decision was by its terms carefully limited to those cases in which the law practically interfered with interstate commerce. Obviously, whether interstate passengers of one race should, in any portion of their journey, be compelled to share their cabin accommodations with colored passengers, was a question of interstate commerce, and to be determined by Congress alone. In this case the supreme court of Mississippi held that the statute applied solely to commerce within the state; and that construction being the construction of the statute of the state by its highest court, must be accepted as conclusive here. If it be a matter respecting wholly commerce within a state, and not interfering with commerce between the states, then, obviously, there is no violation of the commerce clause of the Federal Constitution. Counsel for plaintiff in error strenuously insists that it does affect and regulate interstate commerce, but this contention cannot be maintained."

It cannot be doubted that under this latter decision the state of Kentucky could constitutionally pass a law which would require separate cars or compartments for white and colored passengers when their travel commences and ends in the state. See also, *Wabash, N. L. & P. R. Co. v. Illinois*, 118 U. S. 557, 30 L. ed. 244; *Louisville, N. O. & T. R. Co. v. State*, 2 Inters. Com. Rep. 615, 5 L. R. A. 132, 66 Miss. 662; *State v. Hicks*, 44 La. Ann. 770; *Ex parte Plessy*, 18 L. R. A. 639, 45 La. Ann. 80. The trend of recent cases in the Supreme Court has been to fully sustain the doctrine of the exclusiveness of the power of Congress over

interstate and foreign commerce. Thus in the case of *Wabash, St. L. & P. R. Co v. Illinois*, *supra*, the court held unconstitutional a statute of Illinois which enacted that if any railroad corporation shall charge, collect, or receive for the transportation of any passenger or freight of any description upon its railroad, for any distance within the state, the same or a greater amount of toll or compensation than is at the same time charged, collected or received for the transportation in the same direction of any passenger or like quantity of freight of the same class over a greater distance of the same road, all such discriminating rates, charges, collections, or receipts, whether made directly or by means of rebate, drawback, or other shift or evasion, shall be deemed and taken against any such railroad corporation as prima facie evidence of unjust discrimination, which was prohibited under penalty by the Act. In *Robbins v. Shelby County Taxing Dist.* 1 Inters. Com. Rep. 45, 120 U. S. 489, 30 L. ed. 694, the court held an act of Tennessee unconstitutional that required that drummers and all persons not having a regular licensed house of business in the taxing district of Shelby county, offering for sale or selling goods, wares, or merchandise therein by sample, shall pay to the county trustee the sum of \$10 per week, or \$25 per month, for such privilege. This was because it applied to persons soliciting the sale of goods on behalf of individuals and firms doing business in another state, and so far was a regulation of commerce among the states. In the case of *Minnesota v. Barber*, 3 Inters. Com. Rep. 185, 136 U. S. 313, 34 L. ed. 455, the court held a statute of Minnesota which required as a condition of sales in that state of fresh beef, veal, mutton, lamb, or pork, for human food, that the animals from which such meats are taken shall have been inspected in that state before being slaughtered, unconstitutional and void as an interference with interstate commerce. And again, in the case of *Crutcher v. Kentucky*, 141 U. S. 47, 35 L. ed. 649, the court held an act of the Kentucky legislature which provided that the agent of an express company not incorporated by that state should not

carry on business in the state without first obtaining a license from the state, and that he could not obtain such license until he satisfied the auditor of the state that the company he represented had an actual capital of \$150,000, was unconstitutional and void. The court said in that case:

"But the main argument in support of the decision of the court of appeals is that the act in question is essentially a regulation made in the fair exercise of the police power of the state. But it does not follow that everything which the legislature of a state may deem essential for the good order of society and the well-being of its citizens can be set up against the exclusive power of Congress to regulate the operations of foreign and interstate commerce. We have lately expressly decided in the case of *Leisy v. Hardin*, 3 Inters. Com. Rep. 36, 135 U. S. 100, 34 L. ed. 128, that a state law prohibiting the sale of intoxicating liquors is void when it comes in conflict with the express or implied regulation of interstate commerce by Congress, declaring that the traffic in such liquors as articles of merchandise between the states shall be free."

These and other cases show that the Supreme Court has had occasion and has given the subject of this exclusive power of Congress to regulate foreign and interstate commerce much consideration, and has insisted upon the exclusiveness of this power even as against the exercise of the police power by the several states of this Union. Whether or not a regulation of the defendant company that there should be separate cars or compartments for white and colored passengers, and the passengers be thus separated, is proper and reasonable, cannot arise on this demurrer, as there is nothing in the record showing any regulation or rule by the company. The question of the reasonableness of such a regulation of the company can only arise when the regulation is shown to have been made by the company. *Chicago & N. W. R. Co. v. Williams*, 55 Ill. 185, 8 Am. Rep. 641.

The defendant's demurrer to the petition must be overruled, and it is so ordered.

UNITED STATES DISTRICT COURT, EASTERN DISTRICT OF WISCONSIN.

Re MITCHELL *et al.*

(62 Fed. Rep. 576.)

A state cannot require a license fee for the privilege of traveling from place to place taking orders from consumers for goods to be delivered by a

merchant doing business in another state where his goods are located.

Decided June 25, 1894.

APPPLICATIONS for writs of habeas corpus to obtain the release of petitioners from custody to which they had been committed for failure to procure licenses for the privilege of soliciting orders for merchandise. *Writs granted.*

The facts sufficiently appear in the opinion.

Mr. Clarence H. Childs for petitioners.
Mr. Henry Fitzgibbon for respondent.

Seaman, District Judge, delivered the following opinion:

These several petitioners are imprisoned in Winnebago county upon convictions in justice court for alleged violation of section 1570 of the Revised Statutes of Wisconsin, and amendments thereof, which provide that no person who is not licensed by payment of a fee prescribed by a subsequent section shall travel from place to place within the state for sale of goods "at retail or to consumers," by sample or otherwise, with numerous exceptions of permanent traders and other classes, not including any under which the petitioners can claim exemption. They were all in the employ of W. A. Edwards, a dealer in various articles of merchandise, residing and having his place of business at Minneapolis, Minn., and all were soliciting orders for sale of the employer's goods for future deliveries, and having only samples with them. It is undisputed and conceded that the goods which they respectively offered for sale were at Minneapolis, and not in Wisconsin, and were legitimate and proper articles of commerce. No orders were in fact taken, and no sales or deliveries were actually made.

The aid of this court is invoked on the ground that the arrest and imprisonment in each case violates well settled rights of interstate commerce, of which the power to regu-

late is expressly reserved to Congress by the United States Constitution. Upon the state of facts here presented, it is clear that the petitioners were in the exercise of "interstate commerce," as defined by the Supreme Court in numerous decisions, and they were not infringing any law of the United States. The only justification for their imprisonment is asserted under the state statute entitled "Of Peddlers" (chapter 67, Rev. Stat. as amended by chapter 510, Wis. Laws, 1889; Sanb. & B. Ann. Stat. § 1570). It is unnecessary to determine whether the terms of this statute would intend the imposition of a license fee in these cases; but it is sufficient that the attempted enforcement is against a clear exercise of interstate commerce, and an interference therewith which is repugnant to that clause of the Constitution of the United States which declares that Congress shall have power to regulate commerce among the several states." *Robbins v. Shelby County Taring Dist.* 1 Inters. Com. Rep. 45, 120 U. S. 489, 30 L. ed. 694. The decisions of the Supreme Court are numerous and conclusive to this point, and are well summarized in the opinion of Mr. Justice Brewer, handed down April 30, 1894, in *Brennan v. Titusville*, 153 U. S. 289, 38 L. ed. 719. For their protection in this constitutional right the petitioners are entitled, respectively, to the writ, and it will be granted.

MICHIGAN SUPREME COURT.

COIT & CO. v. ELI R. SUTTON, *Plff. in Err.*

(25 L. R. A. 819.)

Foreign corporations selling through itinerant agents and delivering goods manufactured outside of the state are not, in view of the commerce clause of the United States Constitution affected

by state statutes requiring foreign corporations to file their articles of association with the secretary of state and pay a franchise fee as a condition of doing business within the state.

Decided October 16, 1894.

ERROR to the Circuit Court for Wayne County to review a judgment in favor of the plaintiff in an action brought to recover the contract price of certain lead alleged to have been sold and delivered by the plaintiff to the defendant. *Affirmed.*

The facts sufficiently appear in the opinion. **Mr. R. B. Wilkinson**, for plaintiff in error:

A state may exclude a corporation of any other state from doing business therein, or may

prescribe such terms and conditions for such foreign corporation as it may think proper.

Hartford F. Ins. Co. v. Raymond, 70 Mich. 501; *Paul v. Virginia*, 75 U. S. 8 Wall. 168, 19 L. ed. 857.

The true test of the matter is whether the burden of the tax falls on the thing which is the subject of the tax.

General Interest Ins. Co. v. Ruggles, 25 U. S. 12 Wheat. 419, 6 L. ed. 677.

The tax here falls upon the actual capita

NOTE.—The validity of contracts of a foreign corporation which has not complied with statutory conditions of the right to do business in the state is considered with a review of the authorities in a note to *Edison General Electric Co. v. Canadian Pac. Nav. Co.* (Wash.) 24 L. R. A. 315. But the cases there considered were chiefly in construction of the statutes as indicating an intent of the legislature in respect to making such contracts illegal. In the

present case the statute expressly declares void the contracts of a corporation which has not paid the tax, and the question is as to its application to interstate commerce. For the decisions as to the power to exclude foreign corporations as affected by the constitutional provision as to commerce, see note to *Kindel v. Beck & P. Lithographing Co.* (Colo.) 24 L. R. A. 311.

stock of the foreign corporation. It is paid from the money actually in the corporation before any of the goods are imported, and is not directly or indirectly paid out of the proceeds of the goods imported or sold.

Philadelphia & S. Mail SS. Co. v. Com. 104 Pa. 109.

A law imposing a license on all sewing machine peddlers is not void as interfering with commerce between states, and this is so without regard to whether the machines are manufactured outside the state or not.

Hunte Mach. Co. v. Gage, 100 U. S. 676, 25 L. ed. 754.

There is no tax upon the thing which is the subject of commerce, nor is there any way in which the tax falls on the buyer of the article.

Horn Silver Min. Co. v. New York, 148 U. S. 315, 36 L. ed. 168, 4 Inters. Com. Rep. 57.

The plaintiff in the court below did not seem to be able to distinguish between a franchise tax and a tax upon the capital stock of a corporation.

Beach, Priv. Corp. p. 799; *Desty, Taxn.* § 76, and cases cited; *State v. Stonecall*, 89 Ala. 338; 4 Am. & Eng. Enc. Law, 272d, and cases cited in note.

Mr. A. A. Ellis, Atty. Gen., also for plaintiff in error:

I am willing to rest the validity of this act upon the decision of the United States Supreme Court in the case of *Horn Silver Min. Co. v. New York*, 148 U. S. 305, 36 L. ed. 164, 4 Inters. Com. Rep. 57, which sustained the validity of a similar statute.

Under a statute of Ohio, requiring corporations filing their articles with the secretary of state to pay a fee based on the capital stock of the company, a statute very similar to the one under discussion, it was held that it did not impose any charge on interstate commerce or prohibit foreign corporations from engaging in interstate commerce within its confines.

Ashley v. Ryan, 153 U. S. 436, 38 L. ed. 778.

Messrs. Bowen, Douglas & Whiting, for defendant in error:

The act is unconstitutional and void because it is in conflict with that portion of the Federal Constitution which provides that Congress shall have the power to regulate commerce among the several states.

If by a stretch of the imagination the act could be said to be a police regulation, yet it cannot be sustained because it interferes with the exclusive authority of the Federal government to deal with questions of interstate commerce.

New Orleans Gas Light Co. v. Louisiana Light & H. P. & Mfg. Co. 115 U. S. 650, 29 L. ed. 516.

Though it is a well-settled principle that a state may prescribe any conditions which it chooses to prescribe, under which foreign corporations must act, if they act at all, within that state.

Home Ins. Co. v. Davis, 29 Mich. 240; *Hartford F. Ins. Co. v. Raymond*, 70 Mich. 501; *Paul v. Virginia*, 75 U. S. 8 Wall. 168, 19 L. ed. 357.

This principle is subject to some exceptions, and one of these is that any restriction or regulation imposed upon foreign corporations which interferes with interstate commerce is

4 INTER 8.

invalid because contrary to the "commerce clause" of the Federal Constitution.

Paul v. Virginia, *supra*; *Pennsylvania Teleg. Co. v. Western U. Teleg. Co.* 96 U. S. 1, 24 L. ed. 708; *Cooper Mfg. Co. v. Ferguson*, 118 U. S. 727, 28 L. ed. 1187; *Bowman v. Chicago & N. W. R. Co.* 125 U. S. 465, 31 L. ed. 700, 1 Inters. Com. Rep. 523; *Pembina Consol. Silver Min. & Mill. Co. v. Pennsylvania*, 125 U. S. 190, 31 L. ed. 654, 2 Inters. Com. Rep. 24; *Pullman Palace Car Co. v. Pennsylvania*, 141 U. S. 25, 35 L. ed. 617, 3 Inters. Com. Rep. 595; *Horn Silver Min. Co. v. New York*, 148 U. S. 314, 36 L. ed. 168, 4 Inters. Com. Rep. 57; *Gunn v. White Sewing Mach. Co.* 18 L. R. A. 206, 57 Ark. 24; *Bateman v. Western Star Mill. Co.* 4 Inters. Com. Rep. 260, 1 Tex. Civ. App. 90; *Simmons Hardware Co. v. McGuire*, 39 La. Ann. 848.

The states have no power to impose restriction or regulation upon interstate commerce.

Brown v. Maryland, 25 U. S. 12 Wheat. 419, 6 L. ed. 678; *Paul v. Virginia*, 75 U. S. 8 Wall. 168, 19 L. ed. 357; *Cooper Mfg. Co. v. Ferguson*, 118 U. S. 727, 28 L. ed. 1187; *Brown v. Houston*, 114 U. S. 622, 29 L. ed. 257; *Robbins v. Shelby County Taxing Dist.* 120 U. S. 489, 30 L. ed. 694; *Bowman v. Chicago & N. W. R. Co.* and *Pembina Consol. Silver Min. & Mill. Co. v. Pennsylvania*, *supra*; *Leloup v. Mobile*, 127 U. S. 640, 32 L. ed. 311, 2 Inters. Com. Rep. 184; *Asher v. Texas*, 138 U. S. 129, 32 L. ed. 368, 2 Inters. Com. Rep. 241; *Stoutenburgh v. Hennick*, 129 U. S. 141, 32 L. ed. 637; *Leisy v. Hardin*, 135 U. S. 100, 34 L. ed. 128; *Lyng v. Michigan*, 135 U. S. 161, 34 L. ed. 150, 3 Inters. Com. Rep. 143; *McCall v. California*, 136 U. S. 104, 34 L. ed. 391, 3 Inters. Com. Rep. 181; *Pullman Palace Car Co. v. Pennsylvania*, *supra*; *Crutcher v. Kentucky*, 141 U. S. 58, 35 L. ed. 652; *Horn Silver Min. Co. v. New York*, *Gunn v. White Sewing Mach. Co.*, and *Bateman v. Western Star Mill. Co.*, *supra*; *Lyons-Thomas Hardware Co. v. Reading Hardware Co.* (Tex.) 32 Am. L. Reg. 661; *Ware v. Hamilton-Brown Shoe Co.* 92 Ala. 145; *Singer Mfg. Co. v. Hardee*, 4 N. M. 175; *Re Kimmel*, 3 Inters. Com. Rep. 114, 41 Fed. Rep. 775; *Re White*, 11 L. R. A. 284, 3 Inters. Com. Rep. 531, 43 Fed. Hooker, J., delivered the opinion of the court:

The plaintiff, a corporation of the state of Illinois, recovered a judgment in the Wayne county circuit court, from which the defendant appeals. The finding of facts shows that plaintiff was engaged in the business of shipping from Illinois goods manufactured in that state, to its customers in Michigan, on orders given it by mail, or taken by its agents in Michigan; that on January 23, 1894, the plain-

tiff, through its duly authorized agent, entered into a written contract with the defendant, in the city of Detroit, Mich., for the sale to him of a quantity of white lead at a specified price, to be paid for upon delivery; that on January 27, 1894, delivery of the lead was tendered at Detroit. The defendant refused to receive the lead, claiming the contract to be void. At the time of making such tender the plaintiff had not filed articles of association in this state, and had not paid to the secretary of state a franchise fee, as provided by No. 79 of the Laws of 1893. Counsel for plaintiff seek to avoid the effect of said act, contending that it is in conflict with the provision of the Federal Constitution that "Congress shall have power to regulate commerce among the several states." Article 1, section 8. The defendant relies upon the familiar rule that states may impose conditions upon the right of foreign corporations to do business within their limits. This rule has been recognized by the Federal courts where it does not conflict with the power of Congress to regulate commerce. See *Paul v. Virginia*, 75 U. S. 8 Wall. 168, 19 L. ed. 357. But, where the effect is to restrain or obstruct commerce among the states, it cannot be applied; the Federal decisions, to which we must look for a construction of the Constitution, holding that it is the right of persons residing in one state to contract and sell their commodities in another, unrestrained except where restraint is justified under the police power, by states, or by Act of Congress, and that this right extends to corporations. *Paul v. Virginia*, *supra*; *Brown v. Maryland*, 25 U. S. 12 Wheat. 425, 6 L. ed. 680; *Welton v. Missouri*, 91 U. S. 275, 23 L. ed. 347; *Pen-*

sacola Teleg. Co. v. Western Union Teleg. Co. 96 U. S. 1, 24 L. ed. 708; *Webber v. Virginia*, 103 U. S. 344, 26 L. ed. 565; *Cooper Mfg. Co. v. Ferguson*, 113 U. S. 727, 28 L. ed. 1137; *Pembina Consol. Silver Min. & M. Co. v. Pennsylvania*, 125 U. S. 181, 31 L. ed. 650, 2 Inters. Com. Rep. 24; *Bowman v. Chicago & N. W. R. Co.* 125 U. S. 465, 31 L. ed. 700, 1 Inters. Com. Rep. 823; *Moran v. New Orleans*, 112 U. S. 69, 28 L. ed. 653; *Pickard v. Pullman Southern Car Co.* 117 U. S. 34, 29 L. ed. 785; *Robbins v. Shelby County Taxing Dist.* 120 U. S. 489, 30 L. ed. 694, 1 Inters. Com. Rep. 45; *Leloup v. Mobile*, 127 U. S. 640, 32 L. ed. 312, 2 Inters. Com. Rep. 134; *Fargo v. Stevens*, 121 U. S. 290, 30 L. ed. 890, 1 Inters. Com. Rep. 51; *Philadelphia & S. Mail SS. Co. v. Pennsylvania*, 122 U. S. 326, 30 L. ed. 1200, 1 Inters. Com. Rep. 308; *Pullman Palace Car Co. v. Pennsylvania*, 141 U. S. 18, 35 L. ed. 618, 8 Inters. Com. Rep. 595; *Brennan v. Titusville*, 153 U. S. 289, 38 L. ed. 712.

The law in question imposes a tax upon corporations for the privilege of doing business in Michigan. It is a tax upon the occupation of the corporation, with a provision that all its contracts shall be void until the tax is paid, which, if enforced, would embarrass plaintiff in its commerce with inhabitants of Michigan. It must therefore be held that the act in question does not apply to foreign corporations whose business within this state consists merely of selling through itinerant agents, and delivering, commodities manufactured outside of this state.

The judgment of the circuit court will be affirmed.

The other Justices concurred.

OKLAHOMA SUPREME COURT.

S. F. BUTNER, *Plff. in Err.*,

v.

WESTERN UNION TELEGRAPH CO.

(.....Okla.....)

*1. An act of the territorial legislature which regulates the order of receipt and transmission of telegraphic messages, and prescribes a penalty for its violation, but which does not attempt to regulate the delivery of messages outside the territory, or of messages sent from without the territory, is not in conflict with the constitutional provision giving to Congress the right to regulate commerce between the states and territories.

2. Paragraph 543 of the Oklahoma Statutes of 1890, imposing a penalty of \$50 upon carriers of messages for certain breaches of duty, does not apply to a failure to deliver a message, but only applies to the failure to receive or transmit messages in

the order presented. It is a penal statute, and must be strictly construed.

3. The sendee of a telegraphic message cannot maintain an action against a telegraph company for neglect, delay or nondelivery of a message, in the absence of a showing that it was sent by his agent or was sent for his benefit, and that the carrier had active or constructive notice that it was so sent for the benefit of the sendee.

4. The terms "carelessly, wrongfully, and negligently failed and neglected" to deliver a message, used in a complaint, import ordinary and simple negligence, and nothing more.

5. Damages for mental pain and suffering alone, occasioned by the negligence of a telegraph company in failing to deliver a message announcing the death of a relative, cannot be recovered.

*Headnotes by the Court.

Decided Sept. 7, 1894.

IN ERROR to the district court for Logan county to review a judgment in favor of defendant in an action brought to recover damages for defendant's failure to promptly transmit and deliver a telegraph message. *Affirmed.*

The facts are stated in the opinion.

4 INTER S.

Mr. J. A. Baker for plaintiff in error.

Messrs. Asp, Shortell & Cottingham for defendant in error.

Burford, J. delivered the opinion of the court:

The plaintiff in error filed his complaint in the district court of Logan county against the defendant in error to recover damages for delay in the delivery of a telegram. The complaint alleges in substance that the plaintiff is a resident of Logan county, Okla., and that the defendant was on the 1st day of January, 1893, a corporation duly organized under the laws of the state of New York for the transmission of messages by wire for reward, and owned and operated a telegraph line from Mulvane, in the state of Kansas, to Guthrie, in Oklahoma territory, and was at said time a common carrier of messages for reward between said last named places; that on said date defendant received a message at Mulvane, Kan., for transmission to plaintiff, and received the usual charges thereon; that said message was from plaintiff's son-in-law, John Payne, and announced the death of plaintiff's daughter, and is of the following tenor: "Mulvane, Ks., 1-1, 1893. To S. T. Butner, Dep. Sheriff, c-o Hixon. Sheriff Logan Co.: Bertie died this morning, ten o'clock. Come at once. Ans. John Payne." It is further alleged that defendant negligently, carelessly, and wrongfully, and without fault of plaintiff, failed to deliver said telegram to plaintiff, or the person in whose care it was addressed, for a period of 48 hours after the transmission of said message to Guthrie, O. T.; that, by reason of the said careless and negligent conduct of defendant, plaintiff was not informed of the death of his daughter until two days after her said death; that, after receiving said message, plaintiff was unable to communicate the death of his daughter to his immediate family and the members of his household, who were near relatives, and warmly attached to plaintiff's deceased daughter, in time for them to attend her funeral, and they were deprived of attending her funeral; that plaintiff was unable to make a respectful and proper preparation for attending the funeral of his daughter; that, by reason of such negligence and carelessness upon the part of defendant, plaintiff has suffered great mental pain, distress, humiliation, and mortification, to his damage \$5000, for which he prays judgment. To this complaint the defendant demurred for the reason that the facts alleged were not sufficient to constitute a cause of action. The district court sustained the demurrer, and, plaintiff refusing to plead further, judgment was rendered for defendant for costs, and complaint dismissed.

The ruling of the court in sustaining the demurrer is complained of as error. It appears from the briefs of counsel that there is a contention as to whether this is an action to recover for breach of contract, or for a tort. From our view of the case, this question is immaterial. The main question to be determined is whether mental pain or anguish alone, resulting from the negligent nondelivery of a telegram, constituted an independent basis for damages. On this question there is a conflict of authority which is irreconcilable. The

question is an open one in this territory, and in establishing a precedent this court should adopt that rule which best commends itself to reason and justice, and is based on the soundest principles of law and logic. The English courts have invariably held that mental suffering alone, unaccompanied with an physical or corporal injury, cannot be the basis for the recovery of damages, except in such cases as seduction, false imprisonment, libel, slander breach of promise of marriages, malicious prosecution, and other tortious wrongs committed with a willful or malicious intent to do the wrong. In all these instances, unless there exists some corporal injury, the right to recover damages for mental suffering depends upon the element of positive wrong, willfully or maliciously perpetrated. The allegations of the complaint in this case do not bring it within such rule, as only ordinary negligence is alleged. *Kansas Pac. R. Co. v. Pointer*, 14 Kan. 37; *Gregory v. Cleveland, C. C. & I. R. Co.* 112 Ind. 385. The American courts seem to have followed the rule of the English courts until the case of *So Relle v. Western U. Tele. Co.* 55 Tex. 308, 40 Am. Rep. 805, was decided by the supreme court of Texas, in which it was held that damages might be recovered in an action for nondelivery of a telegraphic message similar to the case at bar. The principal of this case has been followed, with some variations, by the same court, in many cases since that decision, and its reasoning has been substantially adopted by the courts of last resort in the states of Indiana, Kentucky, Tennessee, Alabama, and North Carolina. *Gulf, C. & S. F. Tele. Co. v. Richardson*, 79 Tex. 649; *Wadsworth v. Western U. Tele. Co.* 86 Tenn. 695; *Western U. Tele. Co. v. Henderson*, 89 Ala. 510; *Reese v. Western U. Tele. Co.* 7 L. R. A. 588, 123 Ind. 294; *Chapman v. Western U. Tele. Co.* 90 Ky. 265; *Young v. Western U. Tele. Co.* 9 L. R. A. 669, 107 N. C. 370. On the other hand, the right to recover damages for mental anguish occasioned by the delay or nondelivery of a telegraphic message has been expressly denied, and the doctrine condemned, by the highest courts in the states of Georgia, Florida, Mississippi, Missouri, Kansas, Dakota, Wisconsin, Nevada, the United States circuit court of appeals, and by practically the unanimous current of authority in the Federal courts. *Carrson v. Western U. Tele. Co.* 47 Fed. Rep. 544; *Chase v. Western U. Tele. Co.* 10 L. R. A. 464, 44 Fed. Rep. 554; *Kester v. Western U. Tele. Co.* 55 Fed. Rep. 603; *Western U. Tele. v. Wood*, 21 L. R. A. 708, 57 Fed. Rep. 471; *Tyler v. Western U. Tele. Co.* 54 Fed. Rep. 684; *Wilcox v. Richmond & D. R. Co.* 8 U. S. App. 118, 52 Fed. Rep. 264; *Russell v. Western U. Tele. Co.* 3 Dak. 315; *Victorian R. Comrs. v. Coultas*, L. R. 13 App. Cas. 222; *Lynch v. Knight*, 9 H. L. Cas. 577; *International O. Tele. Co. v. Saunders*, 21 L. R. A. 810, 82 Fla. 484; *Chapman v. Western U. Tele. Co.* 17 L. R. A. 430, 88 Ga. 763; *West v. Western U. Tele. Co.* 39 Kan. 98; *Salina v. Trosper*, 27 Kan. 544; *Western U. Tele. Co. v.*

Rogers, 13 L. R. A. 859, 68 Miss. 748; *Wynman v. Leavitt*, 71 Me. 227, 36 Am. Rep. 303; *Connell v. Western U. Teleg. Co.* 20 L. R. A. 172, 116 Mo. 34; *Johnson v. Wells, Fargo & Co.* 6 Nev. 224; *Ewing v. Pittsburg, C. & St. L. R. Co.* 147 Pa. 40; *Gahan v. Western U. Teleg. Co.* 59 Fed. Rep. 483; *Summerfield v. Western U. Teleg. Co.* (Wis.) Jan. 30, 194. If the authorities holding the affirmative of this proposition presented uniformity of the result obtained, and harmony in the reasoning attempted in support of it, the array would be formidable. Their force, however, is weakened by self-evident disparity of reasoning and conflict of result. Some hold that mental anguish is not a cause of action, but is merely a dependent incident to be taken into consideration in addition to pecuniary damages shown, while others assert that it is an independent cause of action,—a distinct element of damage. Some hold that negligence sufficient to uphold a recovery must be willful; others, that simple negligence will suffice. Some uphold the recovery on the ground of punishment; others, upon the ground of compensation; and some blend both grounds. This conflict exists, not only between the courts of the different states entertaining this view, but in one instance is exhibited in the decisions of a single state. The supreme court of Texas, in the course of its adjudications upon this subject, has held both the affirmative and the negative of all the propositions above enumerated. Numerous other conflicts exist among the decisions of that court; notably, the affirmation and the denial of the rule that the sendee, before he can recover, must identify himself with the contract of transmission. The Tennessee and Alabama cases are not authority in favor of the plaintiff's position, because they refuse to recognize mental pain as an element of damage. They hold it to be an incident merely, to be taken into consideration in addition to pecuniary loss.

There is a decided weight of authority against the right of the plaintiff in error to recover for mental suffering, but we are constrained to rely upon principle, as well as authority, in a case of this kind. The law of telegraph companies cannot trace its distinctive features into the antiquity of the common law. But the duty of the courts, upon the advent of new conditions, is to assimilate the ancient principles of the common law to the new conditions by the process of reasoning called "analogy;" applying old principles, governing previously established relations of a similar character, to the determination of rights arising under the new conditions. If the simple process of inductive reasoning from ancient principles applied to new conditions is inadequate to meet the public conception of expediency and justice, the work of applying new principles to new conditions is a legislative, and not a judicial function. Similar conditions produce similar results. Similar facts left to be dealt with by the judiciary ought to produce uniform rules of law applying to all of such conditions. In entering upon a discussion of this important question, the courts should keep strictly within the line of the judicial path, and not infringe on the province of the legislative branch of government. The question should be resolved by a

reference to the position which mental pain and anguish has heretofore sustained in remedial law as a basis for damages. Mental anguish, prior to the advent of the doctrine contended for in this case, occupied a well defined position in the law of damages, and was not recognized in cases of this character.

It is, however, claimed that the damages in question can be upheld by assimilating them to the damages awarded in cases of physical injury. That mental anguish and suffering can be taken into consideration in cases of corporal injury is too well settled to be for a moment questioned. If some authorities on this question are to be followed as sound law, it might give some countenance to the contention. This we say with a special reference to the decisions of the courts in attempting to draw this argument from this source. They state the premise broadly, in terms which admit all mental suffering resulting from a bodily injury as proper to be considered by the jury in assessing the damages. Such, however, is not the law of any well-considered case that we have been able to find dealing specifically with the question before it for decision as to what mental pain and anguish may be lawfully considered by the jury in cases of corporal injuries. All the well-considered cases dealing explicitly with this question hold that the mental anguish involved in the consideration of the amount of damages to be awarded is that mental anguish connected with the physical suffering,—in short, the mental anguish resulting from the consciousness of physical pain. All independent conceptions of the mind, such as the contemplation of the loss of a goodly appearance, the fear of want, and the like, are to be excluded. *Chicago v. McLean*, 8 L. R. A. 765, 133 Ill. 148; *Kennon v. Gilmer*, 131 U. S. 22, 27, 33 L. ed. 110, 112; *Joch v. Dankwardt*, 85 Ill. 331; *Clinton v. Laning*, 61 Mich. 355; *Trigg v. St. Louis, K. C. & N. R. Co.* 74 Mo. 147, 153, 41 Am. Rep. 305; *Salina v. Trooper*, 27 Kan. 544; *Johnson v. Wells, Fargo & Co.* 6 Nev. 224. It is asserted that mental pain is just as much a proximate result of the wrong in the breach of the contract of transmission of a social telegram as mental pain is the proximate result of the wrong in cases of corporal injury. That statement is true, but the fallacy of this argument rests in the fact that the law does not take notice of mental anguish in cases of corporal injuries merely because it is the proximate result of the wrong. It must be something more. It must be identified with physical pain, of which the law of damages does take notice, before it will be considered. The sorrowful reflections of an injured person over his changed physical condition, of the proximate result of the physical injury, and many other conceptions, arise out of a case of this kind, independently of the physical suffering that proximately result from the injury, which the law entirely disregards. The law recognizes the mental anguish which is connected with and a part of the physical pain, not because it is the proximate result of the injury, but because it is so identified with the physical pain that to disregard it would be to disregard the physical suffering itself. If mental pain were recognized in these cases distinctly and

solely as mental pain, it might afford some argument in favor of the plaintiff in this case; but the plaintiff in the case seeks to recover for mental suffering,—for impressions of the mind wholly distinct from bodily or material complications. The mental suffering regarded as a corporal injury cases is of a wholly different character. It considers mind in its bodily or physical aspect, and disregards it in its purely mental or spiritual sense. This distinction destroys the argument.

For the reasons above outlined, we conceive that the infliction of damages for mental anguish fails to have passed the imposed tests, and cannot be assimilated by the process of analogy to the law obtaining upon any other similar pre-existing relations. On the other hand, heretofore, and even to the present time, with the single exception of the question of the case at bar, it has been uniformly held that in any case resulting from tort or breach of contract, where no other damage than mental suffering can be shown, there is no cause of action.

Suth. Dam. 715; Trigg v. St. Louis, K. C. & V. R. Co. 74 Mo. 153, 41 Am. Rep. 305; Wilcox v. Richmond & D. R. Co. 17 L. R. A. 804, 8 S. App. 118, 52 Fed. Rep. 267. In the case of *Western U. Teleg. Co. v. Wood*, 21 L. R. A. 06, 57 Fed. Rep. 471, the United States circuit court of appeals remarks: "The general rule that mental anguish and suffering, unattended by any injury to the person, resulting from simple actionable negligence, cannot be sufficient basis for an action for the recovery of damages, is maintained and supported by an unbroken line of English authorities by the present state of the general law prior to the *Robtelle* case." In *Masters v. Warren*, 27 Conn. 293, it is said: "No case can be found where a person has been allowed to recover damages for a shock, injury, or outrage to the feelings and sensibilities, arising and caused by the breach of contract, except it is a marriage contract. Such damages can only enter into and become a part of the recovery when the plaintiff has sustained, by the negligence or willful act of another, some corporal or personal injury. They never can be recovered independently and alone, and, if recoverable at all, only in action of tort." The supreme court of Mississippi, in the case of *Western U. Teleg. Co. v. Rogers*, 13 L. R. A. 859, 68 Miss. 748, remarks: "We have given to the investigation the question that consideration which its importance demands, and, though the right of the plaintiff to recover the damages awarded in this case finds support in the decisions of several of the states, we are unwilling to depart from the long established and almost universal rule of law that no action lies for the recovery of damages for mere mental suffering, disconnected from physical injury, and not the result of the willful wrong of the defendant. That such damages are recoverable in actions for breach of contract of marriage is well settled; it is equally true that until recent years this position stood as the marked and single exception in which such damages were recoverable in actions for breach of contract. This action, though in form one for the breach of contract, strikes in several features of the characteristics of an action for the willful tort; and, though the damages recoverable by the plaintiff

INTER S.

for mental suffering are spoken of as 'compensatory,' the fervent language of the courts indicates how shadowy is the line that separates them from those strictly punitive. . . . We are not disposed to depart from what we consider the old and settled principles of law, nor to follow the few courts in which the new rule has been announced. The difficulty of applying any measure of damages for bodily injury is universally recognized and commented on by the courts. But in that class of cases demands for simulated or imaginary injuries are far less likely to be made than will those in suits for mental pain alone. No one but the plaintiff can know whether he really suffers any mental disturbance, and its extent and severity must depend upon his own mental peculiarity. In the nature of things, money can neither palliate nor compensate the injury he sustained. 'Mental pain and anxiety the law cannot value, and does not pretend to redress, when the unlawful act complained of causes that alone.'" In the case of *Chapman v. Western U. Teleg. Co.* reported in 17 L. R. A. 430, 88 Ga. 763, the supreme court of Georgia forcibly remarks: "But it is urged that the public occupation of telegraph companies creates between them and the public special relations, in which their responsibility is greater than that of other persons. So much of their business and profit is derived from the acceptance of messages involving feelings only that at first view it would seem legitimate and salutary to require them to answer in damages for any dereliction of duty in this important part of their activity. The argument is that, in the exercise of a public employment, they undertake, for hire, to serve the feelings of their customers, and therefore ought to pay for negligent nonperformance or misperformance of this peculiar function. This reasoning is unanswerable, so far as it proves a right of action to arise out of the breach of duty. But how about damages, and the measure of damages? It can scarcely be that a new and exceptional principle of damages emerges, *ex proprio rigore*, from unknown recesses of the law, when occasion seems to require it, or that the court can do more than adapt and apply principles already existing when novel transactions, such as those which make up the business of telegraphy, became the subject of adjudication. Precedents must be followed, else the law will become a wandering, uncertain thing. If our understanding of the law, as heretofore expounded by its accredited oracles, be correct, it would be a judicial innovation to require feelings which had, even under contract or public duty, the right to expect help, to be solaced with damages for the disappointment, however severe, at losing the promised benefit. If the subject needs new law, the lawmaking powers may create it, but we decline to usurp their prerogative." In the case of *Wadsworth v. Western U. Teleg. Co.* 86 Tenn. 695, Judge Lurton, dissenting, said: "The reason why an independent action for such damages cannot and ought not to be sustained is found in the remoteness of such damages. . . . Such injuries are generally more sentimental than substantial, depending largely upon physical and nervous condition. The suffering of one under precisely the same circumstances would be no test of the

suffering of another. Vague and shadowy, there is no possible standard by which such an injury can be justly compensated, or even approximately measured. Easily simulated, and impossible to disprove, it falls within all of the objections to speculative damages, which are universally excluded because of their uncertain character. That damages so imaginary, so metaphysical, so sentimental, shall be ascertained and assessed by a jury with justness, not by way of punishment to the defendant, but as a mere compensation to the plaintiff, is not to be expected. That the grief natural to the death of a loved relative shall be separated from the added grief and anguish resulting from delayed information of such mortal illness or death, and compensation given for the latter only, is the task imposed by the law, as determined by the majority. But the rule in question has not been limited, as claimed, to actions based upon physical pain. It has, as we have already seen, upon the authority of *Mr. Wood*, been applied to actions of slander and libel. No matter how gross the insult, or how harrowing to the feelings, there can be no recovery if the slander did not imply a crime, or result in some special damage. The same rule applies in actions brought for the death of another. The plaintiff must have a pecuniary interest in such life, and in such cases there can be no recovery for the injured feelings, the grief, or anguish suffered by the plaintiff, in consequence of the death for which the suit lies. This is the rule, regardless of the relation the deceased bore to the plaintiff. Whether husband or wife, or parent or child, the rule is the same. The damages are for the pecuniary loss sustained. . . . The principles upon which this suit is maintained seems to be so radical . . . a departure from the headlands of the law, and to so seriously threaten the uprooting of doctrines that I have been taught to revere as the very foundation stones of the system of our law upon the subject of contracts and damages, as to make it my duty to give expression to my views upon the questions involved." In our view the departure initiated in Texas, and followed by some other states, is not supported by sound reasoning, and is not in harmony with the well-defined principles of law which the experience of the past have found safe and reliable.

It is insisted by counsel for plaintiff in error that he is entitled to recover the statutory penalty of \$50 provided by the statutes of Oklahoma. Section 28, chap. 11, p. 152, Stat. Okla. 1893, provides: "A carrier of messages by telegraph must, if it is practicable, transmit every such message immediately upon its receipt, but if this is not practicable and several messages accumulate upon his hands he must transmit them in the following order: First, Messages from public agents of the United 4 INTER S.

States or of this territory on public business. Second. Messages intended in good faith for immediate publication in newspaper and not for any secret use. Third. Messages giving information relating to the sickness or death of any person. Fourth. Other messages in the order in which they were received." "Sec. 30. Every person whose message is refused or postponed contrary to the provisions of this chapter is entitled to recover from the carrier his actual damages and fifty dollars in addition thereto." This is a penal statute, and must be strictly construed; and, before one can recover the penalty therein imposed, he must state specifically every fact to bring himself strictly within all its terms. *Western U. Teleg. Co. v. Steele*, 108 Ind. 163; *Kirby v. Western U. Teleg. Co.* (S. D.) Dec. 15, 1893. It will be observed that this statute relates to the receipt and transmission of messages, regulating the order in which they shall be received and transmitted, and does not attempt to regulate the mode, means, or time of their delivery. The message in question was sent from Mulvane, Kan., and any statute of Oklahoma which would attempt to prescribe the order of its receipt at or transmissal from that point would be in conflict with the power of Congress to regulate commerce between the states and territories and would be unconstitutional. *Western U. Teleg. Co. v. Pendleton*, 122 U. S. 347, 30 L. ed. 1187, 1 Inters. Com. Rep. 306; *Western U. Teleg. Co. v. Texas*, 105 U. S. 460, 28 L. ed. 1067; *Rogers v. Western U. Teleg. Co.* 122 Ind. 395. This statute does not attempt to regulate or interfere with the delivery of messages sent to another state, but simply prescribes the order of transmission, and compels the acceptance of messages when presented in the order mentioned. This is not an interference with interstate commerce, and is a proper exercise of the legislative authority. *Connell v. Western U. Teleg. Co.* 108 Mo. 459. There are no allegations of the complaint that would entitle the plaintiff to recover the statutory penalty.

Plaintiff in error insists that he is, in any event, entitled to recover nominal damages. No damages are claimed in the complaint, except for mental anguish. *Russell v. Western U. Teleg. Co.* 3 Dak. 315. There is nothing on the face of the telegram to indicate to the company or its agents that there was any relationship, of any character, existing between the sender and sendee of the message, or of the deceased mentioned in the message, and no allegation that the defendant was notified of any such relationship, or for whose benefit the message was sent.

We find no error in the record. The judgment of the district court is affirmed, at the costs of the plaintiff in error.

All the justices concurring, except **Dale**, J., not sitting.

UNITED STATES CIRCUIT COURT, DISTRICT OF MASSACHUSETTS.

UNITED STATES

v.

JOHN H. PATTERSON *et al.*

(51 Fed. Rep. 1006.)

1. An indictment for conspiracy in restraint of trade or commerce, under the Act of Congress of July 2, 1890, must declare the means by which it is intended to engross or monopolize the market; and it is not sufficient to declare the conspiracy in the words of the enactment.
2. Allegations of what was done in pursuance of an alleged conspiracy cannot enlarge the necessary allegations of an indictment for conspiracy under a particular statute, such as the Act of Congress against conspiracies in restraint of commerce.
3. Insufficient allegations in an indictment which alleges the offense with reasonable precision, are only surplusage under a general demurrer.
4. A conspiracy to drive certain competitors out of the field by violence, annoyance, intimidation or otherwise is not within the prohibition of the Act of Congress against conspiracies in restraint of trade, where there is no aim to engross, monopolize or grasp the market.
5. Violence and intimidation are as much within the mischief of the Act of Congress against conspiracies in restraint of trade or commerce as negotiations, contracts or purchases, if such means are used for the purpose of engrossing, monopolizing or grasping a particular trade.

Decided Feb. 28, 1893.

ON DEMURRER to an indictment charging a violation of the United States statute against conspiracies to monopolize trade and commerce. *Sustained except as to four counts.*

The fourth count in the indictment charged that defendants did unlawfully, wickedly, unjustly, oppressively, and maliciously engage in a combination and conspiracy in restraint of trade and commerce in cash registers between and among the several states of the United States by means of annoying, harassing and intimidating all persons, firms and corporations then engaged in the said trade and commerce, who by reason of their business then competed with the National Cash Register Company in the said trade and commerce in cash registers, by means of threatening such competing persons, firms and corporations and their members, officers, agents and employes, by causing such members, officers, agents and employes to be assaulted and injured, by inducing them to quit their employment, by employing spies to obtain knowledge of the business secrets, by threatening prospective purchasers with annoyance and with suits for infringement, thereby to stifle competition and render it impossible for competing persons to engage in fair and honest competition in trade and commerce with the National Cash Register Company.

The fourteenth count was similar to the fourth, except that it states that the object of the conspiracy was to monopolize the business.

The ninth count was similar, with the exception that it sets out more in detail the acts of the defendants, and the eighteenth count was similar to the ninth, with the exception that it also alleged an intention to monopolize the trade.

Further facts appear in the opinion.

Mr. Frank D. Allen, U. S. Atty., for complainant.

Messrs. H. W. Chaplin and Elihu Root, for defendants.

4 INTER S.

Putnam, Circuit Judge, delivered the opinion of the court:

I do not think there is any constitutional question in this case upon any view of this statute, or upon the face of the indictment. The right of free commerce granted by the Constitution (*Crandall v. Nevada*, 73 U. S. 6 Wall. 35, 18 L. ed. 745, and *Philadelphia & R. R. Co. v. Pennsylvania* ("State Freight Tax") 82 U. S. 15 Wall. 232, 21 L. ed. 146) permits broad legislation; and in no sense is this statute as broad as the Revised Statutes (§ 5508) on the principle of construction applied to the latter in *United States v. Waddell*, 112 U. S. 76, 28 L. ed. 673. See *Logan v. United States*, 144 U. S. 263, 36 L. ed. 429. There may be practical difficulties in applying the statute in such way as to prevent conflicts with state jurisdictions, but these can only arise on the development of the facts at the trial of a particular case, and even then the court will have the guidance of the Supreme Court in *Cross v. North Carolina*, 132 U. S. 131, 33 L. ed. 287, and *Fitzgerald v. Green*, 134 U. S. 377, 33 L. ed. 951. Those cases show that there need not necessarily be a conflict of jurisdiction.

This statute is not one of the class where it is sufficient to declare in the words of the enactment, as it does not set out all the elements of a crime. A contract, combination, or conspiracy in restraint of trade may be not only not illegal, but praiseworthy; as, where parties attempt to engross the market by furnishing the best goods, or the cheapest. So that ordinarily a case cannot be made under the statute unless the means are shown to be illegal, and therefore it is necessary to declare the means by which it is intended to engross or monopolize the market. And by the well-settled rules of pleading it is not sufficient to allege the means in general language, but, if it is claimed that the means used are illegal, enough must be set

out to enable the court to see that they are so, and to enable the defense to properly prepare to meet the charge made against it.

I regard the rule laid down by the Supreme Court in *United States v. Hess*, 124 U. S. 483, 31 L. ed. 516, as applying to this case; and I think the case of *United States v. Simmons*, 96 U. S. 360, 24 L. ed. 819, is easily distinguished. If it is not, the later case will, of course, control. In reference to the suggestion of the counsel for the United States, as to cases at common law alleging conspiracy to prevent a man from pursuing his trade, it is sufficient to say that to conspire to prevent a man from pursuing his trade is in itself illegal. But the case at bar is not at common law, and the proceedings under this statute are peculiar to the statute. I think the rules laid down in *United States v. Hess* distinguish this indictment from all the cases and principles of law relied on by the United States.

The allegations of what was done in pursuance of the alleged conspiracy are under this particular statute irrelevant, and cannot be laid hold of to enlarge the necessary allegations of the indictment, and are of no avail. I think it was so conceded at the argument. If not, there is no question about the law. This disposes of counts 1, 2, 3, 6, 7, 8, 11, 12, 13, 15, 16, and 17.

That the means are alleged with "reasonable precision" in the remaining counts, appears from the practical application of the rules of pleading appropriate to this case made in *United States v. Waddell*, 112 U. S. 76, 28 L. ed. 673. Some of the allegations in each count may be insufficient, but under a general demurrer these are only surplusage. Counts 14 and 18 seem sufficient under the second section of the statute, as will appear from what I have to say hereafter.

The remaining counts, 4, 5, 9, and 10, are laid under the first section. Counts 4 and 9 allege an intent to hinder and prevent all persons and corporations, except the corporation controlled by the defendants, from engaging in the trade and commerce described in the indictment, while counts 5 and 10 only allege a purpose to destroy the competition of the four corporations named, without setting out any purpose of engrossing or monopolizing the business as a whole, or any like purpose. The court does not feel at all embarrassed by the use of the words "trade or commerce." The word "commerce" is undoubtedly, in its usual sense, a larger word than "trade" in its usual sense. Sometimes "commerce" is used to embrace less than "trade," and sometimes "trade" is used to embrace as much as "commerce." They are, in the judgment of the court, in this statute synonymous. The court is well aware of the general rule which has been several times (twice certainly) laid down by the Supreme Court of the United States, that in construing a statute every word must have its effect, and the consequent presumption that the statute does not use two different words for the same purpose; but this rule has its limitations, and it is a constant practice for the legislature to use synonyms. A word is used which it is thought does not perhaps quite

convey the idea which the legislature intends, and it takes another word, which perhaps has to some a little different meaning, without intending to more than make strong the purpose of the expression in the statute.

In the legislation of Congress analogous to this under consideration there is a marked case of the use of synonyms. Rev. Stat. § 5438, uses the words "false, fictitious, or fraudulent;" then the words "any false bill, receipt, voucher;" then the words "agreement, combination, or conspiracy;" then the words "charge, possession, custody, or control," mainly synonyms; while section 5440 uses simply the word "conspire." There would be no question that the word "conspire," in section 5440, means all that the three corresponding synonyms, "agreement, combination, or conspiracy," mean in section 5438; and, rather as a matter of curiosity than because they particularly impress my mind, I have taken off some other instances. The Massachusetts statute cited in *United States v. Britton*, 107 U. S. 670, 27 L. ed. 525, uses the words "secular labor, business, or employment." The words "false, forged, and counterfeited" are used over and over again in *United States v. Howell*, 78 U. S. 11 Wall. 436, 437, 20 L. ed. 196, 197; "peddler and hawker" are in constant use in criminal law; "drinking house or tipping house" is of frequent use in the statutes; so are "goods and chattels." These are all referred to in Bishop on Statutory Crimes as synonymous. There is also the very special case where the criminal statute contained the words "ram, ewe, sheep, and lamb;" and it was held in *Reg. v. McCulley*, 2 Mood. C. C. 34, that the word "sheep" covered the two preceding words, and they might be rejected as surplusage. Sutherland on Statutory Construction says that words which are meaningless have sometimes been rejected as redundant or surplusage. So in this statute I think the words "trade or commerce" mean substantially the same thing. But the use of the word "trade" nevertheless is significant. In my judgment, it was probably used because it was a part of the common law expression, "in restraint of trade," as has been carefully pointed out by the counsel for the defense. This has become a fixed, well-known, common law expression; and by the rule of interpretation as given again in Sutherland on Statutory Construction (§ 253) it has been here used in the sense in which it has been used generally in the law. And these words, "in restraint of trade," lead up directly to what I think is the true construction of this statute on this point.

I think it is useful to analyze the statute. Separating it into parts, we have—first, contract in restraint of trade; second, combination in restraint of trade; and, third, conspiracy in restraint of trade. There can be no question that the second and third parts, as thus put, receive color from the first. Moreover, it is important to note the rule that this whole statute must be taken together. The second section is limited by its terms to monopolies, and evidently has as its basis the engrossing or controlling of the market. The first section is undoubtedly

in pari materia, and so has as its basis the engrossing or controlling of the market, or of lines of trade in various directions. The sixth section also leads in the same direction, because it provides for the forfeiture of property acquired pursuant to the conspiracy. Undoubtedly the word conspiracy in that section has reference to the same subject-matter as in the first. If the intention of the statute was that claimed by the United States, I think the natural phraseology would have been "to injure trade," "to restrain trade."

We are now at the point where the paths separate. Careless or inapt construction of the statute as bearing on this case, while it may seem to create but a small divergence here, will, if followed out logically, extend into very large fields; because, if the proposition made by the United States is taken with its full force, the inevitable result will be that the Federal courts will be compelled to apply this statute to all attempts to restrain commerce among the states, or commerce with foreign nations, such as strikes, boycotts, and every method of interference with foreign commerce, or commerce between the states, by way of violence or intimidation. It is not to be presumed that Congress intended thus to extend the jurisdiction of the courts of the United States without very clear language. Such language I do not find in the statute. Therefore I conclude that there must be alleged in the indictment that there was a purpose to restrain trade, as implied in the common law expression, "contract in restraint of trade," analogous to the word "monopolize" in the second section. I think this is the basis of the statute. It must appear somewhere in the indictment that there was a conspiracy in restraint of trade by engrossing or monopolizing or grasping the market, and it is not sufficient simply to allege a purpose to drive certain competitors out of the field by violence, annoyance, intimidation, or otherwise.

Something has been said in this connection touching the debates in Congress. It is apparently settled law that we cannot take the views or purposes expressed in debate as supplying the construction of statutes. In *United States v. Union Pac. R. Co.* 91 U. S. 72-79, 23 L. ed. 224-228, and elsewhere, the Supreme Court has laid down this rule. But this does not at all touch the question which presents itself in this case, which is whether or not one can gather from the debates in Congress, as he can from any other source, the history of the evil which the legislation was intended to remedy. The debates on this point are very instructive. They show, to my mind, in connection with history from other sources of what preceded the enactment

of this statute, that the purpose was to prevent the engrossing or monopolizing of the market; but they fail to point out particularly what incidents or details of this great evil were to be reached by this legislation.

What I have already said disposes of counts 5 and 10, which do not allege any purpose except to destroy the competition of four corporations named; and they leave for consideration only the counts 4 and 9, which do allege a purpose of engrossing, monopolizing, or grasping the entire trade in question. Such being the case, acts of violence and intimidation may be alleged as means to accomplish the general purpose. Instead of lying outside of the statute, they may aggravate the offense. They are within the logic and spirit of the statute, which are not to be defeated by distinctions which its letter does not suggest to the ordinary mind. Violence and intimidation are as much within the mischief of the statute as negotiations, contracts, or purchases. The former are often used to compel the latter. This line of reasoning applies to both the first and second sections, and finds a sufficient place for every word in each. I find in all the counts which I allow to stand, allegations of an intent to engross, monopolize, and grasp, and of means clearly unlawful, and adapted to accomplish this intent.

I have examined all the cases which have been cited to me as referring to this statute, and I believe that counsel have cited me every case which has been decided in connection with it: but none of them meet the issue which is raised here. Therefore all the expressions in them supposed to touch this case are to be regarded as mere *dicta*. The result is that counts 4, 9, 14, and 18 stand, and the others are quashed.

On March 7, 1893, a special demurrer to counts 4, 9, 14, and 18 was filed. It was argued on May 5, and on May 17, a motion for rehearing was filed.

On June 1, 1893, the following order was entered:

Leave to the defendants to file special demurrer granted February 28, 1893, annulled as inadvertent. Petition of defendants for rehearing on general demurrer granted. Order overruling demurrer as to counts 4, 9, 14 and 18, entered February 28, 1893, annulled. Matters set out in the so-called special demurrer are, by leave of court, assigned as additional causes for demurrer under the general demurrer. Counsel for the defendants and for the United States heard anew touching demurrer to counts 4, 9, 14 and 18. Demurrer overruled as to those counts, defendants to answer over as provided by statute. Defendants have ten days within which to file and present exceptions.

UNITED STATES DISTRICT COURT, SOUTHERN DISTRICT OF CALIFORNIA.

RE CHARGE TO GRAND JURY (No. 1).

(62 Fed. Rep. 894.)

1. While every man has ordinarily the legal right to stop work and quit his employment whenever he chooses to do so, in the absence of a
4 INTER S.

contract obliging him to continue for a definite time, no man has a legal or moral right, while continuing in the employment of another to re-

fuse to do the work he is employed and engages to do.

2. A combination or conspiracy to obstruct or retard the passage of the mail, or to interfere or restrain commerce between the states, is unlawful.
3. Failure of a railroad company to run any other trains than their regular passenger trains for carrying the mail, is not a violation of law, but failure or refusal to carry mails on regular passenger trains, whether local or through trains,

upon which they are required to carry mails, is unlawful.

4. Railroad companies engaged in interstate commerce shall, unless prevented by circumstances beyond their control, run their trains in a reasonable manner, and as often as the ordinary business of commerce requires, but are entitled to determine how many and what cars and engines shall constitute their trains, and are not required to divide the train and run a less number of cars upon refusal of their employes to move the usual and customary trains.

June 29, 1894.

Charge by Judge **Ross**:

Gentlemen of the Grand Jury: Under and by virtue of provisions of the statutes of the United States all railroads or parts of railroads which are now in operation are post roads, and every railroad company in the United States whose road is operated by steam is authorized to carry upon and over its road, boats, bridges, and ferries all passengers, troops, government supplies, mails, freight, and property on their way from any state to another state, and to connect with roads of other states so as to form continuous lines for the transportation of the same to the place of destination. A railroad which is a link in a through line of road by which passengers and freight are carried into a state from other states, and from that state to other states, is engaged in the business of interstate commerce, and every combination or conspiracy in restraint of such trade or commerce is by statute declared to be illegal, and the persons so combining or conspiring are by law guilty of the commission of a crime. Congress has passed laws to regulate such commerce, and has provided, among other things, that any common carrier subject to the provisions of the Interstate Commerce Act, or, whenever any such common carrier is a corporation, any director or officer thereof, or any receiver, trustee, lessee, agent, or person acting for or employed by such corporation, who, alone, or with any other corporation, company, person, or party, shall willfully omit or fail to do any act, matter, or thing required to be done by the Act, or shall cause or willfully suffer or permit any act, matter, or thing so directed or required by the Act to be done, not to be done, or shall aid or abet such omission or failure, shall be deemed guilty of a misdemeanor, and punished in a certain prescribed way. It is also declared by a statute of the United States that any person who shall knowingly and willfully obstruct or retard the passage of the mail is guilty of a crime, and shall be punished. It is further declared by a United States statute that, "if two or more persons conspire . . . to commit any offense against the United States, . . . and one or more of such parties do any act to effect the object of the conspiracy, all the parties to such conspiracy shall be liable to a penalty of not more than \$10,000 or to imprisonment for not more than 2 years, or to both fine and imprisonment, in the discretion of the court." Rev. Stat. § 5440. I charge you, gentlemen of the jury, to forthwith diligently inquire whether any of the laws of the United States to which

4 INTER S.

I have specially called your attention have been violated by any person or persons within this judicial district. You must, in the language of the oath which you and each of you took when impaneled as grand jurors, "present no person from envy, hatred, or malice; neither shall you leave any person unpresented from fear, favor, affection, gain, reward, or the hope thereof, but you shall present all things truly as they come to your knowledge, according to the best of your understanding." It is of the first importance that the law be in all things and at all times maintained. This is especially true in times like the present, when there seems to be abroad in the land a spirit of unrest, and, in many instances, a defiance of law and order. Every man should know, and must be made to know, that whatever wrongs and grievances exist, no matter in what quarter, can only be corrected through lawful means; for the great mass of the American people are law-loving and law-abiding, and will never tolerate any high-handed or unlawful attempt to correct wrongs, whether they be real or imaginary. It is true that ordinarily every man has the legal right to stop work and quit his employment whenever he chooses to do so, unless there be a contract that obliges him to continue for a definite time; but no man has a legal or moral right, while continuing in the employment of another, to refuse to do the work he is employed and engages to do; and where such refusal goes to the extent of violating a law of the United States it is the solemn duty of those charged with its administration to take every step requisite and necessary to its complete vindication.

July 2, 1894. Gentlemen of the Grand Jury: I understand, through the district attorney, that you desire some further instructions in regard to the mail. Congress has provided by statute that the Postmaster General shall in all cases decide upon what trains and in what manner the mails shall be conveyed, and that officer has, through his subordinates, designated for the Southern California Railway Company and the Southern Pacific Railroad Company in this judicial district the regular passenger trains of those roads for the carrying of the United States mails. Neither of those companies is by the law required to run any other trains than their regular passenger trains for the carrying of the mails, and their failure to do so is not a violation of any law of the United States to which my attention has been called, or that I have been able to find. As I told

you the other day, in effect, any and every person who shall knowingly and willfully obstruct or retard the passage of the mail is guilty of a crime against the laws of the United States, and, if two or more persons conspire to commit that or any other offense against the United States, and one or more of such parties do any act to effect the object of the conspiracy, all of the parties to such conspiracy are guilty of a crime; and, if you find from your investigations, which I charged you, and again charge you, diligently to pursue, that any such offense has been committed within this judicial district against the laws of the United States, it is your imperative and solemn duty to find an indictment or indictments against any and every such offending person. Using the substance of the language of *Judge Jackson* in a somewhat similar case that arose in West Virginia in 1893, it is proper for me to say that exactly what is involved in the strike which has brought about all of the trouble here and elsewhere is not for you or me to investigate. At this time it is not necessary to say which side is in the right nor which side is in the wrong, or whether, in fact, either side is in the wrong upon the merits of that question. It may be well to again say that there is but one way to redress a wrong known in this country, and that is through the regularly constituted tribunals of the country. No man, no set of men, no communistic combination of men, can lawfully undertake to redress a wrong except in the way pointed out by law. Whenever men attempt to unlawfully combine themselves together for the purpose or redressing a wrong, they strike at the very foundation of those laws which give them the right of a citizen,—the protection of life, of liberty, and the pursuit of happiness. It is the solemn duty of all good citizens to ponder and think of these things, and be sure that their acts, whatever they are, be within, and not contrary to, the laws of the country; and it is the sworn and imperative duty of those charged with the administration of the laws to take prompt and vigorous measures to bring to the bar of justice any and every infraction of them.

Most of the questions propounded by some of your members are answered in substance by the instructions already given to you by the court. The court has already told you that it is provided by a statute of the United States that the Postmaster General shall in all cases decide upon what trains and in what manner the mails shall be conveyed, and that that officer has, through his subordinates, designated for the Southern California Railway Company and the Southern Pacific Railroad Company in this judicial district the regular passenger trains of those roads for the carrying of the United States mails; and, further, that neither of those companies is by the law required to run any other trains than their regular passenger trains for the carrying of the mails, and that their failure to do so is not a violation of any law of the United States. The court has further instructed you, and again repeats, that any and every person who shall know-

ingly and willfully obstruct or retard the passage of the mail is guilty of a crime against the United States, and that any and every person who knowingly and willfully interferes with or obstructs any interstate commerce is guilty of an offense against a law of the United States; and that, if any two or more persons—it makes no difference who they are—conspire to commit either of those offenses against the United States, and one or more of such parties do any act to effect the object of the conspiracy, all of the parties to such conspiracy are guilty of a crime. Whenever such acts are of a character to prevent and obstruct the carrying of the mails, or to interfere with or obstruct any interstate commerce, and are done for the purpose and with the intent to prevent or obstruct the same, a crime is committed.

July 3, 1894. Gentlemen of the Grand Jury: I especially call your attention this morning to the report of certain acts and declarations of a Doctor Ravlin at a public meeting reported to have been held at Hazard's Pavilion in this city last night, and in connection therewith I instruct you that it is declared by the statutes of the United States that "every person who incites, sets on foot, assists, or engages in any rebellion or insurrection against the authority of the United States, or the laws thereof, or gives aid or comfort thereto, shall be punished by imprisonment not more than ten years, or by a fine of not more than \$10,000, or by both of such punishments; and shall, moreover, be incapable of holding any office under the United States" (Rev. Stat. § 5334); and, further, that, "if two or more persons in any state or territory conspire to overthrow, put down, or to destroy by force the government of the United States; or to levy war against them; or to oppose by force the authority thereof; or by force to prevent, hinder, or delay the execution of any law of the United States; or by force to seize, take, or possess any property of the United States contrary to the authority thereof; each of them shall be punished by a fine of not less than \$500 and not more than \$5000; or by imprisonment, with or without hard labor, for a period not less than six months, nor more than six years, or by both such fine and imprisonment." Rev. Stat. § 5336. You will forthwith diligently inquire whether at the time and place mentioned, or at any other time or place within this judicial district, any person or persons have violated either of these provisions of law, or any other provision of law of the United States; and, in the event you find that any such offense or offenses have been committed, you should forthwith find and return to the court an indictment or indictments against the person or persons so offending, to the end that he or they may be dealt with as law and justice demand. And I charge you that, in the event you find that any such offense or offenses have been committed, the very man or men first to be proceeded against should be the prime movers and controllers in such unlawful acts, and the very man or men who should first be arrested and imprisoned are the ones who declare they will not be arrested, if any

such there be. For, gentlemen of the grand jury, it is well to repeat, and have it fully understood in times like the present, that this is a government of law and order, and that the majesty of the law must and surely will prevail. You and I are its ministers now, and not one single duty or responsibility ought to be shirked, evaded, or postponed. The situation of affairs demands prompt and vigorous action on the part of each and every officer of the law, which it should be not only the wish, but the pleasure, of every good citizen to obey.

The questions with which we have to deal are wholly apart from any of the alleged grievances between the employes of the Pullman and railroad companies and their employers; but the overshadowing question here is whether the laws of the United States shall be permitted to be trampled under foot with impunity; and as to that there can be but one answer, and that is in the negative.

July 11, 1894. Gentlemen of the Grand Jury: One of your number has asked for further instruction respecting the law bearing upon the subject under your investigation. You have already been informed by the court that under and by virtue of provisions of the statutes of the United States all railroads or parts of railroads which are now in operation are post roads, and that every railroad company in the United States whose road is operated by steam is authorized to carry upon and over its road, boats, bridges, and ferries, all passengers, troops, government supplies, mails, freight, and property on their way from any state to another state, and to connect with roads of other states so as to form continuous lines for the transportation of the same to the place of destination; and that a railroad which is a link in a through line of road by which passengers and freight are carried into a state from other states, and from that state to other states, is engaged in the business of interstate commerce, and that every combination or conspiracy in restraint of such trade or commerce is by statute declared to be illegal, and the persons so combining or conspiring are by law guilty of the commission of a crime, whether they be railroad presidents, managers, superintendents, conductors, engineers, brakemen, or firemen. "Commerce with foreign countries and among the states, strictly considered," said the Supreme Court of the United States in *Mobile County v. Kimball*, 102 U. S. 691-702, 26 L. ed. 238-241, "consists in intercourse and traffic, including in these terms navigation and the transportation and transit of persons and property, as well as the purchase, sale, and exchange of commodities." And Mr. Pomeroy, in his work on Constitutional Law (§ 378), referring to the significance of the word "commerce," says: "It includes the fact of intercourse and of traffic and the subject-matter of intercourse and traffic. The fact of intercourse and traffic, again, embraces all the means, instruments, and places by and in which intercourse and traffic are carried on, and, further still, comprehends the act of carrying them on at these places and by and with these means. The subject-matter of intercourse or traffic may

be either things, goods, chattels, merchandise, or persons. All these may therefore be regulated." Congress has passed laws to regulate such commerce, thereby requiring carriers engaged in such transportation of persons and property to transport them in accordance with and subject to the provisions of the Act, and has provided, among other things, that any common carrier subject to the provisions of the Interstate Commerce Act, or whenever any such common carrier is a corporation, any director or officer thereof, or any receiver, trustee, lessee, agent, or person acting for or employed by such corporation, who alone or with any other corporation, company, person, or party shall willfully omit or fail to do any act, matter, or thing required to be done by the Act, or shall cause or willfully suffer or permit any act, matter, or thing so directed or required by the Act to be done, not to be done, or shall aid or abet such omission or failure, shall be deemed guilty of a misdemeanor, and punished in a certain prescribed way.

In respect to the mails of the United States, it is declared by statute that any person who shall knowingly and willfully obstruct or retard the passage of the mail, is guilty of a crime, and shall be punished. It is further provided by statute of the United States that the Postmaster General shall in all cases decide upon what trains and in what manner the mails shall be conveyed, and that officer has, through his subordinates, designated for the Southern California Railway Company and the Southern Pacific Railroad Company in this judicial district the regular passenger trains of those roads for the carrying of the United States mails. Neither of these companies is by the law required to run any other trains than their regular passenger trains for the carrying of the mails, and their failure to do so is not a violation of any law of the United States. But on all of their regular passenger trains, whether they be local or through trains, they are required to carry the mails, and their failure or refusal to do so is unlawful. As respects interstate commerce, railroad companies engaged in such commerce should, unless prevented by circumstances beyond their control, run their trains in a reasonable manner, and as often as the ordinary business of commerce requires. At the same time, as owners of the property, they are legally and justly entitled to determine how many and what cars and engines shall constitute their trains; and, when the composition of trains as usually and ordinarily made up by them is reasonable and appropriate to the services required of them, the law does not, upon the refusal of their employes to move the usual and customary trains, require of such companies to divide the train, and run a less number of cars. The court has further instructed you, and again repeats, that any and every person, whether an employe of a railroad company in high or low position or not employed at all, who shall knowingly and willfully obstruct or retard the passage of the mail, is guilty of a crime against the United States, and that any and every person, whether an officer or employe of a rail-

road company or not, who knowingly and willfully interferes with or obstructs any interstate commerce is guilty of an offense against a law of the United States; and that, if any two or more persons, it makes no difference who they are, conspire to commit either of those offenses against the United States, and one or more of such parties do any act to effect the object of the conspiracy, all of the parties to such conspiracy are guilty of a crime. Whenever such acts are of a character to prevent and obstruct the carrying of the mails, or to interfere with or obstruct any interstate commerce, and are done for the purpose and with the intent to prevent or obstruct the same, a crime is com-

mitted. When the acts which create the obstruction are in themselves unlawful, the intention to obstruct will be imputed to their author, although the attainment of other ends may have been his primary object.

Since preparing the foregoing instructions, the court is informed that certain lawless and criminal acts were committed in this city last night, and you are instructed to forthwith inquire whether any of such acts fall within the criminal statutes of the United States as heretofore pointed out and explained to you by the court, and, if you find that any of the laws of the United States were thereby violated, you should forthwith indict the offending persons.

UNITED STATES DISTRICT COURT, NORTHERN DISTRICT OF ILLINOIS.

Re CHARGE TO GRAND JURY (No. 2).

(62 Fed. Rep. 828.)

1. Insurrection is a rising against civil or political authority, the open and active opposition of a number of persons to the execution of law in a city or state.
2. Opposition to the arrest of persons who have willfully obstructed or retarded the mails, by such a number of persons as would constitute a general uprising in that particular locality, and threatens for the time being the civil and political authority constitutes an insurrection.
3. One who by speech, writing, or other inducements assists in setting on foot an insurrection or carrying it along, or who gives it aid or comfort, is guilty of a violation of law.
4. To constitute an insurrection against the United States, it is not necessary that there should be blood shed, or that its dimensions should be so portentous as to insure probable success, but it is necessary that the rising should be in opposition to the execution of the laws of the United States, and should be so formidable as for the time being to defy the authority of the United States.
5. Men who gather together to resist the civil or political power of the United States, or to oppose the execution of its laws in such force that the civil authorities are inadequate to put them down, and a considerable military force is needed

to accomplish that result, become, with every person who knowingly incites, aids or abets them with whatever motives, insurgents.

6. The corrupt or wrongful agreement of two or more persons with each other, that the employes of several railroads carrying mails and interstate commerce shall quit, and that successors shall by threats, intimidation, or violence be prevented from taking their places, will constitute a conspiracy against interstate trade or commerce.
7. Any concerted action upon the part of others to demand or insist, under any effective penalty or threat, upon railroad employes quitting to the injury of the mail service, or the prompt transportation of interstate commerce, is a conspiracy unless such demand or insistence is in pursuance of a lawful authority conferred upon them by the men themselves, and is made in good faith in the execution of such authority.
8. Proof of demand and insistence under effective penalty or threat that railroad employes quit their service, and of consequent injury to the transportation of the mails or interstate commerce, imposes the burden upon those making such demand or insistence of showing lawful authority conferred by the men themselves, and good faith in its execution.

July 10, 1894.

Charge by Judge Grosscup:

Gentlemen of the Grand Jury: You have been summoned here to inquire whether any of the laws of the United States within this judicial district have been violated. You have come in an atmosphere and amid occurrences that may well cause reasonable men to question whether the government and laws of the United States are yet supreme. Thanks to resolute manhood, and to that enlightened intelligence which perceives the necessity of a vindication of law before any other adjustments are possible, the government of the United States is still supreme.

4 INTER 8.

You doubtless feel, as I do, that the opportunities of life, under present conditions, are not entirely equal, and that changes are needed to forestall some of the dangerous tendencies of current industries. But neither the torch of the incendiary, nor the weapon of the insurrectionist, nor the inflamed tongue of him who incites to fire and sword is the instrument to bring about reforms. To the mind of the American people, to the calm, dispassionate, sympathetic judgment of a race that is not afraid to face deep changes and responsibilities, —there has, as yet, been no appeal. Men who appear as the champions of great changes

must first submit them to discussion—discussion that reaches, not simply the parties interested, but the under circles of society,—and must be patient as well as persevering until the public intelligence has been reached, and a public judgment made up. An appeal to force before that hour is a crime, not only against the government of existing laws, but against the cause itself; for what man of any intelligence supposes that any settlement will abide which is induced under the light of the torch or the shadow of an overpowering threat? With the question behind present occurrences, therefore, we have, as ministers of the law and citizens of the republic, nothing now to do. The law as it is must first be vindicated before we turn aside to inquire how law or practice, as it ought to be, can be effectually brought about. Government by law is imperiled, and that issue is paramount. The government of the United States has laws designed, first, to protect itself and its authority over those to which, under the Constitution and laws, it extends governmental regulations. For the former purpose,—namely, to protect itself and its authority as a government,—it has enacted that every person who entices, sets on foot, assists, or engages in, any rebellion or insurrection against the authority of the United States or the laws thereof, or gives aid or comfort thereto, “and any two or more persons in any state or territory who conspire to overthrow, put down, or destroy by force the government of the United States,” “or to levy war against them, or to oppose by force the authority thereof, or by force to prevent, hinder or delay the execution of any law of the United States contrary to the authority thereof,” shall be visited with certain penalties therein named.

“Insurrection” is a rising against civil or political authority,—the open and active opposition of a number of persons to the execution of law in a city or state. Now, the laws of the United States forbid, under penalty, any person from obstructing or retarding the passage of the mail, and make it the duty of the officer to arrest such offenders, and bring them before the court. If, therefore, it shall appear to you that any person or persons have willfully obstructed or retarded the mails, and that their attempted arrest for such offense has been opposed by such a number of persons as would constitute a general uprising in that particular locality, and as threatens for the time being the civil and political authority, then the fact of an insurrection, within the meaning of the law, has been established. And he who by speech, writing, or other inducement assists in setting it on foot or carrying it along, or gives it aid or comfort, is guilty of a violation of law. It is not necessary that there should be bloodshed, it is not necessary that its dimensions should be so portentous as to insure probable success, to constitute an insurrection. It is necessary, however, that the rising should be in opposition to the execution of the laws of the United States, and should be so formidable as for the time being to defy the authority of the United States. When men gather to resist the civil or political power of the United States, or to oppose the execution of its laws, and are in such force that the civil authorities

are inadequate to put them down, and a considerable military force is needed to accomplish that result, they become insurgents; and every person who knowingly incites, aids, or abets them, no matter what his motives may be, is likewise an insurgent. This penalty is severe, and, as I have said, is designed to protect the government and its authority against direct attack. There are other provisions of law designed to protect those particular agencies which come within governmental control. To these I will now call your attention.

The mails are in the special keeping of the government and laws of the United States. To insure their unhindered transmission, it is made an offense to knowingly and willfully obstruct or retard the passage of the mail, or any carriage, horse, driver, or carrier carrying the same. It is also provided that “if two or more persons conspire together to commit any offense against the United States and one or more of such parties do any act to effect the object of the conspiracy,” all the parties thereto shall be subject to a penalty. Any person knowingly and willfully doing any act which contributes, or is calculated to contribute, to obstructing or hindering the mails, or who knowingly and willfully takes a part in such acts, no matter how trivial, if intentional, is guilty of violating the first of these provisions; and any person who conspires with one or more persons, one of whom subsequently commits the offense, is likewise guilty of an offense against the United States.

What constitutes conspiracy to hinder or obstruct the mails will be touched upon in connection with the subject to which I now call your attention.

The Constitution places the regulation of commerce between the several states and between the states and foreign nations within the keeping of the United States government. Anything which is designed to be transported for commercial purposes from one state to another, and is actually in transit, and any passenger who is actually engaged in any such interstate commercial transaction, and any car or carriage actually transporting or engaged in transporting such passenger or thing, are the agencies and subject-matter of interstate commerce, and any conspiracy in restraint of such trade or commerce is an offense against the United States. To “restrain” is to prohibit, limit, confine, or abridge a thing. The restraint may be permanent or temporary. It may be intended to prohibit, limit or abridge for all time, or for a day only. The law draws no distinction in this respect. Commerce of this character is intended to be free, except subject to regulations by law at all times, and for all periods. Temporary restraint is therefore as intolerable as permanent and practical restraint by actual physical interference,—as criminal as that which flows from the arrangements of business and organization. Any physical interference, therefore, which has the effect of restraining any passenger, car or thing constituting an element of interstate commerce, forms the foundation for this offense. But to complete this offense, as also that of conspiracy to obstruct the mails, there must exist, in addition to the resolve or purpose, the element of criminal conspiracy.

What is criminal conspiracy? If it shall appear to you that any two or more persons corruptly or wrongfully agreed with each other that the trains carrying the mails and interstate commerce should be forcibly arrested, obstructed, and restrained, such would clearly constitute a conspiracy. If it shall appear to you that two or more persons corruptly or wrongfully agreed with each other that the employés of the several railroads carrying the mails and interstate commerce should quit, and that successors should, by threats, intimidation, or violence, be prevented from taking their places, such would constitute a conspiracy.

I recognize, however, the right of labor to organize. Each man in America is a freeman, and so long as he does not interfere with the rights of others he has the right to do with that which is his what he pleases. In the highest sense, a man's arm is his own, and, aside from contract relations, no one but himself can direct when it shall be raised to work, or shall be dropped to rest. The individual option to work or to quit is the imperishable right of a freeman. But the raising and dropping of the arm is the result of a will that resides in the brain, and, as much as we may desire that such wills should remain entirely independent, there is no mandate of law which prevents their association with others, and response to a higher will. The individual may feel himself, alone, unequal to cope with the conditions that confront him, or unable to comprehend the myriad of considerations that ought to control his conduct. He is entitled to the highest wage that the strategy of work or cessation from work may bring, and the limitations upon his intelligence and opportunities may be such that he does not choose to stand upon his own perception of strategic or other conditions. His right to choose a leader, one who observes, thinks, and wills for him,—a brain skilled to observe his interest,—is no greater pretension than that which is recognized in every other department of industry. So far, and with reasonable limits, associations of this character are not only not unlawful, but are, in my judgment, beneficial, when they do not restrain individual liberty, and are under enlightened and conscientious leadership. But they are subject to the same laws as other associations. The leaders to whom are given the vast power of judging and acting for the members are simply, in that respect, their trustees. Their conduct must be judged, like that of other trustees, by the extent of their lawful authority, and the good faith with which they have executed it. No man, in his individual right, can lawfully demand and insist upon conduct by others which will lead to an injury to a third person's lawful rights. The railroads carrying the mails and interstate commerce have a right to the service of each of their employés until each lawfully chooses to quit; and any concerted action upon the part of others to demand or insist, under any effective penalty or threat, upon their quitting, to be injury of the mail service or the prompt transportation of interstate commerce, is a conspiracy, unless such demand or insistence is in pursuance of a lawful authority conferred upon them by the men themselves, and is

made in good faith in the execution of such authority. The demand and insistence under effective penalty or threat, and injury to the transportations of the mails or interstate commerce, being proved, the burden falls upon those making the demand or insistence to show lawful authority and good faith in its execution.

Let me illustrate: Twelve carpenters are engaged in building a house. Aside from contract regulations, they each can quit at pleasure. A thirteenth and fourteenth man, strangers to them, by concerted threats of holding them up to public odium or private malice, induce them to quit, and leave the house unfinished. The latter in no sense represent the former or their wishes, but are simply interlopers for mischief, and are guilty of conspiracy against the employers of the carpenters. But if, upon a trial for such, it results that, instead of being strangers, they are the trustees, agents, or leaders of the twelve, with full power to determine for them whether their wage is such that they ought to continue or quit, and that they have in good faith determined that question, they are not then, so far as the law goes, conspirators. But if it should further appear that the supposed authority was used, not in the interest of the twelve, but to further a personal ambition or malice of the two, it would no longer justify their conduct. Doing a thing under a cloak of authority is not doing it with authority. The injury of the two to the employer, in such an instance, would only be aggravated by their treachery to the associated twelve, and both the employer and the employés should, with equal insistence, ask for the visitation of the law. If it appears to you, therefore,—applying the illustration to the occurrences that will be brought to your attention,—that any two or more persons, by concert, insisted or demanded, under effective penalties and threats, upon men quitting their employment, to the obstruction of the mails or interstate commerce, you may inquire whether they did these acts as strangers to these men, or whether they did them under the guise of trustees or leaders of an association to which these men belong. And, if the latter appears, you may inquire whether their acts and conduct in that respect were in faithful and conscientious execution of their supposed authority, or were simply a use of that authority as a guise to advance personal ambition or satisfy private malice. There is honest leadership among these, our laboring fellow citizens, and there is doubtless dishonest leadership. You should not brand any act of leadership as done dishonestly or in bad faith unless it clearly so appears. But if it does appear,—if any person is shown to have betrayed the trust of these toiling men, and their acts fall within the definition of crime, as I have given it to you,—it is alike the interest, the pleasure, and the duty of every citizen to bring them to swift and heavy punishment.

I wish again, in conclusion, to impress upon you the fact that the present emergency is to vindicate law. If no one has violated the law, under the rules I have laid down, it needs no vindication; but, if there has been such violation, there should be a quick, prompt, and adequate indictment. I confess that the prob-

lems which are made the occasion of pretext for our present disturbances have not received the consideration they deserved. It is our duty, as citizens, to take them up, and, by candid and courageous discussion, ascertain what wrongs exist, and what remedies can be applied. But neither the existence of such problems, nor the neglect of the public hitherto

to adequately consider them, justifies the violation of the law, or bringing on of general lawlessness. Let us first restore peace, and punish the offenders of the law, and then the atmosphere will be clear to think over the claims of those who have real grievances. First, vindicate the law. Until that is done, no other questions are in order.

UNITED STATES DISTRICT COURT, NORTHERN DISTRICT OF CALIFORNIA.

Re CHARGE TO GRAND JURY (No. 3).

(62 Fed. Rep. 840.)

1. Commerce among the states consists of intercourse and traffic between their citizens, and includes the transportation of persons and property, and the navigation of public waters for that purpose as well as the purchase, sale, and exchange of commodities.
2. A combination or conspiracy that will interrupt the transportation of commodities from one state to another is within Act of Congress of July 2, 1890, declaring illegal every combination or conspiracy in restraint of trade or commerce among the several states.
3. Any combination or conspiracy on the part of any class of men who by violence and intimidation prevent the passage of railroad trains engaged in transporting the interstate commerce of the country is a violation of Act of Congress of July 2, 1890, declaring illegal every combination or conspiracy in restraint of trade or commerce among the several states.
4. Willful failure of railroad companies to carry the mails is within U. S. Rev. Stat. § 3905, making it an offense to unlawfully and willfully retard or obstruct the passage of the mail, although their employees refuse to move trains having certain sleeping cars thereon, where the situation is of an extraordinary character, and the interruption to commerce has been serious and long continued and the employees are willing to move trains without such cars.
5. Declarations by one of the parties to a conspiracy during the pendency of the illegal enterprise is evidence against all the others when the combination is proved.
6. To justify the finding of an indictment the evidence must satisfy the grand jury that a conviction of the accused by a petit jury would be warranted.

July 13, 1894.

Charge by Judge Morrow:

Gentlemen of the Grand Jury: You have been summoned and sworn as grand jurors of the District Court of the United States for the Northern District of California. It now becomes my duty to instruct you concerning the duties you will be called upon to perform under the laws of the United States.

The extraordinary occurrences in this state during the past two weeks require your immediate attention, and call for a thorough and sweeping investigation. It is a matter of public notoriety that during this time a great railroad strike has prevailed; that the most important channels of trade and commerce carried by railway service have been closed, the business operations of the state paralyzed, and the passage of the mails seriously retarded and obstructed at several points in the state. The Constitution of the United States provides that Congress shall have power to regulate commerce among the states and establish post-offices and post roads. Pursuant to the first of these provisions, Congress has provided by the Act of July 2, 1890, that—

“Every contract, combination in the form of trust or otherwise or conspiracy, in restraint of trade or commerce among the several states, or with foreign nations, is hereby declared to

be illegal. Every person who shall make any such contract or engage in any such combination or conspiracy shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by fine not exceeding \$5000 or by imprisonment not exceeding one year, or by both said punishments in the discretion of the court.”

“Trade” has been defined as “the exchange of commodities for other commodities or for money; the business of buying and selling; dealing by way of sale and exchange.” The word “commerce,” as used in the statute and under the terms of the Constitution, has, however, a broader meaning than the word “trade.” Commerce among the states consists of intercourse and traffic between their citizens, and includes the transportation of persons and property, and the navigation of public waters for that purpose, as well as the purchase, sale, and exchange of commodities. *Mobile County v. Kimball*, 102 U. S. 702, 26 L. ed. 341; *Gloucester Ferry Co. v. Pennsylvania*, 114 U. S. 203, 29 L. ed. 161, 1 Inters. Com. Rep. 382. The primary object of the statute was undoubtedly to prevent the destruction of legitimate and healthy competition in interstate commerce by individuals, corporations, and trusts, grasping, engrossing, and monopolizing the

markets for commodities. *United States v. Patterson*, 55 Fed. Rep. 605. But its provisions are broad enough to reach a combination or conspiracy that would interrupt the transportation of such commodities from one state to another, and in this view the scope and purpose of the statute have been the subject of consideration in the courts, notably in the case of *United States v. Workingmen's Amalgamated Council*, 54 Fed. Rep. 995. That action was brought by the United States in the eastern district of Louisiana against the Workingmen's Amalgamated Council of New Orleans, La., and others, to restrain the defendants from interfering with interstate and foreign commerce. The facts were that a disagreement had arisen between the warehousemen and their employes and the principal draymen and their subordinates concerning the recognition that should be accorded by the employers to the demands of certain labor organizations in New Orleans, and it was threatened that unless there was acquiescence in these demands all the labor organizations would leave work, and would allow no work in any department of business, and violence was threatened in support of the demands. In some branches of business the effort was made to replace the union men by other workmen. This was resisted by the intimidation springing from vast throngs of the union men assembling in the street, and in some instances by violence, so that the result was that by the intended effects of the doings of the defendants not a bale of goods constituting the commerce of the country could be moved. It was held by the court that the facts of that case brought it within the provisions of the statute. In other words, it was determined that a combination of men who by violence and intimidation restrained trade and commerce among the several states or with foreign nations were acting in violation of this law, notwithstanding they may have had in view some other purpose in relation to their employment. You will observe that in his case the elements of intimidation and violence were present. It was not a case where he men merely quit work, putting their employers to no other inconvenience than of securing other men to fill their places, but it was a case where force and intimidation were used to prevent any one in that locality from engaging in the lawful and necessary business of moving the commerce of the country. The order granting an injunction in that case was affirmed by the circuit court of appeals in the fifth circuit. 57 Fed. Rep. 85. The law as thus declared by a court of recognized ability and authority was recently applied by Judge McKenna of the circuit court of this district in like manner to one feature of the state of affairs to which I am now directing your attention. This law determines that any combination or conspiracy on the part of any class of men who by violence and intimidation prevent the passage of railroad trains engaged in transporting the interstate commerce of the country is a violation of the Act of July 2, 1890.

Another agency of the government is involved in the transportation of the mails, and protect and secure the efficiency of that branch of the service it has been enacted that railroads or parts of railroads which are

now or hereafter may be in operation are established as post roads (Rev. Stat. § 3964); that the Postmaster General shall in all cases decide upon what trains and in what manner the mails shall be conveyed (Act March 3, 1879, 20 Stat. at L. 858, § 3); and every railway company conveying the mails shall carry on any train which may run over its road, and without extra charge therefor, all mailable matter directed to be carried thereon, with the person in charge of the same. Rev. Stat. § 4000. It is further provided in section 3995 of the Revised Statutes that "any person who shall knowingly and willfully obstruct or retard the passage of the mail, or any carriage, horse, driver or carrier carrying the same, shall for every such offense be punished by a fine of not more than \$100." This statute has also been before the courts in cases where bodies of men operating as labor organizations have prevented the passage of trains carrying the mails. In the case of *United States v. Clark*, in the District Court of the United States for the Eastern District of Pennsylvania (13 Phila. 476, 23 Int. Rev. Rec. 306) the defendant was one of a number of persons who assembled at the depot of the Lehigh Valley Railroad at South Easton, Pa. On the arrival of the mail train at the depot, the defendant, who had no connection with the train, said to persons having charge of it that the mail car could go on, but not the rest of the train. The defendant afterwards got on the train, and, with others, placed it on a siding, where it remained for several days. Judge Cadwallader, in charging the jury upon these facts, said:

"The defendant is charged with retarding the transportation of the mail. . . . The mail, in point of fact, was retarded, as the postmaster testifies, two or three days. The occurrence which retarded it, according to the tendency of the proofs, was that several persons were assembled at the depot at Easton for no lawful purpose, and that one or more of them declared that the mail might go on, but the passenger train should not. They uncoupled the mail, and afterwards coupled it for the purpose of carrying it, as they did, to a siding. If that was the fact, and their purpose was to retard the train which transported the mail, it matters not, in point of law, whether they were or were not willing that the mail car or the baggage car or the particular vehicle carrying the mail should go on."

The learned judge then quotes with approval the opinion of Judge Drummond of Chicago upon the subject, as follows:

"In relation to the transportation of the mails by means of railroads it is true that it appears by the evidence in this case that these defendants were willing that the mail car should go, but it must be borne in mind that the mail car can only go in such a way as to enable the railroad to transport the mail where there are other cars accompanying it. It is not practicable, as a general thing, for a railroad to transport a mail car by itself, because that would be attended by serious loss; so that while nominally they permit the mail car to go, they really, by preventing the transit of other passenger cars, interfered with the transportation of the mails."

You will observe that the law is applicable to the case of an obstruction interposed for a

purpose other than that of retarding the mails. This was decided to be the law by the Supreme Court of the United States as long ago as 1868 in the case of *United States v. Kirby*, where it was said:

"When the acts which create the obstruction are in themselves unlawful, the intention to obstruct will be imputed to their author, although the attainment of other ends may have been his primary object." 74 U. S. 7 Wall. 486, 19 L. ed. 280.

In the case of *United States v. Thomas*, 55 Fed. Rep. 381, the transportation of the mails had been obstructed by some persons acting under the influence of a strike. Judge Jackson, in addressing the jury, submitted observations intended for the strikers. He said:

"You have no right to go into a strike and undertake to stop the transportation of the mails of the United States, undertake to stop the running of the cars of the country, or undertake to stop the business which is carried on the great highways of the country, and which is the mainspring to the success of a country like ours. If all this is done, then you step upon a right which you have no right to interfere with. I make these general remarks on this occasion with a hope that I may reach the ear of the intelligent masses, that they may see at once the error they have fallen into. Rely not upon combination and strikes to protect your interests. They are disastrous, stopping your mills, and stopping the enterprises and business of the community which furnish the wage earner the means to support his home. Do not resort to such measures to stop our manufactures, our mills, or the transportation of the mails of the United States, which is so great and important an element of our country for the comfort and welfare of society. If you take this thing up and look at it, and ponder over it, and see the result that must necessarily follow such a course of action, and the train of circumstances that must necessarily accompany it, you would refuse to enter into these combinations and strikes."

That the passage of the mails over certain lines of railroad in this state has been retarded and obstructed there is no question. The regular receipt and dispatch of mails over the roads of the Southern Pacific Company have in fact been suspended at the San Francisco postoffice for a period of about two weeks. Who is responsible for this state of affairs? The strikers, the railroad company, or both? The railway is a great public highway, and the duty of the railroad company as a common carrier is first to the public. The road must be kept in operation for the accommodation of the public, if it is possible to do so with the force and appliances within reach. Any negligence in this respect is not excused by temporary difficulties capable of being promptly removed. The damage and interruption caused by the elements usually receive prompt attention, that traffic may not be suspended longer than is absolutely necessary. The same energy and good faith should be observed with respect to the removal of labor and other difficulties. *Pittsburg, Ft. W. & C. R. Co. v. Hazen*, 84 Ill. 36. The present controversy between the Southern Pacific and its employes appears to be in relation to the movement of Pullman

cars. Both parties to this controversy have announced in the public press that they have been ready and willing from the first to move freight cars and passenger trains without Pullman cars. In my opinion, the situation has been of such an extraordinary character, and the interruption to commerce and the transportation of the mails so serious and long continued, as to have required of the railroad company to temporarily waive questions concerning the make up of regular trains (as the officers of the company claim to have done) and employ such resources as the company had in the movement of other trains in an effort to relieve the prevailing congestion and distress. This obligation I believe to have been a public duty, and a willful failure to perform this duty with respect to the movement of the mails and interstate commerce is therefore, in my judgment, within the purview of the statute.

It is your duty to determine this question under the law as I have stated it to you, and present the guilty parties to the court for prosecution. In this inquiry you will not limit your examination to the conduct of any particular class of persons, but carefully scrutinize the acts of all parties concerned, whether they are officers of the railroad company or employes, and without fear or favor or influence of any kind point out in the proper manner the persons who have transgressed the law and imperiled the best interests of this state. It is our duty to uphold the authority and majesty of the law, and see to it that those who have violated its provisions, whoever they may be, are brought to the bar of justice.

In your inquiry you may find that parties have so associated themselves together in their conduct as to bring them within the law of conspiracy. The statute of the United States upon that subject is as follows:

Section 5440, Rev. Stat.: "If two or more persons conspire either to commit any offense against the United States, or to defraud the United States in any manner, or for any purpose, and one or more of such parties do any act to effect the object of the conspiracy, all parties to such conspiracy shall be liable to a penalty of not more than ten thousand dollars, or to imprisonment for not more than two years, or to both fine and imprisonment, in the discretion of the court."

The elements of this offense are the combination or conspiracy to violate the law, and the overt act or acts to carry the conspiracy into effect. Where several persons are proved to have combined together for the same illegal purpose, any act done by one of the parties in pursuance of the original concerted plan, and with reference to the common object, is, in the contemplation of the law, the act of the whole party, and therefore the proof of such act will be evidence against any of the others who were engaged in the same conspiracy.

It is also true that any declaration made by one of the parties during the pendency of the illegal enterprise is not only evidence against himself, but is evidence against the other parties, who, as we have seen, when the combination is proved, are as much responsible as if they had done the act themselves. You will observe in this connection that the act of combination to violate the statute is the important

element in the crime of conspiracy. The law regards the act of unlawful combination and confederacy as dangerous to the peace of society, and declares that such combination and confederation of several persons to commit crime requires an additional restraint to those provided for the commission of the crime, and makes criminal the conspiracy, with penalties and punishments, distinctive from those prescribed for the crime the subject of the conspiracy. You can readily appreciate why this is true. A conspiracy becomes powerful and effective in the accomplishment of its illegal purpose in proportion to the numbers, power, and strength of the combination to effect it. It is also true that, as it involves a number in a lawless enterprise, it is proportionally demoralizing to the well-being and character of the men engaged in it, and, as a consequence, to the safety of the community to which they belong. The statutes I have cited indicate the general character of the investigation you will be required to make concerning the affairs of the railroad company in the transportation of the mails and in the movement of interstate commerce. With the merits of the controversy between the railroad company and its employes you have nothing to do, except in so far as the facts relating thereto may furnish evidence as to the actual parties engaged in violating the laws of the United States. The right of labor to organize for its own benefit and protection is not questioned. It has the same right in this respect as any other association, and, perhaps, in some respects, its freedom is properly greater. The laboring man is entitled to the highest wages and the best conditions he can command, but he is not entitled to interfere with the rights and property of others, and by force or other unlawful means seize upon the appliances of organized industry, and set at defiance the laws of the government. The right of workmen to quit work, either singly or in a body (subject only to the civil obligations of contracts) is not denied, provided that the abandonment of service is accomplished in a peaceful and orderly manner; and here again the privilege or freedom must be exercised without interfering with the rights and property of others. It may be said that this freedom or privilege accorded to the laboring men, with the restrictions named, is of no great value, since he is thereby prevented from securing the protection he ought to have for his labor, and the power to redress his grievances. This may be true, and it may be conceded that the relations of labor to capital present a difficult problem for solution, but it seems to me that the intelligence of the people ought to solve this question in a peaceful and proper manner. It certainly cannot, with the consent of the courts, be settled by violence or any unlawful means.

It will appear to you from what I have said that a very serious and important duty de-

volves upon you as grand jurors of this court. Your oath requires you to diligently inquire and true presentments make "of such articles, matters, and things as shall be given you in charge or otherwise come to your knowledge touching the present service." The oath indicates the impartial spirit with which your duties should be performed. You are to present no one from envy, hatred, or malice, nor should you leave any one unrepresented for fear, favor, affection, hope of reward or gain, but should present all things truly as they come to your knowledge, according to the best of your understanding. In each judicial district there is a United States attorney, appointed by the president to represent the interests of the government in the prosecution of parties charged with the commission of public offenses against the laws of the United States. The United States attorney for this district will therefore appear before you, and present the accusations which the government may desire to have considered by you. He will point out to you the laws other than those I have mentioned which the government deems to have been violated, and will subpoena for your examination such witnesses as he may consider important, and also such other witnesses as you may direct. In your investigations you will receive only legal evidence, to the exclusion of mere reports, suspicions, and hearsay evidence. Subject to this qualification, you will receive all the evidence presented which may throw light upon the matter under consideration, whether it tend to establish the innocence or the guilt of the accused. And more, if in the course of your inquiries you have reason to believe that there is other evidence not presented to you within your reach, which would qualify or explain away the charge under investigation, it will be your duty to order such evidence to be produced. Formerly it was held that an indictment might be found if evidence were produced sufficient to render the truth of the charge probable. But a different and a more just and merciful rule now prevails. To justify the finding of an indictment you must be convinced, so far as the evidence before you goes, that the accused is guilty; in other words, you ought not to find an indictment unless, in your judgment, the evidence before you, unexplained and uncontradicted, would warrant a conviction by a petit jury. To authorize you to find an indictment or presentment, there must be a concurrence of at least twelve of your number,—mere majority will not suffice. You are to keep your deliberations secret, and allow no one to question you as to your own action, or the action of your associates on the grand jury. In the progress of your examinations, should questions arise concerning which you may desire further instructions from the court, you may come into court for that purpose, and the law will be further explained to you with respect to such questions.

INTER 8.

UNITED STATES CIRCUIT COURT, SOUTHERN DISTRICT OF OHIO.

SAMUEL THOMAS

v.

CINCINNATI, N. O. & T. P. R. CO.

Re F. W. PHELAN.

(62 Fed. Rep. 803.)

1. Any willful attempt with knowledge that a railroad is in the hands of a court through its receiver, to prevent or impede the latter from complying with the order of the court in running the road which, as between private individuals, would give a right of action for damages, is a contempt of court.
2. Instigating the employes of a receiver to leave their employment may be a contempt without being a crime.
3. Inciting the employes of a road in charge of a receiver to quit their service, in pursuance of the plans of an unlawful conspiracy, constitutes a contempt of court.
4. A conspiracy is a combination of two or more persons by concerted action to accomplish a criminal or unlawful purpose or some purpose not in itself criminal or unlawful, by criminal or unlawful means.
5. A combination of railroad employes to compel railroad companies to injure a manufacturer of cars by breaking their contracts with him, is an unlawful conspiracy.
6. A combination of railroad employes to quit their employment to compel their employer to withdraw from a mutually profitable relation with a third person, for the purpose of injuring the latter, when such relation has no effect on the character or reward of their services, is an unlawful conspiracy.
7. Boycotts are unlawful though unaccompanied by violence or intimidation.
8. A combination between railroad employes with the purpose of paralyzing the interstate commerce of the country by refusal of such employes to perform their duties, is an unlawful conspiracy under Act of Congress of July 2, 1890, declaring illegal every combination or conspiracy in restraint of trade or commerce among the several states.
9. A combination of railroad employes to quit employment for the purpose of preventing their employers from running certain cars, with the intent to stop mail trains as well as others, is an unlawful conspiracy, under U. S. Rev. Stat. § 3906, imposing a penalty for obstructing or retarding the passage of the mail.
10. The right of assembly and free speech secured by the constitution of Ohio, cannot be used to carry out an unlawful and criminal conspiracy to obstruct the operation of a railroad by a receiver.
11. Imprisonment for six months was imposed as a punishment for contempt of court in interfering with the operation of a railroad by a receiver, where, after the service of the restraining order, the defendant continuing in his unlawful course, and aggravated his contempt by speeches to the employes of the receiver.

Decided July 13, 1894.

P**ETITION** for the commitment of F. W. Phelan for contempt in inciting employes of a receiver in charge of defendant railroad to engage in a strike. *Punishment inflicted.*
The facts are stated in the opinion.

Messrs. Harmon, Colston, Goldsmith & Hoadly for receiver.
Messrs. Cogan & Shay for Phelan.

Taft, *Circuit Judge*, delivered the opinion of the court:

Samuel M. Felton was appointed receiver in the above entitled cause, March 18, 1893, and has ever since been engaged under the order of the court, in operating the railroad of the Cincinnati, New Orleans & Texas Pacific Railway Company, which is more commonly known as the Cincinnati Southern Railroad. On Monday, July 2, 1894, he filed an intervening petition in the original action, in which he stated that during the previous week, and at the time of filing the petition, he was greatly impeded in the operation of the road by a strike of his employes, and of the employes of other rail-

4 INTER S.

roads in the city of Cincinnati, who were prevented from receiving from him and delivering to him freight carried or to be carried over his road; that said strike was the result of a conspiracy between one F. W. Phelan, now in Cincinnati, and one Eugene V. Debs and others, to tie up the road operated as the said conspirators well knew, by the petitioner as receiver, and other roads in the western states of the United States, until certain demands or alleged grievance of certain persons not in the employ of the receiver or of any other railroad of the United States were acceded to by persons in no manner connected with the management of any railroad of the United States; that the

demand of the employés of one George M. Pullman, or the Pullman Palace Car Company, at Pullman, Ill., for higher wages was refused, whereupon said Debs, Phelan, and others, members of an organization known as the American Railway Union, combined and conspired with each other and with sundry persons, who became members of the organization for the purpose, to compel the Pullman Company to comply with the demands of its employés, and that for the purpose of injuring the Pullman Company, and of thereby forcing from it the concession demanded, Debs, Phelan, and the others named had maliciously conspired and undertaken to prevent the receiver of this court and the owners of other railroads from using Pullman cars in operating their roads, though they are under contract to do so: that in pursuance of said conspiracy Phelan, a resident of Oregon, came to Cincinnati a week before the filing of the petition, and set on foot and incited a strike among the employés of the receiver, and of other railroad companies whose lines run into Cincinnati; that on June 27th, and at other times and places, Phelan made inflammatory speeches to such employés, well knowing many of them to be employés of the receiver in which he urged them all to quit the service of the receiver and the other railroads of the city, and to tie them all up, and to prevent others from taking their places, by persuasion if possible, by clubbing if necessary; that said Phelan was still in the city, directing and continuing the strike, and interfering with the receiver in the operation of the road; that as a result of the conspiracy and strike the receiver had been obliged at great expense to secure and maintain the protection of armed men for his employés; and that all of the foregoing constituted a contempt of this court, and a ground both for committing Phelan and for enjoining him from a continuance of said acts.

Upon the filing of the petition an attachment was issued for Phelan, the contemner, and on the morning of the 3d of July he was arrested, and brought before the court. He was admitted to bail, and at the same time was enjoined by order of the court from, either as an individual or in combination with others, inciting encouraging, ordering, or in any other manner causing the employés of the receiver to leave his employ with intent to obstruct the operation of his road, and thereby to compel him not to fulfill his contract and carry Pullman cars. On Thursday, July 5, the motion of the receiver, for Phelan's commitment came on to be heard, and a week has since been taken up in the giving of testimony and argument.

I propose first to run over the evidence, as briefly as may be, and determine the facts, and then to consider the law applicable to them.

The American Railway Union is an organization of railway employés, to which are eligible as members all persons in the service of railways below a certain rank. It was organized in June, 1893. On May 11, 1894, at Pullman, Ill., the employés of the Pullman Palace Car Company, engaged in manufacturing railway cars of all kinds, including sleeping cars, left the company's employ because of its refusal to restore wages which had been reduced during the preceding year, and the works were then

closed. On June 11, 1894, the general convention of the American Railway Union met at Chicago, and decided that the American Railway Union would take measures to compel the Pullman company to resume business and to re-employ its employés who had left its service on terms to be fixed by arbitration. It does not appear that at this time the Pullman Company's employés were members of the Railway Union, or eligible as such. At the June convention of 1894 there were present representatives from 450 lodges of the union, and the number of members, as estimated at that time, was 250,000. It is said that the local unions had voted for the Pullman boycott before the convention met. The question where the boycott originated is not very material, but it may be said that, as the Pullman strike occurred but a month before the convention, and as it had been deemed necessary by the union to send men all over the country to explain to its members the merits of the Pullman controversy during the boycott, it is obvious that the boycott had its real origin in the union convention at Chicago, where the subject was brought before it, presumably by its board of directors.

The chief governing body of the union is a board of directors, which elects a president, vice president, and secretary, who are the chief executive officers of the union. Eugene V. Debs is, and has been since its organization, the president. Section 6 of the constitution of the union, as adopted in June, 1893, provides that "the board is empowered to provide such rules, issue such orders, and adopt such measures as may be required to carry out the objects of the order, provided that no action shall be taken that conflicts with this constitution." By section 11 of the same instrument the president's powers are thus described:

"It shall be the duty of the president to preside over the meetings of the board and at the quadrennial meetings of the general union. He shall at each annual meeting of the board and at each quadrennial meeting of the general union submit a report of the transactions of his office, and make such recommendations as he may deem necessary to the welfare of the order. He shall enforce the laws of the order, sign all charters, circulars, reports and other documents requiring authentication. He shall decide all questions and appeals, which decisions shall be final, unless otherwise ordered by the board. He may, with the concurrence of the board, deputize any member to perform any required service, issue dispensations not inconsistent with the constitution or regulations of the order, and perform such other duties as his office may impose; and he shall receive such compensation for his services as may be determined at the time of his election."

Phelan, when on the stand, said that these were sections of the old constitution, but that he understood the constitution had been generally changed. He would not say that extensive or material changes had been made, but simply that general changes had been effected. He was in attendance as a delegate only during the last five days of the convention, and this is his explanation for not knowing what the changes were. Phelan's answers on this sub-

ject had really no effect to show that the foregoing sections are not still in force, but simply illustrated the evasiveness and verbal quibbling to which the witness was continually willing to resort under examination. It is certainly strange that if he was here, as he says, as a representative of the union, he should not know the changes, if any really material ones had been made in the constitution, under which he was initiating men into the union, and was receiving orders from his superior officers. We shall see, as we progress, that the two sections of the old constitution are still in force, if we can judge at all from the actual authority exercised by the officers of the union during the present boycott.

The plan of the boycott, as shown by the evidence, was this: Pullman cars are used on a large majority of the railways of the country. The members of the American Railway Union whose duty it was to handle Pullman cars on such railways were to refuse to do so, with the hope that the railway companies, fearing a strike, would decline further to haul them in their trains, and inflict a great pecuniary injury upon the Pullman Company. In case the railway companies failed to yield to the demand, every effort was to be made to tie up and cripple the doing of any business whatever by them, and particular attention was to be directed to the freight traffic, which it was known was their chief source of revenue. As the lodges of the American Railway Union extended from the Allegheny mountains to the Pacific coast, it will be seen that it was contemplated by those engaged in carrying out this plan that, in case of a refusal of the railway companies to join the union in its attack upon the Pullman Company, there should be a paralysis of all railway traffic of every kind throughout that vast territory traversed by lines using Pullman cars. It was to be accomplished, not only by the then members of the union, but also by procuring, through persuasion and appeal, all employes not members either to join the union or to strike without joining, by guarantying that, if they would strike, the union would not allow one of its members to return to work until they also were restored. I shall allude again to the gigantic character of this combination. For my present purpose, it is sufficient to say that on Sunday, June 24, Phelan came to Cincinnati as the authorized representative of the president and board of directors of the union, to enforce and carry out the contemplated boycott and paralysis of business on all railway lines running into Cincinnati which used Pullman cars until they should cease to use them.

I am aware that Phelan denies that such were his authority and instructions, but as in the case of his answers in respect to the constitution and its provision, his denials do not, in view of the overwhelming proof of the circumstances not denied, and his previous admissions not denied, show the fact to be otherwise, but only decrease the reliance which can be placed on any statement made by him in this case. He says that he came here with no direction except to visit the employes of the Pullman Company at a branch factory at Ludlow, to explain to them the merits of the controversy between their employer and their fellows at Chi-

cago, and then, if they struck, to see that the appointed committees who should keep order among them, and look after the sick. At another time he says he was directed to be in Cincinnati during the boycott, but he strenuously denies he was here for the purpose of laying on the boycott or inciting a general strike. He would have the court believe that what occurred was wholly spontaneous, and not through his agency, and that his business was, if there should be such coincidental spontaneity resulting in a strike, to prevent disorder, and to look after the sick. This hardly accords with his first telegram to Debs, his chief officer, dated noon, Tuesday, June 26, as follows: "Pay no attention to press reports. To be effective, was compelled to postpone action until seven, Wednesday morning." On Sunday, June 24, after Phelan's explanation of the Pullman troubles, the Pullman employes at Ludlow determined to strike, and did so Monday morning at 7 o'clock. Phelan says he did not advise them to strike, but just explained the situation, and then a strike followed. When he had explained, and organized committees among the strikers, after the strike had occurred, through no agency of his, his mission was ended, so far as his instructions went. And yet we find him on Tuesday, June 26, at 12 o'clock noon, telegraphing his chief that he was obliged to postpone action until Wednesday morning at 7 in order to be effective. Now, what action was this which he hoped to make effective? Can any one doubt for an instant that the action thus foreshadowed was that referred to in Phelan's dispatch to Debs of June 28 following, when he said, "The tie-up is successful?" On Tuesday night, June 26, there was a meeting of all the switchmen of Cincinnati at Wuebler's Hall. There is no direct evidence how this meeting was called, but the circumstances leave no doubt. Phelan, having brought out the Pullman men, then set to work upon the railway men, and hence the meeting. The telegram of June 26 indicates that Debs expected him to have the meeting and action earlier, but that he was not able to secure an attendance at any earlier meeting sufficiently general to make the action taken effective. Indeed, when the Tuesday night meeting was held, it was found that action must be still further delayed, and a second meeting for Wednesday night was called. At both of these meetings Phelan explained and discussed the Pullman trouble, and announced the Pullman boycott. Now, what was his object? Was it for the purpose of inducing the men whom he addressed, and others not present, whom he urged them to talk to, to demand of the railway companies assistance in boycotting Pullman, and, on refusal, to tie them up, or was it simply for their general information? He repeats upon the stand with much emphasis that he at no time advised any man to strike. What was he doing? His speeches were all directed to that end, and, even if he did not use the word "advise," his conduct was exactly the same as if he had. His trifling with the truth, and his attempt to seek shelter again behind verbal quibbles, simply disparages him as a witness, without concealing the facts. Now, what was done at this meetings of Tuesday and Wednes-

day night after or during Phelan's speeches? A city committee was appointed, consisting of one employé of each of the great railroads entering the city. This committee Phelan continually refers to in his testimony as "my committee," and the term was properly used, for it seems to have spent all its time in his company, and doing his bidding. On this committee was J. Madison, a switchman in the receiver's employ. The first duty of each member of the committee was on June 27, or on the next day, to notify the yard master of his road that the switchmen and members of the American Railway Union would not handle Pullman cars because a boycott had been laid on them. Madison duly notified McCarty, the yard master of the receiver. The necessary result was that three switchmen on the Cincinnati, Hamilton & Dayton Railroad were discharged or relieved of duty on the afternoon of Thursday, June 28, and within six hours a general strike of all the switchmen and yard men, including yard engineers and firemen, on all the roads coming into Cincinnati, took place. This was exactly in accordance with the plan which Phelan had outlined to Westcott, a reporter for the Enquirer, on Tuesday or Wednesday before the strike, in a conversation which he does not deny. Beginning with Tuesday night, June 26, Phelan has made speeches every night since, in which he continued to explain the Pullman trouble to audiences of railroad men, and has read telegrams from Debs of a character calculated to incite and encourage all railway employés to quit their places to assist in the Pullman boycott. He says he has made as many as twenty speeches. Two, at least, were made at Ludlow, Ky., a railroad town, the inhabitants of which are, or were, many of them, employés of the receiver. It is in evidence that when the meetings began the number of the receiver's employés who were members of the American Railway Union was 150. And yet Phelan denies that he is in any sense responsible for the strike of the receiver's employés, or of any other road in town, or for the paralysis of business which followed.

It is marvelous that Phelan can assume such a position in view of the circumstances and his own declarations. Take the evidence of Westcott, the Enquirer reporter, a witness evidently of much experience in acquiring and detailing accurate information, who has no motive to misrepresent Phelan in any way. He was assigned to report the strike, and seems to have found Phelan his best source of information. He made notes of everything at the time, and prepared them afterwards for publication. Phelan has not attempted to deny anything he says. Westcott testifies that Phelan told him before the strike that his main object in coming here was to enforce a boycott against Pullman cars, by tying up every road in Cincinnati for the American Railway Union; that he frequently and constantly repeated the statement that they intended to tie up every road in town, and keep them tied up until they refused to handle Pullman cars; that after the strike on Thursday he said he had most of the American Railway Union men out in Cincinnati, Ludlow, and Covington, and that those who were not out would be out the

next morning; that after his arrest he explained that his course had been to tie up the freight trains, and not so much to stop passenger trains, because the money was in the freight business. Schaff, Gibson, and Bender, officers of the Big Four Railroad, testify that Phelan said to them on Thursday afternoon, when they met him for the purpose of seeing whether the "embargo," as Phelan and Debs expressed it, could not be lifted from the Big Four, because it was a Wagner sleeping car line, that he proposed to tie up every line in town, and was in a hurry because he must go over and tie up the Pan Handle and the C. & O. before sunset; and that, just to show Schaff what he could do, he had called out some more of the Big Four employés. Phelan and those members of the city committee who accompanied him to this meeting deny that this was said, but by their denial showing nothing save that their loyalty to their chief is greater than their regard for the sanctity of their oaths. Westcott, the Enquirer reporter, talked with Phelan about this Schaff interview, and Phelan said that as Schaff tried to "bluff" him, he had called out some more of his men, to show that he had no hard feelings; and when Westcott expressed surprise at that way of showing friendliness, Phelan said that was the way the American Railway Union showed its friendliness in a fight. On June 28, the day of the strike, Debs telegraphed Phelan to let the Big Four alone, if not handling Pullmans, to which Phelan answered: "I cannot keep others out if Big Four is excepted. The rest are emphatic on altogether or none. The tie-up is successful. Once more will Big Four be let alone." If Phelan was not the chief agent and inciter of the general tie-up in Cincinnati, he has been most unfortunate in the use of the language in his telegrams. What he here said necessarily implied that he had induced all the employés to go out, and was trying to keep them out, and that they threatened to return if the Big Four line was exempted from the tie-up.

What I have said of the credibility of Phelan in reference to his agency in enforcing the boycott and tie-up applies with equal force to nearly all his witnesses, especially to those from his city committee. They would have the court believe that Phelan was merely a peacemaker in this community, with no responsibility for the strike, and no purpose to incite it or continue it. Take Bateman. He was a switchman of the receiver, and on the subcommittee of the road. Debs had been applied to by the president of the stock yards to allow the cattle cars to be unloaded, and Debs—presumably in the exercise of the dispensing power given him by the constitution—had directed Phelan to have this done if no injury to the cause resulted. Pending this matter, Westcott was inquiring into the outcome, and applied to Bateman as a subcommittee for information. Westcott says Bateman told him the stock matter was in Phelan's hands, and that the cattle could not be handled without Phelan's orders; that "whatever Phelan says, goes." Phelan told Westcott substantially the same thing, and a telegram from Phelan to Debs is in evidence, in which he says, "I am having stock un-

loaded." And yet Bateman denies his conversation with Westcott, and another member of the city committee says that Phelan had nothing to do with it, and only applauded when it was done. Every committee man who came upon the stand (and they made the majority of contemner's witnesses) tried to give the impression that they were not acting under Phelan's orders, and so does Phelan, and yet his complete command is so apparent that it cannot escape any one. When Phelan forgot himself he used such expressions as "my committee," "I instructed them to do so and so," and occasionally such telltale words would creep into the evidence of all his witnesses. Another kind of statement indulged in by Phelan and all of the committee was to the effect that these committees were organized solely for the purpose of keeping the peace, and assisting the sick, providing for parades, and hiring halls; but not one word is said about the efforts of the committee to induce men to leave the employ of the various railroads, and yet, if Phelan's injunction was followed, persuasion, explanation, and argument were to be used with all who did not join the cause at once. The committee and subcommittees were seventy-five in number. Phelan told Westcott at one time that he had to visit railroad yards with his committee; at another time that his committee were out visiting the various yards, to see the day crews. Evidently they were visiting the men who remained still at work, for the purpose of inducing them to quit; and this, though not mentioned by a single witness for the defense, was doubtless one of the chief reasons for their appointment.

With the intention of showing that he has been guilty of no interference with a compliance with the orders of this court, Phelan said upon the stand that he knew the Southern Railroad was operated by a receiver appointed by this court, and was therefore anxious to avoid interference with its operation, and prevented the calling out of the coach cleaners in the Ludlow yards on this account. Moreover, Buelte, of his city committee, testifies that the Cincinnati Southern was especially excepted from the operation of the boycott notice because it was in the hands of the court. And yet Tuesday night, in the preparation for the boycott and strike which was to be put into effect on Thursday following, through the action of committees in respect to which Phelan himself admits he made suggestions, and which were appointed under his supervising eye, a switchman from the receiver's yard was made the agent of the American Railway Union and its allies to notify the receiver's yard master of the boycott. The notice was given, and the strike occurred earlier among the receiver's employes than among those on some of the other roads. Phelan told Westcott on Thursday afternoon that the men were all out on the Southern, and yet this was the road he wished to save from the boycott, because it was in the hands of the court. What did he visit Ludlow for on Friday, and address a meeting of railroad employes, if he intended to be careful about interfering with the operation of the Southern Railroad by the court? There are no railway employes in Ludlow but

those of the receiver. What was Bateman, the committee man, doing in that place in attendance at two other meetings, if the respect of Phelan and his committee for the court's orders was so great? The purpose with reference to the Southern, as with respect to every other road, is so clearly shown by the telegrams between Debs and Phelan, that it could hardly be more certain if Phelan had admitted it.

Debs to Phelan:

"June 27, 1894.

"Indications are that all western lines will be tied up solidly before sunset to-day."

Phelan to Debs:

"June 28, 1894.

"I cannot keep others out if Big Four is excepted. The rest are emphatic on all, together or none. The tie-up is successful."

Debs to Phelan:

"June 29, 1894.

"About 25 lines now paralyzed. More following. Tremendous blockade."

Debs to Phelan:

"July 2, 1894.

"Knock it to them hard as possible. Keep Big Four out, and help get them out at other places."

Phelan to Debs:

"July 2, 1894.

"Going out all around. Firemen a unit. Will soon be an avalanche to us. Working outside points."

Debs to Phelan:

"July 2, 1894.

"Hold Big Four solid. Going out to-day at every point. Gaining ground rapidly."

Debs to Phelan:

"July 2, 1894.

"Advices from all points show our position strengthened. Baltimore and Ohio, Pan Handle, Big Four, Lake Shore, Erie, Grand Trunk, and Mich. Central are now in fight. Take measures to paralyze all those that enter Cincinnati. Not a wheel turning on Grand Trunk between here and Canadian line."

I have now gone over, more at length than necessary, perhaps, the evidence concerning Phelan's connection with the boycott and strike, his purpose in coming to Cincinnati, and what he did here, and I find the fact to be that he came here deputed by Debs, president of the American Railway Union, and its board of directors, to enforce a boycott against the cars of the Pullman Company by inciting all the employes of the railroads running into Cincinnati to leave their employ, and thereby to tie up every road, and paralyze all traffic of every kind until all of the railroads should consent not to carry Pullman cars in their trains; and that his plan and his actions were directed as much against the Cincinnati Southern road in the hands of the receiver of this court as against every other road in the city; and that he knew, when he inaugurated the boycott on the Southern road and incited the receiver's employes to strike, that the road was in the hands of the receiver, and was being operated under the order of this court.

We come now to consider the question of fact whether Phelan in any of his speeches advised intimidation, threats, or violence in

carrying out the boycott. He is charged with having said, on Thursday night, June 28, at the meeting at West End Turner Hall, that the strike was then declared on; that it was the duty of every A. R. U. man to quit work, to induce and coax other men to go out, and, if this was not successful, to take a club, and knock them out. He is charged with having said, on the same or another occasion during the same week, that the committees should be appointed to persuade men to go out; that, if they would not go, then the committee should get round behind, and kick them out. The meetings at which these remarks were said to have been made were behind closed doors, and no newspaper reporters were permitted to be present. Only A. R. U. men and railroad employes made up the audience. The first charge is supported by the evidence of one J. O. Sweeney, a timekeeper of the Big Four Railway, and he is, so far as the evidence shows, a wholly disinterested witness; and by the evidence of one E. W. Dormer, a witness whose credibility I shall consider later. They both say that the remark elicited much applause, and that, shortly before or after, Phelan advised them to be law-abiding citizens. To this charge Phelan makes an explanatory answer as follows:

"I told nobody to take a club, and do anything with anybody. I, upon several occasions in this city, have used about that one expression about in the same line with that, the substance of which is about this: I have told the boys—different ones—there was a good deal of demands upon me to go around and see everybody and explain this Pullman trouble. I was worried to death. . . . I said, 'You constitute yourselves a committee of one, each of you, and go to the people,—the community in which you live. Go to the boys,—I mean their acquaintances,—and explain to them this trouble. Talk to them about it. Beseech them to listen, because I want them to get the idea before they would condemn us about it; but do not take a club, and knock them in the head about it.' The peculiarity of the speech elicited applause, but I am afraid it was taken the other way."

With reference to the second charge, it is supported by the evidence of E. W. Dormer, who testifies he heard Phelan say it. An account of the speech in which it was said to have occurred was published in the Cincinnati Enquirer of June 29, and read to Phelan by counsel for the receiver. It was as follows:

"Mr. Phelan addressed the men familiarly. 'He who is not with us in this struggle is against us, and will be so regarded.' Then he spoke in scathing tones of the Pullmans. 'We want no weak-kneed individuals with us; we want warriors.' Mr. Phelan then launched into an eloquent denunciation of Grand Master Arthur of the order of locomotive engineers. 'He has not the courage to declare a strike.'"

So far Phelan admitted the truth of the article. The article proceeded:

"When this strike is declared, as it will be before you go home to-night, the members of the American Railway Union in San Francisco, Oregon, Chicago, and all over the great west will stand by you to the bitter end."

And to this he said he did not recollect it,

though he would not deny it. "It might have accidentally slipped out," he said. The article, after stating the passage of a resolution not to go back to work till the strike was declared off, which resolution Phelan said upon the stand that he never heard of, proceeded:

"Mr. Phelan then resumed: 'We must stand solidly together in this hour of trial, and, if anybody returns to work, or takes the place of strikers, seize them by the back of the neck, and throw them out.'"

Upon this passage the examination was as follows:

"Q. Did you say that? A. I don't recollect. Q. Will you swear to the court you did not say it? A. I don't recollect of saying it. Q. Will you swear you did not? A. I don't recollect of saying it. Q. That is as much as you will say? A. That is as much as I will say. I will state this, however, if you want any qualification on it. Q. I don't want any qualification. A. If I did say it, I meant to throw them out of the organization."

This was not a denial of the remark at all, but a statement that it meant something different from what it purported to mean. Phelan said several times in his examination that in a speech remarks slip out that one does not intend. Certainly, if he did not intend personal intimidation by this remark, it was an unfortunate one.

An attack is made on the credibility of Dormer. He was a detective in the employ of Field's Detective Agency of St. Louis, and in the employ of the receiver, ostensibly as a brakeman at first, and afterwards a striker, under the name of Williams. His character has not been attacked otherwise than by showing his assumption of a false appearance and name. There is evidence tending to show a willingness on his part to involve some of his fellow strikers in a trespass on the company's property, but I am bound to say that his accuracy as to everything else that occurred at the meetings which he attended has been borne out by the evidence of Phelan and his witnesses so far as they are willing to recollect. Were the charges as to Phelan's language dependent on Dormer's statement alone, I should not give them sufficient weight to overcome positive denials from Phelan; but the difficulty with Phelan's case is that he does not really and positively deny the statement of Dormer, but seeks to give the language another meaning, which it cannot bear. He contends in respect to each of the charges of inciting violence that his meaning was misunderstood. Had his evidence and that of his committee upon the main issues in this case not been most evasive and wanting in sincerity, I should still be inclined to give Phelan's explanations credit, and give him the benefit of a doubt on this point; but his whole case breaks down with the attempt of himself and his followers to conceal and pervert the most apparent fact in the case, namely, that he instigated, engineered, and controlled the boycott and strike at Cincinnati from beginning to end. After this his denials and evasions can be given but little weight. It is doubtless true that Phelan did tell his men to be law-abiding, that he did tell them to stay out of saloons, and off the company's prop-

erty, in the public, and that he did not wish his followers to subject themselves to the punishment of the law. Westcott testifies to this, and so do Dormer and Sweeney, and this has doubtless prevented many open assaults and trespasses. But I do not doubt that at the same time he encouraged them in a vicious and malicious disposition towards those of their fellows who did not join with them in this boycott, by expressions of the kind testified to by Sweeney and Dormer, and most evasively denied by Phelan, slyly slipped in where they could be given a double meaning if questioned.

The expressions were for the purpose of bringing into operation that secret terrorism which is so effective for discouraging new men from filling the strikers' places, and which is so hard to prove in a court of justice unless it results in open assault. That Phelan openly discouraged conflict with the law is to his credit as a strike organizer, for he wished public sympathy; but that he wished the aid of that secret terrorism, which is quite as unlawful, seems to me to be established. The town of Ludlow has been in such a state that the receiver's employes who live there have been in constant fear. Two engineers have left the town, and moved their families away. The receiver has boarded employes within guarded precincts. It has been shown that storekeepers of Ludlow have refused to sell goods to the receiver's employes because they were boycotted. Threats have been made, and an assault. Insulting and aggressive language has been used to receiver's employes on both sides of the river. Threats are hard to prove. If effective, they not only keep away the employes from service, but the witness from the stand. The receiver has been obliged to keep a large force of the United States deputy marshals on both sides of the river and on his engines and trains in order to induce employes, new and old, to remain in his service. I cannot presume that such protection was invoked by the employes because of groundless fears. The question of fact whether Phelan used expressions in his speeches behind closed doors to the employes of the receiver which were calculated to induce intimidation is not of primary importance in this case, for, as will hereafter be seen, his interference with the operation of the Southern road by the instigation and maintenance of the boycott and strike against the road was the main contempt of this court. The suggestions leading to intimidations would only be aggravations of the contempt; that is all.

Section 725, U. S. Rev. Stat. provides that: "The said courts [i. e., courts of the United States] shall have power to impose and administer all necessary oaths and to punish by fine or imprisonment at the discretion of the courts contempt of their authority; provided, that such power to punish contempts shall not be construed to extend to any cases except the misbehaviour of any person in their presence, or so near thereto as to obstruct the officers of said courts in their official transactions, and the disobedience or resistance by any such officer, or by any party, juror, witness, or other person, to any lawful writ, process, order, rule, decree, or command of the said courts."

It has been held by Judge Drummond in 4 INTER N.

Secor v. Toledo, P. & W. R. Co. 7 Biss. 513. that any unlawful interference with the operation of a road in the hands of a receiver is a contempt of the court, because it is a disobedience or a resistance by a person to a lawful order of the court. This view has been taken by Judges Brewer and Treat in *United States v. Kane*, 23 Fed. Rep. 748; and in *Re Doolittle*, 23 Fed. Rep. 544; and by Judge Pardee in *Re Higgins*, 27 Fed. Rep. 443. These authorities show that any willful attempt by any one, with knowledge that the road is in the hands of the court, to prevent or impede the receiver from complying with the order of the court in running the road, when the attempt is unlawful, and as between private individuals, would give a right of action for damages, is a contempt of the order of the court. The rights of the receiver with reference to his business in conducting the railroad under order of the court are not different in any respect from those of a private railway corporation. The only difference is in the remedy which the courts will apply to prevent or to punish a violation of them when such a violation prevents or impedes the operation of the road, and is intended to do so.

There is no doubt that Phelan intended to prevent utterly the operation of the Southern road by calling out the receiver's employes. He wished thus to paralyze his business. He did the trust a very substantial injury by stopping all traffic for a time, by making it necessary for the receiver to pay heavy expenses for the unusual police protection, and by putting him to much trouble and expense in securing new employes. Now, if the receiver were a private corporation, could he recover damages for the injury thus inflicted on the business of the road? A malicious or unlawful interference with the business of another by inducing his employes to leave his service is an actionable wrong, and subjects the offender to liability for the loss occasioned. In *Walker v. Cronin*, 107 Mass. 555, it was held that a count in a declaration which alleged that a plaintiff was a manufacturer of shoes, and for the prosecution of his business it was necessary for him to employ many shoemakers; that the defendants, well knowing this, did maliciously and without justifiable cause molest him in carrying on said business, with the unlawful purpose of preventing him from carrying it on, and willfully induced many shoemakers who were in his employment, and others who were about to enter it, to abandon it without his consent and against his will; and that thereby the plaintiff lost their services and profits and advantages, and was put to a great expense to secure other suitable workmen, and was otherwise injured in his business,—stated a good cause of action. See also *Sherry v. Perkins*, 147 Mass. 212.

The real question, therefore, is whether the act of Phelan in instigating and inciting the employes of the receiver to leave his employ was without lawful excuse, and therefore malicious. The question is not whether such an act would subject Phelan to punishment by indictment and trial under the criminal laws, but whether the act was unlawful in the sense that he could be made to pay damages for the loss occasioned. Of course, if the act would

subject him to punishment, for an indictable misdemeanor and crime, *a fortiori* would the act be unlawful; but his act may be a contempt without being a crime.

Now, it may be conceded in the outset that the employés of the receiver had the right to organize into or to join a labor union which should take joint action as to their terms of employment. It is of benefit to them and to the public that laborers should unite in their common interest and for lawful purposes. They have labor to sell. If they stand together, they are often able, all of them, to command better prices for their labor than when dealing singly with rich employers, because the necessities of the single employé may compel him to accept any terms offered him. The accumulation of a fund for the support of those who feel that the wages offered are below market prices is one of the legitimate objects of such an organization. They have the right to appoint officers who shall advise them as to the course to be taken by them in their relations with their employer. They may unite with other unions. The officers they appoint, or any other person to whom they choose to listen, may advise them as to the proper course to be taken by them in regard to their employment, or, if they choose to repose such authority in any one, may order them, on pain of expulsion from their union, peaceably to leave the employ of their employer because any of the terms of their employment are unsatisfactory. It follows, therefore (to give an illustration which will be understood) that if Phelan had come to this city when the receiver reduced the wages of his employés by 10 per cent, and had urged a peaceable strike, and had succeeded in maintaining one, the loss to the business of the receiver would not be ground for recovering damages, and Phelan would not have been liable to contempt even if the strike much impeded the operation of the road under the order of the court. His action in giving the advice, or issuing an order based on unsatisfactory terms of employment, would have been entirely lawful. But his coming here, and his advice to the Southern Railway employés, or to the employés of other roads, to quit, had nothing to do with their terms of employment. They were not dissatisfied with their service or their pay. Phelan came to Cincinnati to carry out the purpose of a combination of men, and his act in inciting the employés of all Cincinnati roads to quit service was part of that combination. If the combination was unlawful, then every act in pursuance of it was unlawful, and his instigation of the strike would be an unlawful wrong done by him to every railway company in the city, for which they can recover damages, and for which, so far as his acts affected the Southern Railway, he is in contempt of this court.

Now, what was the combination and its legal character? Was it an unlawful conspiracy? I do not mean by this an indictable conspiracy, because that depends on the statute; but was it a conspiracy at common law? If it was, then injury inflicted would be without legal justification, and malicious. A conspiracy is a combination of two or more persons, by concerted action, to accomplish a criminal or unlawful

purpose, or some purpose not in itself criminal or unlawful, by criminal or unlawful means. *Pettibone v. United States*, 148 U. S. 197, 37 L. ed. 419. What were the purposes of this combination of Debs, Phelan, and the American Railway Union board of directors? They proposed to inflict pecuniary injury on Pullman by compelling the railway companies to give up using his cars, and, on the refusal of the railway companies to yield to compulsion, to inflict pecuniary injury on the railway companies by inciting their employés to quit their services, and thus paralyze their business. It could not have been unknown to the combiners that the Pullman cars were operated by the railway companies under contracts with Pullman. Such large transactions are never conducted without contracts saving the rights of both sides, and the combiners had every reason to believe that it would be a violation of those contracts for the companies to refuse further to haul Pullman cars in their trains. One purpose of the combination was to compel railway companies to injure Pullman by breaking their contracts with him. The receiver of this court is under contract to Pullman, which he would have to break were he to yield to the demand of Phelan and his associates. The breach of a contract is unlawful. A combination with that as its purpose is unlawful, and is a conspiracy. *Angle v. Chicago, St. P. M. & O. R. Co.* 151 U. S. 1, 38 L. ed. 55.

But the combination was unlawful without respect to the contract feature. It was a boycott. The employés of the railway companies had no grievance against their employers. Handling and hauling Pullman cars did not render their services any more burdensome. They had no complaint against the use of Pullman cars as cars. They came into no natural relation with Pullman in handling the cars. He paid them no wages. He did not regulate their hours, or in any way determine their service. Simply to injure him in his business, they were incited and encouraged to compel the railway companies to withdraw custom from him by threats of quitting their service, and actually quitting their service. This inflicted an injury on the companies that was very great, and it was unlawful, because it was without lawful excuse. All the employés had the right to quit their employment, but they had no right to combine to quit in order thereby to compel their employer to withdraw from a mutually profitable relation with a third person for the purpose of injuring that third person, when the relation thus sought to be broken had no effect whatever on the character or reward of their service. It is the motive for quitting, and the end sought thereby, that make the injury inflicted unlawful, and the combination by which it is effected, an unlawful conspiracy. The distinction between an ordinary lawful and peaceable strike entered upon to obtain concessions in the terms of the strikers' employment and a boycott is not a fanciful one, or one which needs the power of fine distinction to determine which is which. Every laboring man recognizes the one or the other as quickly as the lawyer or judge. The combination under discussion was a boycott. It was so termed by Debs, Phelan, and all engaged in it. Boycotts, though unaccompanied by violence or

intimidation, have been pronounced unlawful in every state of the United States where the question has arisen, unless it be in Minnesota; and they are held to be unlawful in England.

In *Moore v. Bricklayers Union No. 1*, 23 Ohio L. J. 48, a union which embraces ninety-five per cent of the bricklayers of Cincinnati got into a controversy with Parker, a boss bricklayer, concerning apprentices and other matters. The union boycotted Parker, and notified all material men that any one selling him material would themselves be boycotted. Moore & Co. continued to sell Parker lime. Thereupon the union notified all of plaintiffs' customers and probable customers that none of its members would work Moore & Co's materials, and seriously damaged the business of Moore & Co. There was no violence, actual or threatened, in the case. Moore & Co. sued the Bricklayers' Union and some of its prominent members for the damages caused by the boycott. This case was tried before a jury in the superior court of Cincinnati, and resulted in a verdict for the plaintiffs of \$2500. The motion for new trial was reserved to the general term, where the case was fully considered, and the conclusion reached that the verdict must stand, because the combination to injure Moore & Co. was an unlawful conspiracy. The case was then carried by writ of error to the supreme court of Ohio, and the judgment of the superior court was affirmed without opinion. By the common law of Ohio, therefore, boycotts are illegal conspiracies. I quote from the opinion of the superior court in that case two passages, which seem to me to state the ground for holding boycotts illegal:

"We are dealing in this case with common rights. Every man, be he capitalist, merchant, employer, laborer, or professional man, is entitled to invest his capital, to carry on his business, to bestow his labor, or to exercise his calling, if within the law, according to his pleasure. Generally speaking, if, in the exercise of such a right by one, another suffers a loss, he has no ground of action. Thus, if two merchants are in the same business in the same place, and the business of the one is injured by the competition, the loss is caused by the other's pursuing his lawful right to carry on business as seems best to him. In this legitimate clash of common rights the loss which is suffered is *damnum absque injuria*. So it may reduce the employer's profits that his workmen will not work at former prices, and that he is obliged to pay on a higher scale of wages. The loss which he sustains, if it can be called such, arises merely from the exercise of the workman's lawful right to work for such wages as he chooses, and to get as high rate as he can. It is caused by the workman, but it gives no right of action. Again, if a workman is called upon to work with the material of a certain dealer, and it is of such a character as either to make his labor greater than that sold by another, or is hurtful to the person using it, or for any other reason is not satisfactory to the workman, he may lawfully notify his employers of his objection and refuse to work it. The loss of the material man in his sales caused by such action of the workman is not a legal injury, and not the subject of action. And so it may be said that in these

respects what one workman may do, many may do, and many may combine to do without giving the sufferer any right of action against those who cause his loss. But on this common ground of common rights, where every one is lawfully struggling for the mastery, and where losses suffered must be borne, there are losses willfully caused to one by another in the exercise of what otherwise would be a lawful right, from simple motives of malice.

* * * * *

"The normal operation of competition in trade is the keeping away or getting away patronage from rivals by inducements offered to the trading public. The normal operation of the right to labor is the securing of better terms by refusing to contract to labor except on such terms. . . . If the workmen of an employer refuse to work for him except on better terms, at a time when their withdrawal will cause great loss to him, and they intentionally inflict such loss to coerce him to come to their terms, they are bona fide exercising their lawful rights to dispose of their labor for the purpose of lawful gain. But the dealings between Parker Bros. and their material men, or between such material men and their customers, had not the remotest natural connection either with defendants' wages or their other terms of employment. There was no competition or possible contractual relation between plaintiffs and defendants where their interests were naturally opposed. The right of the plaintiffs to sell their material was not one which, in its exercise, brought them into legitimate conflict with the rights of defendants to dispose of their labor as they chose. The conflict was brought about by the effort of defendants to use plaintiffs' right of trade to injure Parker Bros., and, upon failure of this, to use plaintiffs' customers' right of trade to injure plaintiffs. Such effort cannot be in the bona fide exercise of trade, is without just cause, and is, therefore malicious. The immediate motive of defendants here was to show to the building world what punishment and disaster necessarily followed a defiance of their demands. The remote motive of wishing to better their condition by the power so acquired will not, as we think we have shown, make any legal justification for defendants' acts."

And so here there was no natural relation between Pullman and the railway employes, and their attempt to injure the companies because they would not injure him is without cause, and malicious, and is unlawful, even though the injury is inflicted merely by quitting employment.

Temperon v. Russell [1893] 1 Q. B. 715, was a case quite like the case just cited. There a firm of builders refused to obey certain rules laid down by three trades unions connected with the building trade at Hull. Thereupon a joint committee of the unions boycotted the building firm; that is, they attempted to prevent it from procuring any materials by notifying material men not to furnish them, on pain of being themselves boycotted. The plaintiff, a material man, refused to comply with its demand, and the unions then demanded of his material men not to furnish him any material, with the threat that,

if they did so, their workmen would quit. The result of this was that contracts for supplies to the plaintiff were broken, and others who, but for the threats, would have made contracts, were deterred from doing so. It was held that the boycott was an unlawful conspiracy, and that the joint committee of the unions who were sued were liable in damages for a malicious interference with the plaintiff's business. There was no violence or threatened violence in this case. The case was decided by the court of appeal of England, consisting of Lord Ester, master of rolls, and Lopes and A. L. Smith, *Lord Justices*.

In *Carew v. Rutherford*, 106 Mass. 1, 8 Am. Rep. 287, a contracting stone mason, contrary to the rules of the union, sent some of his material out of the state to be dressed, and his men, members of the union, refused to work for him any longer unless he paid a fine to the union, and did not return until he paid the fine. This was held to be illegal conspiracy for the purpose of extortion and mischief, and the employer was given a judgment for the recovery of the fine and damages.

Boycotts have been declared illegal conspiracies in *State v. Glidden*, 55 Conn. 46; *State v. Steuart*, 59 Vt. 278, 59 Am. Rep. 710; *Old Dominion SS. Co. v. McKenna*, 80 Fed. Rep. 48; *Casey v. Cincinnati Typographical Union No. 3*, 12 L. R. A. 193, 45 Fed. Rep. 135; *Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co.* 19 L. R. A. 387, 54 Fed. Rep. 730, 738, and in other cases.

But the illegal character of this combination with Debs at its head and Phelan as an associate does not depend alone on the general law of boycotts. The gigantic character of the conspiracy of the American Railway Union staggers the imagination. The railroads have become as necessary to life and health and comfort of the people of this country as are the arteries of the human body, and yet Debs and Phelan and their associates proposed, by inciting the employes of all the railways in the country to suddenly quit their service without any dissatisfaction with the terms of their own employment, to paralyze utterly all the traffic by which the people live, and in this way to compel Pullman, for whose acts neither the public nor the railway companies are in the slightest degree responsible, and over whose acts they can lawfully exercise no control, to pay more wages to his employes. The merits of the controversy between Pullman and his employes have no bearing whatever on the legality of the combination effected through the American Railway Union. The purpose, shortly stated, was to starve the railroad companies and the public into compelling Pullman to do something which they had no lawful right to compel him to do. Certainly the starvation of a nation cannot be a lawful purpose of a combination, and it is utterly immaterial whether the purpose is effected by means usually lawful or otherwise.

More than this, the combination is in the teeth of the Act of July 2, 1890, which provides that:

"Section 1. Every contract, combination in the form of trust or otherwise, or conspiracy in restraint of trade or commerce among the several states or with foreign nations is hereby
4 INTER 8.

declared illegal. Every person who shall make any such contract or engage in any such combination or conspiracy, shall be deemed guilty of a misdemeanor, and on conviction thereof, shall be punished by fine not exceeding five thousand dollars, or by imprisonment not exceeding one year, or both said punishments, in the discretion of the court."

That such a combination as the one under discussion is within the statute just quoted has been decided by Judge Billings of Louisiana in *United States v. Workmen's Amalgamated Council*, 54 Fed. Rep. 994. His view has been followed by the circuit judges of this circuit within the past ten days, by Judges Woods, Allen, and Grosscup of the seventh circuit, and by Judge Woolson of the eighth circuit. A different view has been taken by Judge Putnam in *United States v. Patterson*, 55 Fed. Rep. 605, but, after consideration, Judge Lurton and I cannot concur with the reasoning of that learned judge. The fact that it was the purpose of Debs, Phelan, and their associates to paralyze the interstate commerce of this country is shown conclusively in this case, and is known of all men. Therefore their combination was for an unlawful purpose, and is a conspiracy, within the statute cited.

It could also be shown, if it were necessary, that this combination was an unlawful conspiracy because its members intended to stop all mail trains as well as other trains, and did delay and retard many, in violation of section 3995, U. S. Rev. Stat., which imposes a penalty on any one willfully and knowingly obstructing or retarding the passage of the mail. It would be no defense, under that statute, that the obstruction was effected by merely quitting employment, where the motive of quitting was to retard the mails, and had nothing to do with the terms of employment.

Something has been said about the right of assembly and free speech secured by the constitution of Ohio. It would be strange, indeed, if that right could be used to sustain the carrying out of such an unlawful and criminal conspiracy as we have seen this to be. It never has been supposed to protect one from prosecution or suits for slander, or for any of the many malicious and tortious injuries which the agency of the tongue has been so often employed to inflict. If the obstruction to the operation of the road by the receiver was unlawful and malicious, it is not less a contempt because the instrument which he used to effect it was his tongue, rather than his hand.

But it is unnecessary to consider the question further. It is very clear that Phelan came here to carry out an illegal conspiracy, in the course of which, and in pursuance of which, he attempted, and partially succeeded in tying up the Southern Railroad, operated by a receiver under an order of this court, as he well knew. His purpose in calling out the employes of the Southern Railroad was unlawful by the law of Ohio and the laws of the United States. He intended to prevent entirely its operation. He partially succeeded, and he subjected the receiver to great expense in reducing the loss occasioned by his acts.

It follows that the contemnor is guilty as charged, and it only remains to impose the sentence of the court. This is in the discretion

of the court, to be exercised on any information in reference to the convicted person which the court believes to be reliable. The court would be much more disposed to leniency in this case if the contemnor, after his arrest, had shown the slightest regard for the order of the court which the receiver was attempting to comply with in the operation of the road. Even if he did not fully realize the position in which he had put himself with respect to the order of the court to the receiver to operate the Southern Railroad, his arrest, and the service of the intervening petition, together with the restraining order, should have quickened his conscience and his perceptions of his duty in this regard. It was his duty, therefore, to cease all his operations with reference to the strike in this city which could in any way affect the operation of the Southern Railway, whether by inciting employes to leave the receiver or by preventing his employment of others. What did he do? Instead of ceasing to incite the receiver's employes to leave his employ in pursuance of his unlawful conspiracy, there has been no change whatever in his course from that pursued by him before his arrest. By speeches every night since the arrest he has aggravated his contempt. On the night of July 4, it is in evidence, the contemnor said, in a speech to railroad employes of the city, referring to this trial:

"I don't care if I am violating injunctions. No matter what the result may be to-morrow, if I go to jail for sixteen generations, I want you to do as you have done. Stand pat to a man. No man go back unless all go, and all stay out unless Phelan says go back."

It was a direct invitation to continue the course already taken under his direction of preventing the return of employes to the receiver, and of persuading the striking of others,

and an avowed intention of disregarding the order of the court.

The punishment for a contempt is the most disagreeable duty a court has to perform, but it is one from which the court cannot shrink. If orders of the court are not obeyed, the next step is unto anarchy. It is absolutely essential to the administration of justice that courts should have the power to punish contempts, and that they should use it when the enforcement of their orders is flagrantly defied. But it is only to secure present and future compliance with its orders that the power is given, and not to impose punishment commensurate with crimes or misdemeanors committed in the course of the contempt, which are cognizable in a different tribunal or in this court by indictment and trial by jury. I have no right, and do not wish, to punish the contemnor for the havoc which he and his associates have wrought to the business of this country, and the injuries they have done to labor and capital alike, or for the privations and sufferings to which they have subjected innocent people, even if they may not be amenable to the criminal laws thereof. I can only inflict a penalty which may have some effect to secure future compliance with the orders of this court and to prevent willful and unlawful obstruction thereof.

After much consideration, I do not think I should be doing my duty as a judicial officer of the United States without imposing upon the contemnor the penalty of imprisonment. The sentence of the court is that Frank W. Phelan be confined in the county jail of Warren county, Ohio, for a term of six months. The marshal will take the prisoner into custody, and safely convey him to the place of imprisonment.

UNITED STATES CIRCUIT COURT, EASTERN DISTRICT OF MISSOURI.

UNITED STATES

v.

M. J. ELLIOTT ET AL.

(82 Fed. Rep. 801.)

1. A combination whose professed object is to arrest the operation of interstate railroads until they accede to certain demands, whether such demands are reasonable or unreasonable, just or unjust, is an unlawful conspiracy in restraint of commerce among the states, under Act of Congress of July 2, 1890, declaring every conspiracy in restraint of trade or commerce among the several states illegal.
2. A preliminary injunction will be granted to restrain threatened acts in pursuance of an unlawful conspiracy in restraint of commerce between the states.

Decided July 6, 1894.

SUIT to enjoin defendants from violating the Act of Congress against conspiracies in restraint of trade. On motion for preliminary injunction. *Granted.*
The facts are stated in the opinion.

Mr. William H. Clopton, U. S. Atty., in support of the motion.

4 INTER S.

Thayer, *District Judge*, delivered the opinion of the court (orally):

The unusual character of the bill filed by the government renders it proper that the court should state briefly the reasons that have influenced its action in granting a part of the relief prayed for therein.

The Act of Congress approved July 2, 1890 (26 Stat. at L. 209) entitled "An Act to Protect Trade and Commerce against Unlawful Restraints and Monopolies," declares in its first section that:

"Every contract, combination in the form of trust or otherwise, or conspiracy in restraint of trade or commerce among the several states or with foreign nations, is hereby declared to be illegal. Every person who shall make any such contract or engage in any such combination or conspiracy shall be deemed guilty of a misdemeanor and on conviction thereof shall be punished by fine not exceeding five thousand dollars or by imprisonment not exceeding one year or by both said punishments, in the discretion of the court."

Ordinarily it is neither lawful nor expedient for a court of equity to award an injunction to prevent the doing of acts that are in themselves crimes. The regular course of judicial procedure requires that persons accused of crime should be prosecuted by information or indictment, and not otherwise. There are, however, well-established exceptions to this rule. When a criminal act is threatened, which is liable to occasion irreparable injury to private persons, or which would give rise to a multitude of suits at law to redress the wrong, if committed, a court of equity may issue an injunction, at the instance of an individual, against parties who threaten to commit the wrong. But the court is not called upon, in this instance, to consider whether the proceeding falls within the ordinary jurisdiction of a court of equity. By the fourth section of the Act of July 2, 1890, which is above referred to, Congress has declared that:

"The several circuit courts of the United States are hereby invested with jurisdiction to prevent and restrain violations of this Act; and it shall be the duty of the several district attorneys of the United States in their respective districts under the direction of the Attorney General to institute proceedings in equity to prevent and restrain such violations. Such proceedings may be by way of petition setting forth the case and praying that such violation shall be enjoined or otherwise prohibited. When the parties complained of shall have been duly notified of such petition the court shall proceed as soon as may be to the hearing and determination of the case; and pending such petition and before final decree the court may at any time make such temporary restraining order or prohibition as shall be deemed just in the premises."

This section of the Act makes the jurisdiction of the court clear over the parties and subject matter, if the bill now before the court, which has been exhibited with the sanction of the Attorney General, shows the existence of a conspiracy among the defendants to restrain trade or commerce among the several states, and that acts have already been done or threatened by the several defendants in furtherance

of the alleged conspiracy. Congress has seen fit, on grounds of public policy, to authorize the law officers of the government to appeal to the courts of the United States by a bill in equity filed in behalf of the people of the United States, to arrest, by writ of injunction or prohibition, the commission of acts which are designed to obstruct the free flow of commerce between the states, and no one can doubt the power of Congress to confer such authority. From the very foundation of the government, it has been accepted as a proposition which admitted of no controversy that the right to regulate commerce among the several states, and to pass laws to protect commerce of that character, pertained to the general government, and that its power in that respect was plenary and paramount.

An examination of the bill which has been exhibited by the United States shows that it charges, in substance, that the various defendants named therein have combined and confederated among themselves to prevent several railroads named in the bill, whose lines radiate from St. Louis, and which are engaged, among other things, in interstate commerce, from conducting their customary business of transporting passengers and freight between points in this state and points in other adjoining states to which their several lines extend. The bill further charges that the several defendants named therein have combined and conspired to induce persons in the employ of said railroad companies to leave the service of their respective companies, and to prevent them from securing other operatives, the object of such conspiracy being to prevent said railway companies from hauling certain cars which are customarily used by them in the transaction of their business as interstate carriers of freight and passengers. The bill also charges the commission of divers and sundry acts by some of the defendants in furtherance of the objects of the aforesaid confederation. Among other things, it is alleged that certain of the defendants have issued orders to persons in the employ of the several railway companies, who act subject to their direction, whereby such employes are commanded and required to cease from operating trains of the respective railroad companies in whose service they are employed. It is also alleged that certain of the defendants named in the bill have asserted and threatened that they will tie up and paralyze the operations of each of said railway companies which refuses to accede to certain demands made upon them, and that it is the purpose and object of the defendants so conspiring, and who have made such threats, to so obstruct and cripple said railroad companies as to prevent them from performing their duties as common carriers of freight and passengers between points in the several states to which the lines of such roads extend. It is also charged in the bill, in substance, that it is the purpose and object of the defendants who are engaged in the aforesaid conspiracy to secure to themselves the entire control of interstate commerce between the city of St. Louis and points to other states to which the lines of the several railroad companies mentioned in the bill extend, and to restrain and prevent the persons owning said roads from exercising any independent control thereof in

the transaction of interstate business. The court thinks it manifest that the allegations of the bill, which have thus been very imperfectly stated, show the existence of a conspiracy in restraint of trade and commerce among the several states, within the language and the fair intent and meaning of the Act of July 2, 1890. A combination whose professed object is to arrest the operation of railroads whose lines extend from a great city into adjoining states, until such roads accede to certain demands made upon them, whether such demands are in themselves reasonable or unreasonable, just or unjust, is certainly an unlawful conspiracy in restraint of commerce among the states. Under the laws of the United States, as well as at common law, men may not conspire to accomplish a lawful pur-

pose, by unlawful means. *Pettibone v. United States*, 148 U. S. 197, 37 L. ed. 419; *Com. v. Hunt*, 4 Met. 111, 38 Am. Dec. 346. The construction thus given to the Act of July 2, 1890, is not a new construction. It has already received the same interpretation in other circuits after full consideration,—particularly by the Circuit Court of the United States for the Fifth Circuit in the case of *United States v. Workingmen's Amalgamated Council*, 54 Fed. Rep. 994, 57 Fed. Rep. 85.

The result is that this court, acting on the ground herein stated, will grant a preliminary injunction, restraining the defendants, during the pendency of this suit, and until final hearing, from doing the acts threatened, in pursuance of the alleged conspiracy.

UNITED STATES CIRCUIT COURT, SOUTHERN DISTRICT OF CALIFORNIA.

SOUTHERN CALIFORNIA R. CO.

v.
C. C. RUTHERFORD ET AL.

(62 Fed. Rep. 796.)

An injunction will lie against railroad employes, who, continuing in employment, refuse to perform their duties, where the direct result of such refusal works irreparable damage to the em-

ployer; and, at the same time interferes with the transmission of the mail, and with commerce between the states, notwithstanding there is no precedent for such injunction.

Decided June 30, 1894.

SUIT to enjoin defendants, employes of the complainant company, from refusing to handle trains with Pullman cars attached. *Granted.*
The facts are stated in the opinion.

Mr. W. J. Hunsaker for complainant.

Ross, District Judge, delivered the following opinion:

Time does not admit of an extended statement of the facts of the case or of the reasons for awarding the injunction applied for. The bill shows, among other things, that the complainant railway company is one link in a through line of road extending from National City, San Diego county, Cal., to the city of Chicago, in the state of Illinois, engaged in the transportation, among other things, of interstate commerce and the mails of the United States; its connecting roads being the Atlantic & Pacific and the Atchison, Topeka & Santa Fé railroad companies. That there is a valid existing contract between the complainant company and its connecting companies and the Pullman Palace Car Company by which all regular passenger trains running over the said through line of road, including that of the complainant, carrying the mail and passengers, shall carry Pullman cars. That the defendants are in the employ of the complainant company, and were employed by it to, among other things, handle and operate its trains so engaged

in carrying the United States mail and passengers and freight between National City, Cal., and Chicago, Ill., and to and from intermediate points, and from the time of their employment up to the time of the commission of the acts complained of by the complainant were duly accustomed to handle and operate such trains, including Pullman cars. That subsequently the defendants, although remaining in the employment of the company, refused, and still refuse, to handle or operate any train of cars of the complainant company to which a Pullman car is attached; and because of the discharge by the receivers in possession and control of the Atchison, Topeka & Santa Fé Railroad Company of certain employes of theirs for refusing to handle or operate any train of that road to which a Pullman car is attached, the defendants to the present bill, while remaining in the employment of the complainant company, refused, and still refuse, to handle or operate any of the trains of the complainant company engaged in carrying the mail of the United States and in the aforesaid interstate commerce, which their regular and

accustomed duties as such employes required, and still require, them to operate and handle. Undoubtedly, in the absence of a valid existing contract obligating the defendants to remain in the employment of the complainant company, they would ordinarily have the legal right to quit the employment and cease work at any time. But the bill alleges that the defendants continue in the employment of the complainant company, and yet refuse to perform their regular and accustomed duties as such employes; and it further shows that such refusal subjects and will continue to subject the complainant to a multiplicity of suits and to great and irreparable damage, in that there is an existing valid contract requiring complainant to attach a Pullman car or cars on all of its through trains for the carriage of passengers and the mail, and also retards and interrupts the complainant in the transmission of the United States mail and the interstate commerce aforesaid.

It is manifest that for this state of affairs the law—neither civil nor criminal—affords an adequate remedy. But the proud boast of equity is, "*Ubi jus, ibi remedium.*" It is the maxim which forms the root of all equitable decisions. Why should not men who remain in the employment of another perform the duties they contract and engage to perform? It is certainly just and right that they should do so, or else quit the employment. And where the direct result of such refusal works irreparable damage to the employer, and at the same time interferes with the transmission of the mail and with commerce between the states, equity, I think, will compel them to perform the duties pertaining to the employment so long as they continue in it. If I unlawfully obstruct by a dam a stream of flowing water, equity, at the suit of the party injured, will compel me by injunction, mandatory in character, to remove the dam, and, prohibitory in character, from further interfering with the flow of the stream; and if I unlawfully erect a wall shut-

ting out the light from another, equity will compel me to tear it down, and to refrain from further interference with the other's rights. It is true that such cases are not precisely like the present one, yet the principle upon which the court proceeds in such cases is not not substantially different. And if it be said that there is no exact precedent for the awarding of an injunction in the present case, I respond, in the language of the court in the case of *Toledo, A. & N. M. R. Co. v. Pennsylvania Co.* 19 L. R. A. 387, 54 Fed. Rep. 751:

"Every just order or rule known to equity courts was born of some emergency, to meet some new conditions, and was, therefore, in its time, without precedent. If based on sound principles, and beneficent results follow their enforcement, affording necessary relief to the one party without imposing illegal burdens on the other, new remedies and unprecedented orders are not unwelcome aids to the chancellor to meet the constant and varying demands for equitable relief."

Moreover, the rights of the public in a case of this sort should be considered. "Railroads," said the Supreme Court in the case of *Joy v. St. Louis*, 138 U. S. 50, 34 L. ed. 859, "are common carriers, and owe duties to the public. The rights of the public in respect to these great highways of communication should be fostered by the courts; and it is one of the most useful functions of a court of equity that its methods of procedure are capable of being made such as to accommodate themselves to the development of the interests of the public, in the progress of trade and traffic, by new methods of intercourse and transportation."

For the reasons thus hastily and briefly stated, I shall award an injunction requiring the defendants to perform all of their regular and accustomed duties so long as they remain in the employment of the complainant company, which injunction, it may be as well to state, will be strictly and rigidly enforced.

UNITED STATES CIRCUIT COURT, NORTHERN DISTRICT OF ILLINOIS.

RE CHARGE TO GRAND JURY (No. 4).

(63 Fed. Rep. 436.)

1. The wrongful and corrupt agreement between two or more men connected with the railroad, whatever their position, for the purpose of creating public sympathy in a threatened strike, or any other purpose, to cause the mail trains and trains carrying interstate commerce to be stopped, with acts in pursuance of such agreement, constitutes a conspiracy.
2. An agreement between two or more men connected with a railroad company that, for the purpose of creating public sympathy in a strike, they will discharge men from their employ who would otherwise not have been discharged, intending that such discharge shall stop the running of mail or interstate commerce trains and

thereby raise public indignation, constitutes a conspiracy.

3. An agreement between two or more men connected with a railroad in view of a threatened strike that they will not employ men to take the place of those who quit their service, but will allow mail and interstate commerce trains to stand still for the purpose merely of creating public sympathy or indignation against the strikers, constitutes conspiracy, unless the circumstances and situation were such that the employment of new men, reasonably viewed, would lead to danger to them or to the railroad property, or to any public interest.

July 14, 1894.

Further charge by *Judge Grosscup* (orally):

I think it my duty to give you further instructions. No man is above the law. The line of criminality or innocence is not drawn between classes, but only between men who violate the law and men who do not. The fact that a man may occupy a high position does not exempt him from indictment and trial simply because he does occupy a high position. The fact that a man may occupy a lower position does not exempt him from making known his grievances to you, simply because he may occupy such a position. Your door, therefore, ought to be open to all inquiry coming from every source that is founded on something more than mere rumor or conjecture; in other words, on something that has tangible form. It is stated in public print that some of our fellow citizens believe that the interruption of the mails and of interstate commerce, into which you are inquiring, was the result of a conspiracy upon the part of men higher in the railroads than the employes. If two or more men, no matter what their position in the railroad company may have been, wrongfully and corruptly agreed among themselves, either for the purpose of creating public sympathy in a threatened strike, or for any other purpose, that they would cause the mail trains and trains carrying interstate commerce to be stopped, and did acts in pursuance of that agreement, they are guilty of conspiracy. If two or more men agreed wrong-

fully and corruptly among themselves that, for the purpose of creating public sympathy in this strike, they would discharge men from their employ who otherwise would not have been discharged, intending that such discharge should stop the running of the mail or interstate commerce trains, and thereby raise public indignation, they would be guilty of conspiracy. If two or more men, in view of a threatened strike, agreed wrongfully and corruptly that they would not employ men to take the places of the men who had quitted the service, but would allow the trains to stand still for the sake, merely, of creating public sympathy or indignation against the strikers, they would be guilty of conspiracy, unless the circumstances and situation were such that the employment of new men, reasonably viewed, would lead to danger to those men, or danger to the railroad property, or danger to any public interest. As I said, every man is entitled to bring a complaint of any one of these charges to your attention, if he brings it with tangible evidence,—something that is not mere hearsay, or rumor, but something upon which you can place your judgment; and it is the duty of the district attorney to submit it to you, and of the members of the grand jury to hear it. If there is anything of that kind to be submitted to you, I trust it will be so submitted in your sessions, either during the balance of the day, or when you return next week. That is all I wish to say to you.

UNITED STATES CIRCUIT COURT, SOUTHERN DISTRICT OF ILLINOIS.

ANTHONY J. THOMAS ET AL.,

v.

WABASH, ST. L. & P. R. CO. ET AL.

LANCASTER MILLS of Clinton, Intervenor.

(63 Fed. Rep. 200.)

1. A state statute prohibiting carriers from limiting their liability for loss by fire cannot be made to apply to property being transported under a bill of sale from a point in one state to a point in another state, both foreign to the state enacting the statute, although the carrier's charter was granted by such state and the point where the loss occurs is actually within its boundaries.
2. Permitting a shipment of cotton to lie at one station for eighteen days is negligence under a contract to transport it within a reasonable time.
3. A carrier who receives under a contract to transport it within a reasonable time, freight for

shipment which must go through a point at which the facilities are so greatly overcrowded that a delay will be necessary at that point, will be liable for the loss of the property caused by the delay at that point.

4. A carrier which receives cotton for transportation under a contract by which it agrees to deliver it to the consignee within a reasonable time, is liable for its loss if it leaves it for eighteen days on a barge moored in a river exposed to sparks from passing boats and engine on the levee above, by some of which it is set on fire.

Decided Sept. 24, 1894.

PETITION by the Lancaster Mills to recover the value of property which had been destroyed by fire while in possession of the Cairo, Vincennes & Chicago Line for transportation. *Petition granted.*

The facts are stated in the opinion.

4 INTER S.

Mr. W. L. Gross with *Messrs. John F. Lewis* and **Curtis Tilton** for petitioner.
Mr. John M. Butler, for Thomas and Tracy, receivers.

Allen, *District Judge*, delivered the following opinion:

The proceedings in this cause were commenced by the Insurance Company of North America to recover from the Cairo, Vincennes & Chicago Line, in the hands of Thomas and Tracy, its receivers, the invoice value of 700 bales of cotton destroyed by fire at Cairo, Ill., on the 28th day of December, 1886. The cotton was insured under the provisions of a general policy, in February, 1886, in favor of the Lancaster Mills, and the petitioners, having paid the loss, claim to have been subrogated to the rights of the assured, and seek a recovery against the carrier. Bowles & Son, of Memphis, Tenn., seem to have bought the cotton for, or as agents of, the Lancaster Mills, had the same sent to a compress company in that city, and afterwards it was delivered by such agents of the Lancaster Mills to Joseph Nash, agent of the Cairo, Vincennes & Chicago Line, who gave in return bills of lading. The bill of lading covering the cotton on barge 49, acknowledged its receipt from Bowles & Son at Memphis, and has on its face the words, "Notify Lancaster Mills, Clinton, Massachusetts." It is a through bill, issued by the "Cairo, Vincennes & Chicago Line, in connection with all trunk lines between Cairo, Toledo, Cleveland, Detroit, Chicago, Buffalo, Pittsburgh, Philadelphia, Boston, New York, New England, and intermediate points," and undertook the carriage of the cotton from Memphis to Clinton, Mass. It is signed by Joseph Nash, agent of the Cairo, Vincennes & Chicago Line, and contains a clause exempting the carrier from liability "for loss or damage to any article or property whatever, by fire or other casualty, while in transit, or while in depots or other places of transshipment, or at depots or landings at point of delivery; nor for loss or damage by fire, collision, or the dangers of navigation while on the seas, rivers, lakes, or canals." It bears date, on its face, December 13, 1886, but there is evidently an error as to this date, as barge 49, with the 700 bales of cotton subsequently burned, reached Cairo about midnight of December 10. The bill of lading was probably made on or about the 8th of December. The petition is answered by the receivers of the railroad carrier, and raises numerous questions of fact and of law pertaining to the alleged right of recovery. Much evidence has been taken, and great zeal and ability have been exhibited by counsel on both sides. Many of the issues of fact made by the answer, and questions of law discussed, have ceased to be important, much less controlling, in view of the character of the evidence and the presentation of authorities bearing upon them. No question is made as to the fact that the insurance company paid the Lancaster Mills the amount of the indemnity agreed on between them, nor of law that, having made such payment, it has the same right to recover the insured would have possessed had no payment or subrogation occurred.

One of the first questions presented is made

by the denial on the part of petitioners of the validity of the fire exemption clause in the bill of lading, on account of the force of an Illinois statute passed March 27, 1874, which provides "that whenever any property is received by a common carrier to be transported from one place to another within or without this state, it shall not be lawful for such carrier to limit his common-law liability safely to deliver such property at the place to which the same is to be transported, by any stipulation or limitation expressed in the receipt given for such property." When it is remembered that the bill of lading was executed, delivered, and accepted at Memphis, Tenn., that it contemplated a through carriage of cotton from Tennessee to Massachusetts, and that the power of the carrier to make such contract has not been challenged, the authority of the state of Illinois to declare invalid a clause in the contract cannot be admitted. The legislature of Illinois, in regulating commercial contracts, cannot, in binding effect, go beyond the boundaries of the state; and it does not matter, in this regard, that the franchise to the corporation represented by the receivers, Thomas and Tracy, was granted by the Illinois legislature. They had the same rights at Memphis, or in any other place outside the boundaries of Illinois, to limit their common-law liabilities, that were possessed or belonged to any other contracting party, natural or artificial. It may be assumed, then, that the carrier had the right to limit his common-law liability, but this privilege cannot be held to extend to loss of goods, intrusted to him for carriage, caused by his own carelessness or negligence. Counsel for receivers make no such contention. The intervening petition in this case alleges "that the loss of cotton by said fire was the result of the carelessness and negligence and delay of said receivers of said Cairo, Vincennes & Chicago Line while the said cotton was in their possession in course of transportation in pursuance of the contract of transportation aforesaid." Under the contract of affreightment, evidenced by the bill of lading, the Cairo, Vincennes & Chicago Line had the privilege of selecting its own line of transportation. It made choice of the Mississippi Valley Transportation Company from Memphis to Cairo. The barge containing the cotton left Memphis on the 8th or 9th of December, 1886, and was in the city of Cairo about midnight of the 10th of December. The undertaking bound the carrier to safely carry and deliver the cotton to the consignee within a reasonable time. I cannot, after the best consideration I have been enabled to give the evidence, resist the conclusion that the cotton was unreasonably detained at Cairo. Reaching there on the 10th, it remained on the same barge in the same harbor until the 28th, when it was burned. It is urged, in explanation by counsel for the receivers, that when all the circumstances existing at Cairo at that time are duly and fairly considered, press of business, limited facilities, the precedence of cotton coming on steamboats

to that arriving on barges, etc., the 18 days between the arrival and the destruction of the cotton do not constitute negligence or unreasonable delay on the part of the carrier. And it is also urged that Bowles & Son, agents for the Lancaster Mills at Memphis, knew of the conditions at Cairo when the contract for transportation was made with Nash. It is sufficient to say, with reference to this explanation, that the carrier was bound to know, when he accepted the cotton, that he had or could avail himself of the facilities to transport it within a fairly reasonable period. Knowing the conditions at Cairo, he should not have received the cotton at Memphis. It is unnecessary to cite authorities in support of the position that a carrier is not bound to receive freight when he has no facilities for transporting it, or when his line is already overtaxed and congested by freight previously accepted for transportation. The Cairo, Vincennes & Chicago Line was under no obligation to accept or receive freight at Memphis, when it had no ability to transport it to the destined point within a reasonable time. It chose to do so, however, and cannot be relieved from its undertaking because of difficulties in the way of the performance of the contract, when its agent knew of such difficulties at the time the contract was executed.

The contention is made, however, by counsel for receivers, that, even if unusual delay had occurred at Cairo after the arrival of the cotton, and before it was destroyed,—which is denied,—this would not render the receivers liable for the loss of the cotton burned, because such delay would, at the most, only be a remote, and not the proximate, cause of the loss of the cotton by fire. Many well-considered cases have been referred to by the learned counsel for the receivers in support of his position, and it may be that it announces a sound rule. It will be borne in mind, however, that the negligence imputed to the carrier in this case in the petition is not merely delay, but "that the loss of the cotton by said fire was the result of the carelessness and negligence and delay of said receivers while the said cotton was in their possession, in course of transportation in pursuance of the contract of transportation as aforesaid." If mere delay constituted all the alleged negligence to be found in the pleadings and evidence, the question might present less difficulty, for the negligence must be the proximate, and not the remote, cause of the burning, to render the carrier liable. Had lightning set the cotton on fire, or had one of the frequent river storms destroyed it, the delay preceding the accident might not be regarded as the proximate cause of the destruction; and in such or a like case in fact or principle the cases cited by counsel for the receivers, of *Memphis & C. R. Co. v. Reeres*, 77 U. S. 10 Wall. 176, 19 L. ed. 909; *Morrison v. Davis*, 20 Pa. 171, 57 Am. Dec. 695; *Denny v. New York Cent. R. Co.* 13 Gray, 481, 74 Am. Dec. 645; *St. Louis, I. M. & S. R. Co. v. Commercial U. Ins. Co.* 189 U. S. 223, 85 L. ed. 154; *New York Lighterage & Transp. Co. v. Pennsylvania R. Co.* 43 Fed. Rep. 172; *Hoadley v. Northern Transp. Co.* 115 Mass. 304, 15 Am. Rep. 106,—and others on that line, would be in point. The petition, how-

ever, and the evidence in support of it, go far beyond mere delay, charging and proving satisfactorily that the carrier company, on reaching Cairo with the cotton, on December 10th, did not proceed to North Cairo, where the Cairo, Vincennes & Chicago Line had a wharf-boat, from which cotton on that line of transit was carried up an incline by tracks into the cotton shed, to be loaded on cars for the east; but, on the contrary, tied up Barge 49, containing the cotton, a distance of more than one mile, at the foot of 10th Street, at the public levee, in a position, not only exposed to the sparks of passing steamboats, but in close proximity to the tracks of the Illinois Central Railroad upon the top of the levee. A position more exposed to sparks from the numerous vessels in a busy harbor, and from the smoke-stacks of the engines almost constantly passing on the railroad, could not have been chosen in Cairo. And it was at this exposed point that the barge containing the cotton was moored, till it was destroyed by fire on the 28th of December; the fire originating most likely from sparks emitted from boats on the river or engines on the levee. It is not mere delay, therefore, but negligent delay in a dangerous place, willful, it may be said, and deliberate exposure of the cotton to danger from fire, that fixes the liability of the carrier. The danger could have been foreseen, should have been foreseen, and guarded against.

Another ground of defense, urged apparently with much confidence by counsel for the receivers, is that the owner of the cotton burned on barge 49 expressly assumed the fire risk while the cotton was on the barge, and expressly relieved the Cairo, Vincennes & Chicago Line and its receivers from liability for loss of the cotton by fire while on the barge; or, to put the matter in the language of counsel's brief: "The receivers, by Nash, their agent, purchased and paid for an interest in the insurance of the cotton already effected by the owner in its open policies of insurance issued by the Insurance company of North America, to the extent of the risk while the cotton was on barge 49. By these contracts the insurance held by the owner inured to the benefit of the receivers to the extent of the risk while the cotton was on barge 49." This defense, and the alleged facts on which it is founded, are controverted and vigorously denied by petitioners. The receivers insist that the shipper assumed the river risk, and produce two instruments of writing purporting to be signed by William Bowles & Son, per Hayes, in support of this view. Nash testifies that the money mentioned in the instruments was for the assumption by Bowles & Son of the river risk. These two papers and Nash's testimony constitute the substance of the receivers' evidence upon the point. The petitioner produces William Bowles, Jr., and Mr. Hayes, who characterize the papers as forgeries, and deny positively that the shippers, Bowles & Son, ever assumed the "river risk" or insurance risk between Memphis and Cairo. These two witnesses and others do say, however, that Bowles & Son were paid a rebate by Nash of two to eight cents per 100 pounds; that competition at Memphis for eastern consignments was sharp, and the payment of re-

bates usual, if not universal. The cross-examination of the witnesses upon the disputed point, together with the various circumstances and explanations offered in evidence, satisfies me that the shipper did not assume any such risk; and that, if he was paid anything by

Nash in connection with the transportation of the cotton, it was in the nature of a rebate. No other point or question is deemed of sufficient importance to warrant further discussion in the case. There will be a decree in favor of petitioner for \$35,867.

UNITED STATES CIRCUIT COURT, EASTERN DISTRICT OF LOUISIANA.

FRANK T. COPP

v.

LOUISVILLE & N. R. CO.

(50 Fed. Rep. 164.)

The statute of limitations of the state in which the offense was committed applies in actions under the Interstate Commerce Act to recover back

freight paid to a carrier in excess of that charged other shippers.

Decided April 21, 1892.

ON MOTION for new trial in an action to recover back excessive freight charges. *Granted.*
The facts are stated in the opinion.

Mr. B. R. Forman for plaintiff.

Messrs. Bayne & Denegre for defendant.

Billings, *District Judge*, delivered the following opinion:

The plaintiff has brought suit under the Act of Congress known as the "Interstate Commerce Act" (24 Stat. at L. 380, §§ 3, 9) to recover the amount of freight paid by him to the defendant in excess of that paid to it by others for similar service. An exception was filed by the defendant, interposing the plea of the limitation or prescription in force under the statute of the state of Louisiana. The statute relied upon is Rev. Civ. Code, art. 3536, which provides that "the following actions are also prescribed by one year: That for injurious words, whether verbal or written, and that for damages caused by animals, or resulting from offenses or *quasi* offenses." It is claimed by the defendant that this is an action for a *quasi* offense, and it is controlled by the state statute. Code Prac. art. 28, declares that "personal actions are grounded on four causes: Contracts, *quasi* contracts, offenses, and *quasi* offenses," and article 32 further defines personal actions arising from *quasi* offenses to be when the ground of action is the injury done to another by one of those faults which are not considered as real crimes or offenses. It has not been questioned, and I think cannot be questioned, that the fault complained of by the plaintiff is included within the definition of "*quasi* offenses."

The question is whether this state statute of limitations applies to this action. The action

arises from a law of Congress against discrimination in the charges for the transportation of merchandise. Where there has been discrimination, Congress has created a right of action in favor of the party against whom it has been made for the excess of the charge collected from him, as compared with that collected from others. It is to be observed that in the Act of Congress there is no limitation as to time, and that, unless the state statute applies, there is no limitation. On the other hand, the action is authorized in case of discrimination, with or without damage; and to that extent it is a statute in the nature of a statutory provision for an action to protect the interests of the public, *i. e.*, to secure a uniform rate of charge for the transportation of merchandise by common carriers, and giving an action even in case the party discriminated against had paid no more than the value of the service of transportation. Nevertheless it is a purely civil action, and, by denomination or definition, is within the meaning of the state statute of limitations. The question is whether section 721 of the United States Revised States, being a portion of section 34 of the Judiciary Act of September 24, 1789, includes the limitation or prescription for actions known as "*quasi* offenses" contained in the Louisiana statute. In Angell on Limitations, § 24, the rule is laid down as follows:

"Under the 34th section of the Judiciary Act of 1789, the acts of limitations of the sev-

eral states, where no special provision has been made by Congress, form a rule of decision in the courts of the United States; and the same effect is given to them as is given to them in the state courts."

This passage from Angell is adopted by the Supreme Court as a correct statement of the law in *Hanger v. Abbott*, 73 U. S. 6 Wall. 537, 18 L. ed. 942. In *Toiensen v. Jemison*, 50 U. S. 9 How. 414, 13 L. ed. 197, the Supreme Court quotes approvingly that in the courts of the United States the law of the former governors, and says that "statutes of limitation, unless the plaintiff can bring himself within their exceptions, appertain *ad tempus et modum actionis instituenda*, and not *ad calorem contractus*." In *McIver v. Ragan*, 15 U. S. 2 Wheat. 29, 4 L. ed. 176, Chief Justice Marshall says: "It would be going far to add to these exceptions;" *i. e.*, those exceptions made by the legislature. In *McCluny v. Silliman*, 28 U. S. 3 Pet. 270, 7 L. ed. 676, where the Act of Congress made it the duty of the registers of the land office to enter, upon application, certain lands, and the action was brought against a register for not having entered lands upon the proper application of the plaintiff—the action being an action upon the case, and the statute of Ohio (the suit was brought in the United States circuit court in the district of Ohio) limited to six years all actions upon the case,—the Supreme Court held that the plea setting up the state statute of limitations was a good plea. In that case one of the errors assigned was—

"That no statute of limitations of the state of Ohio, then in force, is pleadable in an action upon the case brought by a citizen of one state against a citizen of another, in the circuit court of the United States, for malfeasance or nonfeasance in office in a ministerial officer of the general government, and especially when the plaintiff's rights accrued to him under a law of Congress."

In reply to this objection, the court, at page 278 [678] says:

"Where the statute is not restricted to par-

ticular causes of action, but provides that the action, by its technical denomination, shall be barred, if not brought within a limited time, every cause for which the action may be prosecuted is within the statute."

In *Ross v. Duval*, 38 U. S. 13 Pet. 45, 10 L. ed. 51, the Supreme Court applies the statute of limitations of the state of Virginia to judgments rendered in the United States circuit courts. At page 60 [58] the court says:

"If this, then, be a limitation law, it is a rule of property; and, under the thirty-fourth section of the Judiciary Act, is a rule of decision for the courts of the United States."

In *Michigan Ins. Bank v. Eldred*, 130 U. S. 693, 32 L. ed. 1080, it is reiterated, as the result of all the decisions of the Supreme Court, that the statutes of limitations were laws of the several states, and under the thirty-fourth section of the Act of 1789, in the absence of special provision by Congress, were binding upon the courts of the United States, as they would be upon the courts of the state in which the United States courts sit. In this case the supreme court of this state has held that the United States circuit courts had exclusive jurisdiction over the actions arising under the Act of Congress under which this action is brought. But I do not see that the exclusive jurisdiction of the United States courts affects the question presented here; for, if the statute would control the matter in the state courts in case they had jurisdiction, the statute is nevertheless the rule of decision. The binding force of the state statute of limitations upon the United States courts in cases where they have jurisdiction comes from section 34 of the Judiciary Act, and the statute made a rule of decision, in cases to which it applies, equally whether the state courts also have jurisdiction or not. The statute becomes a rule of property in the United States courts, if it would include a similar action in the state court. My conclusion is that the statute of limitation of the state applies to this case.

The motion for a new trial will therefore be granted.

UNITED STATES CIRCUIT COURT, NORTHERN DISTRICT OF IOWA.

MURRAY

v.

CHICAGO & N. W. R. CO.

(62 Fed. Rep. 24.)

1. The principles of the common law apply to controversies in the Federal courts in matters of national control so far as they are applicable to the subject-matter.
2. The duties and obligations of carriers to their patrons when engaged in interstate commerce are governed by the common law, in the absence of any legislation of Congress on the subject.
3. The fact that a subject like interstate commerce is beyond state legislative control is not *ipso facto*

exclude the jurisdiction of state courts from cases growing out of such commerce.

4. The concealment from a shipper of the fact that the rates charged him were excessive and that rebates were secretly given to others and false representations as to these facts, do not take a cause of action for the recovery of the excess paid by him out of the statute of limitations, as the case is not based on fraud.

Decided June 14, 1894.

ON DEMURRER to the petition in an action brought to recover back unreasonable charges for the transportation of freight. *Demurrer sustained.*
The facts are stated in the opinion.

Messrs. Hubbard & Dawley for defendant, in support of demurrer.
Messrs. Rickel & Crocker for plaintiff, *contra.*

Shiras, District Judge, delivered the opinion of the court:

In the amended petition filed in this cause it is averred that during the years 1875 to 1887, inclusive, the plaintiff was engaged at Belle Plaine, Iowa, in the business of buying and shipping to Chicago grain, cattle, and hogs, the same being shipped in car-load lots over the line of railway owned and operated by the defendant company; that, at the several times when the shipments were made, the defendant company had posted at its stations, including that at Belle Plaine, printed lists containing the tariff rates charged by the company for the transportation of freight over its line; that, when plaintiff shipped his stock, he applied to the defendant and its station agent at Belle Plaine for the lowest freight rates charged, and was answered by the defendant and its station agent that the posted rates were the lowest and only rates charged by the company, no rebates or concessions in any form being made therefrom to any one; that thereupon the plaintiff shipped his stock, and paid the posted rates therefor; that in fact such representations were false, and were made to mislead the plaintiff; that in fact, as the defendant and its agents well knew, rebates and concessions were then being made to other parties who were competitors in business of the plaintiff, to the great injury of plaintiff; that the fact that these rebates were allowed to the competitors of plaintiff was kept concealed by the defendant, and was not discovered by the plaintiff until within 18 months previous to the commencement of this action; that upon shipments of grain made from points west of Belle Plaine to Chicago the defendant charged the shippers thereof some \$15 per car less than it was then charging the plaintiff for shipping the same kind of grain from Belle Plaine to Chicago, thus discriminating against the plaintiff, and compelling him to pay an excessive and unreasonable rate. To recover the damages claimed to have been thus caused him, the plaintiff brought this action in the superior court of the city of Cedar Rapids, Iowa, whence it was removed to this court upon the application of the defendant company. On part of the defendant, a motion for a more specific statement has been filed, followed by a demurrer, and both have been submitted to the court.

The principal point made in the demurrer is that the petition on its face shows that the shipments made from Belle Plaine, Iowa, to Chicago, Ill., were in the nature of interstate commerce, the regulation of which is reserved to Congress, exclusively, by section 8, art. 1, of the Constitution of the United States.

and that, at the dates of the several shipments in the petition described, there was no Act of Congress or other law regulating commerce between the several states. If I understand correctly the position of the defendant company, it is that, as this action was commenced in the state court, this court, upon removal, succeeds only to the jurisdiction which the state court might have exercised rightfully in case no removal had been had; that in the state court the action could not be maintained for two reasons: First, that as section 8, art. 1, of the Constitution of the United States confers the right to regulate interstate commerce exclusively upon Congress, thereby depriving the states of the power to legislate touching the same, it follows that state courts are deprived of all jurisdiction over cases growing out of interstate commerce; and, second, that there is no common law of the United States; that the common law of England has become the common law of the several states, in such sense that each state has its own common law; and that the common law of the state of Iowa cannot be applied to interstate commerce, in view of the provisions, already cited, of the Constitution of the United States. Dealing with these propositions in the reverse order of their statement, is it true that the principles of the common law are not in force in the United States with respect to such subjects as are placed within the exclusive control of Congress? It will not be questioned that, before the Revolution, the common law was in force, so far as applicable, in the several colonies then existing. Thus, in *United States v. Reid*, 53 U. S. 12 How. 361-363, 13 L. ed. 1023, 1024, it is said:

"The colonists who established the English colonies in this country undoubtedly brought with them the common and statute laws of England, as they stood at the time of their emigration, so far as they were applicable to the situation and local circumstances of the colony."

When the Constitution of the United States was adopted, it was based upon the general principles of the common law, and its correct interpretation requires that the several provisions thereof shall be read in the light of these general principles. The final disruption of all political ties between the colonies and the mother country did not terminate the existence of the common law in the colonies. It came originally into the several colonies, not by force of legislative enactments to that effect by the parliament of Great Britain, and the effect of which might be held to have terminated when the colonies became independent, but, as is said by *Mr. Justice Story*, speaking for the Supreme Court

in *Van Ness v. Pacard*, 27 U. S. 2 Pet. 137-144, 7 L. ed. 374-377.

"Our ancestors brought with them its general principles and claimed it as their birthright; but they brought with them and adopted only that portion which was applicable to their situation."

In *Cooley*, Const. Lim. 31, it is said:

"From the first the colonists in America claimed the benefit and protection of the common law. In some particulars, however, the common law, as then existing in England, was not suited to their condition and circumstances in the new country, and those particulars they omitted as it was put in practice by them. They also claimed the benefit of such statutes as, from time to time, had been enacted in modification of this body of rules; and, when the difficulties with the home government sprung up, it was a source of immense moral power to the colonists that they were able to show that the rights they claimed were conferred by the common law, and that the king and parliament were seeking to deprive them of the common birthright of Englishmen. . . . While colonization continued,—that is to say, until the war of the Revolution actually commenced,—these decisions were authority in the colonies, and the changes made in the common law up to the same period were operative in America also, if suited to the condition of things here. The opening of the war of the Revolution is the point of time at which the continuous stream of the common law became divided, and that portion which had been adopted in America flowed on by itself, no longer subject to changes from across the ocean, but liable still to be gradually modified through changes in the modes of thought and of business among the people, as well as through statutory enactments. The colonies also had legislatures of their own, by which laws had been passed which were in force at the time of the separation, and which remained unaffected thereby. When, therefore, they emerged from the colonial condition into that of independence, the laws which governed them consisted—First, of the common law of England, so far as they had tacitly adopted it, as suited to their condition; second, of the statutes of England or of Great Britain, amendatory of the common law, which they had in like manner adopted; and, third, of the colonial statutes. The first and second constituted the American common law, and by this, in great part, are rights adjudged and wrongs redressed in the American states to this day."

Thus it appears that, when the Constitution of the United States was adopted, the general rules of the common law, in so far as they were applicable to the conditions then existing in the colonies, and subject to the modifications necessary to adapt them to the uses and needs of the people, were recognized and were in force in the colonies, and the people thereof were entitled to demand the enforcement thereof through the judicial tribunals then existing. The adoption of the Constitution did not deprive the people of the several colonies of the protection and advantages of the common law. The Consti-

tution itself recognizes the fact of the continued existence of the common law, and indeed it is based upon the principles thereof, and its correct interpretation requires that its provisions shall be read and construed in the light thereof. By section 2, art. 3, of the Constitution it is declared that:

"The judicial power shall extend to all cases in law and equity, arising under this Constitution; the laws of the United States, and treaties made or which shall be made, under their authority; . . . to all cases of admiralty and maritime jurisdiction."

In this section we have a clear recognition of the existence of the several systems of law, equity, and admiralty. The section does not create these systems, but, recognizing their existence, it declares the extent of Federal jurisdiction in regard thereto. The rules and principles which form the laws maritime are not created by the Constitution, for, as is said by Chief Justice Marshall, in *American Ins. Co. v. 356 Bales of Cotton*, 26 U. S. 1 Pet. 511-546, 7 L. ed. 242-256:

"A case in admiralty does not, in fact, arise under the Constitution or laws of the United States. These cases are as old as navigation itself, and the law, admiralty and maritime, as it has existed for ages, is applied by our courts to the cases as they arise."

In *New Jersey Steam Nav. Co. v. Merchants Bank of Boston*, 47 U. S. 6 How. 344-390, 12 L. ed. 465-485, it is declared that:

"By the Constitution, the entire admiralty power of the country is lodged in the Federal judiciary, and Congress intended, by the ninth section, to invest the district courts with this power, as courts of original jurisdiction."

The Constitution does not create a system of maritime law, nor does it enact that the system, as prevailing in England or in Europe, shall become the law of the United States; but, recognizing the fact that the law maritime was then in force in the colonies, it confers the jurisdiction upon the Federal courts. The same is true of the equitable jurisdiction. It is certainly not necessary to cite authorities in support of the proposition that the Constitution of the United States neither created nor enacted a system of equitable jurisprudence and procedure, but, recognizing the existence of the system, it conferred upon the courts of the United States jurisdiction in equity, maintaining the pre-existing distinction between equitable and legal remedies. Is it not clear that the same is true in regard to the common law? At the time of the adoption of the Constitution there was in existence in the colonies the system of the common law, of equity, and of admiralty. It was not the purpose of the Constitution to abrogate any one of these systems. One of the main objects sought to be accomplished was to establish the extent of the legislative and judicial powers of the national government then being created. Owing to the fact that it was not proposed to destroy the state governments then existing, but, continuing these, to create a national government, to be paramount and supreme within its limited

sphere, it became a necessity that the extent of the powers of each government should be defined; and, in a general sense, it may be said that the plain adopted was to confer upon the national government the power of control over subjects affecting the country or people at large, reserving to the states control over all that are local, or which do not require a uniform system or law for their proper regulation. Can it be denied that, at the time of the adoption of the Constitution, the people of the several states possessed the rights, and were subject to the duties and obligations, recognized and enforced by the principles and modes of procedure forming the separate systems of law, equity, and admiralty? Is there any ground for holding that it was the purpose of the Constitution to recognize the continuing existence of the systems of equity and admiralty, but to deny the existence of the common law, or to refuse its recognition? Such a construction of its provisions is clearly inadmissible. The principles and modes of procedure of the three systems of law, equity, and admiralty, in force previous to the adoption of the Constitution, remained in force after its adoption, save as to such modification as were created by the provisions of the Constitution. That this is the true view of the question appears, not only from the references found in the Constitution, and the amendments thereto, to the common law, as a recognized and existing system, but in the Judiciary Act of 1789 the several branches of the law, such as the law of nations, the common law, the admiralty and maritime law, and equity are fully recognized as then existing, and the jurisdiction arising under the same is divided between the courts created by that Act. That the principles of the common law have always been recognized and enforced in proper cases by the courts of the United States is a proposition so plain that a citation of the cases is not necessary for its support; yet, to show the course of judicial action in this particular, a few of the numerous cases to be found in the decisions of the Supreme Court will be quoted from.

In *Cox v. United States*, 31 U. S. 6 Pet. 172-204, 8 L. ed. 359-371, wherein suit was brought in the United States court in Louisiana upon the bond of a navy agent, it was held that the bond must be deemed to be a contract performable at the city of Washington, "and the liability of the parties must be governed by the rules of the common law." To the same effect is the ruling in *Duncan v. United States*, 32 U. S. 7 Pet. 435, 8 L. ed. 739. In *Swift v. Tyson*, 41 U. S. 16 Pet. 1-18, 10 L. ed. 865-871, —a case involving the law of negotiable paper, —the Supreme Court held that the provisions of the thirty-fourth section of the Judiciary Act of 1789 did not require the courts of the United States to follow the ruling of the state courts upon the principles established in the general commercial law, it being said by *Mr. Justice Story*, speaking for the court, that:

"We have not now the slightest difficulty in holding that this section, upon its true intent and construction, is strictly limited to local statutes and local usages of the

character before stated, and does not extend to contracts and other instruments of a commercial nature, the true interpretation and effect whereof are to be sought, not in the decisions of the local tribunals, but in the general principles and doctrines of commercial jurisprudence."

To the same effect is the ruling in *Oates v. First Nat. Bank of United States*, 100 U. S. 239, 25 L. ed. 580, and *Brooklyn City & N. R. Co. v. National Bank of the Republic*, 102 U. S. 14, 26 L. ed. 61. In the latter case it is said:

"The decisions of the New York court, which we are asked to follow in determining the right of parties under a contract there made, are not in exposition of any legislative enactment of that state. They express the opinion of that court, not as to the rights of parties under any law local to that state, but as to their rights under the general commercial law existing throughout the Union, except where it may have been modified or changed by some local statute. It is a law not peculiar to one state, or dependent upon local authority, but one arising out of the usages of the commercial world."

In *Fenn v. Holme*, 62 U. S. 21 How. 481-484, 16 L. ed. 198, 199, it is said:

"In every instance in which this court has expounded the phrases 'proceedings at common law' and 'proceedings in equity,' with reference to the exercise of the judicial powers of the courts of the United States, they will be found to have interpreted the former as signifying the application of the definitions and principles and rules of the common law to rights and obligations essentially legal, and the latter as meaning the administration with reference to equitable, as contradistinguished from legal, rights of the equity law, as defined and enforced by the court of chancery in England."

In *New York Cent. R. Co. v. Lockwood*, 84 U. S. 17 Wall. 357, 21 L. ed. 627, the question of the power of a common carrier to exempt himself by contract from the liability placed upon him by the common law is discussed at length, and it was held that the court was bound to decide the question upon the ground of public policy, and according to the principles of general commercial law.

The case of *Kohl v. United States*, 91 U. S. 367, 374-376, 23 L. ed. 449, 452, presented the question whether the United States could exercise the right of eminent domain for the purpose of condemning land in the city of Cincinnati, to be used as a site for a public postoffice. The right was maintained, it being said that:

"When the power to establish postoffices and to create courts within the states was conferred upon the Federal government, included in it was authority to obtain sites for such offices and for such courthouses, and to obtain them by such means as were known and appropriate. The right of eminent domain was one of those means, well known when the Constitution was adopted, and employed to obtain lands for public uses. Its existence, therefore, in the grantee of that power, ought not to be questioned. . . . The right of eminent domain always was a right

at common law. It was not a right in equity, nor was it even the creature of a statute. The time of its exercise may have been prescribed by statute, but the right itself was superior to any statute. . . . It is difficult, then, to see why a proceeding to take land by virtue of the government's eminent domain, and determining the compensation to be made for it, is not, within the meaning of the statute, a suit at common law, when initiated in a court. It is an attempt to enforce a legal right."

In *Moore v. United States*, 91 U. S. 270, 23 L. ed. 346, the question was, by what law is the Court of Claims to be governed in respect to the admission of evidence in the hearings had before it? and the Supreme Court held that:

"In our opinion it must be governed by law; and we know of no system of law by which it should be governed other than the common law. That is the system from which our judicial ideas and legal definitions are derived. The language of the Constitution and of many acts of Congress could not be understood without reference to the common law. The great majority of contracts and transactions which come before the Court of Claims for adjudication are permeated, and are to be adjudged, by the principles of the common law."

In *Atchison, T. & S. F. R. Co. v. Denver & N. O. R. Co.* 110 U. S. 667-681, 28 L. ed. 291-296, it is said:

"The Atchison, Topeka, & Santa Fé Company, as the lessee of the Pueblo & Arkansas Valley Railroad, has the statutory right to establish its own stations, and to regulate the time and manner in which it will carry persons and property, and the price to be paid therefor. As to all these matters it is undoubtedly subject to the power of legislative regulation, but, in the absence of regulation, it owes only such duties to the public, or to individuals, associations, or corporations, as the common law, or some custom having the force of law, has established for the government of those in its condition."

In *Baltimore & O. R. Co. v. Baugh*, 149 U. S. 378, 37 L. ed. 778, was presented the question whether the engineer and fireman of a locomotive engine are fellow servants, so that the fireman could not recover from the railway company damages for injuries caused by the negligence of the engineer, there being no statutory enactment to that effect in the state of Ohio, wherein the accident happened. Under the decisions of the supreme court of Ohio, liability on part of the railway company existed; but the Supreme Court of the United States refused to follow these rulings, holding that:

"The question is essentially one of general law. It does not depend upon any statute; it does not spring from any local usage or custom; there is in it no rule of property, but it rests upon those considerations of right and justice which have been gathered into the great body of the rules and principles known as the 'common law.' There is no question as to the power of the states to legislate and change the rules of the common law in this respect, as in others; but, in the

absence of such legislation, the question is one determinable only by the general principles of that law."

Citations of this character from the decisions of the Supreme Court might be continued almost without limit. From them it appears, beyond question, that the Constitution, the Judiciary Act of 1789, and all subsequent statutes upon the same subject are based upon the general principles of the common law, and that, to a large extent, the legislative and judicial action of the government would be without support and without meaning if they cannot be interpreted in the light of the common law. When the Constitution was adopted, it was not the design of the framers thereof to create any new systems of general law, nor to supplant those already in existence. At that time there were in existence and in force in the colonies or states, and among the people thereof, the law of nations, the law admiralty and maritime, the common law, including commercial law, and the system of equity. Upon these foundations the Constitution was erected. The problem sought to be solved was not whether the Constitution should create or enact a law of nations, of admiralty, of equity, or the like, but rather how should the executive, legislative, and judicial powers and duties based upon these systems, and necessary for the proper development and enforcement thereof, be apportioned between the national and state governments. The principles, duties, and obligations inhering in these systems of law were already in force. The Constitution neither created nor adopted them, but, recognizing the fact that they were in fact in existence, and were the possessions of the people, it proceeded to apportion the exercise thereof between the national and state governments. The general line of division, as already said, is based upon the principle of national control over subjects affecting the country and the people as a whole, and wherein uniformity of rule and control is desirable, if not indispensable, and of state control over subjects of local interests. The result was that upon the national government was conferred, as to some subjects, paramount and exclusive control; as to others, paramount, but not exclusive, control, unless Congress by legislation excluded state action; as to others, control concurrent with the states. The division thus made is as to the subjects of legislative and judicial jurisdiction, and not a division of systems of law. The Constitution does not place under national control the law of nations and of admiralty, and under state control common law and equity, but it divides the subjects of governmental control, and each subject carries with it the law or system appropriate thereto. The subject-matter of dealing with other nations is conferred exclusively upon the national government, and of necessity all questions arising under the law of nations and the right to seek changes in this law by conventions with other governments are committed to the national government. The right to regulate foreign commerce is conferred exclusively upon Congress, and of necessity that confers upon the national legis-

lature and judiciary the duty of enforcing the law maritime. The right to regulate interstate commerce is conferred exclusively upon Congress, and, when it legislates, the resulting statute will be interpreted with reference to the general principles of the common law. In the absence of congressional regulation of interstate commerce, the courts called upon to decide cases arising out of interstate commerce must apply the principles of the common law. So, also, when called upon to decide cases arising out of intrastate commerce, when there is no state statute or law applicable thereto, the courts must apply the common law. The apportionment of control over foreign, inter- and intrastate commerce, made by the Constitution, did not affect the applicability of the common law thereto. It divided the control over the general subject of commerce, and apportioned to the national government exclusive legislative control over foreign and interstate commerce; and this apportionment carried with it the right to confer upon the national judiciary jurisdiction over cases involving foreign and interstate commerce, and, in the exercise of this jurisdiction, the courts are bound by the general principles of the common law, save where the same have been changed by legislative enactment.

To me it seems clear, beyond question, that neither in the Constitution, nor in the statutes enacted by Congress, nor in the judgments of the Supreme Court of the United States can there be found any substantial support for the proposition that, since the adoption of the Constitution, the principles of the common law have been wholly abrogated touching such matters as are by that instrument placed within the exclusive control of the national government. But it is not to be denied that support to the proposition is to be found in part of the reasoning employed by *Mr. Justice Matthews* in announcing the opinion of the Supreme Court in *Smith v. Alabama*, 124 U. S. 465, 31 L. ed. 508, 1 Inters. Com. Rep. 804. This case came before the Supreme Court upon a writ of error bringing into review a judgment of the supreme court of Alabama affirming a judgment of the city court of Mobile in habeas corpus proceedings, and which presented the question whether a statute of the state of Alabama, providing for the examination and licensing engineers engaged in operating locomotive engines in that state, was void, as applied to engineers running interstate trains, on the ground that it was an attempt to regulate interstate commerce. The case did not in fact involve any question in regard to the common law. The judgment of the court was that the statute was passed to secure the safety of the public in person and property, and any effect it had upon interstate commerce was incidental and remote; and the validity of the statute was sustained. In the course of the opinion it is pointed out that the laws of the states provide for remedies in cases of nonfeasance or misfeasance on part of common carriers, and that it had never been held that such laws were void, as being unconstitutional regulations by the state of interstate com-

merce. Following these propositions, we find it said:

"But for the provisions on the subject found in the local law of each state, there would be no legal obligation on the part of the carrier, whether *ex contractu* or *ex delicto*, to those who employ him; or, if the local law is held not to apply where the carrier is engaged in foreign or interstate commerce, then, in the absence of laws passed by Congress or presumed to be adopted by it, there can be no rule of decision based upon rights and duties supposed to grow out of the relation of such carriers to the public or to individuals. In other words, if the law of the particular state does not govern that relation, and prescribe the rights and duties which it implies, then there is and can be no law that does until Congress expressly supplies it, or is held by implication to have supplied it, in cases within its jurisdiction over foreign and interstate commerce. The failure of Congress to legislate can be construed only as an intention not to disturb what already exists, and is the mode by which it adopts, for cases within the scope of its power, the rule of the state law, which, until displaced, covers the subject. There is no common law of the United States, in the sense of a national customary law, distinct from the common law of England, as adopted by the several states, each for itself, applied as its local law, and subject to such alteration as may be provided by its own statute. . . .

There is, however, one clear exception to the statement that there is no national common law. The interpretation of the Constitution of the United States is necessarily influenced by the fact that its provisions are framed in the language of the English common law, and are to be read in the light of its history. The code of constitutional and statutory construction, which, therefore, is gradually formed by the judgments of this court, in the application of the Constitution and the laws and treaties made in pursuance thereof, has for its basis so much of the common law as may be implied in the subject and constitutes a common law, resting on national authority."

The meaning to be given to this last sentence quoted from the opinion of *Mr. Justice Matthews* is not at all clear. If it be true that the Supreme Court, in construing the provisions of the Constitution, and the laws and treaties made in pursuance thereof, has the right to adopt, as the basis of its Constitution, so much of the common law as may be implied in the subject, which proposition seems to be affirmed, then is it not true that the principles of the common law, so far as applicable to the subject-matter, are recognized as in force touching matters of national control? It is evident that it was present to the mind of the learned justice whose opinion we are considering, that it would not do to hold that the failure of Congress to legislate touching the duties and obligations of common carriers engaged in interstate commerce left the public without any law for its protection, and therefore the suggestion is made that:

"The failure of Congress to legislate can

be construed only as an intention not to disturb what already exists, and is the mode by which it adopts, for cases within the scope of its power, the rule of the state law."

The rules prevailing in the different states may be variant or antagonistic. A delivery of goods may be made to a common carrier in California, for transportation to New York. Do the legal relations, duties, and obligations existing between the shippers and carrier vary and change as the shipment passes state boundaries, so as to accord with the local law of each state through which the carrier may choose to take them? Upon such a theory, what becomes of the principle that the exclusive control of foreign and interstate commerce was committed to Congress in order to secure a uniform rule touching the same? I would amend the statement of *Mr. Justice Matthews* so that it should read:

"The failure of Congress to legislate can be construed only as an intention not to disturb what already exists; and as, at the time of the adoption of the Constitution, common carriers, under the principles of the common law, were subject to certain duties and obligations, the failure on the part of Congress to legislate thereon evinces the legislative intent to leave the rules and principles of the common law in full force, as controlling and defining the relations, duties, and obligations of common carriers engaged in interstate commerce."

It will be further noticed that it is suggested in the opinion that it might be implied that Congress has supplied a law or rule governing foreign and interstate commerce. Is there not as good ground to be found in the provisions of the Constitution, and the statutes based thereon, for implying the recognition of the principles of the common law, as there is for implying the recognition of the law of nations, or the maritime law as applied to foreign commerce? Suppose a merchant or manufacturer residing in the United States makes a shipment of goods by land into the dominion of Canada, and another shipment of goods to England by sea, in both instances the goods being delivered to common carriers for transportation and delivery; would not the duty and obligations resting upon the steamship line to which the goods destined for England were delivered be measured by the law maritime? What express provision of the Constitution or of the statutes of the United States declares that shipowners engaged in foreign commerce are subject to the law maritime? Has Congress ever adopted a code of laws declaring what the rules and principles are that are applicable to foreign commerce carried on over the high seas or the navigable waters of the country? It has adopted specific provisions modifying the general principles of the law, but it has always recognized the existence of the general system. Can it be contended that, in the absence of legislation by Congress expressly adopting the law maritime, foreign shipments upon the ocean are without legal protection; that, from the acceptance of the goods for transportation and delivery, no implied contract

is created; that the respective rights and duties of the parties are such and such only, as may be created by express contract between the parties? Even if an express contract is entered into, by what rules and principles are its provisions to be construed? That the law maritime has been in force, and is now in force, in the United States, cannot be questioned; and yet it was not created or expressly enacted in the Constitution or any Act of Congress. That system of law was in existence when the Constitution was adopted, and its existence is recognized in the Constitution, and provision is made for enforcing the same by conferring admiralty jurisdiction upon the courts of the United States. From this the inference, and the only inference, is that it was not the intent of the Constitution to abrogate the then existing maritime law, but, recognizing its existence, to provide for its enforcement in all matters to which it is applicable, including foreign commerce. There is no doubt, therefore, that, as to that part of foreign commerce which is carried on through the agency of common carriers upon navigable waters, there is a system of law applicable thereto, and courts having jurisdiction to enforce the principles of the system. How is it, in regard to that part of foreign commerce carried on with neighboring countries, where the transportation is by land, as in the case supposed of a shipment of goods to Canada? It is said that the common carrier engaged in foreign commerce cannot be held subject to the principles of the common law, because Congress has not expressly adopted the common law, and therefore it cannot be applied to shipments made to foreign countries. Is not the existence of the common law as fully recognized in the Constitution, and the laws of Congress based thereon, as is the existence of the law maritime? Do not the Constitution and the Judiciary Act confer upon the courts of the United States full common law jurisdiction? Are not the courts of the United States, therefore, authorized to enforce the principles of the law maritime and the common law in all cases to which they are applicable, and which are within the jurisdiction of the Federal courts? Suppose a shipment of goods is made from San Francisco, through New York, to England. The carrier receives the goods to be sent by land to New York, and thence by ship to England. No special contract is made. This shipment is a matter of foreign commerce. When placed on shipboard at New York for transportation to England, is there any doubt that the law maritime is applicable thereto, and that, if litigation should arise regarding the ocean transportation, the courts of the United States would apply the principles of the law maritime thereto? If litigation with the common carrier should arise touching the land transportation, would not the courts of the United States have the right to apply the principles of the common law thereto? Upon what fair principle of construction can it be held that the Constitution so far recognizes the law maritime that it must be held to be in force, but that the recognition of the common law is not suffi-

cient to keep it in force in matters of national concern?

In *Swift v. Philadelphia & R. R. Co.* 58 Fed. Rep. 858,—a case decided by the United States Circuit Court for the Northern District of Illinois,—it is held that the law of the state of Illinois could not be applied to contracts for shipments of property into other states; that interstate commerce cannot be controlled by the local law of the state, either statutory or common; that, previous to the enactment of the Interstate Commerce Act by Congress, there was no Act of Congress regulating interstate commerce; that the United States had never adopted the common law; that, previous to the adoption of the Interstate Commerce Act in 1887, there was therefore no law controlling the relations of carriers and shippers in regard to interstate commerce. If it be true that the principles of the common law are not in force in this country in regard to such matters as are placed under national control, then it is difficult to escape the conclusions reached by Judge Grosscup in the case just cited; but I cannot concur in the proposition that the principles of the common law have no existence in this country, as applicable to national affairs, or that these principles have only a local existence, due to their adoption by the several states. It is certainly a novel proposition that up to the date of the enactment of the Interstate Commerce Act, in 1887, all the foreign and interstate commerce of the country was without the pale of law, and that there were no legal rules or principles which governed or controlled the relations between the shippers or carriers engaged in that business; and yet such seems to be the conclusion in *Swift v. Philadelphia & R. R. Co.* In *Chicago & N. W. R. Co. v. Osborne*, 4 Inters. Com. Rep. 257, 10 U. S. App. 480, 52 Fed. Rep. 912,—a case involving the construction of the Interstate Commerce Act,—Mr. Justice Brewer, speaking for the court, held:

"It was the first effort of the general government to regulate the great transportation business of the country. That business, though of a quasi public nature, and therefore subject to a governmental regulation, has, as a matter of fact, been carried on by private capital through corporations. The fact that it was a quasi public business always prevented the owners of capital invested in it from charging, like owners of other property, any price they saw fit for its use. A reasonable compensation was all they could exact, and he who felt aggrieved by a charge could always invoke the aid of the courts to protect himself against it."

Mr. Justice Brewer is here speaking of the condition of affairs before the enactment of the Interstate Commerce Act, and he expressly declares that, prior to that Act, common carriers engaged in interstate commerce were bound to charge only a reasonable compensation, or, in other words, they were subject to the principles of the common law.

It is further argued that it has been repeatedly decided that the inaction of Congress, up to 1887, in passing any law regarding interstate commerce, shows that the

intent was to leave such commerce free from all restraint, and therefore common carriers assumed no common law liability in undertaking shipments of goods from one state to another. The decisions of the Supreme Court in the numerous cases involving the validity of state laws affecting foreign and interstate commerce have always held that the inaction of Congress could not be construed to mean that the states were at liberty to legislate in regard to these subjects in the absence of congressional legislation, but that such inaction evidenced that it was the intent of Congress to leave commerce, foreign and interstate, free from all legislative restrictions. It has never been held, however, that the freedom of commerce meant that those engaged in carrying it on were not under legal restraints and obligations growing out of the relations of carriers and shippers. If the theory now contended for by the defendant company be correct, then from the foundation of the government up to April 4, 1887, when the Interstate Commerce Act took effect, it was open to all the common carriers engaged in foreign or interstate commerce to act as they pleased in regard to accepting or refusing freights, in regard to the prices they might charge, in regard to the care they should exercise, and the speed with which they should transport and deliver the property placed in their charge. What more disastrous restraint upon the true freedom of foreign and interstate commerce could be devised than the adoption of the doctrine that the inaction of Congress left the carriers engaged therein entirely free to accept and transport the property of one man or corporation, and to refuse to accept the like property of another, or to transport the products of one locality, and to refuse to transport those of another; to charge an onerous toll upon the property of one, and carry that of his neighbor for nothing? Can it be possible that the transcontinental railways and other Federal corporations engaged in foreign and interstate commerce, in the absence of congressional legislation, were not under any legal restraints, and that the citizen, in his dealings with them, was without legal remedy or protection? In the absence of congressional legislation, what law could be applied to them, with regard to matters under the exclusive control of the national government, except the principles of the common law or the law maritime? I cannot yield assent to the broad proposition that, as to those subjects over which Congress is given exclusive legislative control, there is no law in existence if Congress has not expressly legislated in regard thereto. The true doctrine, in my judgment, is that the Constitution of the United States, when it was adopted, gave full recognition to the existing systems of the law of nations, of admiralty and maritime, of the common law, and equity. It apportioned to the national government, then created, control over certain subjects, exclusive as to some, concurrent as to others. This apportionment of control over certain subjects necessitated the exercise of both legislative and judicial powers, and provision was made for the former in the

creation of Congress, and for the latter in the creation of the Supreme Court, and by conferring authority on Congress to create other courts. The courts thus created were vested with jurisdiction in admiralty and at common law and in equity. If there is no common law jurisdiction to be exercised, and no common law principles to be enforced, why create courts for that purpose? But it is said in *Swift v. Philadelphia & R. R. Co.*, and the same thought is found in other cases, that "the courts of the United States have had many occasions to enforce the common law, but in every instance it has been as the municipal law of the state by which the subject-matter was affected." This may be generally, but it is not universally, true. In *Mississippi Mills v. Cohn*, 150 U. S. 202, 37 L. ed. 1052, we find a case which was originally brought in a court of the state of Louisiana, in which state the civil and not the common law is in force. The suit was removed into the United States circuit court, and was by that court dismissed for want of jurisdiction, upon the ground that, being a suit in equity, it could not be maintained, because the remedy at law was sufficient. The Supreme Court reversed the ruling, holding that even if, under the law of the state of Louisiana,—that is, the civil law,—the remedy at law was sufficient, yet that fact would not defeat the jurisdiction in equity of the Federal court, for the reason "that the inquiry, rather, is whether, by the principles of common law and equity, as distinguished and defined in this and the mother country at the time of the adoption of the Constitution of the United States, the relief here sought was one obtainable in a court of law, or one which only a court of equity was fully competent to give." In this ruling the Supreme Court was certainly not enforcing the municipal law of the state of Louisiana. If courts of the United States can only recognize and enforce the principles of the common law when the same form part of the municipal law of the state, how comes it that the Supreme Court directed the circuit court in Louisiana to apply the principles of the common law and of equity, as they existed when the Constitution was adopted, to the decision of the question of jurisdiction arising in that case? Suppose a state should enact that all questions of title to realty should be triable only in a court of equity, and in accordance with the principles of equity; would that enactment confer upon the courts of the United States the same jurisdiction, and thus permit a question of strict legal title to be tried in equity in the courts of the United States, if, according to the principles of the common law in force when the Constitution was adopted, an action in ejectment would afford an ample remedy? Clearly, the Federal court could in such case entertain only the common law action, and in so doing it would be acting under and enforcing the principles of the common law, not the municipal law of the state, for it would be disregarding that, but the common law brought by our ancestors from the mother country.

Perhaps the most forcible illustration of
4 INTER S.

the fact that the government of the United States does recognize and enforce the principles of the common law with regard to subjects wholly within national control, and not as part of the municipal law of any state, is found in connection with the organization and proceedings of the Court of Claims. This court is not a court in and for the district of Columbia, nor is it a court of any district or circuit. It has jurisdiction over cases arising in any of the states or territories. It has jurisdiction to hear and determine cases against the United States. Of all the courts in the Union, it is the one dealing with matters of national concern, arising under the Constitution and laws of the United States, and not under the local law of the several states. The form of procedure is statutory, supplemented by rules of its own adoption. As to this court thus organized, and clothed with a jurisdiction wholly national in its character, the express ruling of the Supreme Court is to the effect that the general law controlling its action is the common law. To repeat a quotation already made from the opinion of the Supreme Court in *Moore v. United States*, 91 U. S. 270, 23 L. ed. 346, in regard to the Court of Claims:

"In our opinion, it must be governed by law; and we know of no system of law by which it should be governed other than the common law. . . . The great majority of contracts and transactions which come before the Court of Claims for adjudication are permeated and are to be adjudged by the principles of the common law."

To the same effect is the ruling in *United States v. Clark*, 96 U. S. 37, 24 L. ed. 696, and there are no decisions to the contrary. There is no Act of Congress which adopts the common law as the rule of action for the Court of Claims. The reasons which declare the common law to be the system governing its action apply equally to the other courts of the United States. By the provisions of the Act of Congress of March 3, 1887, concurrent jurisdiction with the Court of Claims is conferred upon the district and circuit courts of the United States. Many of the claims against the United States arise out of implied contracts; that is, the facts are such that, according to the principles of the common law, an obligation to pay for the use of property is implied, in the absence of an express contract. Thus, in *United States v. Palmer*, 128 U. S. 262, 32 L. ed. 442, the judgment of the Court of Claims awarding to Palmer the sum of \$2256.75 as a reasonable compensation for the use, by the government, of certain patented military equipments, was sustained by the Supreme Court. It being said that "we think an implied contract for compensation fairly arose under the license to use, and the actual use, little or much, that ensued thereon." In this case there was no express agreement for compensation nor for the amount thereof. Applying the principles of the common law to the facts, the Court of Claims held that the law would imply a contract to pay a reasonable compensation, and the Supreme Court affirmed the judgment. Had Palmer brought

the suit in a circuit court of the United States instead of in the Court of Claims, is it possible he would have been defeated on the ground that the local law of the state did not apply, and that the common law could not be invoked in a circuit court of the United States, and therefore there was no law applicable to the situation in the absence of an express contract? The right of recovery in such cases is not dependent upon the court in which the action may be brought, but upon the question of the principles of law—that is, the system of law—which are applicable to the situation, and which define the rights and obligations of the parties. Under the principles of the common law, as the same existed at the time of the separation between the colonies and Great Britain, common carriers of goods assumed certain duties and obligations to their patrons. The adoption of the Constitution of the United States certainly did not change the relation existing between the carrier and the public, nor in any way affect the obligations assumed by the carrier. The Constitution conferred legislative control over foreign and interstate commerce upon Congress, reserving to the several states legislative control over intrastate commerce. This division of legislative control did not, however, abrogate the common law principle then in force. Thus, in *Boyce v. Anderson*, 27 U. S. 2 Pet. 150, 7 L. ed. 379, the question presented was whether the strict rule of the common law in regard to liability for goods lost could be applied in the case of slaves; and it was held that it would not be applied, as slaves were human beings having a volition of their own; but it was held that “the ancient rule that the carrier is liable only for ordinary neglect still applies to them.” In determining the rights of the parties in this case, the Supreme Court, speaking by Marshall, *Ch. J.*, relied upon the common law for its guidance. In *Bank of Kentucky v. Adams Exp. Co.* 93 U. S. 174, 23 L. ed. 874, the question arose as to the liability of the express company for certain packages of money sent from New Orleans, La., to Louisville, Ky., and which were destroyed by fire while in transit, the bills of lading containing stipulations in respect to the liability of the company. It will be noticed that the shipment was from one state to another, and therefore was of the nature of interstate commerce. In the course of the opinion it is said:

“We have already remarked that the defendants were common carriers. . . . Having taken up the occupation, its fixed legal character could not be thrown off by any declaration or stipulation that they should not be considered such carriers. The duty of a common carrier is to transport and deliver safely. He is made, by law, an insurer against all failure to perform this duty, except such failure as may be caused by the public enemy, or by what is denominated the act of God. . . . The exception or restriction to the common law liability introduced into the bills of lading given by the defendants . . .”

Thus we have the express declaration that

a common carrier engaged in interstate commerce is subject to the common law liability pertaining to his occupation. Many other cases of like import are to be found in the Supreme Court reports, in which it is assumed that the principles of the common law are applicable to common carriers engaged in foreign or interstate commerce; and I can see no good reason for holding that the duties and obligations imposed upon a common carrier by the common law are not operative when he undertakes the transportation of property from state to state. It is said in argument that the obligations imposed upon common carriers are largely based upon considerations of public policy; that each state determines for itself what its public policy demands; and that the courts of the United States can recognize and enforce only the public policy of the state. There is a public policy of the nation as well as that of the several states. As to all such matters as are reserved to the states, and are therefore without the plane of national control, it may well be that it is for each state to determine what public policy dictates with regard thereto. The rule of the common law is that no one can lawfully do that which is injurious to the public, or which conflicts with the prevailing sentiment or interest of the community. In determining whether a given act or course of conduct is injurious to the public interests, regard must be had to the circumstances. That which the public interests may demand in one locality may not be suited to the interests of another locality. There are many matters of a local nature which it is for each state to regulate and control for itself, either by legislation, or by judicial declarations of the results derivable from the application of common law principles to the existing surroundings. On the other hand, there are many matters which affect the entire country, which are therefore of national importance, and which must be dealt with accordingly. In deciding legal questions arising out of the latter class of cases, courts are not confined to the inquiry whether the particular state in which the court may be sitting, has an established public policy touching the subject-matter, but they will apply the recognized principles of general jurisprudence, to wit, the principles of the common law, or of the law of nations, or of the law maritime, as the nature of the particular case may demand. Thus, in *Oscanyan v. Winchester Repeating Arms Co.* 103 U. S. 261, 26 L. ed. 539, the Supreme Court held that a contract entered into between a consul general of the Ottoman government residing at New York, and a company engaged in supplying arms, whereby the former was to be paid a commission upon all contracts secured through his aid was void, even though it might be valid in Turkey, it being said:

“But admitting this to be otherwise, and that the Turkish government was willing that its officers should take commissions on contracts obtained for it by their influence, that is no reason why the courts of the United States should enforce them. Contracts per-

missible by other countries are not enforceable in our country if they contravene our laws, our morality, or our policy."

The variety of cases in which this doctrine is applied may be seen by reference to *Marshall v. Baltimore & O. R. Co.* 57 U. S. 16 How. 314, 14 L. ed. 953; *Providence Tool Co. v. Norris*, 69 U. S. 2 Wall. 45, 17 L. ed. 868; *Burke v. Child*, 88 U. S. 21 Wall. 441, 22 L. ed. 623; *Mequire v. Corneine*, 101 U. S. 108, 25 L. ed. 899; *Texas v. White*, 74 U. S. 7 Wall. 700, 19 L. ed. 227; *Hanauer v. Doane*, 79 U. S. 12 Wall. 342, 20 L. ed. 439; *Thomas v. Richmond*, 79 U. S. 12 Wall. 349, 20 L. ed. 453; *Woodstock Iron Co. v. Richmond & D. Extension Co.* 129 U. S. 643, 32 L. ed. 819. In these cases, and others of similar import, the Supreme Court does not base the rulings upon the local law of any state, for in the majority of the cases the question arose in connection with matters outside the plane of state control. Thus, in *Burke v. Child*, *supra*, a bill in equity was filed to enforce an agreement for services rendered in getting through Congress a bill for payment to Trist of a remuneration for his services to the United States in negotiating the treaty of Guadalupe Hidalgo with Mexico. Mr. Justice Swayne, speaking for the court, declared that:

"It is a rule of the common law, of universal application, that where a contract, express or implied, is tainted with either of the vices last named as to the consideration on the thing done, no alleged right founded upon it can be enforced in a court of justice."

Applying this rule of the common law to the facts of the case, the agreement sought to be enforced was held void.

The conclusion I reach upon this subject is that at the time of the separation of the colonies from the mother country, and at the time of the adoption of the Constitution, there was in existence a common law, derived from the common law of England, and modified to suit the surroundings of the people; that the adoption of the Constitution and consequent creation of the national government did not abrogate this common law; that the division of governmental powers and duties between the national and state governments provided for in the Constitution did not deprive the people who formed the Constitution of the benefits of the common law; that, as to such matters as were by the Constitution committed to the control of the national government, there were applicable thereto the law of nations, the maritime law, the principles of equity, and the common law, according to the nature of the particular matter; that, to secure the enforcement of these several systems when applicable, the Constitution and Congress, acting in furtherance of its provisions, have created the Supreme Court of the United States and the other courts inferior thereto, and have conferred upon these courts the right and power to enforce the principles of the law of nations, of the law maritime, of the system of equity, and of the common law in all cases coming within the jurisdiction of the Federal courts, applying, in each instance, the system which the nature of the case demands;

that, as to all matters of national importance over which paramount legislative control is conferred upon Congress, the courts of the United States (the Supreme Court being the final arbiter) have the right to declare what are the rules deducible from the principles of general jurisprudence which control the given case, and to define the duties and obligations of the parties thereto; that the common law now applicable to matters committed to the control of the national government is based upon the common law of England, as modified by the surroundings of the colonists, and as developed by the growth of our institutions since the adoption of the Constitution, and the changes in the business habits and methods of our people; that the binding force of the principles of this common law, as applied to matters affecting the entire people, and placed under the control of the national government, is not derived from the action of the states, and is no more subject to abrogation or modification by state legislation than are the principles of the law of nations or of the law maritime. The transactions out of which the present controversy arises pertain to interstate commerce. The defendant company, when engaged in transporting the grain and cattle of plaintiff from Iowa to Chicago, Ill., was acting as a common carrier of property, and assumed all the duties and obligations pertaining to that occupation. In determining the obligations assumed by a common carrier engaged in interstate commerce, the court has the right to apply the rules of the common law, unless the same have been changed by competent legislative action, and therefore, in the present case, all shipments made before the adoption of the Interstate Commerce Act are governed by the common law, and those made since the adoption of that Act by the common law as modified by that Act.

A further point is made in support of the demurrer, to the effect that this court succeeds only to the jurisdiction of the state court in which the action was originally brought, and that state courts have no jurisdiction over cases arising out of interstate commerce, the argument being that, as the state cannot legislate touching interstate commerce, the state courts are without power to determine cases of the like character. This position is not well taken. The limitations upon the legislative power of the nation and of the several states do not necessarily apply to the judicial branches of the national and state governments. The legislature of a state cannot abrogate or modify any of the provisions of the Federal Constitution nor of the acts of Congress touching matters within congressional control, but the courts of the state, in the absence of a prohibitory provision in the Federal Constitution or acts of Congress, have full jurisdiction over cases arising under the Constitution and laws of the United States. The courts of the states are constantly called upon to hear and decide cases arising under the Federal Constitution and laws, just as the courts of the United States are called upon to hear and decide cases arising under the

law of the state, when the adverse parties are citizens of different states. The duty of the courts is to explain, apply, and enforce the existing law in the particular cases brought before them. If the law applicable to a given case is of Federal origin, the legislature of a state cannot abrogate or change it, but the courts of the state may apply and enforce it; and hence the fact that a given subject, like interstate commerce, is beyond state legislative control, does not, *ipso facto*, prevent the courts of the state from exercising jurisdiction over cases which grow out of this commerce. Had this action remained in the state court in which it was originally brought, that court would have had jurisdiction to hear and determine the issues between the parties, because Congress has not enacted that jurisdiction over cases of this character is confined exclusively to the courts of the United States, and therefore the jurisdiction of the state court was full and complete.

The demurrer also presents the question of the statute of limitations, it being claimed that, under the provisions of the statute of Iowa, all right of action is barred in five years from the date of the shipments on which it is claimed unjust charges were made. The petition contains five counts. In each the real ground of complaint is that the defendant company charged plaintiff unjust, excessive, and unreasonable rates upon the shipments made by him. It is averred that the defendant company was performing the same service for other parties at less rates, thus discriminating against the plaintiff; but, as I construe the counts of the petition, the averments of discrimination are made as evidence in support of the charge that the rates exacted of the plaintiff were excessive and unreasonable. The action was commenced on the 25th day of August, 1892, and on part of the defendant it is claimed that the statute bars the suit as to all shipments made prior to August 25, 1887. In the petition it is charged that the unreasonable rates were exacted during the years from 1875 to 1891, both inclusive, it being further averred that, from time to time, plaintiff, when about to make shipments, made inquiry of the station agent of the defendant at Belle Plaine for the lowest rates, and was assured by such agent that the published rates were the lowest given; that no secret rebates or commissions were allowed to other parties; that the rate demanded of plaintiff was the same, and as favorable, as that demanded of all others making like shipments; that these representations were in fact false; that the defendant company was giving other shippers rebates and concessions, keeping the fact secret, which amounted to \$25 per car; that plaintiff, relying upon the assurances made him, paid the rates demanded, which were in fact excessive, and greater than those paid by other shippers, and that plaintiff did not discover the fact that rebates had been allowed others until within a year last past. There can be no doubt that whatever cause of action exists in favor of the plaintiff, by reason of the charge of excessive or unreasonable rates, accrued to him as each shipment

was made. If the facts are as is alleged in the petition, then, upon the payment by plaintiff of the excessive charges upon each shipment, a right of action accrued to the plaintiff for the recovery of the damages thus caused him, which was then as full and complete as it is at the present time. The ordinary rule is that the statute begins to run when the right of action is completed. Does the case fall within any exception to this rule? The provision of the statute applicable to the case is the general one, to wit, "and all other actions not otherwise provided for in this respect, within five years." Iowa Code, § 2529. By section 2530, Iowa Code, it is declared that "in actions for relief on the ground of fraud or mistake, and in actions for trespass to property, the cause of action shall not be deemed to have accrued until the fraud, mistake or trespass complained of shall have been discovered by the party aggrieved;" but it is settled that this statutory exception is not applicable to cases of the character of that now under consideration. *Boomer Dist. Twp. v. French*, 40 Iowa, 601; *Carrier v. Chicago, R. I. & P. R. Co.* 6 L. R. A. 799, 79 Iowa, 80. It is, however, claimed by plaintiff that, under the principles of the common law, it will not be held that the cause of action has accrued until actual discovery of the fraud or concealment has been had. In *Boomer Dist. Twp. v. French*, *supra*, the supreme court of Iowa held that where a treasurer of the district, by false and fraudulent entries upon his books, concealed the fact of a misappropriation of a sum of money coming into his hands, the statute did not begin to run until discovery of the fraud thus practiced. In *Carrier v. Chicago, R. I. & P. R. Co. supra*, the supreme court of Iowa held the common law exception applicable in an action of a similar character to that now before the court, upon the authority of *Boomer Dist. Twp. v. French*; stating, however, that, "if the question was before us for the first time, we might hesitate to declare the rule announced in *Boomer Dist. Twp. v. French*." The conclusion reached in *Carrier v. Chicago, R. I. & P. R. Co.* is followed and affirmed in *Cook v. Chicago, R. I. & P. R. Co.* 3 Inters. Com. Rep. 383, 9 L. R. A. 764, 81 Iowa, 551. These decisions are based, not upon a construction of the provisions of the Iowa statute, but upon the view therein taken of the rule of the common law; and the conclusion reached is not, therefore, binding upon the courts of the United States when they are called upon to construe the common law, and apply its principles to cases arising between citizens of different states. *Baltimore & O. R. Co. v. Baugh*, 149 U. S. 368, 37 L. ed. 772.

As already stated, this action is not based upon the fraudulent representations made. It is not an action in the nature of trespass on the case or of deceit, according to the common law form of procedure, and based upon the false assertions or representations, and for the recovery of the damages caused thereby, but rather in the nature of an action for money had and received to recover back the alleged excessive part or portion of the

rates charged and paid. A right of recovery would be established by proof showing that the plaintiff had been compelled to pay an unreasonable rate, even though it might appear that the plaintiff knew at the time that the rate was unreasonable, for a shipper may be so circumstanced that he is compelled to ship, and cannot exercise an option to ship or not; and, if he cannot ship except by paying the unreasonable charge, he may do so, and may then sue to recover back the excess wrongly exacted from him. *Robertson v. Frank Bros. Co.* 132 U. S. 17, 23, 33 L. ed. 286, 238. Where the action is not founded upon the alleged fraud or concealment, but is in the nature of an action for money had and received, the decided cases are not in accord upon the question whether concealment of the fact of an excessive charge will prevent the running of the statute. Where a party seeks relief on the ground of fraud, either in the nature of a proceeding in equity for the purpose of canceling the transaction, and restoring the parties to their original position and rights, or by means of an action at law for the damages, there is certainly strong ground for holding that the same principle should be applied to either form of action, and that the statute should not be held to apply except from the discovery of the fraud which constitutes the basis of the action; and this is the conclusion of the Supreme Court in *Bailey v. Glover*, 88 U. S. 21

Wall. 342, 22 L. ed. 636. The form of the action is not, therefore, the determinative consideration, but the question is whether, in an action at law to recover the amount of the excessive charges made by defendant, or of the damages caused thereby, the bar of the statute can be avoided by showing that the defendant fraudulently concealed the fact that lesser rates were charged upon like shipments of property made by other parties. Technically, the action is not based upon the fraudulent concealment of the fact that rebates were allowed other parties, but upon the fact that unreasonable rates were exacted of the plaintiff. No case decisive of this question in this court has been cited by counsel. Other cases of like character are pending in the court, and the expense of trying the same upon the facts will be great. In view of this fact I deem it most desirable that the question of the applicability of the statute of limitations should be finally settled before further expense is made in these cases, and, as the question presented by the demurrer can be readily presented to the court of appeals at small cost, and with little delay, I shall sustain the demurrer on the question of the statute of limitations, to the end that the parties may secure a ruling from the court of appeals upon the questions involved before incurring the expense necessarily attending a jury trial.

UNITED STATES DISTRICT COURT, WESTERN DISTRICT OF MISSOURI.

UNITED STATES, v. GEORGE W. HOWELL ET AL.

(56 Fed. Rep. 21.)

1. But one overt act need be proved to sustain an indictment for conspiring to violate the United States Act of March 2, 1889, against obtaining transportation for property over railroads at less than regular rates.
2. Interstate shipments only are affected by the United States Act of March 2, 1889, against obtaining transportation for property over railroads at less than regular rates.
3. Variance between allegations and proof as to the point of shipment of property for which less than schedule rates was obtained is immaterial if both points were within the same state and subject to the same rates for shipment to the points of destination in another state.
4. To sustain an indictment for conspiring to obtain less than established rates for the shipment of property over a railroad, it is not necessary that the rate should have been published by posting it as required by the interstate commerce law.
5. Employers who knowingly permit their employees to obtain less than schedule rates for transportation of their property over railroads, and who receive the benefit of such conduct, either directly or indirectly, may be punished under the United States Act of March 2, 1889, against obtaining transportation at rates less than the schedule.
6. Conspiracy is an agreement, combination, or undertaking entered into between two or more persons to do something which is against the law of the country.
7. Residence within the territorial jurisdiction of the court is not necessary to render one punishable by such court for a conspiracy committed there.
8. One who joins a conspiracy for the purpose of furthering its design is punishable as though he had been a party to it from the beginning.
9. A conspiracy may be established by circumstantial evidence.
10. Circumstantial evidence which is equal in proving power to the testimony of one positive, uncontradicted, creditable eye witness is sufficient to sustain a conviction of conspiracy to violate the United States Act against obtaining illegal shipping rates.
11. Although a conviction may be had on the testimony of accomplices, if it produces on the minds of the jury a full and complete conviction of its truthfulness, it is a prudential rule that such wit-

- nesses should be corroborated by circumstances or otherwise as to some material point of their testimony.
12. To impeach a witness the evidence must reflect the opinions of the people in the community in which he lives.
 13. The testimony of defendants is to be considered in the light of their relation to the case.
 14. To sustain a conviction the proof must be suf-

ficient to establish all the material allegations in issue so that reasonable men upon a matter of importance or concern would be satisfied of their being true.

15. A reasonable doubt which will require acquittal must be a real and substantial one and not a mere conjecture or a surmise as to the possibility of innocence.

Decided December 21, 1892.

CHARGE to the jury upon trial of an indictment for alleged violation of the United States statute against conspiring to obtain discrimination of rates for transportation of freight. The facts sufficiently appear in the charge.

Mr. George A. Neal, U. S. Atty., for the United States.
Messrs. Hall & Pike for defendants.

Parker, District Judge, charged the jury as follows:

You have heard the evidence in this case, and the arguments of counsel upon the case. It now becomes the duty of the court to give you the principles of law to apply to that state of the case which you find to be true from the testimony. You are aware that your verdict, as does the verdict of every other jury, consists of two things,—the truth as you find it, and the principles of law applicable to that truth. In that way you get at the result which we call a "verdict." The principle of law given you is that which defines the crime, aside from other principles given by the court, instructing you as to how you should view the evidence of witnesses, and some other subordinate matters of that kind. The definition of a crime is that which the law declares to be the offense, and to which you are to take and apply the evidence to see whether the evidence makes out such a state of case as the law says shall be established to make the crime. Now, this is not a charge for the actual commission of an overt crime, but is only a charge where it is alleged the parties agreed to commit a crime called in law a "conspiracy." It is laid down under the law as it now stands, by section 5440, Rev. Stat. as amended by the Act of Congress, as follows:

"If two or more persons conspire, either to commit any offense against the United States, or to defraud the United States in any manner or for any purpose, and one or more of such parties do any act to effect the object of the conspiracy, all the parties to such conspiracy shall be liable to a penalty of not less than \$1000 and not more than \$10,000, and to imprisonment not more than two years."

You are aware of the fact that under the law of the United States you do not fix the punishment, but you pass upon the question of the guilt or innocence of the party charged. This is the statute under which this offense is charged. There are other statutes that have been passed, comprehended in what is usually

called the "Interstate Commerce Act," together with the several amendments that have been passed since that time. It is by this Act that the overt act—that is, the open act; the actual act done in furtherance of the conspiracy or to effect the object of the conspiracy—is alleged to be a crime. It was first made an offense under that Act for common carriers of property for hire to do certain things which are set out in the section of the law as amended by the Act of Congress of March 2, 1889. It is provided there that any common carrier subject to the provisions of this Act, or, whenever such common carrier is a corporation, any officer or agent thereof, or any person acting for or employed by such corporation, who, by means of false billing, false classification, false weighing, or false report of weight, or by any other device or means, shall knowingly and willfully assist, or shall willingly suffer or permit, any person or persons to obtain transportation for property at less than the regular rates, then established and enforced on the line of transportation of such common carriers, shall be deemed guilty of a misdemeanor, and shall, upon conviction thereof in any court of the United States of competent jurisdiction within the district where such offense was committed, be subject to a fine not exceeding \$5000, or imprisonment in the penitentiary for a term not exceeding two years, or both, in the discretion of the court, for each offense.

That is the section of the law which has reference to the common carrier. There was no provision under this Act that undertook to declare it a penal offense for the shipper to do certain things. There was no penalty that was applicable to the act of the shipper until the amendment of this law, March 2, 1889. On its first enactment it was manifest to the law-makers that the railroad companies alone were the parties who would make this unjust discrimination against the people of the country, against the consumer, against the man of small business, against the man who is selling in small quantities, against the man who is will-

ing to assist his neighbor by setting up that generous rivalry in trade that promotes the welfare of the consumer. It was not conceived by the lawmaker who would be the principal party in interest that would be benefited by this discrimination. But the great shipper, the large wholesale dealer, the man running the combine, or the trust or the combination entered into by vast enterprises, would be the one that would seek and was promoting this discrimination in the freight rates of the country when this last law was passed. It was accordingly seen that that would be the purpose of parties so interested. It was therefore declared by the amendment passed on the 2d day of March, 1889, that for certain conduct upon the part of shippers a penalty should be prescribed. The law is as follows:

"Any person, and any officer or agent of any corporation or company, who shall deliver property for transportation to any common carrier subject to the provisions of this act, or for whom, as consignor or consignee, any such carrier shall transport property, who shall knowingly and willfully, by false billing, false classification, false weighing, false representation of the contents of the package, or false report of weight, or by any other device or means, whether with or without the consent or connivance of the carrier, its agent or agents, obtain transportation for such property at less than the regular rates then established and enforced on the line of transportation, shall be deemed guilty of a fraud, which is hereby declared to be a misdemeanor, and shall, upon conviction thereof in any court of the United States of competent jurisdiction within the district in which such offense was committed, be subject to a fine of not exceeding five thousand dollars, or imprisonment in the penitentiary for a term not exceeding two years, or both, in the discretion of the court."

Now, that enumerates the different methods that may be used by the carrier for the purpose of carrying on this discrimination, and it contains a general sweeping clause providing that all other devices or means, such as by reporting falsely to the carrier the contents of the package, and in that way getting a discrimination, or by any other means or contrivance or device, if he seeks to obtain this discrimination for his own benefit, he is liable to a penalty. You and I are to take a view of all the facts and circumstances, and are to enforce the law if it has been violated. If a law is a bad law, it should be enforced in order that it may be the sooner known and repealed, and, if it is a good law, it should be enforced in order that justice may be done. We have nothing to do with the good or bad policy of the law. The question, and the only question, that we are to inquire into, is to first ascertain what the law is, and then whether it has been violated; and we sometimes are enabled to take a more comprehensive and proper view of the state of case by understanding the good or bad policy of the law. Now, it seems to me at a glance that the good policy of this law is apparent, and especially of this provision prohibiting the conduct of the shipper, who is more largely interested in getting reduced rates than any one else—Gentlemen, the shipper, and especially the large shipper, has a great interest to induce

him to get a discrimination of rates in his favor,—to get an "underrate," as it is called; and the man who gets a discrimination in his favor in the shipment of his freight, especially if he is doing a large business, seeks thereby a large personal benefit to the detriment of his rival in a small business, and by the same process works an injury to business all over the country, whether he be a lumberman, a wholesale groceryman, or a large shipper.

How can he do that? In the first place, by means of this discrimination he is able to overcome all rivals, and press out smaller business not as well situated in that respect as he is; and not only the rival wholesale dealer, but he is so situated as to be able to do as the proof shows these defendants did. He is able to have branch retail houses all over the country, and operate a business of that kind, caused by the discrimination in his favor. It is therefore agreed that the purpose of this law was to protect the people. That was the intention of it. There was great wisdom in providing that, if there was a discrimination to be made by this means, there should be a penalty attached to such conduct. These are the two provisions of the law that create an offense of the character I have named upon the part of the common carrier or his agent, and also conduct of a like character, or conduct that may be similar to some extent, upon the part of the shipper. The shipper may commit the offense with or without the concurrence of the other party.

It is alleged in this indictment, in connection with other things, that the purpose of this conspiracy was to enable S. R. Howell, George W. Howell, and Herbert N. Jewett to obtain this discrimination of rates or to obtain rates less than the regular rates charged by this railroad company, specified in the indictment. That was the purpose of the conspiracy. Remember, you are not trying them for doing that, but for conspiring to do that. You are required to find that Mott, who is alleged to be the man who did the overt act,—and he could do it with the concurrence of anybody, or without the concurrence of anybody,—that he did certain things in furtherance of this design. The law requiring that some one of the conspirators shall have done some overt act—some actual act—to carry out the common design and the common criminal enterprise, the act so done by some one of the conspirators must be a crime under the law of the United States. Now, under this section two things are required to make this an offense: First, there must be a conspiracy as affecting these parties, or at least two of them, and, in furtherance of that conspiracy, the man Mott must have done that which it is alleged he did in furtherance of this conspiracy, and the proof offered must show it accomplished,—the purpose enumerated in the indictment.

I will now tell you what is necessary to be found in this indictment. Now, there are different kinds of allegations in the indictment. There are those which go to the very gravamen of the offense, and others that are material, but subordinate. They do not occupy that importance in the indictment that others may occupy, yet they are all necessary to make the offense. Let us see what is charged in

this indictment, and ascertain what is necessary to be proven; and after that we will define this crime known as a "conspiracy;" and after that we will enumerate to you what must be shown to have been done by Mott in furtherance of that conspiracy; then we will give you the rules of law that are to be considered by you in weighing the testimony of the witnesses.

You will understand that if you should believe that these different shipments, charged in this indictment,—and there are only two sets of shipments, by the way, although they were charged in four counts,—if these shipments were all made in pursuance of the common agreement, one agreement (you will bear in mind that a conspiracy may be continuous) then they are acts done in furtherance of the one agreement. Your recollection will not fail you when you refer to the condition of things at the time of the whiskey frauds in this country, and the proof showed them to have been continuous for years; men were connected with them for years. Now, in this case, if there was a common criminal understanding entered into, and I mean by that a conspiracy to do the offense charged in this indictment, and all that is alleged in the indictment to have been done was done in pursuance of that one agreement, then there is but one offense in all these charges and the overt acts or the actual acts done causing the conspiracy. It is for the agreement to do the acts you are to first make search. And I repeat, in order that you may make no mistake, that if there was an agreement, and acts were continually done as are charged in the different counts of this indictment, then there is but one offense. There are four counts. They do not undertake to charge but one offense; that is, provided you find there was but one conspiracy. If you find that to be the case, then the effect of these four counts is only to charge one crime. Although there may have been many different sets of overt acts done in furtherance of this conspiracy, the proof of one overt act is enough for you to find to establish that branch of the case.

It is not necessary to find both of the others charged in the indictment. The doing of one overt act by at least one of the conspirators is sufficient to make out that element of the offense, if done in furtherance of it. Both of the overt acts do not make it any the less a conspiracy. Now, the first count in this indictment charges the shipper of certain lumber with doing certain things; and I want to say to you that all these counts run together. The first and third are the same, with the exception of the allegation of the relation of these defendants to each other. The second count alleges that S. R. Howell and George W. Howell and Herbert N. Jewett were partners. The third count alleges that S. R. Howell and Herbert N. Jewett were partners, and that George W. Howell was their agent, together with Pierce & Tibbetts.

The crime as charged in the third count has the same relation to the transaction or to the business. It includes Pierce, the witness here, and the defendant Tibbetts; that is, the charge in the third count. Now, if you should be-

lieve that that was the relation of the parties, and that they were not partners, as charged in the first count, then your finding would be properly made under the third count in the indictment. The same offense is charged, the same conspiracy to accomplish the same purpose, and the same overt act is set out, in the third as in the first count of the indictment. Now, again, the second count charges the same conspiracy as the first count. Provided you find there was no break in the agreement, you then find there was but one unlawful act. It charges the same conspiracy. It charges, also, that S. R. Howell, George W. Howell, and Herbert N. Jewett were partners, as does the first count, but it charges the doing of a different overt act. The shipping to the different destinations of the cars and the amount of lumber shipped, and that it was of different weight from the lumber described in the first count, and that the underweighing was in greater proportion than in the first count,—that is the difference between that count and the first count,—I say it depends upon whether you find there was any break in the criminal understanding or agreement. The proof shows, as I am compelled to remind you, gentlemen, a continuous transaction of this character, that it was a continuous business, and you would have a right to consider the continuing nature of the business to ascertain that there was but one conspiracy. Now, the mate of the second count is the fourth count. It charges the same overt act. It charges the same character of conspiracy, or to accomplish the same results. I mean it charges the weighing of the same amount of lumber in pounds and the same destination for the lumber, but, like the third count, it alleges a different relation of these defendants to each other. It sets out, as does the third count, that S. R. Howell and Herbert N. Jewett were partners, and George W. Howell was their agent, as in the third count, and that he occupied the relation to the transaction as did Pierce and Tibbetts. That is the only difference between that count and the second count in the indictment. If you should find that that overt act was one done in the same way as the one that is alleged to have been done under the third count in the indictment, your proper finding would be: "We, the jury, find the defendants S. R. Howell and H. N. Jewett guilty as charged in the fourth count of the indictment." If you find they were all partners under the first count of the indictment, then the proper finding would be upon the first and second counts of the indictment. Now, let us see what is necessary to be found. I have called your attention to the fact as to the different relations of these parties that are set up. It is alleged in addition that Edward Pierce and Edward Tibbetts were engaged by said parties or said company as agents in and about the shipment of lumber. That is necessary to be found,—that they were the agents,—because in ascertaining the extent of this conspiracy it is your duty to gather in all the parties connected with it. It becomes twofold your duty in a case like this, because you will understand that it takes at least two persons to make a conspiracy. You may find a party

guilty, provided he acted with others, not even indicted, so as to make the two in the conspiracy.

Then you will remember that the principle as indirectly invoked, that those two witnesses, Mott and Pierce, occupy the relation before you as accomplices; that is to say, they confess or admit they were accomplices. You are to consider their relation to the case, before you can consider it. You must believe their relation as accomplices, and to believe they were accomplices you must find a condition in which as accomplices they acted in this conspiracy, because, if you do not, you cannot find the condition of an accomplice. But they confess by their evidence that they were accomplices. Therefore it becomes necessary that you should gather up in your minds the condition as shown by the testimony, and in this way judge whether that relation or not existed. In addition you are required to find that the Chicago, Rock Island & Pacific Railroad Company and the Chicago, Kansas & Nebraska Railroad Company were companies—railroad companies—engaged in the business of common carriers shipping for hire, and, in addition to that, it is necessary to find they occupied such a relation under the law as that the law applies to their shipments, because, as remarked by counsel on the part of the defendants in this case, this law has nothing to do with shipments in the state. It must be interstate shipments to give Congress power to pass such a law, and punish under such a law.

And the proof is sufficient, as the court has told you, if they were acting as *de facto* corporations, and engaged in this matter of common carriers from one state in the United States to another, and in this case we think as to this commodity, this merchandise or lumber, if you please, was shipped from one state to another. The court in that connection yesterday intimated that in its judgment the allegation in the indictment that this lumber was delivered to these parties at Atchison, Kan., for shipment in Kansas, the rate being the same from Atchison as from East Atchison or Winthrop, and the condition as to its being interstate commerce being the same,—that allegation in the indictment as to shipment from points in Kansas,—becomes a subordinate allegation, and the variance between the allegations and the proof was not material, because it cannot possibly work any substantial injury to the defendants. The material inquiry on that point is whether this overt act was done and this conspiracy was entered into in this jurisdiction, and consequently whether these elements of this crime transpired in this jurisdiction; and, again, whether or not the lumber, as a matter of fact, was shipped through this jurisdiction or from the state of Kansas to some other state in the Union, and that it passed into this jurisdiction and was weighed in the jurisdiction. That is, the overt act that goes to make out that requisite of the crime, provided it was underweighed.

These things are required to be found, and then it is required to be found that they undertook to ship this lumber to the towns named in the indictment, or to some one of them, either to Deshler, Neb., Du Bois, Neb., or Lewistown, in the state of Nebraska, or to the 4 INTER S.

towns of Arriba and Burlington, in the state of Colorado. The court tells you in this connection that the proof shows such a relation upon the part of this railroad company to this transaction as to show that it becomes subject to the law of Congress,—the law passed in 1887, and amended in 1889. You first are required to find, in addition to these propositions, that the said corporations, the ones which I have named, and that are set out in the indictment by the name of the Chicago, Rock Island & Pacific Railroad Company, the Chicago, Kansas & Nebraska Railroad Company, and the St. Joseph & Iowa Railway Company, had established schedules or tariffs of transportation for persons and property along the lines of transportation of such common carriers. If a rate had been established, if it was known by the people in charge of these railroads as an established rate, as a fixed rate, having a uniform character, undertaking to treat all shippers alike in proportion to the distances shipped, if that rate was then and there a fixed rate of that character, in my judgment it is not necessary that it should be published by posting the rate up. That is a thing required by this law to be done by the railroad company for the information of the people, that this practice may not be indulged in by the shippers, and any companies may not discriminate in favor of one and against others, and, if these companies did not do that, there is a penalty attached to it: but that is a different duty from the one prescribed by this statute. If they have an established rate, if that rate is established, if it is so far established as to become a fixed rate under which they act, and parties as shippers, or parties as agents of common carriers, combined for the purpose of evading that rate, of getting an underrate in their favor, or of securing a discrimination as against the people generally, they may be held under this law which charges them with conspiring to do an unlawful act. You are required, of course, to find that a rate has been established by the railroad company. You may take into consideration, in ascertaining the establishment of that rate, that testimony of the witness or witnesses who had charge of that sort of business, and you may also take into consideration the poster put up by them to inform the public as to where these rates could be seen. It is the evidence of the established rate upon their part, and that is one of the elements that must be found in this case. Now, you are required, in addition to that, to find that at the time alleged in the indictment, which was upon the 28th day of May, 1889, or within three years prior to November 6, 1891, the date upon which the indictment was found, Mr. Mott—W. D. Mott—was a person acting for or employed by said railroad companies in weighing and reporting weights of all freights taken and received by them for transportation by said corporations at the city of Winthrop or East Atchison.

That is material to be shown, or so much of it as that he was employed to make the weighing alleged to have been made in the indictment. Whether he was generally employed for that purpose does not matter. If he was employed for the purpose of making these weights, where there was an underbilling,

where there was an underweighing, where there was an attempt to secure a discrimination in favor of the shipper, that would be responsive to that allegation. If he was working for this weighing company, and these railroad corporations were members of that company, he would be their agent. That is necessary to be found. In addition, you are required to find that as far as the first count is concerned, and I have given you the difference between these counts and the one difference that exists—I am talking now as to what is necessary to be found under the first count, and the same thing must be found under the other counts, varying according to the difference in the overt acts charged, and the difference existing in the relation of these parties to each other. The first count has charged that S. R. Howell, George W. Howell, and Herbert N. Jewett were doing business as partners. Then you are required to find that that relation existed between them; that they occupied that relation to each other; and that in attempting and designing to ship large amounts of lumber from Winthrop to points in other states, to wit, to Deshler, in Nebraska, to Du Bois and Lewiston, Neb., and Arriba and Burlington, in the state of Colorado, to some one of these points in Nebraska or Colorado that are named in this indictment, they were there representing the shipper; that these parties, Pierce and the other defendants, were the agents of these parties when they were intending to make these shipments, and that they were acting for said parties as their agents, and acting in this transaction with the knowledge and procurement of S. R. Howell, George W. Howell, and Herbert N. Jewett,—because it is necessary to show the relation of the Howells in this transaction if they are to be convicted. If this business was the business of the Howells, or, if you please, it was the business of George W. Howell and Herbert N. Jewett, and that Pierce and Tibbetts, or Pierce and Tibbetts and George W. Howell, as charged in the third and fourth counts of the indictment, did things that are charged that they did do, in furtherance of the common design to connect these other parties, the parties who owned the business, the heads of the firm, as it were, the business must be done with their knowledge and procurement. If they knew about it, and they permitted it to go on and received the benefits from it, they are directly or indirectly interested in it. It matters not, in this case, whether the benefit was directly received by the consignee or the consignor of this lumber or by the shipper. It makes no difference.

If the purchaser receives the benefit of the transmission of this lumber, then it was a direct benefit to him, and also a direct benefit to the man who was the seller, because by means of cheaper rates, of under prices, he makes customers and builds up trade, and by means of trade holds out inducements to men to purchase from him because of the advantage he has with the railroad company. So, in every case, it is either a direct or an indirect advantage to him. If the man who is the buyer pays the freight, as a natural consequence he will buy more goods from such a firm than if it were a house that could not

control these freight rates. That is one of the reasons why such a law was enacted, that one man in business should not create such a trust or combination or monopoly as would destroy the trade and commerce of the country if it was regulated by his dictation and by his control. It is in pursuance of this, in pursuance of the trade and policy of such men, legislation is leveled at the heads of these men, these combinations, these trusts, that are reaching out and grasping all the concerns of this country, so that the consumer and small dealer and everybody else has to pay toll to the combinations, or to the large dealers. Then it makes no difference, I say, whether the benefit to the shipper was direct or indirect, or to the owner of that business in this case,—either the two Howells and Jewett, or S. R. Howell and Jewett,—the transactions carried on by Pierce and Tibbetts must have been done with their knowledge and procurement.

If they had the knowledge of it, if they permitted it to go on, if they received benefits from it, directly or indirectly, it was by their procurement as much as though they had directly or indirectly commanded it to be done, because it is the duty of a business man so situated to see to it that the law shall not be violated by his subordinates through his neglect of his duty to attend to his business and to protect the public. If you find that the proof does not show the connection to that degree of certainty that the case must be proven that S. R. Howell was so connected with this transaction, that is, that he either knew of it and commanded it, or that he had knowledge of its being done and permitted it to be done, and that the firm received the benefits of it, he would be entitled to an acquittal at your hands, unless the evidence shows his relation to that transaction, as I have stated, beyond a reasonable doubt, as it must show it before you can find him guilty. Now, while these parties occupied this relation to each other, some as owners of the business and shippers, and some as agents of the shippers, and another as agent of the railroad company, and the party who did the weighing while they were occupying that relation, you are required to find that all these parties conspired with one another to commit an offense against the United States,—that is to say, that they did, on the day mentioned, or at any time within three years prior to the 6th of November, 1891, conspire, combine, and agree together falsely and fraudulently to ship a quantity of lumber at less than the actual weight, and they were then within this jurisdiction, that is, the St. Joseph division of the western district of Missouri,—and also to find the one charged with doing the overt act, as alleged, did, by false billing, false weighing, and false representations of weights, knowingly and willfully assist, obtain, suffer, and permit the said George W. Howell, S. R. Howell, and H. N. Jewett, of said company of Howell, Jewett & Co., to obtain transportation for their said property. In this case the proof must show you the combination and means resorted to in furtherance of it and the purpose for which they entered into it, to wit, to enable this firm of the Howells and Jewett or of Howell and Jewett, as the case may be, to obtain transportation for their property,—that

is, lumber alleged to have been transported and underbilled,—to obtain from them that privilege to secure the carriage of the lumber to the points designated, and from the place where it was billed and weighed, at less than the regular rates then and there established and in force. That is the allegation of the conspiracy; that is the allegation of the purpose in view when they did conspire. There is but one other clause in this indictment, and that is that while that was the purpose of these parties, while that was their object, W. D. Mott, in furtherance of the common design of which he was a part, of which they were all alleged to have been a part,—the common design which bound them together for the purpose of obtaining the shipments at underweights,—that in furtherance of that design to accomplish it he did a certain thing. What is it? That he weighed a car or cars of lumber and shipped them out at less than their actual weight; that is, by falsely weighing, falsely billing freight to be shipped. That is the allegation of the act done by Mr. Mott in furtherance of this common design; that is what is necessary to be found in this indictment; and it must be found, if you find under any of the counts in this indictment.

Now, what is the nature of this charge of conspiracy? *Mr. Justice* Dillon, in his trial of the whiskey cases, gives a very happy definition of this crime called a "conspiracy." He says: "A conspiracy means a combination formed by two or more persons to effect an unlawful end; said persons acting under a common purpose to accomplish the end desired." *United States v. Babcock*, 3 Dill. 586. An agreement or an undertaking, or a combination, if you please, entered into between two or more persons to accomplish an illegal result, and what is meant by accomplishing an illegal result is doing something which is against the laws of the country; entering into a combination to do anything of that kind; to do something which by law is a crime. Two men may agree to go out here and steal a horse. That is an offense against the laws of the United States, provided it occurs in a place where the United States has jurisdiction, as in the Indian territory. They agree to go out and steal a horse. They do not steal the horse, but one of them goes to the stable and gets a horse, that they may safely get away with the horse. They are intercepted. They did not steal the horse at all. Now, they may be indicted for attempting to steal the horse, in entering into a conspiracy to steal the horse, but they cannot be convicted for the offense of stealing, even if one of them went so far as to do an overt act in furtherance of the design. Not only this unlawful combination shall be entered into, this agreement to violate a law of the United States, but one of the parties to the conspiracy must do the overt act charged, that we can see there is something more than a mental purpose to commit the crime. These are the two things that make up this crime: The overt act I have enumerated to you; such act alleged in this indictment to have been done by Mott; the act that was agreed upon to have been done by these other parties in furtherance of this conspiracy. The agreement upon the part of the alleged conspirators was to secure

a shipment of freight at an underweight as established by the railroad that did the shipping. That was the purpose of the combination, and if it was accomplished in the manner enumerated by the statute, if he did that which would make him responsible under the paragraph of the law as to the shippers, who would become responsible under that act for the crime committed by him, he might become guilty under the law. Now, these are the two elements that go to make out this crime. The doing of the overt act in furtherance of the common criminal design is one of the things you must find. You are required to find, first, in this case, was there such a conspiracy, as is alleged, as affecting at least two of these persons? It is not necessary that the two should be on trial. Was there such a conspiracy as is described in this indictment, and was any one of these overt acts that are alleged here to have been done in furtherance of it done as alleged? These are the propositions necessary to be found to establish this case, such as is stated in this indictment. After you have found these propositions,—that is, whether they are true or not,—then you are to look into this evidence to see how many defendants were connected with this unlawful combination. Now, what is necessary to make a conspiracy? You will understand that this is a crime that may be committed at long range. A man may be living in Chicago and be guilty of a conspiracy in this district. In the whiskey trials it was alleged that men living in the city of Washington were so connected in the conspiracy in the eastern district of Missouri as that they could be tried in that district; and it is true that a man may be connected with this kind of a crime, and be responsible for it in a given jurisdiction where it has its headquarters, where the agreement is made out, where it is entered into; he may be connected with it as though he had been living in that jurisdiction. In this case it is not necessary for S. R. Howell to have been living in the jurisdiction at the time of the formation of the conspiracy. He may become a party when it was created, by acts of a certain nature, even though living in Chicago, or he may be responsible after it was formed, provided he went into it or had anything to do, as charged in the indictment.

Does the law require you, under your oath as jurymen, to see the thing itself in order that it may be found to exist? It gives you the right of judging the intent from the act done. You cannot find it except in one way, and that is by circumstances. Especially is that true with a conspiracy. The conspirator has two objects in view. He would hardly think it worth while to enter into a conspiracy unless there was some motive which prompted the desire to consummate it. Because he has that motive to consummate it, it is necessary to have a secret understanding. People do not put it in writing, as you do a deed which conveys your land to another, or have it recorded in a book as evidence of the title that you pass to another. If the officers of the law would lay their hands upon them before they had consummated the conspiracy, their purpose would fail; then they may act with secrecy because of the desire to accomplish a result. It is not necessary to be made by so many formulated

words. I know that not one of you gentlemen has a criminal purpose in view, but I have explained this for the purpose of showing to you the principle, and in construing it you must be guided by the light of human experience and human understanding; but if I knew that one of you gentlemen had a criminal purpose in view, and with that knowledge I joined you for the purpose of consuming that object, and in furtherance thereof I entered upon the same design with the purpose of aiding you in its commission, then it is the same, for I have joined the conspiracy as though I had been a party to it in the beginning, for that is what the law seeks and calls a "design" or an "agreement" entered into with the knowledge of assisting in the perpetration of that which is against the law, and which is called "conspiracy." It may be entered into in either one of these ways. If it is a secret, how are you to find it? I may read a little in reference to the nature of conspiracy. Judge Dillon says, in the case of *United States v. Babcock*, 3 Dill. 585:

"It is not necessary, to constitute a conspiracy, that two or more persons should meet together and enter into an explicit or formal agreement for an unlawful scheme, or that they should directly, by words or in writing, state what the unlawful scheme was to be, and the details of the plans or means by which the unlawful combination was to be made effective. It is sufficient if two or more persons, in any manner, or through any contrivance, positively or tacitly come to a mutual understanding to accomplish a common and unlawful design. In other words, where an unlawful end is sought to be effected, and two or more persons, actuated by the common purpose of accomplishing that end, work together in any way in furtherance of the unlawful scheme, every one of said persons becomes a member of the conspiracy, although the part he was to take therein was a subordinate one, or was to be executed at a remote distance from the other conspirators."

Any act done in shipping this lumber to its final destination out of the district, if done by all or any one of these parties, would be an overt act, you can notice, if done in the jurisdiction. A combination formed by two or more persons to effect an unlawful end is a conspiracy, said persons acting under a common purpose to accomplish the end designed. Any one who, after a conspiracy is formed, and who knows of its existence, joins therein, becomes as much a party thereto from that time as if he had originally entered into it. That is the nature of this crime. How are we to find it? We must find it, if we are to find it at all, alone by circumstances, because we cannot find it by positive evidence. Positive evidence may be introduced to show the existence, as in this case, of the overt act, done in furtherance of the conspiracy. We can have positive proof of it, and this witness who did the weighing would be a positive eyewitness. Pierce or any other witness would be a positive witness. That is something which is tangible and real, and something to which you can apply one of the five senses. It is not necessary to prove that underbidding was done in secret, although it matters not whether it

was so done so far as that part of the offense is concerned. As to the overt act, you have positive evidence of its occurrence, and you may resort to this class of testimony called "positive evidence," because proved by an eyewitness of the underbidding. There is another kind of testimony that you can resort to, and, while sometimes have a prejudice against this class of evidence, Judge Dillon said, in a case he tried while he was on the circuit bench of Iowa, that although this was one of the resorts of lawyers to make a hobgoblin, to frighten jurymen into a prejudice against this class of evidence, yet circumstantial evidence was one of the most important classes of testimony. Although we know there are men who have some prejudice against this class of testimony, when we understand it and look at it fairly we can see how much depends upon this kind of evidence. A man enters the household of an innocent family and murders the wife and the children of the husband. No eyewitnesses except those eyes that are closed by the hand of death were eyewitnesses. What are you going to do? Are you going to let it stand unpunished? Shall we say, because there was no eyewitness of the crime, that the murderer shall go unpunished, because no one saw the shooting, the flash of the pistol, or the dagger used? That man who did it may be insane. He may be incapable of having intent. Under the law, in a crime of that character, even as in crimes of a high nature, the intent is the first element that goes to make up the crime. Under the law, until you prove the intent to commit the crime, no conspiracy can be charged. How are you going to prove it? You cannot prove it except by circumstances. There has not been an eyewitness who could see the mind of that man actually and really. It is only by circumstances, and acts connected with the circumstances, that we are able to form any opinion. Now, of all the crimes that have to be proven by circumstantial evidence, this is the chiefest, because of its secret character, because of its not being proclaimed or made public, so that men can see and know it by the positive evidence. You have to drag it to the light of day to see whether there was an intent or a purpose to commit a crime or a criminal design, for the intent or design is the very germ of the crime. I do not consider it improper to detain you a little longer to give you the opinion of one of our ablest jurists on this class of testimony, which is often resorted to by courts. In the case of *Com. v. Twitchell*, 1 Brewst. 571, a case tried in Philadelphia before Judge Brewster, the court in that case says, and I indorse every word of it:

"Mr. Bentham tells us that all evidence flows from persons and things. These are the only two sources from which we can expect testimony, and, unless we resolve to let all secret crimes go unpunished, all civil disputes to remain undecided, and to throw away our reason, we cannot act upon the statements of persons and things. I say statements of things, because if we consult the experience of every hour we will be taught that inanimate objects have voice as well as sentient things. It is in vain, then, for man to say that, because others have failed in their efforts to detect error, he will sit quietly down, and perversely refuse to

apply his intelligence to the problems of life, whether they encounter him in the counting room or in the jury box. He might just as well refuse to use his legs because others have fallen or been killed in walking. He might with equal propriety refuse to eat because others have been poisoned while partaking or nourishment. Some persons, admitting the force of the principle which actually compels us to act upon evidence, still insist nothing but positive testimony should produce conviction, and, adhering tenaciously to this favorite dogma,—those who are too timid or too weak to exercise the reasoning faculties with which kind Providence has endowed them,—they assail all circumstantial evidence. A moment's reflection, however, must satisfy all candid minds of the unsoundness of such a proposition. Suppose for a moment that this was the rule for our being, and that we had been so constituted that we could believe nothing unless it was demonstrated to us by our own senses or by the statement of an eyewitness, what would then be our condition? Of course, we could not punish any crime unless it were perpetrated in the presence of spectators. All secret murders, arson, burglaries, forgeries, and other offenses could be committed with impunity. Nor would the mischief stop there. Few civil controversies could be settled by juries, no book of original entries could be received in evidence, no note or obligation would avail unless there were a subscribing witness; indeed, this would not be sufficient, for, if he died before trial, the claim would expire with him, and insurance on the life of the witness would not even avoid the difficulty, for the policy would die with its attesting witness. For the same reason all receipts would perish with those who saw them signed, and all our deeds and muniments of title would be swept away by the death of the subscribing witness and the magistrates before whom they were acknowledged; all proof of handwriting by comparison be annihilated; infamy would be destroyed, or remitted to its infancy in barbarous ages. With the abolition of legal punishment for crime, mob laws and vigilance committees would supersede the use of courts and juries. The whole frameworks of society would be impaired, if not destroyed. The absurdity of the prejudice against circumstantial evidence may be still further illustrated by reflecting for a moment upon the use to which we constantly and properly apply it. Not only do business men answer letters, pay drafts, and credit others to the extent of millions daily upon the testimony of circumstances alone, but they commendably carry this faith, as the evidence of things unseen, into the reasoning which connects them with the world beyond our own. A trifling circumstance—the fall of an apple—has proved to the satisfaction of philosophers the great laws of gravitation which control the motion of the universe. The man who denies the existence of his Maker is properly regarded by many as thereby evincing his want of reason. Yet what proof have we of this important and accepted truth except from circumstances? The same kind of testimony is the prop of our belief in all the great truths of revelation. If we turn from the world to the great mechanism

4 INTER S.

within us, we see again that no rational man pauses for one instant to doubt the force of circumstantial testimony. What evidence have we that it is a heart that beats or a brain that throbs within us, except from the fact that those organs exist in all similarly constituted beings? And we accept remedies for all the ills that flesh is heir to upon precisely the same faith as circumstantial evidence."

Chief Justice Gibson has given an excellent illustration of the force of this kind of testimony. He says (*Com. v. Harman*, 4 Pa. 272):

"You see a man discharge a gun at another. You see the flash, you hear the report, you see the person fall a lifeless corpse, and you infer from all these circumstances that there was a ball discharged from the gun, which entered his body and caused his death, because such is the usual and material and natural cause of such an effect. But you did not see the ball leave the gun, pass through the air, and enter the body, and your testimony to the fact of killing is thereby inferential; in other words, circumstantial."

The improvements of modern science furnish us with another illustration: You are in a telegraph office, and see the battery in motion. A message is received. The station at the other end of the line may be a thousand miles distant. No human eye ever saw the subtle fluid pass along the wire, and yet you would hardly listen with patience to the man or the argument undertaken to reason to you that the message might have come through the air or the earth without the agency at the wire, and that all your evidence to the contrary was circumstantial, and therefore unworthy of regard. In short, a skepticism like this would open wide the door for the perpetration of all secret crimes, would uproot our faith in man, and destroy even our belief in a Creator and in a future state. These are some of the evils which flow from the declaration of a principle, that we should reject all circumstantial evidence.

There is much more of that which I could occupy your time in reading, and it illustrates to you forcibly the great standing that that sort of evidence has in the courts of the country, and, I may say, in the estimation of intelligent men, because you act on it, and have to depend on this kind of evidence to satisfy your minds of the great problems of life. You may resort to evidence of this kind to establish a case of this character, for it is one which, above all other cases, must be proven by circumstances, in part, at least. You may have no positive evidence of it. You may take into consideration their association, their relation to each other, their intimacy with each other, their interest in the business transacted, and the results that would flow from the commission of the act. All of these circumstances and these facts may be taken into consideration. The test as to this character of evidence goes to its character and to its sufficiency. If it is equal in proving power to the testimony of one positive, uncontradicted, credible eyewitness, the law says it is sufficient to establish any proposition. Evidence of any kind, positive or circumstantial, establishing a proposition affecting a crime, is sufficient when it proves it to that extent.

Now, while we are upon this subject, it may be proper to call your attention to the fact, in addition to what I have said, that you may take into consideration the very overt act done, if apparently done in pursuance of the design, to show who was connected with that understanding. You may use that overt act to show the other circumstances. You may use it for that purpose as one item of evidence to show the existence of the conspiracy. As I have remarked, two of the witnesses who were on the stand are confessed accomplices in this alleged crime. They say that they did certain things. If they did, these things would make a conspiracy, and the doing of this particular act charged. If that proposition is true, then you are to inquire whether the other persons charged in the indictment were connected with it. After the first proposition is established, then you must see if the other parties were connected with it. From Pierce, the witness, you have certain facts with reference to George W. Howell that would make him a party to this conspiracy; and if it be true that Jewett was connected with that transaction, that he had knowledge of it, that he permitted it to go on with that knowledge of the offense, with benefits received directly or indirectly as a member of that firm, that would make him a party also. If the other state of the case was true,—that is, that S. R. Howell and Herbert N. Jewett were partners, and George W. Howell, with knowledge and as an agent, was connected with that transaction and assisted in it, that he furnished the means as the agent representing the business of S. R. Howell and Herbert N. Jewett of carrying on the purpose,—that would make him a party in the business also. But I have already adverted to the facts necessary to connect the other Howell with the transaction. Now, these witnesses, Pierce and Mott, occupied a relation to the case different from ordinary witnesses. They confessed they were guilty as charged in the indictment. That would make them responsible under the law. The law lays down a rule on that subject, as to how you should regard testimony of witnesses of that character, and the proposition that the court is asked to give you on that subject by counsel for the defendants is not the law, and the court refuses to give it. The law is different from that, and is contained in the rule which has been laid down by *Mr. Justice Dillon* in the trial of the case I have already referred you to. That is the case with this man Pierce. That is the case with Mott, and he stands here indicted in five or six cases; but as to whether he is indicted or not, that cuts no figure, except it may prove some one of the propositions that he is a party to the conspiracy. The rule of law is that accomplices are competent witnesses, and that when sworn you should consider their testimony, for you can convict on their testimony when all the facts and circumstances surrounding the case go to verify their statements. You are to consider their evidence. They are competent witnesses, but under the legislation of Congress they may not be compelled to testify. But the testimony of conspirators is always to be received with extreme caution, and weighed and scrutinized with great care, by the jury. It is just and

proper for the jury to seek for corroborating facts to bear out their statement. It is just and proper to do it, but it is not absolutely necessary, provided the testimony of the accomplice produces in the minds of the jury full and complete conviction of its truth. Now, there is one point that in my judgment needs elaboration. It is just and proper in such cases for the jury to seek corroborating facts in material respects. You will understand that it is always safest and best to look for corroborating facts. It is a rule you should always apply, not to take a man's testimony alone in any case, but to look through the whole evidence to see whether there are other facts in the case which corroborate that. And I may say right here, in this connection, that all truths in this world are in harmony; I mean all material or relevant truth. If one witness in a case is telling the truth, there are other propositions, if you can get at them, other truths, that will corroborate what he says; and it is by means of this fact, and of the recognition of the fact, that these other truths frequently consist of circumstances, that we can find the truth in a given case. I say that the testimony of the principal witness upon material facts may be corroborated alone by circumstances, if correctly produced.

Therefore it is prudent, it is safe, it is proper, in a case where a man testifies, to look to other facts corroborating what he says. The testimony of any witness is true if it produces a belief of that character,—if it is equal in proving power to the testimony of one eyewitness; but it is a prudential rule that all witnesses who are confessed accomplices should be corroborated in some material part. It is not necessary to corroborate in every part of the act, in every part of that which goes to make up a crime in every detail, but if he is corroborated in some material fact that is sufficient; that goes to show by the light of other evidence the truth of the statement, and that is what the law means by saying he must be corroborated in some material part. It must, in some particular, tend to show the guilt or innocence of the parties outside of his evidence. That corroboration may come from oral testimony or from documentary evidence, from letters, from writing. It may come from evidence, or letters admitted and found to be competent evidence, but you are to look to it to see that there are corroborating facts in some particular to go to make up the accusation against the parties charged. This is as to the testimony of accomplices. That same witness, Pierce, was sought to be impeached, and his testimony broken down. I give you a rule in this connection that bears upon the other proposition: If you should believe that he is an accomplice, and that you cannot believe him on that ground, if standing alone; if you believe his testimony is so supported by other facts and circumstances as to impart verity to it, and to make it worthy of belief,—you might believe it on that ground, and you are not at liberty to reject his evidence because he is an accomplice, and you are not to do so until you look through the case to see if his evidence is corroborated. It was sought to be impeached by a number of witnesses; and right here let me say to you that it is a dangerous method of impeachment to the witness and to the cause of justice, and it often

works very unjustly against the witness. You, therefore, in ascertaining whether he has been successfully impeached, are to ascertain, first, whether it has been proven in a credible way that the character of that witness as given to you was the character reflected by the opinion of the people generally in the neighborhood where he lives. It frequently happens that we make up our judgments by our own feelings towards the party. There are many men in this world who have such an opinion of themselves that they take their own judgment, and by it compare all other judgments. You say that his reputation is good or bad; but we must consider that reputation as only the reflex of character,—the reflex of the character,—and, in justice to men called into the courts of the country without any idea or intimation of who is going to swear against them, it is for you to see whether that impeachment has been successfully made against the party. There is not a man on earth, if you catch him under certain circumstances, that you cannot find some one to prove that his general character for truth and veracity was bad. Every man who is a man has his enemies, and it frequently happens that men mistake this thing for general reputation. And, again, it opens wide the door of personal prejudice, and it affords means by which men can concoct and do great damage to a witness. It is a means of attack that may be easily resorted to. Then, in ascertaining how far that attack has gone,—and, if made successfully, you have a right to look through all the evidence in this case; if you do not believe the statements of these witnesses reflect the opinions of the people in the community, there is a failure on that ground to impeach; if you do believe that, and they reflect it, then you are to look to other circumstances to see whether really that was the condition as created by the community generally,—you have a right to take into consideration the fact that he was the admitted trusted employé of the defendants; and their evidence fully sustains that fact to such an extent that large sums of money were paid to him, and not a question asked as to how he disposed of it and disbursed it. I say, if he was connected with the business of that company in that way, you have a right to take it into consideration in this case. If the impeachment has been successful, or the reflex of the opinion, the sentiments of the people generally have been placed before you as a jury in this case, and that the witness stands to you in that way, then you are to look to the other testimony to see whether he is corroborated. If you believe other facts so corroborate his statement as to give verity to it, you may believe him. In a case of that kind you are to say whether his statement is true, to look to all these facts in justice to the defendants and to the witnesses. There are other rules the law gives you for weighing the testimony of witnesses. In addition to the ones already given, you are to take his evidence, the evidence of the accomplice, and see whether there are other facts and circumstances outside of his statement coming from other witnesses corroborating his statement. The same rule applies to the testimony of Pierce and Mott. The rules of law given us say that we are to consider the testimony of each witness

4 INTER S.

as to its consistency, its probability, its reasonableness. If the witness gives you a statement that by your judgment and observation of life seems to be probable, seems to be reasonable when comparing it with what you have observed, seems to be consistent, is not that witness entitled to belief? Then you consider the question as to whether it is borne out by other facts, in the light of the other testimony of the case. The law says that defendants may testify; they have a right to go on the stand and make their statements. You take them as you take the statements of all other witnesses,—for what they are worth. We are all pretty much alike in this matter of self-interest. We need not set ourselves up as standards. The best of men think they should be believed. It comes so near to us that it takes possession of us, this thing of self interest. The law says that any man can go on the stand and testify. When defendants go on the stand the fact is they have a motive, a consideration. It is a severe test. Some men can stand against it, and follow the line of truth as best they know it, but the law considers that they may not be able to do that; and yet they may be honest men, as the world goes, intentionally honest men, and, for the reason that they may not be able to do it, the law says to you, "You are to consider it in the light of their relation to the case."

You are to do, also, as you do with other witnesses, to see whether it is contradicted by other reliable facts; that, if it is, then it is weakened, as you may attach credit to the contradicting facts; and you are to see to it also whether it is corroborated by other reliable facts, and, if so, it is strengthened. That is the relation the testimony of the defendant witnesses bears to you. Look at its consistency, its reasonableness and probability, in the light of the surrounding circumstances. You may reject it upon the ground that he is a defendant witness, or that he is contradicted by other evidence. You are to take that view of the testimony of all the witnesses, and look for supporting facts. If you believe, when you apply all these rules, that it is entitled to belief, then you are to find it true. Now, to what degree of certainty must this be established? The same degree is required to be established as to other evidence. You cannot demonstrate propositions growing out of human conduct. You can prove them so there is no conjecture to be arrayed against them. It sometimes is said that nothing can be proven to a degree of certainty when it comes to that which grows out of human conduct connected with crime, and which is dragged to the light of day by taking the circumstances and actions connected with it. You cannot have it proven absolutely. The law does not ask you to accomplish the impossible. It asks you, as reasonable men, to do that which reasonable, ordinary men would do,—nothing more; nothing less. Where does this rule come from? This rule of law comes from what reasonable men ordinarily do in the everyday affairs of life. It is our own experience, based upon our observation of others and our actions. We observe the actions of men, and that the rule existing was ascertained as to the amount of proof necessary to

bring belief to the minds of the reasonable men of the country. Evidence was necessary to bring his mind to a conclusion that was reasonable, ascertained by looking at the actions of men in the light of facts proven. Upon that was formulated this rule that the proofs in a criminal case, before conviction can take place by a jury, must be sufficient to establish all the material allegations in the issue beyond a reasonable doubt; so that reasonable men upon a matter of importance or concern would be satisfied of its being true. When it is proven to that extent, it is proven beyond a reasonable doubt. This degree of certainty must exist in this case, and nothing more. The law contemplates it is your moral duty to find this. Now, the counsel for the defendants have called your attention to the question of reasonable doubt in reference to this case. That must be a real and substantial doubt, and not a mere conjecture or surmise as to the possibility of innocence. No other doubt is entitled to a moment's consideration; no other is entitled to occupy your minds for a single second.

Gentlemen, that is the degree of certainty to which this case is required to be established. I believe I have covered every proposition in this case necessary to be given. Gentlemen, in conclusion there is nobody connected with the government in this case who wants anything but simple justice, and I speak for myself and the district attorney when I say that we seek equal and exact justice. Notwithstanding this great cry about the railroad corporations, I ask you to vindicate the law. Railroads are entitled to the same rights as others, but it sometimes looks as if attorneys endeavor to take advantage of a jury. Intelligent men, under their oaths, will administer equal and exact justice in all cases, whether affecting railroads or affecting private citizens. The law ought to be administered, and should be administered, in this way, for the railroad companies have their interests which should be preserved; and it is the object of the law to enforce penalties when statutes or laws are violated, either by the railroad company or private shippers. Gentlemen, you will proceed to make up your verdict.

UNITED STATES CIRCUIT COURT SOUTHERN DISTRICT OF ALABAMA.

BIGBEE & WARRIOR RIVERS PACKET CO.

v.

MOBILE & OHIO R. CO.

(60 Fed. Rep. 545.)

1. No dissimilarity in circumstances or conditions justifying a discrimination in rates exists between a shipment of cotton from Mobile to New Orleans by a person who receives it by vessel from Demopolis, Ala., and a shipment by a person who receives his cotton from any other part of Alabama or by rail.
2. A person who receives cotton at Mobile from any particular point on the Alabama rivers whether it comes by boat or wagon or any other way and desires to ship it from Mobile to New Orleans by a railroad line is entitled to have it shipped at the Mobile rate as much as any person who receives his cotton from any other point or who may have bought it at Mobile, and it is

no objection to such right that it would give every town located on such rivers equal facilities and advantages with those of Mobile, as that is the purpose of the Interstate Commerce Act.

3. An agreement by a railroad company with other companies within a specified territory for the purpose of maintaining a uniform rate upon all shipments of cotton from certain points in Alabama in vessels plying the Alabama rivers and received at Mobile, to be rehipped and transported to New Orleans to charge a certain sum per bale in excess of its regular rate from Mobile is no justification of such discriminating charge and contravenes the Interstate Commerce Act.

Decided December 30, 1893.

ON DEMURRER to answer in an action brought to require defendant to transport freight delivered to it by plaintiff at the same rates at which it transports other freight. *Sustained.* The facts are stated in the opinion.

Messrs. Pillans, Torrey & Hanaw for relator, in support of the demurrer.
Mr. E. L. Russell for respondent, *contra.*

Toulmin, *District Judge*, delivered the following opinion:

The facts in this case, as stated and admitted

in the pleadings, are that the relator is a corporation of the state of Alabama, and is engaged in transporting cotton and other mer-

chandise upon its vessels plying on the Bigbee river in the state of Alabama; that the respondent is a common carrier of goods, engaged in interstate commerce, and over its line and connecting lines undertakes to carry, as such common carrier, goods, including compressed cotton bales, from Mobile, in the state of Alabama, to New Orleans, in the state of Louisiana; that respondent, as such carrier, has for a long time, and does yet carry and transport compressed cotton bales from Mobile to New Orleans at and for the price of 80 cents a bale to ship's side at New Orleans, and the 80 cents a bale is the usual and customary rate charged from Mobile to ship's side at New Orleans on compressed cotton. Relator, having in the city of Mobile 400 bales of compressed cotton which it had brought on one of its boats from Demopolis, Ala., for reshipment to New Orleans, delivered the same to respondent at its freight sheds in Mobile, the place provided for receiving such goods for carriage, and requested and demanded of respondent that said cotton be shipped as customary, and at said customary rate of 80 cents a bale, and tendered the freight money in advance to respondent. Respondent refused to transport the cotton, as it was requested to do, at the rate of 80 cents a bale, and demanded \$1.25 a bale. One dollar and a quarter a bale was and is a higher rate than is charged by respondent to others and the general public for transporting cotton of like kind and condition from Mobile to New Orleans. Respondent sets up in justification of its refusal to receive and transport said cotton at 80 cents a bale, and of its demand of \$1.25 a bale, substantial dissimilarity of circumstances and conditions from those under which other cotton is offered by other shippers at Mobile, and received by respondent to be transported to New Orleans. The substantial dissimilarity of circumstances and conditions as averred by respondent is the fact that the relator was engaged in transporting cotton and other merchandise upon its vessels on the Bigbee river, and that this cotton was received by the relator at Demopolis, Ala., and was transported upon its vessels to Mobile, for the purpose of reshipping the same over respondent's line, or some other line of railroad to New Orleans. And respondent further says, in justification, that it had agreed with the Louisville & Nashville Railroad Company, and certain other railroad companies within a specified or given territory, for the purpose of maintaining a uniform rate upon all shipments of cotton from Demopolis and some other points in Alabama, in vessels plying the Alabama rivers, and received at Mobile to be reshipped and transported to New Orleans, that it would charge \$1.25 a bale for such transportation, and that the 400 bales of cotton in question were so received from Demopolis. Respondent, in short, says that it refused to receive and transport said cotton, as stated by relator, (1) because it was not offered under like circumstances and conditions as an ordinary or usual shipment of cotton over its line and connecting lines from Mobile to New Orleans; and (2) because of the agreement referred to.

The interstate commerce law, among other things, provides that it shall be unlawful for any common carrier, subject to the provisions

4 INTER S.

of the law, to charge, demand, collect, or receive from any person or persons a greater or less compensation for any services rendered or to be rendered in the transportation of property than it charges, demands, collects, or receives from any other person or persons for doing for him or them a like contemporaneous service in the transportation of a like kind of traffic, under substantially like circumstances and conditions (section 2, "Act to Regulate Commerce," 24 Stat. at L. 379); and by section 3 of the Act it is provided that it shall be unlawful for any common carrier, subject to the provisions of the Act, to make or give any undue or unreasonable preference or advantage to any particular person or locality, in any respect whatsoever, or to subject any particular person or locality to any undue or unreasonable prejudice or disadvantage in any respect whatsoever.

It is contended on part of respondent that the proposed shipment of the cotton in question was not as an original shipment from Mobile to New Orleans, but was shipment from Demopolis, Ala., through Mobile to New Orleans. The cotton was shipped from Demopolis to Mobile to be forwarded to New Orleans, but was not shipped by through bill of lading from Demopolis, *via* Mobile, to New Orleans, but was shipped from Demopolis to Mobile, consigned to relator at Mobile, to be reshipped at Mobile. It was tendered by relator to respondent, to be shipped over its line and connections to New Orleans, and a bill of lading therefor demanded of respondent. The fact is that all cotton shipped from Mobile to New Orleans by any person comes from some point outside of Mobile. What substantial dissimilarity in circumstances and conditions is there, then, between a shipment of cotton from Mobile to New Orleans by a person who has received the cotton from Tuscaloosa, or any other part of Alabama, for illustration, and a shipment of cotton from Mobile to New Orleans by a person who has received it from Demopolis, Ala.? There is a dissimilarity in the circumstance that one lot of cotton came from one point and the other lot from another point. But this is not a substantial dissimilarity, such as is contemplated by the law, and it is not every dissimilarity of circumstance or condition that justifies a dissimilarity of rates. "That some dissimilar conditions justify dissimilarity in rates is true. That remote dissimilarities of condition justify any dissimilarities which the carrier chooses to make is not true." *Interstate Commerce Com. v. Texas & P. R. Co.* 4 Inters. Com. Rep. 408, 57 Fed. Rep. 955. The circumstances and conditions to be considered are those which bear upon the transportation by the particular carrier, and under which such transportation is conducted. They must have direct bearing upon the traffic over the line on which the discrimination is made. The dissimilarity of circumstances and conditions set up by respondent in justification of its claim is not the outcome of competition by water routes or any other competitive railroad line not subject to the Interstate Commerce Act. Respondent's position on this point cannot be sustained. I am unable to see that the circumstance that the cotton in question came from Demopolis to Mobile, to be reshipped thence to New Orleans, has any direct bearing upon the

traffic over respondent's line to New Orleans. I am unable to see how the fact or circumstance that the cotton came from Demopolis can in any way affect transportation or traffic over respondent's line and connecting lines to New Orleans. The respondent has no line to Demopolis, Ala., and no connecting line or joint traffic arrangement with the relator, the Bigbee & Warrior Rivers Packet Company, and hence there is no question of a proportion of rates involved in the case.

It is further contended by the respondent that to grant to the relator the right to ship its cotton from Mobile to New Orleans at the same rate given to other shippers of cotton from the one point to the other at what the counsel calls "the Mobile rate of 80 cents on a bale," would give to every town located on the Alabama rivers equal facilities and advantages with those of Mobile. That is true, and that is what I understand the Interstate Commerce Act provides for and is designed to protect, when it says that it shall be unlawful for any common carrier subject to the provisions of this Act to make or give any undue or unreasonable preference or advantage to any particular person or locality in any respect whatsoever, or to subject any particular person or locality to any undue or unreasonable prejudice or disadvantage in any respect whatsoever. I consider that any person who receives cotton at Mobile from Demopolis, or any particular point on the Alabama rivers, whether it comes by boat, by wagon, or any other way, and desires to ship it from Mobile to New Orleans by respondent's railroad line, is as much entitled

to have it shipped at the Mobile rate of 80 cents a bale as any other person is who receives his cotton from any other point, or who may have bought it at Mobile. To deny the former this right while it is given to the latter would, in my judgment, be subjecting him and the locality from which he got his cotton to an undue and unreasonable disadvantage, and would be violative of the Act to Regulate Commerce. *Crews v. Richmond & D. R. Co.* 1 Inters. Com. Rep. 708. The United States Supreme Court in the case of *Union Pac. R. Co. v. Goodridge*, 149 U. S. 680, 37 L. ed. 896, says, in substance, that it was designed by the Act to Regulate Commerce "to cut up by the roots the entire system of rebates and discriminations in favor of particular localities; that carriers are bound to deal fairly with the public, to extend them reasonable facilities for the transportation of their persons and property, and to put all their patrons upon an absolute equality." Relative to the agreement set up in the defense I will say that "if the respondent is acting, or claims to act, under the compulsion of circumstances and conditions of its own creation or connivance in the making of an exceptional rate, then these will not avail it" (*Business Mens Assn. v. Chicago, St. P. M. & O. R. Co.* 2 Inters. Com. Rep. 41); and, further, that, in my opinion, such an agreement contravenes the Act to Regulate Commerce. My conclusion is that no justification has been shown by the respondent for the discrimination complained of, and that relator's demurrers to respondent's answer should be sustained; and it is so ordered.

UNITED STATES CIRCUIT COURT.

UNITED STATES

v.

WORKINGMEN'S AMALGAMATED COUNCIL *et al.*

(26 L. R. A. 158, 54 Fed. Rep. 904.)

1. An injunction against an unlawful combination in restraint of trade, in violation of the Act of Congress, will not be denied because, after the filing of the bill, the unlawful interference with trade has ceased.
2. The interdiction by Act of Congress of contracts or combinations in restraint of trade or commerce among the several states or with foreign nations applies to combinations of labor as well as of capital, which are in restraint of such trade or commerce.
3. An answer under oath does not preclude an injunction in the Federal courts, where the oath of the respondent is waived in the bill according to Equity Rule 41.

4. An unlawful combination in restraint of interstate or foreign commerce may exist among labor organizations, although their original purpose and general character is lawful.
5. The stopping of transportation of goods and merchandise in transit from state to state and to and from foreign countries which is caused by a strike of all the members of labor organizations in a certain city in all kinds of business in an attempt to compel the employment of none but union men in a certain business, is an unlawful restraint of commerce in violation of the Act of Congress.

Decided March 25, 1893.

SUIT to enjoin defendants from violating the provisions of the United States statute which was passed to protect trade and com-

merce against unlawful restraint and monopolies. *Injunction granted.*

The facts are stated in the opinion.

NOTE.—For other cases touching the subject of a strike by employes as an unlawful conspiracy, see *Casey v. Cincinnati Typographical Union No. 3* (C. C. S. D. Ohio) 12 L. R. A. 183, and note; *Toledo*, 4 INTER S.

A. A. & N. M. R. Co. v. Pennsylvania Co. (C. C. N. D. Ohio) 19 L. R. A. 387, and 395; *Waterhouse v. Comer* (C. C. S. D. Ga.) 19 L. R. A. 408; *Arthur v. Oakes* (C. C. App. 7th C.) 4 Inters. Com. Rep. 744, 26 L. R. A. 414.

Mr. F. B. Earhart, U. S. Atty., for complainant.

Messrs. M. Marks and A. H. Leonard, for defendants:

Preliminary injunctions should be allowed only when shown to be clearly necessary to afford immediate protection to some right or contract which would otherwise be seriously injured or impaired.

High, Inj. §§ 4, 22, 23.

A complainant is not entitled to a preliminary injunction to protect a right which depends on an unsettled or disputed question of law.

10 Am. & Eng. Enc. Law, p. 787, *Injunction*.

Chancery will not grant an injunction, pending a demurrer or plea which, if sustained, dismisses the bill.

Erving v. Blight, 3 Wall. Jr. 139; Thatcher, Pr. par. 14, p. 783.

Upon the filing of an injunction bill, the defendant may immediately put in his answer to prevent the issuing of the writ and the court is bound to consider such answer and give it due weight if filed before the application for the injunction is disposed of and if the equities of the bill are fairly met and negatived, the injunction will not be granted.

10 Am. & Eng. Enc. Law, *Injunction*, pp. 1008, 1014.

Defendants in common with all men have the right to do any and all things not prohibited by law.

They have a right to organize unions and to become members thereof.

They have a right individually and collectively through such unions to resist the encroachments of capital.

They have a right to refuse to work with non-union men.

They have a right to refuse employment, and to abstain from all labor, whenever they choose so to do.

Com. v. Hunt, 4 Met. 127, 38 Am. Dec. 346.

Billings, District Judge, delivered the following opinion:

This cause is submitted upon an application for an injunction on the bill of complaint, answer, and numerous affidavits and exhibits. The bill of complaint in this case is filed by the United States under the Act of Congress entitled "An act to protect trade and commerce against unlawful restraint and monopolies," (26 Stat. at L. p. 209). The substance of the bill is that there is a gigantic and widespread combination of the members of a multitude of separate organizations for the purpose of restraining the commerce among the several states and with foreign countries. It avers that a disagreement between the warehousemen and their employes and the principal draymen and their subordinates had been adopted by all the organizations named in the bill, until, by this vast combination of men and of organizations, it was threatened that, unless there was an acquiescence in the demands of the subordinate workmen and draymen, all the men in all of the defendant organizations would leave work, and would allow no work in any department of business; that violence was threatened and used in sup-

4 INTER S.

port of this demand; and that this demand included the interstate and foreign commerce which flows through the city of New Orleans. The bill further states that the proceedings on the part of the defendants had taken such a vast and ramified proportion that, in consequence of the threats of the defendants, the whole business of the city of New Orleans was paralyzed, and the transit of goods and merchandise which was being conveyed through it from state to state, and to and from foreign countries, was totally interrupted. The elaborate argument and brief of the solicitors for the defendants presents six objections.

The defendants urge (1) that, the strike or cessation of labor being ended, and labor resumed throughout all branches of business, there is no need for an injunction. I know of no rule which is better settled than that the question as to the maintenance of a bill, and the granting of relief to a complainant, is to be determined by the status existing at the time of filing the bill. Rights do not ebb and flow. If they are invaded, and recourse to courts of justice is rendered necessary, it is no defense to the invasion of a right, either admitted or proved, that since the institution of the suit the invasion has ceased. With emphasis would this be true where, as here, the right to invade is not disclaimed. The question, then, is, What was the state of facts at the time of and prior to the filing of the bill? or whether, if the facts alleged in the bill were true at that time, there was need of an injunction.

The defendants urge (2) that the right of the complainants depends upon an unsettled question of law. The theory of the defense is that this case does not fall within the purview of the statute; that the statute prohibited monopolies and combinations which, using words in a general sense, were of capitalists, and not of laborers. I think the congressional debates show that the statute had its origin in the evils of massed capital; but, when the Congress came to formulating the prohibition which is the yardstick for measuring the complainant's right to the injunction, it expressed it in these words: "Every contract or combination in the form of trust, or otherwise in restraint of trade or commerce among the several states or with foreign nations, is hereby declared to be illegal." The subject had so broadened in the minds of the legislators that the source of the evil was not regarded as material, and the evil in its entirety is dealt with. They made the interdiction include combinations of labor, as well as of capital; in fact, all combinations in restraint of commerce, without reference to the character of the persons who entered into them. It is true this statute has not been much expounded by judges, but, as it seems to me, its meaning, as far as relates to the sort of combinations to which it is to apply, is manifest, and that it includes combinations which are composed of laborers acting in the interest of laborers.

The defendants urge (3) that, the answer being under oath, and denying all the allegations of the bill, the injunction cannot issue. Before the adoption of the amendment to the forty-first rule in equity, it was a rule

in chancery practice that, where the answer was under oath, and denied all the equities of the bill, the injunction should be refused; but, since in this case the oath of the respondents is waived in the bill, their answer, under Rule 41, can be used at this hearing with the probative force of an affidavit alone, and no longer has necessarily the effect claimed for it by the defendants' solicitors.

The defendants urge (4) that the proofs in the case are vague, and insufficient to establish the allegations of the bill. When I consider the affidavits of individuals, and the proclamations of the governor of the state of Louisiana and the mayor of the city of New Orleans, and the statements in the public journals, supported by testimony, and the affidavits filed in this cause, I find the material allegations of the bill fully sustained. Not only was the flow of commerce through the city of New Orleans purposely arrested, but even the transportation of the goods and merchandise from the government warehouses to the landings was forcibly stopped. The following exhibits in the case, consisting of proclamations of the governor of Louisiana and the mayor of New Orleans, taken from the official journals, manifestoes, and the recitals of the sayings of the defendants, taken from the public newspapers, which have not been disproved by the respondents, show, as matter of history, the vast proportions of the interruption caused by the defendants to the prosecution of all the branches of business within the city of New Orleans, and the purpose with which it was done, to wit, that no business was to be transacted till the demands made by the employés of the warehousemen and the subordinate draymen were complied with:

"A General Strike Ordered by the Amalgamated Council for To-Morrow, Unless the Merchants Recognize the Union this Evening.

"President Leonard's Statement.

"When the people of New Orleans awake to-morrow morning, they will probably find that one of the largest strikes that has ever taken place in this city has been inaugurated. To-day, at 12:30 o'clock, President Leonard, of the Amalgamated Council, made his promised statement to the members of the press relative to last night's meeting of the council. Mr Leonard said that it had been decided at the meeting to order a general strike for to-morrow morning, unless the merchants ask for a conference this afternoon. The unions were determined to compel the employers to recognize them, and they took this step to force this recognition, if possible. Mr. Leonard further said that every trade and line over which the council has jurisdiction will go out, barring none. If at any time during the strike the merchants manifest a desire to recognize the unions, the men will be ordered to return to work, and a conference committee appointed to meet a similar committee from the merchants. The committee of fifteen of the Amalgamated Council will remain in session for some hours this evening, and the employers will thus be given their last chance to accede to the demands of the strikers."

"The Strike Ordered.

"Hall Amalgamated Council,
"New Orleans, November 4, 1892. }

"At a meeting of presidents of the labor unions and organizations, held on Friday, November 4, 1892, at the Screwmen's Hall, the following manifesto was adopted and ordered submitted to all the members of labor unions and organizations in the city of New Orleans:

"To all Union Men Wherever Found, Greeting: In view of the fact that in the difficulty existing between the board of trade, merchants, boss draymen, and weighers, and in view of the fact that they claim to represent the entire employing power in the city, and claim broadly and emphatically that they will not recognize unions or labor organizations in connection with their business, and endeavor by their acts to prevent other employers from either employing or recognizing union men, and believing it for the best interests of organized labor that we refrain from working for any employer until the board of trade and others recognize the rights of men to organize into labor unions throughout the city, calling them, as union men, to abstain from any work or assisting in any way in prolonging the existing difficulty. The gauntlet has been thrown down by the employers that the laboring men have no rights that they are bound to respect, and, in our opinion, the loss of this battle will affect each and every union man in the city; and, after trying every honorable means to attain an equitable and just settlement, we find no means left open but to issue this call to all union men to stop work, and assist with their presence and open support from and after Saturday noon, November 5, 1892, and show to the merchants and all others interested that the labor unions are united.

"James Leonard, Chairman.

"John Breen,

"A. M. Keir,

"James E. Porter,

"John M. Callaghan,

"Committee."

"Will the Strike be General?

"Meeting of the Amalgamated Council this Evening.

"To the representative of a morning paper, Assistant State Organizer Porter said the outlook for a successful strike was most excellent, and promised that every union in the city would stand by the locked-out workmen. He said it was possible a general strike would be ordered, and that labor is determined to win this struggle. A union man who was with Mr. Porter is represented to have said that the strike will be made a victory of the laboring classes of the city, and, unless the unions are recognized, there will be more bloodshed than imagined. Mr. Porter is reported to have added: 'We propose to win by peace, if we can; but if we are pushed to the wall, force will be employed.' There are ninety-seven unions in the city. The Amalgamated Council meets to-night to discuss the strike. The joint conference of the executive committees of the striking organizations met last night, and decided to pay no attention to the invitation of the merchants with respect to the proposed tribunal. Inasmuch as the merchants decline to

recognize the unions, the unions refuse to appoint any members of the tribunal, and will only do so when they are given to understand that the men they may appoint are to be regarded as official representatives of their unions."

"Answer to Proposition of the Governor.

"Nov. 8th, 1892.

"To His Excellency, Gov. M. J. Foster—
Dear Sir: According to agreement, we were to give you an answer this morning in regard to certain propositions that you have submitted; but, after consideration by the committees, we found that the propositions would have to be first submitted to the executive committee of the merchants' body, and we have not, up to the present time, heard what action was taken in regard to the matter. In consideration of these facts, we now have these propositions to submit, and will have to stand on them: First. We are willing to arbitrate on wages. Second. We are willing to arbitrate on hours. Third. We want the question of 'none but union men to be hired when available, from and after the final adoption of tariff and hours,' to be accepted without arbitration.

"James Leonard, Chairman.

"John Breen,

"A. M. Keir,

"John Callaghan,

"James Porter."

"Proclamation.

"Mayorality of New Orleans, }
City Hall, Nov. 9, 1892. }

"Citizens of New Orleans: The time has come when I, as your mayor, feel that the forces placed at my command are inadequate to further protect peaceable citizens and their property, owing to the many demands made on them. I am then compelled to call upon all good citizens desirous of the welfare and safety of the city. I, therefore, as your chief magistrate, do hereby issue this, my proclamation, commanding all law-abiding and law-loving citizens to attend at the city hall to-morrow (Thursday), Nov. 10, 1892, and then and there to be sworn in as special officers to aid and assist the organized police force of this city in their duties incumbent upon them.

"Given under my hand and seal of office, this ninth day of November, in the year of our Lord 1892. John Fitzpatrick.

"By the Mayor,

"Clark Steen, Secretary."

"Proclamation of the Governor.

"New Orleans, La. Nov. 10, 1892.

"To the People of New Orleans: The condition of affairs prevailing in your city during the past ten days; the danger to the peace and good order of this community arising from the paralysis of industry, trade, and commerce, and from the suspension of the usual means of transportation; the insecurity of life and property caused by the perturbed state of the public mind, aggravated by the closing of the gas and electric light works, thus holding out an incentive to criminals to ply their vocation in darkness,—have not escaped my attention, and have caused me the deepest solicitude. I therefore request all peaceable citizens not to congregate in crowds upon the streets and

thoroughfares, and I urge upon them to discountenance all undue excitement and acts of violence, and to make known to the officers intrusted with the administration of the law any breaches of the peace. I hereby declare that the people of this city must and shall be protected in the full enjoyment of all their constitutional rights and privileges. All the power vested in me by the constitution and laws of this state shall be devoted to the preservation of the peace, the maintenance of good order, and the protection of the lives and property of the citizens.

"Murphy J. Foster,

"Governor of Louisiana."

"The governor said there were no further orders to communicate at the moment. It is understood, however, that orders are being issued to the militia, and that, after the railroad presidents' meeting is over, an effort will be made to start the street cars. The companies are expected to furnish the drivers, and the entire military force of the state, with the bodies that are being organized as recruits, will be used to furnish them with the necessary protection. That will settle the question very soon whether the rioters or the legally constituted authorities of the state are to be masters of the situation."

The defendants urge (5) that the corporations of the various labor associations made defendants are in their origin and purposes innocent and lawful. I believe this to be true. But associations of men, like individuals, no matter how worthy their general character may be, when charged with unlawful combinations, and when the charge is fully established, cannot escape liability on the ground of their commendable general character. In determining the question of sufficiency of proof of an accusation of unlawful intent, worth in the accused is to be weighed; but when the proof of the charge is sufficient,—overwhelmingly sufficient,—the original purpose of an association has ceased to be available as a ground of defense.

The defendants urge (6) that the combination to secure or compel the employment of none but union men is not in the restraint of commerce. To determine whether the proposition urged as a defense can apply to this case, the case must first be stated as it is made out by the established facts. The case is this: The combination setting out to secure and compel the employment of none but union men in a given business, as a means to effect this compulsion, finally enforced a discontinuance of labor in all kinds of business, including the business of transportation of goods and merchandise which were in transit through the city of New Orleans, from state to state, and to and from foreign countries. When the case is thus stated,—and it must be so stated to embody the facts here proven,—I do not think there can be any question but that the combination of the defendants was in restraint of commerce.

I have thus endeavored to state and deal with the various grounds of defense urged before me. I shall now, as briefly as possible, state the case as it is established in the voluminous record.

A difference had sprung up between the

warehousemen and their employes and the principal draymen and their subordinates. With the view and purpose to compel an acquiescence on the part of the employers in the demands of the employed, it was finally brought about by the employed that all the union men—that is, all the members of the various labor associations—were made by their officers, clothed with authority under the various charters, to discontinue business, and one of these kinds of business was transporting goods which were being conveyed from state to state, and to and from foreign countries. In some branches of business the effort was made to replace the union men by other workmen. This was resisted by the intimidation springing from vast throngs of the union men assembling in the streets, and in some instances by violence; so that the result was that, by the intended effects of the doings of these defendants, not a bale of goods constituting the commerce of the country could be moved. The question simply is, Do these facts establish a case within the statute? It seems to me this question is tantamount to the question, Could there be a case under the statute? It is conceded that the labor organizations were at the outset lawful. But, when lawful forces are put into unlawful channels,—i. e. when lawful associations adopt and further unlawful purposes and do unlawful acts,—the associations themselves become unlawful. The evil, as well as the unlawfulness, of the act of the defendants, consists in this: that, until certain demands of theirs were complied with, they endeavored to prevent, and did prevent, everybody from moving the commerce of the country.

What is meant by "restraint of trade" is well defined by *Chief Justice Savage* in *People v. Fisher*, 14 Wend. 18, 28 Am. Dec. 501. He says: "The mechanic is not obliged by law to labor for any particular price. He may say that he will not make coarse boots for less than one dollar per pair; but he has no right to say that no other mechanic shall make them for less. Should the journeymen bakers refuse to work unless for enormous wages, which the master bakers could not afford to pay, and should they compel all journeymen in the city to stop work, the whole population must be without bread; so of journeymen tailors or mechanics of any description. Such combinations would be productive of derangement and confusion, which certainly must be injurious to trade."

It is the successful effort of the combination of the defendants to intimidate and overawe others who were at work in conducting or carrying on the commerce of the country, in which the court finds their error and their violation of the statute. One of the intended results of their combined action was the forced stagnation of all the commerce which flowed through New Orleans. This intent and combined action are none the less unlawful because they included in their scope the paralysis of all other business within the city as well.

For these reasons I think the injunction should issue.*

*This decision was affirmed by the circuit court of appeals on June 12, 1893, on the ground that the court will not reverse an interlocutory order granting a temporary injunction, unless it is already shown that it was improvidently granted. [Ed.]

UNITED STATES CIRCUIT COURT, DISTRICT OF NEBRASKA.

OLIVER AMES ET AL.,

v.

UNION PACIFIC R. CO. ET AL. (No. 8.)

GEORGE SMITH ET AL.,

v.

CHICAGO & N. W. R. CO. ET AL.

HENRY L. HIGGINSON ET AL.,

v.

CHICAGO, B. & Q. R. CO. ET AL.

1. A state statute duly authenticated will be regarded by the United States courts as having been enacted in full compliance with all the prescribed forms, unless the constitution or decisions of such state require a determination of the question of enactment upon different evidence.
2. In Nebraska a statute duly authenticated cannot be overturned by extrinsic evidence if the journals of the two houses show that every thing was done which the constitution requires should be done and recorded in the due passage of the act.
3. Parol testimony is not admissible to impeach the validity of an act which by the record is shown to have been duly and legally passed.
4. The clause in the charter of the Union Pacific Railroad Company giving Congress power over the rates of freight to be charged thereon, does not preclude the several states from interfering with such rates.
5. A classification of railroads as those which have been in operation for a certain length of time and those which have been recently built and limiting the rates which may be charged on the

- old roads is not an arbitrary classification denying such roads the equal protection of the laws, nor does it make the statute invalid as class legislation.
6. A state statute limiting the rates to be charged by freight carriers does not interfere with interstate commerce because it adopts a different classification for freight from that which has been established by the railroads for the section of country in which such state is located.
 7. Limiting local rates of freight does not necessarily interfere with interstate commerce because the carriers for their own convenience rearrange the interstate rates to make them conform to the local rates prescribed by the statute.
 8. There is no sufficient remedy at law to deprive a United States court of equity of jurisdiction over an alleged unlawful reduction by a state statute of freight rates, by reason of the fact that the statute provides for a petition to the state court which may, in its discretion, direct the board of transportation to permit the carrier to raise its rates to the former amount.
 9. A state legislature cannot deprive a United States equity court of jurisdiction over an alleged unlawful reduction of freight rates affecting citizens of other states by itself, prescribing them by direct act, instead of delegating the authority to a commission.
 10. The amount invested in a railroad cannot be ignored in determining the reasonableness of rates fixed by law to be charged thereon, although such amount is far in excess of present value of the property.
 11. There is no hard and fast test which can be laid down to determine whether or not the rates of railroad freight charges established by the legislature are just and reasonable.
 12. A reduction of 29½% by the legislature in the local freight rates of the railroad is unreasonable and void, where the new rates would result in a loss on local business to more than half of the roads affected by it, and as to the other roads the earnings from local business would not be enough to pay the proportion of the interest on the bonded debt which should be paid by such business in comparison with business of other kinds.
 13. The fact that the freight rates are higher in one state than in another is not of itself sufficient to justify an arbitrary reduction of them by the legislature in the former state for the purpose of equalizing rates.
 14. The enforcement of an unreasonable reduction by the legislature of freight rates may be enjoined.

Decided November 12, 1894.

SUITS by railway stockholders to enjoin the enforcement of a reduction of railroad freight rates. *Relief granted.*

The facts are stated in the opinion.

Before **Brewer**, *Circuit Justice* and **Dundy**, *District Judge*.

Brewer, *Circuit Justice*, delivered the opinion of the court:

In each of these three cases, respectively, the plaintiffs are stockholders in the corporation first named therein as party defendant. In the first the defendants are the Union Pacific Railway Company, a corporation created under the laws of Congress, and owning and operating a railroad partly within the limits of the state of Nebraska; the St. Joseph & Grand Island Railroad Company, the Omaha & Republican Valley Railroad Company, and the Kansas City & Omaha Railroad Company, corporations organized under the laws of the states of Kansas and Nebraska, whose stock is substantially owned and whose lines are controlled and operated by the Union Pacific Railway Company; and certain officers of the state of Nebraska, constituting its board of transportation, together with the secretaries thereof. In the second the defendants are the Chicago & Northwestern Railroad Company, a corporation organized and existing under the laws of the states of Illinois, Wisconsin, and Iowa; the Fremont, Elkhorn & Missouri Valley Railroad Company, a corporation organized under the laws of the state of Nebraska; and the Chicago, St. Paul, Minneapolis & Omaha Railroad Company, a corporation organized under the laws of the states of Minnesota and Nebraska,—both of which companies are owned and their roads operated by the Chicago & Northwestern Railroad Company; and, in ad-

dition, the board of transportation of the state of Nebraska, and its secretaries. In the third case the defendants are the Chicago, Burlington & Quincy Railroad Company, a corporation organized and existing under the laws of the states of Illinois and Iowa, which owns, controls, and operates, in the name of the Burlington & Missouri River Railroad Company in Nebraska, certain lines within that state; and in addition the state board of transportation, and its secretaries.

On April 12, 1893, the legislature of the state of Nebraska passed an act (Laws 1893, chap. 24, p. 164; Neb. Consol. Stat. p. 211) spoken of in the records in these cases sometimes as the "Newberry Bill," and sometimes as "House Roll 33," which act prescribed the maximum rates for the transportation of freight by railroads within the state. The act, in terms, applies only to freight whose transit begins and ends within the state, and in no manner attempts to affect interstate freight. The bills in these cases were filed to restrain the state officials from putting that act in force, as against the railroads named. Pleadings were perfected, a large volume of testimony has been taken, and the cases are now before us, upon pleadings and proof, for determination.

At the threshold the question arises whether this, which purports to be an act of the legislature, is a law; in other words, whether the various steps prescribed by the constitution as

essential to the due passage of a bill through the two houses of the legislature were all regularly taken. The act is found duly filed in the office of the secretary of state; is attested by the signatures of the speaker of the house, and its chief clerk, also by the signatures of the president of the senate, and its secretary; is indorsed, "Approved, April 12, A. D. 1893. Lorenzo Crounse, Governor," and bears the following additional certificate, signed by the chief clerk of the house of representatives: "I hereby certify that the within act originated in the house of representatives, and passed the legislature, April 5, A. D. 1893." An Act of Congress thus authenticated would be conclusively presumed to have been duly and legally enacted. This precise question was before the Supreme Court of the United States, and fully considered in *Field v. Clark*, 143 U. S. 649, 36 L. ed. 294. Following that decision, the courts of the United States will regard an act of any state legislature, thus authenticated, as having been enacted in full compliance with all the prescribed forms, unless there be some special provision in the constitution of that state, or some decision of its supreme court, which requires a looking beyond these evidences of authenticity, and determination of the question of due enactment by reference to other kinds of matters of evidence, or, to state the proposition in another form, the rule prescribed in that case will control unless the state has prescribed some other or further rule.

In the constitution of Nebraska (art. 3, §§ 8, 10, 11) are these provisions, which are all that are referred to by counsel, or that seem to have any bearing on this question:

Sec. 8. Each house shall keep a journal of its proceedings, and publish them (except such parts as may require secrecy) and the yeas and nays of the members on any question shall, at the desire of any two of them, be entered on the journal. All votes in either house shall be *via voce*.

Sec. 10. The enacting clause of a law shall be, "Be it enacted by the legislature of the state of Nebraska," and no law shall be enacted except by bill. No bill shall be passed unless by assent of a majority of all the members elected to each house of the legislature. And the question upon the final passage shall be taken immediately upon its last reading, and the yeas and nays shall be entered upon the journal.

Sec. 11. Every bill and concurrent resolution shall be read at large on three different days in each house, and the bill and all amendments thereto shall be printed before the vote is taken upon its final passage. No bill shall contain more than one subject, and the same shall be clearly expressed in its title. And no law shall be amended unless the new act contains the section or sections so amended, and the section or sections so amended shall be repealed. The presiding officer of each house shall sign, in the presence of the house over which he presides, while the same is in session and capable of transacting business all bills and concurrent resolutions passed by the legislature.

The utmost that can be inferred from these constitutional provisions is that, in respect to certain matters, evidence may be sought in the journals of the two houses, and evidence which

will prevail over that which appears on the enrolled bill as found in the office of the secretary of state; and this is as far as any decision of the supreme court of Nebraska has gone.

In *Hull v. Miller*, 4 Neb. 503, that court held that the office of the journal is to record the proceedings of the house, and that it must appear on the face of the journal that a bill was passed by a constitutional majority, but also held that an omission therefrom of other matters which the constitution does not, in terms, require to be entered upon the journal, would not invalidate the law, and that it would be presumed, in favor of its validity, that the legislature had done that which it ought to have done. In *State v. Liedtke*, 9 Neb. 462, it was claimed that an appropriation bill, as it passed both houses, named a larger sum than was found in the enrolled bill signed by the governor, and a mandamus was asked to compel the state auditor to draw his warrant on the treasurer for such excess; but the court denied the writ, and declined to look into the journals of the two houses to see whether the fact was as claimed, on the ground that, even if such sum was in the bill when before the houses, it had never received the approval of the governor, and had therefore never been legally appropriated. In *State v. McLelland*, 18 Neb. 236, 53 Am. Rep. 814, the matter was considered at some length, and it was held that the certificate of the presiding officers as to the passage of a bill through their respective houses is only prima facie evidence of that fact; that the journals may be examined, and, if they show that the bill did not pass, that evidence will be held conclusive, and the supposed law set aside. Similar is the case of *State v. Robinson*, 20 Neb. 96. The same proposition was again affirmed in *State v. Moore*, 37 Neb. 13, on the strength of the prior decisions; the court, however, saying that, were the question a new one, it would be inclined to follow the rule laid down by the Supreme Court of the United States in *Field v. Clark*, 143 U. S. 649, 36 L. ed. 294.

In the case at bar the journals of the two houses, fairly construed, affirmatively show that everything was done which the constitution requires shall be done and recorded in the due passage of a bill. It will be sufficient to quote the recitals of the house journal, those of the senate journal being equally explicit.

"January 14, 1893.

"Introduction of Bills.

"The following bills were read the first time, and ordered to a second reading: House Roll No. 33. A bill for an act to regulate railroads, to classify freights, to fix reasonable maximum rates to be charged for the transportation of freights upon each of the railroads in the state of Nebraska."

"January 16, 1893.

"Bills on Second Reading.

"House Roll No. 33. A bill for an act to regulate railroads, to classify freights, to fix reasonable maximum rates to be charged for the transportation of freights upon each of the railroads in the state of Nebraska."

"March 10, 1893.

"House Roll 33. A bill for an act to regu-

late railroads, to classify rates, to fix reasonable maximum rates to be charged for the transportations of freights upon each of the railroads in the state of Nebraska.

"Was read third time.

"This bill having been read at large on three different days, and the same with all its amendments having been printed.

"The question being.

"Shall the bill pass?"

"Affirmative votes, 63.

"Negative votes, 30.

"A constitutional majority having voted in favor of the passage of the bill, the bill passed and the title as amended was agreed to."

"Mr. Speaker: I move to amend the title by adding the following and to provide penalties for violations of this act. Rhodes.

The motion prevailed.

"April 6, 1893.

"Mr. Speaker: Announced that he was about to sign house roll No. 85 while the house was in session and capable of doing business."

As for the parol testimony which was offered, tending to show some verbal alterations in the bill after it had passed the house of representatives, it is enough to say: First, that parol testimony is not admissible to impeach the validity of an act which, by the record, is shown to have been duly and legally passed, and, second, even if such testimony were competent, the supposed alterations were trifling, and not of a character to affect in any substantial manner the scope and reach of the bill. I am therefore clearly of the opinion that this act passed the legislature of the state, and received the approval of the governor, in due conformity to all substantial constitutional requirements in respect thereto.

From this preliminary matter I turn now to the consideration of various questions elaborately discussed by counsel, in respect both to the scope and validity of this law, and the jurisdiction of this court. Many of them I shall notice but briefly, for, while I have given a careful examination to all, to attempt anything like an elaborate discussion of each would unnecessarily prolong this opinion.

It is insisted that the Union Pacific Railway Company cannot be subjected to the provisions of this statute, because it is a corporation created by Congress, and as such, in the discharge of any of its functions, is subject only to the control of that body. The general question of the power of a state in respect to rates for local freight over a corporation organized under the laws of Congress was considered in *Reagan v. Mercantile Trust Co.* (No. 1), 154 U. S. 413, 38 L. ed. 1028, ante, 575, and it was there held that the mere fact that the corporation was so organized did not exempt it from state control in that respect. It was conceded in the opinion in that case that Congress could wholly remove such a corporation from state control; but it was held that, in the absence of something in the statute indicating an intention on the part of Congress to so remove it, the state had the power to prescribe the rates for all local business carried by it. Of course that decision is controlling. It is true, there is one provision in the Union Pacific Act which tends to show an intent on the part of Congress to retain to itself

4 INTER S.

full control over all rates, and that is found in the eighteenth section of the Act (12 Stat. at L. 497) as follows:

"And be it further enacted, that whenever it appears that the net earnings of the entire road and telegraph, including the amount allowed for services rendered for the United States, after deducting all expenditures, including repairs, and the furnishing, running, and managing of said road, shall exceed ten per centum upon its costs, exclusive of the five per centum to be paid to the United States, Congress may reduce the rates of fare thereon, if unreasonable in amount, and may fix and establish the same by law."

There is in these words, it will be seen, a special reservation of the power to fix rates; and when this is taken in connection with the general provision in the same section, reserving the right to "add to, alter, amend, or repeal this Act," there is much force in the contention that Congress intended to reserve to itself, as it had the power to do, the sole and absolute control of all the rates to be charged by the company. But I am not fully satisfied that this language warrants such a conclusion. Of course, if the Union Pacific Railway Company is not exempt from the operation of this Act, no other company is.

Again, it is insisted, that the Act is obnoxious to the charge of denying to the railroads the equal protection of the laws, secured to them by the 14th Amendment to the Constitution of the United States, and this because all the roads in the state are not subject to its provisions. Section 4 is relied on to sustain this charge:

"All railroads, or parts thereof, which have been built in this state since the first day of January, 1889, or may be built before the thirty-first day of December, 1899, shall be exempt from the provisions of this act until the thirty-first day of December, 1899."

The right to classify is conceded, but it is said that this classification is arbitrary, and depends upon no fair and reasonable difference. Attention is called to the fact that since January 1, 1889, the Rock Island Company has built a road from Omaha to Lincoln, which is a part of its main line from Chicago to Denver; that in all of its business the Rock Island is in active competition with the several companies whose roads are subject to the provisions of this act; and that it is an unreasonable, unjust discrimination to exempt the Rock Island Company from like subjection. I cannot concur in these views. The principle of classification adopted by the legislature, whether wise or unwise, is within its power. To divide railroads into two classes, placing in the one all that have been constructed and in operation for a length of time, and whose business must therefore be presumed to have been thoroughly established, and in the other all only recently constructed, is clearly not a mere arbitrary distinction; and this notwithstanding it may be that one of the recently constructed roads is so fortunate as to have immediately secured a large business. The "protection of infant industries" is a term of frequent use in the political discussions and history of this country; and to rule that a classification based upon such principle is purely arbitrary, and

therefore unconstitutional, would certainly be a judicial novelty.

Again, it is insisted that this act interferes with interstate commerce, in two ways: First, it establishes a classification of freights different from that which prevails west of Chicago; and, in the second place, by reducing local rates, it necessarily reduces the rates on interstate business. Neither of these objections seems to me to be well taken. In the first place, the classification of freights by the railroads is a purely voluntary act, not compelled by any statute, and not uniform throughout the country. There is one system which prevails east of Chicago, and one west. It might be more convenient if the classification established by this act harmonized with that adopted by the railroad companies doing business west of Chicago; but surely the voluntary act of the railroad companies, in establishing a uniform classification for certain territory, can work no limitation on the power of the state to establish a different classification. To say, for instance, that because the railroad companies have voluntarily placed flour in a certain class, on which a specified rate is to be charged, such voluntary act of mere classification destroys the power of the state to establish a classification which puts flour in another class, and subject to another rate, is, to my mind, a most extravagant pretention. Neither can I understand how the reduction of local rates, as a matter of law, interferes with interstate rates. It is true the companies may, for their own convenience, to secure business, or for any other reason, rearrange their interstate rates, and make them conform to the local rates prescribed by the statute, but surely there is no legal compulsion. The statute of the state does not work a change in interstate rates, any more than an Act of Congress prescribing interstate rates would legally work a change in local rates. Railroad companies cannot plead their own inconvenience, or the effects of competition between themselves and other companies, in restraint of the otherwise undeniable power of the state.

It is further insisted by defendants that this court has no jurisdiction over these actions—First, because, in the act itself, an adequate legal remedy is provided, by petition to the supreme court of the state, and courts of equity may not interfere when adequate legal remedies are provided; secondly, because the rates are prescribed by a direct act of the legislature, and not fixed by any commission. I am unable to assent to either of these contentions. The remedy referred to is found in section 5, which authorizes any railroad company, believing the rates prescribed to be unreasonable and unjust, to bring an action in the supreme court of the state, and if that court is satisfied that the rates are, as claimed, unjust and unreasonable to such company, it may make an order directing the board of transportation to permit the railroad to raise its rates to any sum, in the discretion of the board, provided that the rates so raised shall not be higher than were those charged by such railroad on the 1st day of January, 1893. But this comes very far short of being an adequate legal remedy. Suppose, in such an action, the opinion of the Supreme Court is that the rates are unjust and

unreasonable. There is no judgment of that court raising the rates, but only giving to the board of transportation a discretion. There is no final judgment relieving the company from the burden of the rates fixed by the act. It only opens the door to action by the board of transportation. Surely, a judgment or decree giving permission to do justice is not securing justice. It might as well be argued that giving to the executive power to pardon one convicted of crime is an adequate legal remedy for the correction of errors committed on the trial. An adequate legal remedy is one which secures, absolutely and of right, to the injured party, relief from the wrong done. But, even if it were a full and complete legal remedy, it is one which can be secured only in a single court, and that a court of the state. And, as was held in the case of *Reagan v. Farmers Loan & T. Co.* (No. 1) 154 U. S. 362, 38 L. ed. 1014, 4 Inters. Com. Rep. 560, it is not within the power of the state to tie up citizens of other states to the courts of that state for the redress of their rights, and for protection against wrong. The laws of Congress, passed under authority of the Constitution of the United States, open the doors of the Federal courts to citizens of other states to suits and actions for the prevention or redress of wrong, and the state cannot close those doors. Whatever effect such legislation may have upon the courts of the state, the courts of the United States are as open now as they were before to actions for the protection of citizens of other states in their property rights within the state of Nebraska; and the fact that the rates are absolutely prescribed by direct act of the legislature, instead of being created by the commission appointed by the state, is immaterial. The commission is but one agency of the state. The substantial question is whether the rates, as prescribed, work a wrong or injury to the property rights of the citizens of other states. I quote, in support of these propositions, these words from the case last cited:

"A state cannot tie up a citizen of another state, having property rights within its territory invaded by unauthorized acts of its own officers, to suits for redress in its own courts. Given a case where a suit can be maintained in the courts of the state to protect property rights, a citizen of another state may invoke the jurisdiction of the Federal courts. *Mercer County Suprs. v. Coules*, 74 U. S. 7 Wall. 118, 19 L. ed. 86; *Lincoln County v. Luning*, 133 U. S. 529, 33 L. ed. 766; *Chicot County v. Sherwood*, 148 U. S. 529, 37 L. ed. 546. . . . The equal protection of the laws, which, by the 14th Amendment, no state can deny to the individual, forbids legislation, in whatever form it may be enacted, by which the property of one individual is, without compensation, wrested from him for the benefit of another, or of the public. This, as has been often observed, is a government of law, and not a government of men; and it must never be forgotten that under such a government, with its constitutional limitations and guaranties, the forms of law and the machinery of government, with all their reach and power, must in their actual workings, stop on the hither side of the unnecessary and uncompensated taking or de-

struction of any private property, legally acquired and legally held."

There can be no doubt of the jurisdiction of this court in actions like these, and its duty to protect the property rights of the plaintiffs against any wrongful invasion thereof by the state through legislation in any form.

But the grave question still remains, are the rates prescribed in this act, as the maximum over which the railroad companies may not go, unreasonable, and so unreasonable as to justify the courts in staying its operation? No more difficult problem can be presented than this. There are so many matters which enter into it, and which must be taken into consideration, before a satisfactory answer can be reached. I think it may assist to a true understanding of the scope of this question, and the various considerations which must enter into it, if we notice how, as a matter of history, the situation and the question have arisen. So far as the mere question of power is concerned, the transportation of persons and property is, equally with the carrying of letters and papers, a legitimate function of government. By reason of this, private corporations, acting as common carriers, are given the right to exercise the governmental power of eminent domain, and thus against the will of the owner, to take his property for their public or quasi public uses. But in the history of this country the carrying of papers and letters was assumed by the government, and the transportation of persons and property left to private persons. In other words, the people chose to manage the carrying of the correspondence of the country, and to leave the matter of transportation to individuals. With the wisdom of this the courts have no concern. I simply notice the fact. But in consequence of this the carrying of letters and papers by strictly governmental agencies became what may be fairly called a system, while the transportation of persons and property by private individuals and corporations became a business. In the one there was a simple classification and a uniform rate, and the system was extended wherever population went, and so far as possible to supply all the needs of all parts of the country in the way of transmission of news and letters. Whether in the carrying out of this system, at the end of each year, there was a profit or not, was immaterial. It was something which the people of the whole country were doing for the joint and equal benefit of all, and if the expenses exceeded the revenues the common treasury paid the deficiency. Gain, profit, revenue, are in no sense the object of the post-office. There is no effort to increase the number of letters or papers by special inducements, with a view of building up an increased business in one place or another, or in one direction or another. With uniform rates and equal facilities, all persons and places are served, and the system is improved, and the facilities for carrying and distribution are multiplied and bettered, as extensively and as rapidly as Congress, in its judgment, deems for the best interests of the whole people. No citizen in any town or city can get special rates for the carrying of his correspondence. No one can be favored in the promptness with which his correspondence is carried, or the

4 INTER S.

kind of service which is rendered. The thought and purpose of the postoffice is equal service to all, and uniform rates. On the other hand, as the government did not undertake the matter of transportation, it became a business carried on by individuals and corporations, and carried on, as other business, with a view to private gain, according to the judgment of those engaged therein. No effort was made by the government, representing the public, to stay private investment in this business. On the contrary, the whole tenor of legislation was to encourage such investment, and thus to multiply the facilities and agencies of transportation, until now it is estimated that ten billions of dollars are invested in railroad transportation alone. It is unnecessary to stop here to inquire whether this investment was not largely in excess of the needs of the country, and unwisely made. It is enough to know that it has been made, with the acquiescence, if not with the active encouragement, of the public. Now, in the carrying on of any private enterprise, increase of business with increase of profits is a stimulating thought, and for this very variety of action is taken. Advertisement, solicitation, inducement, favors, are all freely resorted to, but with the single purpose of larger business and greater gain. It is not strange that in the carrying on of transportation all the characteristics of other kinds of business are found. Indeed, that is often given as one of the reasons for continuing the present methods in respect to transportation, and a matter in eulogy thereof. As evidence of this, I need do no more than quote this from the brief of counsel for the plaintiffs: "Take the case of the beet-sugar factory at Grand Island. Nebraska sugar must be sold in the Chicago market, for instance, in competition with Cuba, Louisiana, and Sandwich Island sugar. If a higher price be asked for Nebraska sugar than for sugar from other regions, it will not find a buyer. But the production costs about the same in Nebraska as in Cuba, Louisiana, and the Sandwich Islands. High railroad rates will shut it out of Chicago. Low rates must be given. Accordingly, the road is compelled, by the necessities of the situation, whether it will or not, to give them. Its own interests force it to do so. But that is not all. When the enterprise is in its infancy, cost of production is greater than elsewhere. Accordingly, the road must make rates so low as to cover this excess of the manufacturer's cost; sometimes so low as to wipe out all the road's profit: sometimes below what the transportation costs the road. Of course, the road cannot always do this, nor can it do it on all its business. It justifies the irregularity in the exceptional case by the promise of paying business in the future. If helped at first, the new industry, by and by, will give the road a large business, and make up all concessions. The present loss is borne in hope of future gains. This is the way all commercial enterprises are carried on. He is most successful who acts on this principle with the best judgment. It is a general law of business."

The beet-sugar factory referred to in the above quotation furnishes a clear illustration of the difference between the postoffice system

and the transportation business. When the proprietor thought of locating that factory, the cost of correspondence was not considered, in determining the question of location, while that of transportation was the principal factor. Not only that; it was an uncertain factor. There was no schedule—no tariff—by which he could, at a glance, determine what the rates of transportation would be from one place or another to the market which he must reach. It became, therefore, a matter of negotiation—of contract—with the transportation companies; and, as stated by counsel, the negotiations resulted in rates at first cheaper than the cost of transportation, with the expectation of rates enlarged in the future, or that the loss on that transportation would be made up by extra charges on other transportation. Now, it may be for the interest of Nebraska that the beet-sugar industry be developed in that state, and that transportation elsewhere shall be temporarily burdened in order to accomplish this development; or, it may be better for the country at large, and thus for Nebraska, as a part of that country, that the cost of transportation everywhere be as fixed and certain as the cost of correspondence. But whether the one system or the other be the better is not for judicial consideration, for it is a mere matter of policy, involving, necessarily, no question of the rights of person nor property.

It is obvious that, in the matter of transportation, we are in an experimental or transitional stage. At first, transportation was a mere private business, and managed as such. Now, there is a growing conviction that the best interests of the people will be subserved by changing it from a business to a system. I say "experimental or transitional," for experience may satisfy that the change is not wise, and that it is better to continue transportation as a business; leaving to the interest of those engaged therein to determine how it shall be managed, and giving to them the power to build up, as counsel has suggested, industries and towns here and there. In such case the present would be only an experimental stage. Or it may be that experience will only make more imperative the present demand that transportation shall be a system, with absolute certainty and uniformity of rates, in which case the change will be made, and this will be regarded as the transitional era. The transition may be accomplished by the government taking possession of transportation, and itself discharging that public duty. Certainly that would be the simplest, and—for the courts, at least—the easiest solution of the problem which now impends; for by purchase or condemnation, and in a single transaction, the state, paying simply the actual value of the property invested in transportation, would have the same control over it that the national government has over the post-office system, and could prescribe such rates as it saw fit, making good by general taxation any loss. But, as ten billions of dollars are invested in the business of railroad transportation, the public may be reluctant to incur such indebtedness, and seek to accomplish the same result of uniformity of rates by means of legislation similar to that before us. In

other words, leaving the property in the hands of the present owners, uniformity of rates is sought to be secured by compulsory legislation. Here comes in the embarrassment of present conditions. Property invested in railroads is as much protected from public appropriation as any other. If taken for public uses, its value must be paid for. Constitutional guaranties, to this extent, are explicit; and in such condemnation proceedings no inquiry is permitted as to how the owners have acquired the property, provided only it be legally held by them. If a farm belongs to an individual, and the public seeks to take it, it must pay its value, and is not permitted to diminish the price by proving the owner acquired the means of purchase by immoral or disreputable practices. He may have made his fortune dealing in slaves, as a lobbyist, or in any other way obnoxious to public condemnation; but, if he has acquired the legal title to the property, he is protected in its possession, and cannot be disturbed until the receipt of its actual cash value. The same rule controls if railroad property is sought to be appropriated. No inquiry is open as to whether the owner has received gifts from state or individuals, or whether he has, as owner, managed the property well or ill, or so as to acquire a large fortune therefrom. It is enough that he owns the property,—has the legal title; and, so owning, he must be paid the actual value of that property. If he has done any wrong in acquiring or using the property, that wrong must be redressed in a direct action therefor, and cannot be made a factor in condemnation proceedings. These propositions in respect to condemnation proceedings are so well settled that no one ever questions them. The same general ideas must enter into and control legislation of the kind before us. The value of the property cannot be destroyed by legislation depriving the owner of adequate compensation. The power which the legislature has is only to prescribe reasonable rates, not any rates. The language of the constitution of Nebraska in respect to the matter is (Const. 1875, art. 11, § 4) "And the legislature may, from time to time, pass laws establishing reasonable maximum rates of charges for the transportation of passengers and freight on the different railroads in this state." But the foundation of the idea of reasonableness is justice. That which is unjust cannot be reasonable, and, when the strong arm of the legislature is laid upon property invested in railroad transportation, it must be so laid as to do justice to such investors. There can be no justice in that which works to such investors a practical destruction of their property thus invested. It must always be borne in mind that property put into railroad transportation is put there permanently. It cannot be withdrawn at the pleasure of the investors. Railroads are not like stages or steamboats, which, if furnishing no profit at one place, and under one prescribed rate of transportation, can be taken elsewhere, and put to use at other places, and under other circumstances. The railroad must stay, and, as a permanent investment, its value to its owners may not be destroyed. The protection of property implies the protection of its value. The

authorities on these general propositions are collected in the opinion in the recent case of *Reagan v. Farmers Loan & T. Co.*, 154 U. S. 362, 38 L. ed. 1014, 4 Inters. Com. Rep. 560, and I need not do more than refer to that case.

What is the test by which the reasonableness of rates is determined? This is not yet fully settled. Indeed, it is doubtful whether any single rule can be laid down, applicable to all cases. If it be said that the rates must be such as to secure to the owners a reasonable per cent on the money invested, it will be remembered that many things have happened to make the investment far in excess of the actual value of the property,—injurious contracts, poor engineering, unusually high cost of material, rascality on the part of those engaged in the construction or management of the property. These and many other things, as is well known, are factors which have largely entered into the investments with which many railroad properties stand charged. Now, if the public was seeking to take title to the railroad by condemnation, the present value of the property, and not the cost, is that which would have to pay. In like manner, it may be argued that, when the legislature assumes the right to reduce rates, the rates so reduced cannot be adjudged unreasonable if, under them, there is earned by the railroad company a fair interest on the actual value of the property. It is not easy to always determine the value of railroad property, and if there is no other testimony in respect thereto than the amount of stock and bonds outstanding, or the construction account, it may be fairly assumed that one or other of these represents it, and computation as to the compensatory quality of rates may be based upon such amounts. In the cases before us, however, there is abundant testimony that the cost of reproducing these roads is less than the amount of the stock and bond account, or the cost of construction, and that the present value of the property is not accurately represented by either the stocks and bonds, or the original construction account. Nevertheless, the amount of money that has gone into the railroad property—the actual investment, as expressed, theoretically, at least, by the amount of stock and bonds—is not to be ignored, even though such sum is far in excess of the present value. It was said in the case of *Reagan v. Farmers Loan & T. Co.* 154 U. S. 412, 38 L. ed. 1028, 4 Inters. Com. Rep. 574:

"It is unnecessary to decide, and we do not wish to be understood as laying down as an absolute rule, that in every case a failure to produce some profit to those who have invested their money in the building of a road is conclusive that the tariff is unjust and unreasonable. And yet justice demands that every one should receive some compensation for the use of his money or property, if it be possible, without prejudice to the rights of others."

It is not always reasonable to cast the entire burden of the depreciation on those who have invested their money in railroads. Take the Union Pacific Railway, for illustration. At the time the government created the corporation, to induce the building of this transcontinental road through a largely unoccupied territory, it loaned to the company \$16,000 a mile; taking as security therefor a second

lien on the property, and granting to the corporation the right to create a prior lien to an equal amount, which was done. There is testimony tending to show that the road in Nebraska could be built to-day for \$20,000 a mile. Would it be full justice to the government, would it satisfy the common sense of right and wrong, would it be reasonable, for the state of Nebraska to so reduce the rates that the earnings of the road would only pay ordinary interest on \$20,000 a mile, and so, the holders of the first lien being paid their interest, the government be forced to be content with only interest on one fourth of its investment? Or, to put the case in a little stronger light, suppose the promoter of this enterprise had been some private citizen, who had advanced his \$16,000 a mile as a second lien, and that the road could be constructed to-day for only \$16,000 a mile. Would it be reasonable and just to so reduce rates as to simply pay to the holders of the first lien reasonable interest, and leave him without recompense for his investment? Is there not an element of equity which puts the reduction of rates in a different attitude from the absolute taking of the property by virtue of eminent domain? In the latter case, while only the value is paid, yet that value is actually paid, and the owners may reinvest, and take the chances of gain elsewhere, whereas, if the property is not taken, the owners have no other recourse than to receive the sum which the property they must continue to own will earn under the reduced rates. Considerations such as these compel me to say that I think there is no hard and fast test which can be laid down to determine in all cases whether the rates prescribed by the legislature are just and reasonable, and that often many factors enter into the determination of the problem. Obviously, however, the effect of the reduction upon the earnings is the first and principal matter to be considered. This is a matter of computation. The power of regulating railroads is often said to be a legislative power vested in the lawmaking body, to be exercised for the general welfare. Within the term "regulation" are embraced two ideas: One is the mere control of the operation of the roads, prescribing the rules for the management thereof,—matters which affect the convenience of the public in their use. Regulation, in this sense, may be considered as purely public in its character, and in no manner trespassing upon the rights of the owners of railroads. But within the scope of the word "regulation," as commonly used, is embraced the idea of fixing the compensation which the owners of railroad property shall receive for the use thereof; and when regulation in this sense, is attempted, it necessarily affects the property interests of the railroad owners; and it is "regulation," in this sense of the term, that we are to consider in the present cases.

There are certain matters which embarrass these cases, and render all computations more than ordinarily difficult. One is this: The various companies are doing an interstate as well as a local business. If these roads were wholly within the state, and only local business done by them, the computation would be much simplified, and the effect of the reduction in rates upon the property more easily disclosed.

But all of these roads are interstate roads, and a large portion of their business is interstate business. Some of it is local business in other states than Nebraska. Now, it will not do to look simply at the gross earnings, and, because the reduction therein made by the enforcement of this statute still leaves enough to pay reasonable compensation to the owners of the property, uphold the act, because, if the legislature of Nebraska can put in force this tariff for local business, the legislatures of other states through which these roads run, and the Congress of the United States, may make corresponding reductions in the rates on all other business, local and interstate, and the aggregate of such reductions might entirely destroy all earning capacity from the property.

Another matter to be noticed is this: There is in this act no interference with the passenger tariff, but only a maximum for freight rates. So we cannot place all the local expenses over against all the local receipts, and draw our conclusions therefrom. We have an attempt by the legislature to prescribe a maximum tariff for only the transportation of freight within the limits of Nebraska, and are called upon to determine whether the rates so fixed are unreasonable, and afford no fair compensation to those who have invested their means in

these railroad properties. In order to determine this, we must ascertain what it costs to carry this local freight, what the receipts have been therefrom, and what reduction will be made in such receipts by the application of this act, and then we must take such proportion of the gross investment in the roads as the present earnings from local freights bear to the total earnings of the road. From these computations, we may see whether the reduction made by this act in the local freights, if applied to all the company's business, would leave any compensation to the owners, and, if so, how much. Obviously, the problem thus presented is one of exceeding difficulty. Fortunately, we have in Mr. Dilworth, the secretary of the state board of transportation, one of the defendants' witnesses, a gentleman whose competency and credibility are unchallenged. In the computations which I have made, I have relied mainly on his figures. From the labyrinth of tables, figures, and estimates presented in the testimony, and discussed by counsel in their briefs and arguments, let me take these two tables, presented by Mr. Dilworth, which seem to lay the basis for some fair calculations as to the effect of this act upon the business of the various companies:

receipts which would have resulted if the rates prescribed by the House Roll 83 had been in force during that year. In Exhibit 20 is found the percentage of expenses to earnings upon the business of those companies. Obviously, the cost of transportation would be the same whether the companies received the prices which they did in fact receive, or the reduced rates prescribed by House Roll 83. If the cost of hauling local freight was the same as that of the other business done by the roads, in order to ascertain what amount the companies earned from local freight, it would be necessary to multiply the gross receipts by the percentage of expenses to earnings. This would show the amount that it cost to carry that freight, and the difference between that cost and the receipts would be the amount of the net earnings. From such net earnings subtract the amount of reduction caused by House Roll 83, and the result will show whether, under such rates, the companies would have earned anything from local freight, and, if so, how much. Making this computation, and placing the results in a table, and we have the following:

Exhibit 4 shows the amount actually received for business within the state during the year ending June 30, 1892, by the various roads whose interests are in controversy in these cases; also, the amount of reduction in those

4 INTER 8.

	Gross Receipts, or Total Amount Received for Tons Hauled Locally.	Percentage of Expenses to Earnings.	Cost of Hauling Local Freight.	Net Earnings from Local Freight.	Total Amount of Reduction caused by H. R. 83.	Net Earnings, if Rates Prescribed by H. R. 83 had been in Force.	Deficiency by Same Cause.
Burlington & Missouri R. R. in Neb.	\$1,257,884	64.23	\$759,082	\$442,762	\$385,175	\$77,617	—
Chicago, St. Paul, Minn. & Omaha.	123,063	65.96	81,152	41,881	36,204	6,587	—
Fremont, Elkhorn & Missouri Valley.	336,714	70.71	238,090	98,624	99,310	—	\$686
Union Pacific Railway.	398,363	56.44	224,779	173,486	117,487	55,998	—
Omaha & Republican Valley.	83,385	93.12	82,257	6,078	23,043	—	\$19,865
St. Joseph & Grand Island.	31,004	74.23	23,014	7,990	8,886	—	846
Kansas City & Omaha.	6,680	75.19	4,965	1,645	1,890	—	244

From this table it will be seen that if, during that year, these companies had been limited in their charges to the rates prescribed by this act, four of them, to wit, the Fremont, Elkhorn & Missouri Valley, the Omaha & Republican Valley, the St. Joseph & Grand Island, and the Kansas City & Omaha, would not

only have received nothing by way of earnings, but would actually have been carrying the freight at a loss. The three other roads would have made, respectively, net earnings of \$77,617, \$5587, and \$55,998. This is upon the assumption that the cost of carrying local freight is the same as that of carrying through freight, and hence that, applying the general per cent of expenses, enables us to determine accurately the earnings from local freight. But the testimony shows that the cost of carrying the local freight is largely in excess of the cost of other business. The exact per cent of such excess is not disclosed. It may, perhaps, be difficult to determine it accurately. Mr. Fink, a witness for the plaintiffs,—a gentleman of large experience in railroad transportation, and of national reputation as an authority in such matters,—says that the cost of carrying local freight is four times that of carrying through freight; Mr. Utt, another witness for the plaintiffs, who is the commissioner employed by the Commercial Club, of Omaha, to look after railroad transportation matters affecting the business of the city, testifies that the one costs six times as much as the other; while Mr. Dilworth, the secretary of the defendant board, and their principal witness on matters of this kind, also says that it cost more to do local than through business; that the percentage of operating expenses on the local business would exceed the percentage on all business probably 10 per cent and might run up to 20 per cent,—possibly might be higher than that. Of course this testimony is not like that which we have heretofore been examining, where the figures and per cents are accurate and certain, but is largely in the way of estimate. And yet it is clear from the testimony that the per cent of expenses for carrying local freight is considerably above the total per cent of operating expenses. Now turning to the last table, it will be seen that, if the cost of carrying local freight was 7 per cent more than the general per cent of expenses, the Burlington & Missouri River Company would, under the reduction caused by House Roll 83, have earned nothing from the transportation of local freight; if only 5 per cent, the Chicago, St. Paul, Minneapolis & Omaha road would likewise have earned nothing from that source; and, similarly, the Union Pacific Railway, if the per cent was 14.1 per cent. It is difficult to resist the conviction that if the rates prescribed by House Roll 83 had been in force during the year ending June 30, 1892, not a single one of these roads would have earned a dollar from the transportation of local freight. It is true that Exhibit 4 shows the effect of the reduction caused by House Roll 83 only for the business of a single year,—that ending June 30, 1892; but a comparison of the business in 1891 and 1893 with that for 1892, as found in the Exhibit 20, shows an average per cent of expenses less in 1892 than in either of the other years. So that evidently the year 1892 was selected by the board of transportation for the making of its table. Exhibit 4, as the most favorable. But light upon this legislation is further thrown by another table prepared by defendant, as follows:

DEFENDANTS' EXHIBIT 23.

Statement Showing Mileage, Capital Stock, and Funded Debt of the Following Named Railroads for the Year Ending June 30, 1892.

	Entire Mileage.	Capital Stock.	Funded Debt.	Total.	Capital Stock per Mile.	Funded Debt per Mile.	Total per Mile.
C. R. & O.	5290	\$75,297,400	\$116,590,980	\$192,978,380	\$14.09	\$22.024	\$36.473
C. St. P. M. & O.	1356	34,060,128	23,742,800	57,802,928	55.103	17.504	72.608
F. E. & M. V.	1300	30,370,000	21,110,000	51,480,000	23.352	16.238	39.590
L. P. R. V.	1896	60,868,500	123,734,397	184,602,897	93.316	70.468	163.786
O. & N. W.	482	2,430,550	8,391,550	10,822,100	17.343	17.343	34.686
St. J. & G. L.	251	4,600,000	8,721,408	13,321,408	18.332	34.763	53.090
K. C. & O.	193	4,410,000	2,715,000	7,125,000	22.760	14.007	36.767

Take the Union Pacific Railway, whose net earnings for local freight seem greater than those of any other company, and by this last table it appears to be bonded for \$70,468 per mile. The total mileage of that road within the state is 467 miles; so that, if the bonded incumbrance were distributed according to mileage, the burden resting upon the part of the road within the state of Nebraska would be \$32,908,556. Six per cent interest on this (the amount allowed by Act of Congress incorporating the company, and which is the rate on the original mortgages, at least) is \$1,974,513,

4 INTER 8.

or the amount to be paid out of the earnings of the road before the stockholders are entitled to any dividends. From Exhibit 4 it appears that the receipts for all business done in the state was \$5,262,057; for hauling local freight, \$398,262, or about $7\frac{1}{2}$ per cent of the gross receipts. Local freight, therefore, should earn $7\frac{1}{2}$ per cent of the amount necessary to pay the interest on the bonded indebtedness resting on the lines in the state. Seven and one half per cent on \$1,974,513 is \$148,088. But the net earnings for local freight that year were \$173,483, showing that there was only about \$25,000 earned from local freight, to be distributed among the stockholders; and this upon the assumption, in the face of the testimony to the contrary, that the cost of carrying local freight is exactly determined by the general per cent of expenses to earnings. By the same table it appears that if the rates prescribed by House Roll 33 had been in force the earnings from local freight, upon like assumption, would have been \$55,996, or but little more than one third of the amount necessary to pay the portion of the interest on the bonds properly chargeable to local freight. If it be said that it is not a fair apportionment of the bonded indebtedness, to distribute it by the mileage, because the cost of construction in the mountainous part of the road, west of Nebraska, was much greater than such cost within the limits of the state, and if it be said that the cost of material and labor at the time of construction was far in excess of the present cost, and that there was extravagance, if not corruption, in carrying on the work of construction (all of which is undoubtedly true) it is also true that the Act of Congress under which the company was chartered and the road constructed provided for the issue by government to the company of bonds to the amount of \$16,000 a mile within the limits of the state of Nebraska, to be a second lien, and with power in the company to execute a prior mortgage for a like amount. Congress, therefore, in the inception of the work, made specific provision for an indebtedness of \$32,000 per mile on the road within the limits of the state. In order to meet its share of the interest on such indebtedness, the local freight should have earned \$67,248, or about \$12,000 more than would have been earned under House Roll 33. Again, there is a volume of testimony as to what it would cost to reproduce these various roads; such amount, being, as claimed, a fair test of the present value. I shall not—now, at least—attempt to make any comparison of this testimony, but, for present purposes, content myself with taking this concession from the brief of the defendants' counsel:

"There is sufficient testimony in this record to justify the conclusion that the average cost of reproduction or value of the roads in the state of Nebraska does not exceed \$20,000 per mile, including right of way, railway tracks, equipment, station houses, telegraph lines, and terminal properties."

The present value of the Union Pacific Railway property in the state, at the sum named in this concession, would be \$9,840,000. To pay 6 per cent on this conceded value would require, as its contribution to the earnings from the local freight, \$42,080. Or, in other

words, upon the conceded value, the local freight earnings, as reduced by House Roll 33, would have paid but their proportionate share of 8 per cent interest. If a proportionate reduction in rates was made by other states and by Congress (and, of course, such a reduction would be equally within their power) so that the total net earnings of the road would be but 8 per cent on this conceded value, obviously only the holders of the first lien would receive full interest on their indebtedness, while the holders of subordinate liens would receive but a fraction thereof. All the stockholders would go without compensation, and soon their investment would be swept away by foreclosure proceedings. Take the same process of computation, and apply it to the only other company which would have any amount of earnings under the reduction caused by House Roll 33, to wit, the Burlington & Missouri River Railroad in Nebraska. Beyond the statement in Exhibit 23 of the capital stock and funded debt per mile of the Chicago, Burlington & Quincy Company, which owns and operates the Burlington & Missouri River Railroad, we have, from the testimony of its auditor, the exact amount of mortgage indebtedness resting upon the road within the limits of the state, and the amount of interest charges due therefrom, to wit, an indebtedness of \$45,268,992.80, and interest charges for the year 1892, \$2,224,171.17. The amount received for local freight was about 16 per cent of the total amount realized on all business done in the state, as appears from Exhibit 4. Sixteen per cent, therefore, of this interest, should have been earned by the local freight. Sixteen per cent is \$355,867. But the table shows that the net earnings therefrom, under the rates prescribed by House Roll 33, for that year, would have been only \$77,617,—not a fourth of the amount which it should contribute to the payment of such interest. But, again, as Mr. Dilworth testified, the average reduction on local rates caused by House Roll 33 is 29½ per cent. The tariff which was in force at the time of the passage of this act had been for some three or more years fixed by the voluntary action of the railroad companies, and the reduction of 29½ per cent was from its rates. It must be remembered that these roads are competing roads; that competition tends to a reduction of rates, sometimes, as the history of the country has shown, below that which affords any remuneration to those who own the property. Can it be possible that any business so carried on can suffer a reduction of 29½ per cent in its receipts without ruin? What would any business man, engaged in any business of a private character, think of a compulsory reduction of his receipts to the amount of 29½ per cent? The effect of this testimony is not destroyed by the table offered of the percentage of reduction on the total amount of business done by these companies in the state, as follows:

B. & M. R.	4.2%
C. St. P. M. & O.	4.5%
F., E. & M. V.	4.1%
U. P.	2.0%
O. & R. V.	1.9%
St. J. & G. I.	2.7%
K. C. & O.	1.5%

4 INTER S.

For such a table indicates, as is further shown by defendant's Exhibit 4, how small a proportion of the total amount of business done in the state comes from purely local freight. Nor is it weakened by any comparison between the amount of reduction and the total receipts from all business. It may be, as stated by counsel, that the annual earnings of the Chicago, Burlington & Quincy Company are \$27,916,128, and that the total amount of reduction caused by this House Roll 33 is only \$365,175. It may be that the capital stock of the company is \$76,407,500, and that \$365,175, distributed among the stockholders may not be, for any of them, a great sum; but the entire earnings of the Chicago, Burlington and Quincy are more than 20 times the receipts from local freight in Nebraska, and to reduce such earnings by 20 times \$365,175 would make a startling difference in their amount. The fact that the state of Nebraska can reach only one-twentieth of the total earnings gives it no greater right to make a reduction in respect to that one twentieth than it would have, had it the power over the total earnings, and attempted in them a like per cent reduction. If it would be unreasonable to reduce the total earnings of these roads 29½ per cent, it is *prima facie*, at least, equally unreasonable to so reduce any single fractional part of such earnings.

It is, however, urged by the defendants that, in the general tariffs of these companies, there is an inequality; that the rates in Nebraska are higher than those in adjoining states; and that the reduction by House Roll 33 simply establishes an equality between Nebraska and the other states through which the roads run. The question is asked, are not the people of Nebraska entitled to as cheap rates as the people of Iowa? Of course, relatively, they are. That is, the roads may not discriminate against the people of any one state. But not necessarily absolutely as cheap, for the kind and amount of business, and the cost thereof, are factors which determine largely the question of rates, and these vary in the several states. The volume of business in one state may be greater per mile, while the cost of construction and of maintenance is less. Hence, to enforce the same rates in both states might result in one in great injustice, while in the other it would only be reasonable and fair. Comparisons, therefore, between the rates of two states, are of little value, unless all of the elements that enter into the problem are presented. It may be true, as testified by some of the witnesses, that the existing local rates in Nebraska are 40 per cent higher than similar rates in the state of Iowa. But it is also true that the mileage earnings in Iowa are greater than in Nebraska. In Iowa there are 280 people to each mile of railroad, while in Nebraska there are but 190; and, as a general rule, the more people there are the more business there is. Hence, a mere difference between the rates in two states is of comparatively little significance.

Another matter must be noticed. As heretofore stated, the year 1892, upon which the estimates given by Mr. Dilworth are made, seems to have been the most favorable of the three years in respect to which figures are

given. In addition to the inference drawn from these tables, the testimony of witnesses shows that that year was one of the most prosperous years for railroad business in quite a length of time. Now, it is one of the difficulties of this case that no provision is made for the varying conditions of business in different years and parts of years. Maximum rates are prescribed, above which the roads may not go, no matter what unforeseen events may affect the amount of business which they are doing. Indeed, since the argument of these cases, the railroad business in the West suffered a most serious prostration, growing out of the fearful strikes in the month of July. A statutory and fixed tariff, like the one before us, has no provisions for such contingencies as that. The loss is cast absolutely and wholly upon those who have invested their money in railroad business. In short, it deprives these property owners of all chances to make profit which result from private control of business, and compels them to pay out of their pockets all the losses which result from the enforcement of an absolute system.

I might prolong this opinion, and notice many other matters which have been referred to by counsel. I have done a great deal of work in computations,—work which is properly the duty of a special master, but which I have done in order to satisfy myself as to the effect of this reduction of rates on the business of these railroads. I have not attempted to introduce all of these computations into this

opinion. It is long enough as it is. The computations and tables which I have placed indicate the lines of inquiry which have seemed to me most satisfactory. The conclusion to which I have come is that, having regard to the present condition of affairs in the state, the present volume of business done over these roads, and any probabilities of an early change in that volume, a reduction of 29½ per cent in the rates of local freight is unjust and unreasonable to those who have invested their money in these railroad properties. I appreciate fully the embarrassments and difficulties attending an investigation of this kind. I am reluctant, as every judge should be, to interfere with the deliberate judgment of the legislature. I have taken much time to study this case in all its relations, and have come, though reluctantly, to the conclusion I have stated, and am therefore constrained to order decrees in behalf of the plaintiffs, staying the enforcement of this tariff upon the companies named in the bills. It may be said that, even if furnishing no reasonable remuneration to-day, the result might be different under an increase of business. That, of course, is possible; and it may be that, as the volume of business increases, the time will come when the rates fixed by this House Roll 33 will be reasonable and just. So there should be entered, as a proviso to the decrees, that leave is reserved to the defendants, at any time that they are so advised, to move the court for a reinvestigation of the question of the reasonableness of these rates.

UNITED STATES CIRCUIT COURT, DISTRICT OF MINNESOTA.

Re C. H. SCHECHTER.

(Minn.)

1. A state statute requiring every person who sells nursery stock grown without the state, to file an affidavit with the secretary of state and a bond of \$2000, and exhibit to every purchaser a certificate of compliance from the secretary of state, is invalid as imposing an obstruction to, and regulating Interstate commerce.
2. A state statute requiring every person selling nursery stock grown in another state to file with

the secretary of state an affidavit and bond of \$2000, and exhibit to every purchaser a certificate from the secretary, is unconstitutional as depriving citizens of other states dealing in a sound article of commerce produced therein of the valuable privilege and immunity enjoyed by the citizens of the state that every person shall be presumed to be honest and innocent of wrong.

Decided October 13, 1894.

PETITION for a writ of habeas corpus to procure the release of petitioner from custody to which he had been committed for alleged violation of a state statute prescribing certain conditions for the sale of fruit trees. *Petitioner discharged.*

The facts are stated in the opinion.

Messrs. N. Kingsley and W. E. Todd for petitioner.

Messrs. Henry A. Morgan and A. L. Hoppaugh for the state.

Sanborn, Circuit Judge, delivered the following opinion:

The prisoner, a citizen of the state of Iowa, is

deprived of his liberty under the commitment of a justice of the peace of the state of Minnesota, on the sole ground that, as the agent of

citizens of the state of Illinois, he sold fruit trees that were grown in the state of Illinois in the state of Minnesota, without complying with the provisions of sections 1-3 of chapter 196 of the Laws of Minnesota for the year of 1887. There is no claim that any false representations were made or any fraud committed in this sale. Section 1 of this chapter provides that it shall be unlawful for any person to sell or offer for sale any tree, plant, shrub, or vine, not grown in the state of Minnesota, without first filing with the secretary of state an affidavit setting forth his name, age, occupation, and residence, and, if an agent, the name, occupation, and residence of his principals, and a statement as to where the nursery stock to be sold is grown, together with a bond to the state of Minnesota, in the penal sum of \$2000, conditioned to save harmless any citizen of this state who shall be defrauded by any false or fraudulent representations as to the place where such stock sold by such person was grown, or as to its hardiness for climate. Section 2 provides that the secretary of state, on compliance with the provisions of section 1, shall give to the applicant a certificate setting forth the facts that show a full compliance by the applicant with the provisions of the act, and that said applicant shall exhibit this certificate, or a copy of it, to any person to whom stock is offered for sale. Section 3 provides that any person, whether as principal or agent, who shall sell or offer for sale any foreign grown nursery stock within this state, shall furnish to the purchaser a duplicate order, with a contract specifying that such stock is true to name, and as represented. Section 4 imposes a penalty of not less than \$25 nor exceeding \$100, or of imprisonment in the county jail for a term not less than 10 nor more than 60 days, in the discretion of the court, for the sale by any person of any foreign grown nursery stock within this state without complying with the first three sections of the act. There is no law of the state of Minnesota which imposes any such restrictions upon the sale of any tree, plant, or vine grown in this state.

The third clause of section 8 of article 1 of the Constitution of the United States provides that "the Congress shall have power . . . to regulate commerce with foreign nations, and among the several states, and with the Indian tribes." The effect of this provision of the Constitution has been so frequently and forcibly declared by the Supreme Court of the United States that it is sufficient for the purposes of this case to state a few of the propositions that the decisions of that court have established. The power to regulate commerce among the states was carved out of the general sovereign power held by each state, and granted by the Constitution to the Congress of the United States. This power was thus vested in Congress exclusively, and no state, by virtue of any power not thus granted, whether under the name of the "police power," or under any other name, can lawfully infringe upon this grant. This power to regulate commerce, thus granted to Congress, is not subordinate to any of the powers not granted, but paramount to all the powers of the state, and any act of the state which inter-

feres with interstate commerce in a well-known and sound article of commerce is unconstitutional and void. Now, while there are certain subjects in their nature local, such as harbor pilotage, beacons, bridges, etc., regarding which a state may legislate when Congress has not, yet when the subject-matter is the sale of a well recognized article of commerce, such as vines, trees, or shrubs, or any other well-known article of commerce, the product of another state, the subject is in its nature national, susceptible of regulation by rules uniform throughout the nation, and obviously susceptible of wise regulation by such uniform national rules only; and in such a case there can, of necessity, be only one system or plan of regulation, and that Congress alone can prescribe. In all cases where Congress has passed no law regulating interstate commerce in any well recognized article of commerce, that fact is conclusive evidence that it intends such commerce to be free, and any law of the state which prohibits or restricts it must be held to be in violation of the Constitution. I do not intend to hold that valid quarantine and sanitary laws may not be passed by the legislature of the state. There is no such question presented in this case. It is not claimed that these trees that were grown in the state of Illinois were deleterious to the health or the comfort, or dangerous to the lives or property, of the citizens of this state. Nor do I intend to hold that a proper inspection law may not be passed by the legislature of this state to prevent the introduction here of any diseased or dangerous article which might interfere with the health, comfort, well-being, or happiness of the people of this state. No questions of that kind are presented in this case. This law imposes a restriction upon the sale of foreign grown trees by its very terms; and any law which imposes any vexatious or annoying restriction upon the sale of articles that are themselves sound articles of commerce must be held to be an interference with commerce, and thus in violation of the clause of the Constitution to which I have referred. To provide that every man who sells a foreign product shall be required to file an affidavit with the secretary of state, and a bond of \$2000, and to exhibit to every man who purchases the article a certificate of the secretary of state that he has complied with these provisions, certainly imposes a vexatious and annoying obstruction to commerce in the article mentioned. For that reason I think that this law is in violation of this clause of the Constitution.

Moreover, article 4, § 2, of the Constitution of the United States, provides that "the citizens of each state shall be entitled to all privileges and immunities of citizens in the several states." This provision of the Constitution, in my opinion, gives to the citizens of other states the right to introduce and sell the products of those states in Minnesota on the same terms that her own citizens sell like products of this state. The Illinois tree, the Wisconsin vine, the Iowa shrub, that is sound, and is of the same character as that grown in the state of Minnesota, seeking sale in this state, is entitled to be sold by those who deal in it on the same terms and with no greater restrictions

than the like article produced in the state of Minnesota; and any restriction which imposes upon the dealers in foreign articles that are themselves sound, burdens that are not imposed on the dealers in like articles produced in the state of Minnesota, in my opinion, violates that provision of the Constitution to which I have last referred.

It is said that the bond required here is to prevent the dealers in foreign trees from perpetrating fraud in their sale, and that it is competent for the state to protect its citizens against the fraudulent representations of such dealers. The answer is that when a state un-

dertakes, by statutory regulation, to deprive citizens of other states, who deal in sound articles of commerce produced in other states, of that presumption of honesty and innocence of wrong which it indulges in favor of the dealers in its own products, and which the law raises in favor of every man, it very effectually deprives the citizens of other states of the most valuable privileges and immunities its own citizens enjoy.

For these reasons, I think the prisoner must be discharged.

Let an order be entered to that effect.

TENNESSEE SUPREME COURT.

MILAN MILLING & MANUFACTURING CO.

v.
W. E. GORTON *et al.*

(.....Tenn.....)

1. A foreign corporation which simply contracts to furnish milling machinery and place it in a mill, without having any office or agency in the state, is not carrying on business in the state within the meaning of a statutory prohibition of carrying on business.

2. It is an act of interstate commerce for a foreign corporation to sell and set up machinery in a state where it has no agency or office.

Decided Oct. 7, 1894.

CCROSS APPEALS from a decree of the Chancery Court for Gibson County refusing to foreclose a mortgage on property given by the Milan Milling & Manufacturing Company, but entering a personal judgment against it for the amount of the debt secured by the mortgage. *Reversed.*

The facts are stated in the opinion.

Messrs. S. F. Rankin, Edward H. Smith, and Joseph R. Hawkins, for complainant:

The contract being in violation of law, the notes executed therefor are void and cannot be collected; even in the hands of an innocent purchaser.

Acts 1891, chap. 122; *Snoddy v. American Nat. Bank*, 7 L. R. A. 705, 88 Tenn. 574; 2 Am. & Eng. Enc. Law, 368; 1 Parsons, Notes & Bills, 213; *Sugars v. Brinkworth*, 4 Campb. 46; *Reynolds v. Nichols*, 12 Iowa 399; *Brown v. Tarkington*, 70 U. S. 3 Wall. 377, 18 L. ed. 255; *Utica Ins. Co. v. Cadwell*, 3 Wend. 296; Story, Prom. Notes, § 198; *Cunningham v. National Bank of Augusta*, 71 Ga. 400; *Mays v. Williams*, 27 Ala. 267.

The chancellor properly decided that the Maish & Gorton Manufacturing Company were doing business in Tennessee, in violation of the statute requiring that foreign corpora-

tions file copy of charter with the secretary of state, and an abstract in county doing business.

State v. Phenix Ins. Co., 92 Tenn. 420; *Cary-Lombard Lumber Co. v. Thomas*, Id. 587.

Messrs. John R. Walker and Albert W. Biggs, for defendant:

The true and only meaning of the act is that foreign corporations of the character mentioned wishing to locate in this state must perform the conditions precedent of filing and registering their charters.

The contention that the contract is void in Tennessee is manifestly wrong. The presumption in law is that the contract was made with reference to the state where the contract was legal.

If a contract is partly good and partly bad, the courts will, if possible, separate the good from the bad and allow a recovery for the good.

Cary-Lombard Lumber Co. v. Thomas, 92 Tenn. 587.

This transaction was an act of interstate commerce.

Being such the legislature of Tennessee cannot impose any burdens, lay any restrictions or regulations upon it.

U. S. Const. art. 1, § 8.

Whenever state legislation is in its essence and of necessity a regulation of interstate commerce, and therefore of national importance, it is an encroachment upon the powers

NOTE.—As to how far the exclusion of foreign corporations is an interference with interstate commerce, see note to *Kindel v. Beck & P. Lithographing Co.* (Colo.) 24 L. R. A. 311.

4 INTER S.

of Congress over this subject and is therefore void, even though Congress may never have legislated upon the subject.

Cooley, Const. Law, p. 68; *Paul v. Virginia*, 75 U. S. 8 Wall. 168, 19 L. ed. 357; *Gloucester Ferry Co. v. Pennsylvania*, 114 U. S. 196, 28 L. ed. 158; *Pennacola Teleg. Co. v. Western U. Teleg. Co.* 96 U. S. 15, 24 L. ed. 718.

The legislature of our state requires every foreign corporation to register their charters, etc., and this court in *Cary-Lombard Lumber Co. v. Thomas*, *supra*, held said act to be constitutional and correctly so; they also held that the Cary-Lombard Lumber Company, which we understand had a lumber yard in the city of Memphis, and was actually carrying on its business there in violation and defiance of the statutes of the state, could not recover on its contracts made while thus defying the laws of Tennessee.

Cooper Mfg. Co. v. Ferguson, 118 U. S. 727, 28 L. ed. 1137, held that these statutes are to be strictly construed.

A state cannot levy a tax or impose any other restriction upon inhabitants of other states for selling or seeking to sell their goods in such state before they are introduced therein.

Robbins v. Shelby County Taxing Dist. 120 U. S. 489, 30 L. ed. 694; *Asher v. Texas*, 128 U. S. 131, 32 L. ed. 369, 2 Inters. Com. Rep. 241; *Reno*, Non-Residents, § 4; *Bowman v. Chicago & N. W. R. Co.* 125 U. S. 465, 31 L. ed. 700; *Horn Silver Min. Co. v. New York*, 148 U. S. 305, 36 L. ed. 164; *Gloucester Ferry Co. v. Pennsylvania*, 114 U. S. 196, 29 L. ed. 158; *Philadelphia & S. Mail SS. Co. v. Pennsylvania*, 122 U. S. 326, 30 L. ed. 1200, 1 Inters. Com. Rep. 308; *Leisy v. Hardin*, 135 U. S. 100, 34 L. ed. 128, 3 Inters. Com. Rep. 36.

A Georgia corporation supplied brick to build an Alabama house. Being compelled to file a lien against the house in order to recover its pay, the defendants plead that the foreign corporation had not complied with Alabama statutes regulating the admission of foreign corporations. The court held, the sale of brick in another state or the filling of an order sent from this state is an act of interstate commerce which is not affected by our laws which require foreign corporations to have a place of business and an agent here as a condition precedent to their capacity to do business in Alabama. Nor is the institution and prosecution of suits in our courts the doing business within the requirement of our laws.

Cook v. Rome Brick Co. 98 Ala. 409.

It has been held by the supreme court of Wisconsin that a foreign insurance company which has not complied with the statute prescribing conditions upon which it may do business in the state may still take a mortgage security for a debt due there, and foreclose it in the courts of that state.

Charter Oak L. Ins. Co. v. Sawyer, 44 Wis. 387. See also *Beard v. Union & American Pub. Co.* 71 Ala. 60; *Crutcher v. Kentucky*, 141 U. S. 47, 35 L. ed. 649.

The notes sued on in the cross-bill were purchased by the complainants in the cross bill in due course of trade for value, before due and without notice of any claims for damages or offsets.

4 INTER S.

In fact there being innocent purchasers of the notes cannot be questioned by any kind of judicial argument.

This Milan Milling Company had the power to execute notes and to select the place of payment, just as much so as an individual.

Notes given in settlement of transactions merely prohibited by statute are good in the hands of an innocent purchaser and pass to him by assignment denuded of their void qualities.

1 Dan. Neg. Inst. §§ 198, 808; *Bozeman v. Allen*, 48 Ala. 512; Byles, Bills, 7th ed. pp. 141, 142; *Norris v. Langley*, 19 N. H. 423; Chitty, Bills, 11th ed. p. 69; *Coring v. Atman*, 71 N. Y. 435, 27 Am. Rep. 70; *Aurora v. West*, 22 Ind. 88, 85 Am. Dec. 413.

It is frankly conceded that had the Tennessee legislature made this contract absolutely void, and that this was a Tennessee contract, we could not maintain this suit.

See 4 Lawson, Rights, Rem. & Pr. § 1600; *Lennig v. Rabston*, 23 Pa. 137; *Buchanan v. Drovers Nat. Bank*, 55 Fed. Rep. 223.

Any valid operative assignment of the debt whether evidenced by note, bond, or otherwise, is also an efficient assignment of the mortgage and vests the assignee with all the equitable rights, interest, and remedies of the mortgage.

3 Pom. Eq. Jur. 1210; *Jones*, Mortg. § 1176; *Richards v. Holmes*, 59 U. S. 18 How. 143, 15 L. ed. 304.

McAllister, J., delivered the opinion of the court:

The original bill in this cause was filed in the chancery court of Gibson county by the Milan Milling & Manufacturing Company against W. E. Gorton *et al.* for the purpose of enjoining the collection of four notes and the foreclosure of a deed of trust made to secure them. In the year 1892 the Milan Milling & Manufacturing Company entered into a written contract with the Maish & Gorton Manufacturing Company, a foreign corporation, having its office and principal place of business at Warsaw, in the state of Indiana, whereby the latter company stipulated to manufacture, deliver, and put in position for the former company at Milan, in the state of Tennessee, certain milling machinery. The price agreed to be paid by the Milan Milling Company was \$5384, viz: \$1897 in cash upon the arrival of the machinery at the mill, \$486 in sixty days, \$750 in six months, \$750 in twelve months, and \$750 in eighteen months, from April 15, 1892, all evidenced by promissory notes. The Milan Milling Company further agreed to execute a first mortgage upon the milling property and lot to secure said deferred payments. In compliance with their agreement, the Maish & Gorton Manufacturing Company furnished said machinery, and adjusted it in the mill building at Milan, and the same was accepted by the Milan Milling Company. The cash payment was made, and notes executed for the deferred payments, which were secured by a first mortgage on the milling property. Shortly after the execution of the notes, they were indorsed by the Maish & Gorton Manufactur-

ing Company to the State Bank of Warsaw, Ind. Default having been made by the Milan Milling Company in the payment of the first note, the trustee advertised the property to be sold in accordance with the provisions of the deed of trust. Thereupon the Milan Milling Company filed their original bill to enjoin the sale, alleging that the Maish & Gorton Manufacturing Company had breached their contract in the manufacture and delivery of said machinery, in consequence whereof the Milan Milling Company had been greatly damaged; and in accordance with the prayer of the bill an injunction issued restraining the trustee from selling the property. The State Bank of Warsaw, in its answer, denied all the material allegations of the bill, claiming to be an innocent purchaser of said notes for value before maturity in due course of trade, and by cross-bill prayed a foreclosure of the deed of trust. It appeared in proof that the Maish & Gorton Manufacturing Company and the State Bank of Warsaw are both foreign corporations, chartered under the laws of the state of Indiana, and that neither company has ever complied with the laws of the state of Tennessee requiring foreign corporations, before doing business in this state, to register their charters. Upon final hearing the chancellor was of opinion, and so decreed, that both the State Bank of Warsaw and the Maish & Gorton Manufacturing Company, being foreign corporations, and not having complied with the laws of Tennessee, the said contract to furnish machinery was nonenforceable, and that, the deed of trust having been executed in violation of said statutes, complainant in the cross-bill, the said State Bank of Warsaw, was not entitled to have same foreclosed. The chancellor, however, was of opinion that the State Bank of Warsaw was a bona fide purchaser for value before maturity of the notes in question, and as such was entitled to a decree against the Milan Milling & Manufacturing Company on the two notes which had matured at the date of filing the cross-bill. The chancellor further decreed that the complainant in the original bill, to wit, the Milan Milling & Manufacturing Company acquired no such jurisdiction over the Maish & Gorton Manufacturing Company as would entitle them to a decree against the latter for a breach of the contract, but the court decreed that the injunction be made perpetual, so far as it sought to enjoin the sale of said milling property by the trustee. The Milan Milling & Manufacturing Company appealed from so much of said decree as adjudged it liable upon said notes. The State Bank of Warsaw appealed from so much of said decree as refused a foreclosure of the deed of trust on the milling property for the satisfaction of said notes.

The assignment most earnestly pressed and elaborately argued by counsel for the State Bank of Warsaw is that the chancellor erred in finding that the Maish & Gorton Manufacturing Company was doing business as a foreign corporation in violation of the statutes of this state. It is insisted that the said Maish & Gorton Manufacturing Company do not come within the purview of these laws,

for the reason that this company has no office or agency in the state and is not engaged in carrying on business in the state of Tennessee. It is not insisted on behalf of appellants that this corporation is engaged in interstate commerce,—that is, manufacturing mills and milling machinery in the state of Indiana, and in selling the same by their agents, or upon orders in the different states of the Union; that all its transactions with the Milan Milling & Manufacturing Company were acts of interstate commerce, the regulation of which belongs exclusively to the domain of the Congress of the United States; and that the construction of the statute contended for would render it void, because it would thereby involve an interference with interstate commerce. In the case of *Cooper Mfg. Co. v. Ferguson*, 113 U. S. 727, 28 L. ed. 1137, it appeared that the constitution of Colorado provided that no foreign corporation should do any business within the state without having one or more known places of business, and an authorized agent or agents in the same, upon whom process might be served. The legislature of the state enacted that foreign corporations, before being authorized to do business in the state, should file a certificate with the secretary of state and the recorder of the county in which the principal business was carried on, designating the principal place of business, and the agent there on whom process might be served. These provisions of the constitution and statute laws of the state of Colorado being in force, the Cooper Manufacturing Company, a corporation organized and existing under the laws of the state of Ohio, and having its principal place of business at Mt. Vernon, Ohio, sent an agent into the state of Colorado, and entered into a contract in writing with the defendants, who were citizens of Colorado, by which it was agreed that the Ohio corporation should sell and deliver to the defendants, citizens of Colorado, a steam engine and other machinery. Default having been made by the defendants in payment, the plaintiff brought suit to recover of the defendants damages for their breach of the contract. It was held by the state court of Colorado that plaintiff could not recover, because it appeared that said foreign corporation had not complied with the law of the state in respect to filing a certificate with secretary of state and the recorder of the county in which the principal business was carried on. On appeal to the United States Supreme Court it was held that the facts of the case did not constitute a carrying on of business in Colorado, and was not forbidden by its constitution and law. *Mr. Justice Matthews*, in delivering a concurring opinion, stated, we think, the correct basis of the judgment of the court. He said, viz: "Whatever power may be conceded to a state to prescribe conditions on which foreign corporations may transact business within its limits, it cannot be admitted to extend so far as to prohibit or regulate commerce among the states; for that would be to invade the jurisdiction which by the terms of the Constitution of the United States is conferred exclusively upon Congress. In the present case,"

he continued, "the construction claimed for the constitution of Colorado and the statute of that state cannot be extended to prevent the plaintiff in error, a corporation of another state, from transacting any business in Colorado, which of itself is commerce. The transaction in question was clearly of that character. It was the making of a contract in Colorado to manufacture certain machinery in Ohio to be there delivered for transportation to the purchasers in Colorado. That was commerce, and to prohibit it, except on conditions, is to regulate commerce between Colorado and Ohio, which is within the exclusive province of Congress." The judge continues: "It is quite competent, no doubt, for Colorado to prohibit a foreign corporation from acquiring a domicile in that state, and to prohibit it from carrying on within that state its business of manufacturing machinery; but it cannot prohibit it from selling in Colorado, by contracts made there, its machinery manufactured elsewhere, for that would be to regulate commerce among the states." It has been suggested that the case of *Cary-Lombard Lumber Co. v. Thomas*, 92 Tenn. 587, is in conflict with this view.

Such supposition is erroneous, and is based upon an entire misconception of that case. The court in the *Cary-Lombard Case* was not dealing with interstate commerce. No such question was presented by the record in that case. On the contrary, it distinctly appeared in evidence that the Cary-Lombard Lumber Company had an office and lumber yards in the city of Memphis, and was actually engaged in carrying on business in this state. It had acquired a situs and domicile in the state, and was, of course, subject to the regulations of our statute. In the case at bar the Malsh & Gorton Manufacturing Company, a foreign corporation, had simply contracted with citizens of Tennessee to furnish certain milling machinery, and to adjust it in position in the mill. This company was in no sense engaged in carrying on its business in this state, but was engaged in an act of interstate commerce.

In this respect the decree of the chancellor is reversed, and a decree will be entered in favor of the State Bank of Warsaw on all of the notes which in the meantime have matured, and for a foreclosure of the deed of trust made to secure them.

UNITED STATES CIRCUIT COURT OF APPEALS, EIGHTH CIRCUIT.

LITTLE ROCK & MEMPHIS R. CO., *Appt. and Plff. in Err.*,

v.

ST. LOUIS & SOUTHWESTERN R. CO.

SAME

v.

ST. LOUIS, IRON MOUNTAIN & SOUTHERN R. CO.

SAME

v.

LITTLE ROCK & FT. SMITH R. CO.

(63 Fed. Rep. 775.)

1. Requiring prepayment of freight charges by a by a connecting carrier without requiring it of other shippers or carriers at the same place does not constitute an unreasonable or undue disadvantage within the meaning of the interstate commerce act.
2. Other connecting carriers are not entitled to through billing and rating and to the use of tracks and terminals of a carrier which has voluntarily made an arrangement giving these advantages to one connecting carrier.

Decided Sept. 24, 1893.

A PPEALS from, and writs of error to, the Circuit Court of the United States for the Eastern District of Arkansas to review a judgment in favor of defendants to proceedings brought to compel defendants to enter into through shipping relations with the complainant and to recover damages for their refusal to do so. *Affirmed.*

Argued before Caldwell, Sanborn, and Thayer, *Circuit Judges.*

NOTE.—For other cases as to equal rights of connecting carriers under interstate commerce act, see *Kentucky & I. Bridge Co. v. Louisville & N. R. Co.* (C. C. D. Ky.) 2 L. R. A. 289; *Burlington, C. R. & N. R. Co. v. Dev* (Iowa) 12 L. R. A. 436, and note.

4 INTER S.

Statement by Thayer, Circuit Judge:

These were six suits which were brought by the Little Rock & Memphis Railroad Company against the St. Louis Southwestern Railway Company, the St. Louis, Iron Mountain & Southern Railway Company, and the Little Rock & Ft. Smith Railway Company, for alleged violations of the third section of the interstate commerce law. 24 Stat. at L. 379, §80. A suit at law and a bill in equity were filed against each of the defendant companies above named, in which the Little Rock & Memphis Railroad Company counted upon the same violation of the law; asking in the one case for an injunction, and in the other for damages.

The six suits against the three companies involved similar questions. They have been argued as one case, and it is found most convenient to dispose of them in a single opinion. Subjoined diagrams will serve to illustrate the relations which the several railroads concerned occupy to each other. It will be seen by a glance at diagram No. 1 that the Little Rock

DIAGRAM NO. 1.

& Memphis Railroad runs east and west from Little Rock, Ark., to Memphis, Tenn. Its total length is about 135 miles. Coming down from the north, the St. Louis Southwestern Railway crosses the Little Rock & Memphis Railroad at Brinkley, a point intermediate between Little Rock and Memphis. It also crosses a branch of the St. Louis, Iron Mountain & Southern Railway, leading from the main line of that road into Memphis at Fair Oaks, which is a point about twenty miles north of Brinkley. Diagram No. 2 illustrates the situation further west, in and about Little Rock. It will be seen that the main line of the St. Louis, Iron Mountain & Southern Railway Company enters Little Rock from the north, and thence runs southwest through Arkansas into Texas, with a branch leading from Little Rock to the southeast. The Little Rock & Ft. Smith Railway runs west from Little Rock to Ft. Smith on the western border of the state of Arkansas, and to Ft. Gibson in the Indian territory. Its length is said to be about 165 miles. Diagram No. 2 does not

DIAGRAM NO. 2.

show the main line of the St. Louis Southwestern Railway, which is disclosed by the

first diagram; but it is sufficient to say that, after passing through Brinkley, it runs in a southwesterly direction through Arkansas, and far into Texas. As against the St. Louis Southwestern Railway Company, complaint was made that it refused to receive freight or passengers coming over the Little Rock & Memphis Railroad except at local rates, and that it refused to honor through tickets or through bills of lading issued by the latter road, and that it required all freight to be re-billed and reloaded, and all passengers to purchase new tickets, at the town of Brinkley, while at the same time it accepted through tickets and through bills of lading, and cars loaded in car-load lots, that came over the line of the St. Louis, Iron Mountain & Southern Railway Company, and that it did this although the facilities for an interchange of freight and passengers at Brinkley were in every respect equal to those existing at Fair Oaks. As against the Little Rock & Ft. Smith Railway Company complaint was made that it refused to accept interstate freight at Little Rock under through bills of lading issued by the Little Rock & Memphis Railroad Company, while it accepted freight under through bills of lading issued by all other lines of railroad terminating at the city of Little Rock, Ark., and that it likewise refused to accept freight from the Little Rock & Memphis Railroad Company except upon prepayment of all freight charges, while at the same time it accepted freight at Little Rock from all other individuals and corporations without the prepayment of freight charges. Complaint was also made against the Little Rock & Ft. Smith Railway Company that it accepted from the St. Louis, Iron Mountain & Southern Railway Company passengers on through tickets, and with through checking of baggage, while it refused to accept passengers coming over the Little Rock & Memphis Railroad on through tickets issued by that road, and that it charged passengers coming from that road local rates from Little Rock westward, and required them to recheck their baggage at Little Rock. Complaint was also made against the Little Rock & Ft. Smith Railway Company that it exchanged freight with the St. Louis, Iron Mountain & Southern Railway upon an arrangement for through billing, and in the cars in which it was shipped, when shipped in car-load lots, and that it refused at the same time to exchange freight with the Little Rock & Memphis Railroad Company, except upon local rates, and that it refused to accept from or deliver to the latter road any loaded cars. As against the St. Louis, Iron Mountain & Southern Railway Company, complaint was made that it refused to receive any freight from the Little Rock & Memphis Railroad Company at Little Rock, except upon the prepayment of all charges thereon, while it received freight at that point from all other persons and corporations without demanding the prepayment of freight charges. It was further alleged, as against that company, that the discrimination in question was made, not because the defendant company was unwilling to extend credit to the Little Rock & Memphis Railroad Company, but from a desire to oppress that company and destroy its business. A demurrer having been

filed to the several bills in equity and complaints at law, the same were sustained by the circuit court, whereupon the complainant company declined to plead further, and a final judgment dismissing the action was entered in each case. The opinion of the circuit court is reported in 59 Fed. Rep. 400, 4 Inters. Com. Rep. 537.

Messrs. U. M. Rose, W. E. Hemingway and G. B. Rose, for appellant, and plaintiff in error:

Every statute made against an injury, mischief, or grievance impliedly gives a remedy, for the party injured may, if no remedy be expressly given, have an action upon the statute.

Broom, *Legal Maxims*, p. 149.

There are two railroads, coming both from the same place, joining the Fort Smith Railroad at the same point, having each every facility for the interchange of traffic. With one the Fort Smith road makes all the customary traffic arrangements, transports its freight in the cars in which it is received, and upon greatly reduced through rates, while denying all this to the other. The statute prescribes that "every common carrier subject to the provisions of this Act, shall, according to their respective powers, afford all reasonable, proper, and equal facilities for the interchange of traffic between their respective lines, and for the receiving, forwarding, and delivering of passengers and property to and from their several lines, and those connecting therewith, and shall not discriminate in their rates and charges between such connecting lines."

The Fort Smith road discriminates between two roads joining it at the same point. The St. Louis Southwestern discriminates between two joining it at different points, but in favor of the one which is twenty miles further away, thus compelling passengers and freight to follow a route which is twenty miles longer to the manifest injury of the public.

New York & N. R. Co. v. New York & N. E. R. Co. 3 Inters. Com. Rep. 542; *Samuels v. Louisville & N. R. Co.* 4 Inters. Com. Rep. 420, 31 Fed. Rep. 57; *Little Rock & M. R. Co. v. East Tennessee, V. & G. R. Co.* 4 Inters. Com. Rep. 261, 47 Fed. Rep. 771.

Messrs. George E. Dodge and B. S. Johnson, for appellees and defendants in error:

A United States circuit court, in the exercise of its equity powers, cannot require a railroad company engaged in interstate commerce traffic, to enter into an agreement with another railroad company, engaged in like traffic, for a joint through routing and joint through rates, and, upon the refusal of the company to comply with such requirement, may the court itself make such a contract for the parties?

Little Rock & M. R. Co. v. St. Louis, I. M. & S. R. Co. 2 Inters. Com. Rep. 763, 41 Fed. Rep. 559; *Little Rock & M. R. Co. v. East Tennessee, V. & G. R. Co. and St. Louis, I. M. & S. R. Co.* 2 Inters. Com. Rep. 460; *Little Rock & M. R. Co. v. East Tennessee, V. & G. R. Co.* 4 Inters. Com. Rep. 261, 47 Fed. Rep. 771; *Oregon Short Line & U. N. R. Co. v. Northern Pac. R. Co.* 4 Inters. Com. Rep. 249, 51 Fed. Rep. 465; *Kentucky & I. Bridge Co. v. Louis-*

ville & N. R. Co. 2 L. R. A. 289, 2 Inters. Com. Rep. 351, 37 Fed. Rep. 567; *Atchison, T. & S. F. R. Co. v. Denver & N. O. R. Co.* 110 U. S. 679, 28 L. ed. 296; *Dubuque & S. C. R. Co. v. Richmond*, 86 U. S. 19 Wall. 589, 22 L. ed. 176; *Pullman's Palace Car Co. v. Missouri Pac. R. Co.* 115 U. S. 597, 29 L. ed. 502; *Express Cases*, 117 U. S. 1, 29 L. ed. 791; *Capehart v. Louisville & N. R. Co.* 3 Inters. Com. Rep. 278.

The fact that one common carrier receives freight from another, outside of the fact that they are compelled, both by federal and state laws so to do, does not make them partners, so as to become liable or obligated for each other's bills of lading.

Hot Springs Railroad v. Trippe, 42 Ark. 471, 48 Am. Rep. 65; *St. Louis Ins. Co. v. St. Louis, V. T. H. & I. R. Co.* 104 U. S. 156, 26 L. ed. 685.

There is no law that will compel one carrier to receive freight from another carrier and advance charges thereon, should it desire not to do so.

St. Louis, I. M. & S. R. Co. v. Lear, 54 Ark. 402; *Fordyce v. Johnson*, 56 Ark. 430; *Loewenberg v. Arkansas & L. R. Co.* Id. 439; *Little Rock & Ft. S. R. Co. v. Daniels*, 49 Ark. 352; *Burlington, C. R. & N. R. Co. v. Dey*, 12 L. R. A. 436, 3 Inters. Com. Rep. 584, 82 Iowa, 312; *Chicago & A. R. Co. v. Pennsylvania Co.* 1 Inters. Com. Rep. 357; *Scofield v. Lake Shore & M. S. R. Co.* 2 Inters. Com. Rep. 76; *Re Joint Water & Rail Lines*, 2 Inters. Com. Rep. 496; *United States v. Delaware, L. & W. R. Co.* 2 Inters. Com. Rep. 617, 40 Fed. Rep. 101; *Randall v. Richmond & D. R. Co.* 108 N. C. 612; *Allen v. Cape Fear & Y. F. R. Co.* 100 N. C. 397; *Hutchinson, Carr.* § 116; *Pickford v. Grand Junction R. Co.* 10 Mees. & W. 399; *Barnes v. Marshall*, L. R. 18 Q. B. 785; *Wylde v. Pickford*, 8 Mees. & W. 443; *Botsen v. Donovan*, 4 Barn. & Ald. 28; *Bastard v. Bastard*, 2 Show. 81.

No power existed at common law, and none is given by the Act, to court or Commission, to compel connecting companies to contract with each other, to abandon full control of their separate roads, or to unite in a joint tariff.

Chicago & N. W. R. Co. v. Osborne, 4 Inters. Com. Rep. 257, 10 U. S. App. 430, 52 Fed. Rep. 915; *Express Cases*, 117 U. S. 1, 29 L. ed. 791; *Kentucky & I. Bridge Co. v. Louisville & N. R. Co.* 2 L. R. A. 289, 2 Inters. Com. Rep. 351, 37 Fed. Rep. 567; *Little Rock & M. R. Co. v. St. Louis, I. M. & S. R. Co.* 2 Inters. Com. Rep. 763, 41 Fed. Rep. 559; *Iluaco R. & Nar Co. v. Oregon Short Line & U. N. R. Co.* 57 Fed. Rep. 673.

Messrs. Samuel H. West, John M. Taylor and J. G. Taylor also for appellees and defendants in error.

Thayer, Circuit Judge, delivered the opinion of the court:

It will be observed that the sole question in the cases filed against the St. Louis, Iron Mountain & Southern Railway Company concerns the right of that company to require the prepayment of freight charges on all property tendered to it for transportation at Little Rock by the Little Rock & Memphis Railroad Company, while it pursues a different practice with

respect to freight received from other shippers at that station. At common law a railroad corporation has an undoubted right to require the prepayment of freight charges by all its customers, or some of them, as it may think best. It has the same right as any other individual or corporation to exact payment for a service before it is rendered, or to extend credit. *Oregon Short Line & U. N. R. Co. v. Northern Pac. R. Co.* 51 Fed. Rep. 465, 472, 4 Inters. Com. Rep. 249. Usually, no doubt, railroad companies find it to their interest, and most convenient, to collect charges from the consignee; but we cannot doubt their right to demand a reasonable compensation in advance for a proposed service, if they see fit to demand it. This common law right of requiring payment in advance of some customers, and of extending credit to others, has not been taken away by the interstate commerce law, unless it is taken away indirectly by the inhibition contained in the third section of the act, which declares that an interstate carrier shall not "subject any particular person, company, corporation or locality . . . to any undue or unreasonable . . . disadvantage in any respect whatever." This prohibition is very broad, it is true, but it is materially qualified and restricted by the words "undue or unreasonable." One person or corporation may be lawfully subjected to some disadvantage in comparison with others, provided it is not an undue or unreasonable disadvantage. In view of the fact that all persons and corporations are entitled at common law to determine for themselves, and on considerations that are satisfactory to themselves, for whom they will render services on credit, we are not prepared to hold that an interstate carrier subjects another carrier to an unreasonable or undue disadvantage because it exacts of that carrier the prepayment of freight on all property received from it at a given station, while it does not require charges to be paid in advance on freight received from other individuals and corporations at such station. So far as we are aware, no complaint had been made of abuses of this character at the time the interstate commerce law was enacted, and it may be inferred that the particular wrong complained of was not within the special contemplation of Congress. This being so, the general words of the statute ought not to be given a scope which will deprive the defendant company of an undoubted common law right, which all other individuals and corporations are still privileged to exercise, and ordinarily do exercise. It is most probable that self-interest—the natural desire of all carriers to secure as much patronage as possible—will prevent this species of discrimination from becoming a public grievance so far as individual shippers are concerned; and it is desirable that the courts should interfere as little as possible with those business rivalries existing between railroad corporations themselves, which are not productive of any serious inconvenience to shippers. We think, therefore, that no error was committed in entering the judgment and decree in favor of the St. Louis, Iron Mountain & Southern Railway Company.

The complaint preferred against the other companies, to wit, the St. Louis Southwestern
4 INTER S.

and the Little Rock & Ft. Smith Railway Companies, is somewhat different. It consists in the alleged refusal of those companies—First, to honor through tickets and through bills of lading issued by the complainant company, or to enter into arrangements with it for through billing or through rating; and, secondly, in the alleged refusal of these companies to accept loaded cars coming from the Little Rock & Memphis Railroad, and in their action in requiring freight to be rebilled and reloaded at the two connecting points, to wit, Brinkley and Little Rock.

Before discussing the precise issue which arises upon this record, it will be well to restate one or two propositions that are supported by high authority as well as persuasive reasons, and which do not seem to be seriously controverted even by the complainant's counsel. In the first place, the Interstate Commerce Law does not require an interstate carrier to treat all other connecting carriers in precisely the same manner, without reference to its own interests. Some play is given by the Act to self-interest. The inhibitions of the third section of the law, against giving preferences or advantages, are aimed at those which are "undue or unreasonable;" and even that clause which requires carriers "to afford all reasonable, proper, and equal facilities for the interchange of traffic" does not require that such "equal facilities" shall be afforded under dissimilar circumstances and conditions. Moreover, the direction "to afford equal facilities for an interchange of traffic" is controlled and limited by the proviso that this clause "shall not be construed as requiring a carrier to give the use of its tracks or terminal facilities to another carrier." *Kentucky & I. Bridge Co. v. Louisville & N. R. Co.* 37 Fed. Rep. 571, 2 L. R. A. 289, 9 Inters. Com. Rep. 351; *Oregon Short Line & U. N. R. Co. v. Northern Pac. R. Co. supra*. In the second place, it has been held that neither by the common law nor by the interstate commerce law have the national courts been vested with jurisdiction to compel interstate carriers to enter into arrangements or agreements with each other for the through billing of freight, and for joint through rates. Agreements of this nature, it is said, under existing laws, depend upon the voluntary action of the parties, and cannot be enforced by judicial proceedings without additional legislation. *Little Rock & M. R. Co. v. East Tennessee, V. & G. R. Co.* 4 Inters. Com. Rep. 261, 47 Fed. Rep. 771; *Little Rock & M. R. Co. v. St. Louis, I. M. & S. R. Co.* 41 Fed. Rep. 559, 2 Inters. Com. Rep. 763, and cases there cited by Judge Caldwell. Furthermore, it has been ruled by Mr. Justice Field in the case of the *Oregon Short Line & U. N. R. Co. v. Northern Pac. R. Co.*, 51 Fed. Rep. 465, 474, 4 Inters. Com. Rep. 249, that the third section of the Interstate Commerce Act does not require an interstate carrier to receive freight in the cars in which it is tendered by a connecting carrier, and to transport it in such cars, paying a mileage rate thereon, when it has cars of its own that are available for the service, and the freight will not be injured by transfer. It should be remarked in this connection that the bills on file in the present cases, as well as

the petitions in the law cases, fail to disclose whether the offending companies have refused to receive freight in the cars in which it was tendered to them, even when it would injure the freight to transfer it, or when they had no cars of their own that were immediately available to forward it to its destination. Neither do the bills or the petitions disclose whether, in tendering freight in cars to be forwarded, the complainant company demanded the payment of the usual wheelage on the cars, or tendered the use of the same free, for the purpose of forwarding the freight to its destination. The allegations of a refusal to receive freight in cars are exceedingly general, and convey no information on either of the points last mentioned.

As we have before remarked, the several propositions above stated do not seem to be seriously questioned. It is urged, however, in substance, that although the court may be powerless to make and enforce agreements between carriers for through billing and through rating, and for the use of each other's cars, tracks, and terminal facilities, yet that when a carrier, of its own volition, enters into an agreement of that nature with another connecting carrier, the law commands it to extend "equal facilities" to all other connecting carriers, if the physical connection is made at or about the same place, and the physical facilities for an interchange of traffic are the same, and that this latter duty the courts may and should enforce. It will be observed that the proposition contended for, if sound, will enable the courts to do indirectly what it is conceded they cannot do directly. It authorizes them to put in force between two carriers an arrangement for an interchange of traffic that may be of great financial importance to both, which could neither be established nor enforced by judicial decree, except for the fact that one of the parties had previously seen fit to make a similar arrangement with some other connecting carrier. It may be, also, that the arrangement thus forced upon the carrier would be one in which the public at large have no particular concern, because the equal facilities demanded by the complainant carrier would be of no material advantage to the general public, and would only be a benefit to the complainant.

Another necessary result of the doctrine contended for is that it deprives railway carriers, in a great measure, of the management and control of their own property, by destroying their right to determine for themselves what contracts and traffic arrangements with connecting carriers are desirable and what are undesirable. There ought to be a clear authority found in the statute for depriving a carrier of this important right, before the authority is exercised, for, when questions of that nature have to be solved, a great variety of complex considerations will present themselves, some of which can neither be foreseen nor stated. A railroad having equal facilities at a given point for forming a physical connection with a number of connecting carriers might find it exceedingly beneficial to enter into an arrangement with one of them, having a long line and important connections, for through billing and rating, and for the use of

each other's cars and terminal facilities, while it would find it exceedingly undesirable and unprofitable to enter into a similar arrangement with a shorter road, which could offer nothing in return. Or the case might be exactly the reverse. The shorter, and at the time the less important, road, might be able to present sound business reasons which would make an arrangement with it, of the kind above indicated, more desirable than with the longer line. Furthermore, if it be the law that an arrangement for through billing and rating with one carrier necessitates a like arrangement with others, this might be a controlling influence in determining a railway company to refuse to enter into such an arrangement with any connecting carrier. In view of these considerations, we are unable to adopt a construction of the interstate commerce act which will practically compel a carrier, when it enters into an arrangement with one carrier for through billing and rating and for the use of its tracks and terminals, to make the same arrangement with all other connecting carriers, if the physical facilities for an interchange of traffic are the same, and to do this without reference to the question whether the enforced arrangement is or is not of any material advantage to the public.

In two of the cases heretofore cited (*Kentucky & I. Bridge Co. v. Louisville & N. R. Co.*, and *Oregon Short Line & U. N. R. Co. v. Northern Pac. R. Co.*) it was held that the charge of undue or unreasonable discrimination cannot be predicated on the fact that a railroad company allows one connecting carrier to make a certain use of its tracks or terminals, which it does not concede to another. This conclusion was reached as the necessary result of the final clause of the third section of the interstate commerce law, above quoted, to the effect that the second paragraph of the third section shall not be so construed as to require a carrier to give the use of its tracks or terminals to another company. Railroads are thus left by the commerce Act to exercise practically as full control over their tracks and terminals with reference to other carriers as they exercised at common law. The language of *Mr. Justice Field* in that behalf was as follows: "It follows from this . . . that a common carrier is left free to enter into arrangements for the use of its tracks or terminal facilities, with one or more connecting lines, without subjecting itself to the charge of giving undue or unreasonable preferences or advantages to such lines, or of unlawfully discriminating against other carriers. In making arrangements for such use by other companies, a common carrier will be governed by considerations of what is best for its own interests. The Act does not purport to divest the railway carrier of its exclusive right to control its own affairs, except in the specific particulars indicated." 51 Fed. Rep. 474, 475, 4 Inters. Com. Rep. 249.

Furthermore, it is the settled construction of the Act, as we have before remarked, that it does not make it obligatory upon connecting carriers to enter into traffic arrangements for through billing and rating either as to passenger or freight traffic. This conclusion has been reached by all of the tribunals who have

had occasion to consider the subject, and it is based on the fact that, in enacting the commerce act, congress did not see fit to adopt that provision of the English railway and canal traffic act, passed in 1873, which expressly empowered the English commissioners to compel connecting carriers to put in force arrangements for through billing and through rating when they deemed it to the interest of the public that such arrangements should be made. *Little Rock & M. R. Co. v. East Tennessee, V. & G. R. Co.* 4 Inters. Com. Rep. 261, 47 Fed. Rep. 771; *Kentucky & I. Bridge Co. v. Louisville & N. R. Co.* 87 Fed. Rep. 567, 630, 631, 2 L. R. A. 289, 2 Inters. Com. Rep. 351. See, also, the second annual report of the Interstate Commerce Commission (2 Inters. Com. Rep. 249). In the light of these adjudications, we are compelled to conclude that if the charge of an unreasonable discrimination cannot be successfully predicated on the ground that a railway company makes an arrangement with one connecting carrier for the use of its tracks and terminals, which it refuses to make with another, although the physical facilities for an interchange of traffic are the same, then the charge of discrimination cannot be predicated on the ground that it makes an arrangement for through billing and rating with one carrier, and does not make it with another. The Interstate Commerce Act does not, it seems, at present, make it obligatory on carriers to make arrangements of either sort, and does not give the commission power to compel such arrangements, but leaves connecting carriers, as at common law, to determine for themselves when such arrangements are desirable, and when undesirable. Moreover, arrangements for through billing and rating will, as a general rule, necessarily involve an agreement for the use, to some extent, of each other's terminals and tracks; and, by the express language of

4 INTER S.

the statute, such use cannot be enforced without the consent of the owner. We are unwilling, therefore, as the law now stands, to compel the defendant companies to afford the facilities which the complainant demands. As was said by *Mr. Justice Jackson*, then circuit judge, in the case to which we have already referred: "The law should be as liberally construed in favor of commerce among the states as its language will permit; but, when complaint is made or relief is sought solely or mainly in the interest of the common carriers engaged in the transportation of such commerce, the act complained of or the right asserted should not rest upon any doubtful construction, but should clearly appear to have been forbidden or conferred."

We are also forced to conclude that if the public interest requires that interstate carriers shall be compelled to put in force arrangements for through billing and rating, and for the establishment of joint through lines, the statute should be made more explicit, and that the commission should be empowered to prescribe the terms of such arrangements upon a comprehensive view of the circumstances of each particular case.

Some allusion was made in the argument to a provision found in the constitution of the state of Arkansas (art. 7, § 1) as having some bearing on the questions discussed in these cases; but as the bills and petitions filed are plainly founded on the Interstate Commerce Law, and thus involve a Federal question arising under that Act, and as there is no jurisdiction arising from diverse citizenship, we have not felt called upon to consider or decide the proposition founded upon the constitution of the state.

In view of what has been said, the several decrees and judgments are hereby affirmed

APPENDIX.

EIGHTH ANNUAL REPORT

OF THE

INTERSTATE COMMERCE COMMISSION.

Hon. WILLIAM R. MORRISON, Chairman, of Illinois.

Hon. WHEELOCK G. VEAZEY, of Vermont.

Hon. MARTIN A. KNAPP, of New York.

Hon. JUDSON C. CLEMENS, of Georgia.

Hon. JAMES D. YEOMANS, of Iowa.

EDWARD A. MOSELEY, Secretary.

LETTER OF TRANSMITTAL.

INTERSTATE COMMERCE COMMISSION,

Washington, December 5, 1894.

SIR: In accordance with the provisions of the Act to Regulate Commerce, I have the honor to transmit herewith the eighth annual report of the Interstate Commerce Commission.

Respectfully yours,

W. R. MORRISON, *Chairman.*

THE SPEAKER OF THE HOUSE OF REPRESENTATIVES.

EIGHTH ANNUAL REPORT

OF THE

INTERSTATE COMMERCE COMMISSION.

Washington, D. C., December 8, 1894.

To the Senate and House of Representatives:

The Interstate Commerce Commission respectfully submits for the consideration of Congress this, its eighth annual report.

The meaning and application of various provisions of the Act to Regulate Commerce have been discussed at considerable length in previous reports of the Commission, both for the instruction of carriers and the information of the public. It may fairly be assumed that the purposes and requirements of the law are now generally understood. The operation of the statute for nearly eight years, the numerous cases in which its provisions have been applied by the Commission, the adjudication of the Federal courts, and the wide publicity resulting from newspaper and other publications have made railway managers, and the great body of shippers as well, reasonably familiar with the aims and obligations of this enactment. Further exposition of its principles seems less important at this time than a statement of efforts to secure its observance and recommendations of such added legislation as will aid its proper enforcement. While containing such information upon transportation subjects as, in the light of the year's experience, should be set forth, the present report will be mainly devoted to stating what has been done toward securing observance of the law through exercise of the Commission's powers and by proceedings in the courts, and what amendments are necessary to remedy discovered defects in the statute and specifically regulate such transportation methods as may operate to embarrass the working of the law.

COURT DECISIONS.

A number of judicial decisions construing important provisions of the statute have been rendered during the year.

The power of Congress to authorize the Commission to "invoke the aid of any court of the United States in requiring the attendance and testimony of witnesses and the production of books, papers, and documents," was the particular subject of controversy in the case entitled the *Interstate Commerce Commission v. W. G. Brimson et al.* The United States Supreme Court held in this case that Congress may employ any appropriate means, not forbidden by the Constitution, to carry into effect and accomplish the objects of a power granted to it by the Constitution, and that the judiciary can only inquire whether the means devised by Congress are forbidden by the Constitution; that Congress has plenary power, subject only to the limitation imposed by the fundamental law, to prescribe the rules by which commerce among the states is to be regulated; that the provision of the twelfth section of the Act to

Regulate Commerce, requiring the courts to use their process in aid of inquiries before this Commission, is constitutional and valid, and that a proceeding to compel the attendance and testimony of witnesses before the Commission, or to compel the production of books, documents, or papers, in a case of which, under the Constitution, a Federal court may take cognizance; that failure to obey an order of the court requiring the giving of such testimony, or the production of documents before the Commission, is properly punishable by the court as for contempt thereof.

The plenary power of the legislature in this respect is further illustrated by the decision of the Supreme Court in *New York & New England Railroad Company v. Town of Bristol*, which declares that railroad corporations are subject to legislative control in all respects necessary to protect the public against danger, injustice, and oppression, and that the state has power to exercise this control through boards of commissioners.

So, too, in *Reagan v. Farmers Loan & Trust Company*, the Texas Railroad Commission case, the settled right of the state to regulate carriers through the medium of a railroad commission is again fully recognized by the Supreme Court. In that case it is distinctly stated that judicial interference with schedule rates prescribed by the legislature, or the Commission under its granted authority, is confined to restraining a regulation of rates which operates to deny to owners of property invested in the business of transportation that equal protection which is the constitutional right of owners of other property. Prescribing charges for carriers is held to be a legislative or ministerial duty rather than a judicial function, the province of the courts being to decide whether such rates are unjust and unreasonable to the carrier and such as to work practical destruction to rights of property, and if so found to restrain their operation.

The appeal taken by the Commission to the circuit court of appeals for the fifth judicial circuit from the decision of the United States Circuit Court for the Northern District of Georgia in a case generally known as the Social Circle Long and Short Haul case, has been decided in favor of the Commission. The decree of the circuit court of appeals reverses the decision of the circuit court and directs that the order of the Commission, requiring the defendant carriers to make no greater charge on first class freight for the shorter distance from Cincinnati to Social Circle than from the longer distance from Cincinnati to Augusta, shall be enforced. The defendants have appealed to the United States Supreme Court, where it is expected that the case will be disposed of during the present term of the court. The decision

ion of the court of appeals in this proceeding amounts to a complete denial of the theories contended for in behalf of the carriers. It is to be hoped that the court of last resort will, in this case, fully and finally construe the meaning and application of the fourth section.

The same circuit court of appeals has directed the enforcement of the Commission's order prescribing maximum rates on oranges from Florida points to northern cities. This case is also in the Supreme Court on appeal by the defendant carriers, and will probably come up for argument at an early day.

A recent decision rendered by Judge Williams in the United States Circuit Court for the Western District of Kansas will prove of special value in many cases. Upon statements made to, and informal investigation by the Commission, in relation to transportation rates in force to and from Wichita, Kans., the Commission decided in 1893 to avail itself of that provision in the amended twelfth section of the Act which requires district attorneys to institute proceedings upon request of the Commission and prosecute the same under the direction of the Attorney General, and so determined to advance this Wichita case by having it brought directly before the court in the first instance. By this course, formal investigation and report by this Commission was avoided. The defendant demurred to the petition filed by the district attorney on behalf of the United States upon the ground that the United States had no standing in court as a party complainant in a proceeding under the Act to Regulate Commerce. In other words, that the case would be brought into court only by the Wichita people themselves, or by this Commission for the purpose of enforcing its previously issued order.

The opinion of the court, overruling the demurrer and sending the case to trial on the merits, declares that this method of procedure is not only proper, but was clearly intended by Congress as an aid to the Commission in promptly discharging its statutory duty to "execute and enforce the provisions of this Act." Many cases arise where, under principles previously laid down but disputed by defendant carriers, violations of law are apparent to the Commission; and there are other cases also where peculiar circumstances call for the earliest final adjudication possible. These are matters which may well be brought to trial in the courts in the first instance, and such direct procedure in the courts by the government, which relieves shippers and communities from the burdens of instituting and conducting litigation in such cases, will doubtless prove of great utility.

In the case of the Interstate Commerce Commission against the Detroit, Grand Haven & Milwaukee Railway Company, known as the Grand Rapids Free Cartage case, in which, as stated in our last report, the order of the Commission was sustained, the court directed, on application by the defendant for rehearing, that the decree be entered so as to prohibit free cartage at Grand Rapids unless a like service, or its equivalent in value by reduced rates, be at the same time afforded at Ionia, the place from whence the complaint to the Commission originated; and unless the fact that such free

cartage or such equivalent reduced rate is afforded at both points shall be noted in the defendant's established tariffs of freights and charges published as required by law. This was a modification by the court of the order issued by the Commission. The defendant appealed, and the case is now in the circuit court of appeals.

In the case brought by the Commission against the New York Central & Hudson River Railroad Company *et al.*, in the United States Circuit Court for the Northern District of New York, to enforce its order issued in the case of Page and others against the same carriers, the court filed a memorandum opinion declining to enforce the order of the Commission, upon the single ground that no distinction was made between window shades decorated by hand and the much less valuable article manufactured by machinery. The order of the Commission required the carriers to reduce rates on window shades from first to third class, and the omission to specify machine made shades was due to the facts that the carriers had hitherto made no distinction in classifying hand and machine decorated shades; that no question was raised during the proceeding before the Commission as to the impropriety of a single classification for both, and that comparatively very few hand made or hand decorated shades are the subject of shipment. The Commission certified these facts to the court, and stated that the order was not intended to prohibit the carriers from charging higher rates on the hand made article, and the court was requested to review its decision. This case is further considered in this report under the head of "Unjust Classification."

Whether a state court can take cognizance of suits brought to recover for extortionate or discriminating charges for the carriage of interstate commerce is a question of much consequence to shippers and in regard to which the decisions are conflicting. Cases of this nature relate, of course, to the contract relations of the parties in the state where the controversy arises, and are not brought to regulate the charges of interstate carriers. Upon removal from the state to Federal courts of proceedings of this character the contention has taken on an additional phase, namely, that not only have the state courts no jurisdiction of the legality of interstate carrying charges contracted for with carriers or collected by them from shippers, but that, outside of the Act to Regulate Commerce, there is no common or statute law applicable to such cases in any court, state or Federal. In the case of *Swift v. Philadelphia & Reading Railroad Company et al.*, Judge Grosscup held that "the United States as a distinct sovereignty imposes no laws upon its subjects except such as are expressly or impliedly enacted by Congress;" in other words, that there is no Federal common law, and that the common law rule of the several states which requires common carriers to charge only what is reasonable and just does not apply to carriers of interstate commerce, the only restrictions upon the latter being such as are contained in the Act to Regulate Commerce and its amendments. Judge Shiras, of the

Iowa Federal bench, states directly opposite in the case of *Murray v. Chicago & Northwestern Railway Company*. He holds that there a common law of the United States as well as a law of equity and a law maritime. As above stated, these questions are full of interest to shippers, because it is important for them to know whether they can attack contracts, or bring damage suits growing out of interstate carriage in their state courts, and also whether, as matter of fact, the Act to Regulate Commerce constitutes the only legal restraint upon carriers engaged in traffic between the states.

A recent decision in the United States Circuit Court for the Southern District of Illinois seems to rest upon the existence of a common law applicable throughout the United States. This was the case of *Thomas v. Railroads*, in which a statute of Illinois providing that a carrier cannot, by stipulation, limit his common law liability for safe delivery, was held not to effect a shipment from Tennessee and passing through Illinois to Massachusetts, although the charter of the contracting carrier was granted in Illinois. The court did hold, however, that the carrier could not limit his common law liability for loss or injury resulting through its own negligence.

The case of *Bigbee & Warrior Rivers Packet Company v. Mobile & Ohio Railroad Company* decided under the Act to Regulate Commerce, by the United States Circuit Court for the Southern District of Alabama, shows an instance of rather extreme discrimination. The roads had an established rate on cotton from Mobile to New Orleans, which they charge on local shipments; but on cotton offered to them at Mobile by the plaintiff packet company for carriage to New Orleans they demanded a rate much higher than that in force on local shipments between the same points. This was done to discourage shipments by the packet line from the original shipping point, which in this case was Demopolis, Ala., and thus throw the whole carriage to the railroads. The carriers set up the plea of "dissimilar circumstances and conditions," but the court held that all goods offered for shipment at a given point must be carried at the established rate for such goods from that point, regardless of the place where they originate. The following extract from the opinion sets forth a principle which has been frequently announced by the Commission:

There is a dissimilarity in the circumstance that one lot of cotton came from one point and the other lot from another point. But this is not a substantial dissimilarity, such as is contemplated by the law, and it is not every dissimilarity of circumstance or condition that justify a dissimilarity of rates. "That some dissimilar conditions justify dissimilarity in rates is true. That remote dissimilarities of condition justify any dissimilarities which the carrier chooses to make, is not true." *Interstate Commerce Com. v. Texas & Pacific R. Co. ante*, 408. The circumstances and conditions to be considered are those which bear upon the transportation by the particular carrier, and under which such transportation is conducted. They must have direct bearing upon the

traffic over the line on which the discrimination is made. The dissimilarity of circumstances and conditions set up by respondent in justification of its claim is not the outcome of competition by water routes or another competitive railroad line, not subject to the Interstate Commerce Act. Respondent's position on this point cannot be sustained. *Bigbee & Warrior R. Packet Co. v. Mobile & O. R. Co. ante*, 829.

The case of *Union Pacific Railway Company v. Goodrich*, decided last year by the United States Supreme Court, was not reported in time for mention in our last report to Congress. It was a proceeding based upon a section of the Colorado statute of 1885, forbidding discriminations in railroad charges, and the controversy arose over rates charged for carrying coal from different places to Denver. The section of the Colorado act contains language which is strikingly like the provisions in the second and fourth sections of the Act to Regulate Commerce. This is shown by the presence in the Colorado law of the phrase, "upon like conditions and under similar circumstances," which is very similar to the phrase, "under substantially similar circumstances and conditions," in the second and fourth sections of the Federal statute, and by a power vested in the Colorado railroad commissioners under the Colorado law which is like the relieving authority given to this Commission by the fourth section, or long and short haul clause, of the Act to Regulate Commerce. The following extract from the opinion shows that similarity in language, the strict construction given to the circumstances and conditions phrase, and the recognition of the Supreme Court of the relieving power vested in the Colorado commissioner:

This Act was intended to apply to intrastate traffic the same wholesome rules and regulations which Congress two years thereafter applied to commerce between the states, and to cut up by the roots the entire system of rebates and discriminations in favor of particular localities, special enterprises, or favored corporations, and to put all shippers on an absolute equality, saving only a power, not in the railroad company itself, but in the railroad commissioner, to except "special cases designed to promote the development of the resources of this state," and not to prevent the commissioner "from making a lower rate per ton per mile, in carload lots, than shall govern shipments in less quantities than carload lots, and from making lower rates for lots of less than five carloads than for single carload lots." The statute recognizes the fact that it is no proper business of a common carrier to foster particular enterprises or to build up new industries, but deriving its franchise from the legislature, and depending upon the will of the people for its very existence, it is bound to deal fairly with the public, to extend them reasonable facilities for the transportation of their persons and property, and to put all its patrons upon an absolute equality.

The Act approved February 11, 1893, was intended to afford protection to witnesses required to testify under the Act to Regulate Commerce, which would be as broad as the immunity from self-incrimination provided

for in the Constitution. Its passage was a direct result of the decision of the United States Supreme Court in the Counselman case, in which it was clearly intimated that Congress has a power to make a law under which unwilling witnesses could, through provision therein for protection from the legal consequences of their testimony, be compelled to give evidence concerning their knowledge of criminal transactions. It was doubtless presumed by Congress, when this Act was passed, that the Supreme Court had considered all the conditions surrounding a witness who should refuse to testify on the ground that his testimony might tend to incriminate himself, especially the effect of enforced disclosures upon his character. But during an investigation held by the Federal grand jury at Chicago, some months since, Judge Grosscup decided in the case of James, who had pleaded his privilege and refused to testify, that it is beyond the power of Congress to pass a law which would afford protection to a witness as broad as the immunity provided in the Constitution, and the chief basis of the decision was that while a witness might be freed by such a law from the legal consequences of his testimony, the Government could not by any enactment save him from the disgrace and taint upon his character which a disclosure of his connection with crime might entail. As no appeal could be taken from this ruling, it will not be possible to obtain the decision of the Supreme Court upon this point until the question can be raised in another jurisdiction, an order obtained directing the witness to answer, and an appeal be taken by the witness to the proper appellate court. A law providing for appeals by the government from decisions of this character and from rulings sustaining demurrers to indictments would remove many of the embarrassments which now surround prosecutions for criminal offenses.

The distinction between the Counselman and Brimson cases above discussed is not generally understood. They both relate to the compulsory giving of testimony, but here the similarity ceases. The Counselman case did not arise under the Act to Regulate Commerce. That proceeding involved section 860 of the Revised Statutes and the 5th Amendment of the Constitution. The Brimson case related to the constitutionality of the twelfth section of the Act to Regulate Commerce. The Counselman case referred solely to a matter of personal privilege under the Constitution, while the question in the Brimson case was whether under the Constitution a provision in a law passed by Congress was valid. Concisely, the difference between the two cases is this:

Under the Brimson decision it is a constitutional exercise of judicial power for a court to compel a witness to give proper testimony before this Commission. Under the Counselman decision a witness cannot be compelled to give testimony before any tribunal, civil or criminal, which may tend to incriminate himself, unless he is protected by statutory enactment from the legal consequences of his testimony, and that section 860 of the Revised Statutes did not afford such protection. As above shown, the decision of Judge Grosscup in the James case goes beyond this and holds

that the Amendment of 1893 does not secure the immunity guaranteed by the Constitution, and that no statute can.

The foregoing are the principal decisions in which the law has been construed or referred to by the courts during the year. In addition to these, attention should be called to orders, injunctions, and opinions arising out of railway labor troubles, which have been partially based upon sections of the Act to Regulate Commerce. That provision intended to bring about general interchange of traffic with connecting lines on equal terms, and to compel the prompt forwarding of passengers and goods at reasonable rates, have been found so weak as to be incapable of forcing a railroad company to haul the loaded car of a connecting carrier at established local rates, and yet can be successfully invoked by a railroad company to restrain its employes from obstructing or in any way interfering with the prompt forwarding of interstate traffic over its own and connecting lines, is a condition of affairs which not plain people alone, but those supposed to be versed in the law, find it extremely difficult to understand. Using clauses of the law to regulate certain phases of railway labor may be entirely proper upon the ground that such statutory provisions impose duties of a public nature upon the employing carriers, the performance of which the employes have no right to prevent. This may or may not be so; but if it is, then difficulties should not be found in the way of using the same clauses to compel connecting carriers to interchange and forward traffic according to the intent of those who framed the statute. Aside from the vital interest of the public in the compulsory extension of through routing facilities, we can think of no more forcible argument in favor of an amendment which will bring the carriers into unquestioned subjection to this part of the law than the situation above set forth. The subject of through routes and through rates is discussed at length in another portion of this report.

CRIMINAL AND CIVIL PROCEDURE UNDER THE LAW.

Considerable public discontent has been manifested on account of nonenforcement of the penal provisions of the Act to Regulate Commerce, and the expression of this feeling has included some thoughtless criticism of the Commission.

The statute makes it the duty of the Commission to keep itself informed of the methods of carriers in conducting their business, and to execute and enforce the provisions of the Act, and district attorneys are required, upon the request of the Commission, to institute and prosecute all necessary proceedings for the enforcement of such provisions and for the punishment of all violations thereof. This clause in the twelfth section of the law undoubtedly refers to criminal as well as civil proceedings, and the Commission has always considered reports to the Department of Justice of facts concerning alleged violations of the penal provisions of the Act to be one of its duties.

But it should be borne in mind that this does not impose upon the Commission the duties of

a detective bureau. It means that the Commission shall keep itself generally informed of the business practices of common carriers, and whenever facts come to its knowledge which appear to warrant action, that it shall recommend the institution of criminal proceedings by the Department of Justice to that end. This is neither a detective nor a prosecuting function—it is rather a result of that continuous investigation into the transportation business of the country which the Act to Regulate Commerce specifically requires of this Commission. To accomplish the purposes of such general inquiry Congress has endeavored to open up to the Commission certain avenues of information, including the power to summon witnesses and obtain their testimony and the production by them of books, papers, and documents, the making and filing of special statements and annual reports, the filing of tariffs and contracts, and information on special subjects from time to time as may be required; and to facilitate the acquirement of information it was deemed necessary to add to the twelfth section of the law a provision that the testimony given by persons before the Commission should not be used against such persons in any criminal proceedings.

These powers, apparently sufficient, but in reality extremely difficult to successfully exercise, are to be exerted and information thereby obtained used in the continuous inquiry prescribed in the statute. That the exercise of authority by the Commission by several of the means just mentioned has been resisted by carriers and unwilling witnesses in various ways, and that they have often succeeded in embarrassing and greatly delaying the progress of regulation under the law, is too well known to require further mention at this time. We believe, however, that the declarations of the Supreme Court in the Brimson matter, and decisions in other recent cases, indicate a trend of judicial construction which will eventually remove these embarrassments and greatly aid the administration of the statute.

If, then, in the course of such general and continuing investigation the Commission shall become apprised of facts which appear to warrant their presentation to the officers of the Government charged with the prosecution of criminal offenses, it is clearly required to further the execution and enforcement of the law by reporting such facts to the Department of Justice and requesting the institution of proper proceedings. Here the Commission's connection with the criminal side of the statute necessarily ends. The report to the Department of Justice of criminal matters coming to its knowledge from day to day is all that this Commission, or any other bureau or tribunal not having the power to prosecute or condemn, can do.

Upon this subject we desire to add that we not only think it our duty to request these prosecutions, but that every citizen, shipper, merchant, railroad official or employé, should, in the interests of law-abiding shippers, fair commercial dealing, and honest and successful railroad operation, openly and heartily assist the Government in running down and punishing these violations of a statute designed to protect them and the interests they represent.

4 INTER S.

It is time to obliterate the impression that such aid will cause the person giving it to take on the character of an informer, using the term in a reproachful sense. We do not apply that term to a man seeking the arrest of one who has defrauded or robbed him, injured his property, or betrayed his confidence. Yet the giving and taking of less than lawfully established transportation charges is nothing more or less than fraud, robbery of other shippers, injury to their business, and a betrayal of trust in a common public servant. Why should the giving of information of these offenses under the Act to Regulate Commerce be deemed a reproach either to the shipper or the railroad official, or subject them to the enmity of any person or the antagonism of any commercial interest?

Importers loudly complain when tariff duties have been secretly cut in favor of business rivals, and actively assist in prosecuting the officers. What proper considerations exist to deter shippers from seeking the punishment of railroad officials and shippers who have put upon them the kind of injury for which importers do not fail to demand punishment of the perpetrators? The carrier and the customhouse each renders a public service and each collects a charge upon commerce. One is a tax upon its carriage, the other a tax upon its admission into the country; and the regulation and equal application of either is a governmental function in which the whole public is vitally concerned. Both the law and public sentiment condemn fraud in the collection or payment of customs as a crime meriting prompt and severe punishment, and when public opinion shall regard transportation frauds in the same light the serious difficulties now met with at every hand in endeavoring to convict those who willfully violate the Act to Regulate Commerce will have mainly disappeared.

The shipper who secretly secures an advantage in transportation rates over his competitor in business has hitherto been looked upon more in the light of the smartest party to a horse trade than as the participant in a criminal offense for which he should be fined and imprisoned. This is because transportation has been regarded in the popular mind as a part of private business instead of a reliable and impartially conducted agency provided under Government sanction, by which very many industries can only be carried on. When this distinction becomes thoroughly understood the punishment of penal offenses under the statute will be comparatively easy and the necessity therefor correspondingly rare; and difficulties in the way of conviction will be no more formidable than those which beset the Government in prosecuting other crimes and misdemeanors. Success in enforcing the penal provisions of this Act depends almost solely upon whether those interested in transportation, or having knowledge of particular transactions, will give their aid and assistance in that behalf, and regard such action on their part as a duty which they owe to themselves, the community, and the state.

In this connection we may properly allude to certain modifications of the penal provisions of the Act, which are advocated by many railroad managers. It is proposed by them to

exempt the officers and employes of carrying corporations from criminal liability for rate cutting and similar offenses, and to impose such liability solely upon the corporations themselves. In brief, the argument is that the extreme severity of the present law operates to prevent its enforcement; that railway managers will not give information against their rivals when the consequence might be the imprisonment of individuals with whom their personal relations are friendly and familiar, but that such disclosures would be freely made if they resulted only in the imposition of a fine upon the offending corporation. We are not prepared to indorse this view. Corporations can act only through their officers and agents, and necessarily an offense against business rectitude and public morality must be committed by some individual who has knowledge of the law and consciously transgresses its provisions.

The wrongdoing now referred to involves, in our judgment, a high degree of moral turpitude which should rightfully subject to exposure and punishment the persons who are guilty of it. We believe that the corporations should themselves be indictable, and regard it a mistake of the present statute that they are not; but we also believe that their officers and agents should remain amenable, as they are now, to the penal obligations of the law. This view includes retention of the imprisonment feature in the tenth section. Undoubtedly the scheme which will practically result in preventing these misdemeanors is the useful one to adopt, even if a different plan would seem more consonant with abstract justice. For this reason we question the wisdom of making both shipper and carrier criminally liable for the same transaction, and believe that the amendment of 1889, which extended to shippers the penal liability theretofore imposed upon carriers only, has proved a constant and serious obstacle to the prosecution of these offenses.

In our opinion, the best distribution of criminal liability, having regard to the means most likely to secure the punishment of offenders, is to make the shipper alone liable for such offenses as false billing, false weighing, false description of the contents of packages, and other wrongful manipulations of property, for these matters are peculiarly within the control of the shipper; while the carrier alone should be liable for such offenses as rate cutting, rebates, and other wrongful manipulations of the published schedules, for these matters are peculiarly within the control of the carrier. In the latter class of offenses liability should attach to the carrying corporation and also to its officers and agents, for the mere imposition of a fine upon the corporation would not, in our estimation, prove an adequate penalty.

It might, nevertheless, be well to provide specifically in this proposed amendment that whenever a shipper falsely bills or misrepresents the contents of a shipment with the knowledge of any officer, agent, or employé of the carrier, then such officer, agent, or employé shall also be liable to the penalties provided in the tenth section.

The civil side of the law presents a wholly

different aspect. Under the requirements of the statute the Commission is continually engaged in a general investigation, as above described, and such continuous inquiry results in many special investigations instituted by the Commission upon its own motion, as well as upon formal complaints brought by shippers and others under various provisions of the statute.

These special investigations, made on complaint or the Commission's own motion, are conducted with the regard to form and process of law. The Commission, in proceedings of this character, files a statement of its findings and conclusions and thereupon issues an order which either dismisses the proceedings or requires the carrier to conform to the law in the particulars set forth. If such order against a carrier is disobeyed, the Commission may apply to the proper court for its enforcement and appear in the case as petitioner on behalf of the public. The Commission may also in certain cases, as held in the *Wichita* case, before cited, request the Department of Justice to institute civil proceedings in the name of the United States, and this without any special investigation by the Commission or the issuance by it of an order against a carrier.

These statements are made for the purpose of setting out as clearly as possible the difference between criminal and civil procedure under the Act, and to describe generally the functions of the Commission in civil matters as distinguished from its duty or power in relation to criminal violations of the statute.

WORK OF THE COMMISSION.

Hearings and Investigations.

In addition to the general sessions held at Washington during the year, hearings have also been held and investigations made by the Commission or one or more of its members at Providence, R. I.; Frankfort and Louisville, Ky.; Coldwater and Meridian, Miss.; Birmingham, Ala.; Memphis, Tenn.; Titusville, Pa.; Syracuse, Buffalo, and New York, N. Y.; Philadelphia, Pa.; Boston, Mass.; Chicago, Ill.; St. Louis and Kansas City, Mo.; Keosauqua, Iowa; Topeka, Kans.; Indianapolis, Ind. Several visits were paid to some of these places.

Detail Work.

The routine work of the Commission, consisting of correspondence, preparation and mailing of reports, opinions, orders, and conclusions, and the filing, examination, and treatment of railway reports, tariffs, contracts, and other documents, has been fully as great as in former years and of the same general character.

Expenditures.

The names and compensation of persons employed by the Commission, with the appropriations and expenditures for the past year, will be found in Appendix A.

Decisions.

The principal points decided by the Com-

mission since the date of its organization are set forth in Appendix B.

Civil Cases Pending in the Courts.

Following is a statement of cases now pending in the courts to enforce orders of the Commission:

Interstate Commerce Commission v. Lehigh Valley Railroad Company. Rates on coal. Pending in United States Circuit Court, Eastern District of Pennsylvania.

Interstate Commerce Commission v. Louisville & Nashville Railroad Company. Rates on coal. Pending in United States Circuit Court, Middle District of Tennessee.

Texas & Pacific Railway Company v. Interstate Commerce Commission. Inland rates on domestic and import traffic. Pending in United States Supreme Court.

Detroit, Grand Haven & Milwaukee Railway Company v. Interstate Commerce Commission. Free cartage. Pending in United States Circuit Court of Appeals, Sixth Judicial Circuit.

Cincinnati, New Orleans & Texas Pacific Railway Company et al. v. Interstate Commerce Commission. Social Circle long and short haul case. Pending in United States Supreme Court.

Interstate Commerce Commission v. Atchison, Topeka & Santa Fe Railroad Company et al. San Bernardino long and short haul case. Pending in United States Circuit Court of Appeals, Ninth Judicial Circuit.

Interstate Commerce Commission v. Louisville & Nashville Railroad Company. Middletown, Ky., long and short haul case. Pending in United States Circuit Court, Southern District of Ohio.

Interstate Commerce Commission v. Clyde Steamship Company et al. and four other cases. Georgia Railroad Commission long and short haul cases. Three cases pending in United States Circuit Court, Northern District of Georgia, and two cases pending in United States Circuit Court, Southern District of Georgia.

Interstate Commerce Commission v. East Tennessee, Virginia & Georgia Railway Company. Chattanooga, Tenn., long and short haul case. Pending in United States Circuit Court, Eastern District of Tennessee.

Savannah, Florida & Western Railway Company et al. v. The Florida Fruit Exchange. Rates on oranges from Florida points. Pending in United States Supreme Court.

Interstate Commerce Commission v. Northern Pacific Railroad Company et al. Fargo, N. Dak., long and short haul case. Pending in United States Circuit Court, District of North Dakota.

United States, ex. rel. W. R. Morrison and others, v. New York & Texas Steamship Company. Refusal to file tariffs. Pending in United States Circuit Court, Southern District of New York.

Interstate Commerce Commission v. Alabama Midland Railway Company et al. Troy, Ala., rate discrimination case. Pending in United States Circuit Court, Middle District of Alabama.

Interstate Commerce Commission v. Delaware,
: INTER S.

Lackawanna & Western Railroad Company et al. Window shade classification case. Pending in United States Circuit Court, Northern District of New York.

The Shinkle, Wilson & Kreis Company et al. v. Louisville & Nashville Railroad Company et al. Unreasonable rates from Cincinnati to Southern points. Pending in United States Circuit Court, Southern District of Ohio.

Interstate Commerce Commission v. Cincinnati, New Orleans & Texas Pacific Railway Company et al. Unreasonable rates from Chicago, Cincinnati, and other points to Southern territory. Pending in United States Circuit Court, Southern District of Ohio.

H. W. Behlmer v. South Carolina Railway Company et al. Summerville long and short haul case. Pending in United States Circuit Court, District of South Carolina.

Long and Short Haul Clause.

The case of a hay dealer at Summerville, S. C., which was decided in September last, presents with singular clearness the principal difficulties which have been encountered in the operation and administration of this clause.

The defendants carried hay in carloads from Memphis, Tenn., through Summerville to Charleston, S. C., for 19 cents a hundred, while they charged the complainant 28 cents a hundred on carload shipments from Memphis to Summerville, the 9 cents difference being equal to the local rate in force for carrying hay from Charleston back to Summerville. It was evident that this difference of \$1.80 per ton was sufficient to preclude the complainant, engaged in business at Summerville, from buying hay and selling and reshipping it to other points in that section in competition with Charleston dealers. The Charleston competitor could usually afford to sell to the same customer for what the hay cost the complainant. The Summerville dealer was thus practically confined to Summerville for a market, and even there had to compete on even terms with dealers doing business at Charleston, 19 miles away. The defendants sought to justify their departure from the general rule of the fourth section by showing the existence of railroad competition between Memphis and Charleston, and of competition by rail or water, or part rail and part water, from such markets as New York, Boston, Philadelphia, Baltimore, and Chicago.

The case was decided in accordance with rulings previously made by the Commission in the case of James & Mayer Buggy Company, Chattanooga Board of Trade, Georgia Railroad Commission, and Gerke Brewing Company, and supported by the decision of the court of appeals for the fifth judicial circuit in the proceeding brought by the Commission to enforce its order in the James & Mayer Buggy Company's case, commonly known as the Social Circle Long and Short Haul Case.

The Commission held that the competition of markets or the competition of carrying lines subject to regulation under the Act does not justify carriers in making greater short haul or lower long haul charges over the same line in the same direction (the shorter being included within the longer distance) in the ab-

sence of an order of relief issued by this Commission upon application therefor and after investigation. The carriers were therefore ordered not to charge more for the transportation from Memphis to Summerville than from Memphis to Charleston. This order has not been obeyed. It was our view that the defendants ought not to engage in competition for traffic from Memphis to Charleston if the rates obtainable are not remunerative, and if they are remunerative the defendants cannot lawfully assume to say that such rates, though profitable on Charleston traffic, are greatly unprofitable for a similar service to a shorter distance point on the same line in the same direction.

If \$3.80 per ton is profitable to the carriers for bringing hay in carloads from Memphis to Charleston, then \$5.60 per ton, nearly 50 per cent more, on a carload of hay hauled from Memphis to Summerville, which is nearer than Charleston is to Memphis, represents an extra profit of \$1.80 per ton which the defendants did not, and they plainly could not, show to be equalled by extra cost for transporting a car of hay to and delivering the same at Summerville. The carriers may be able to show reasons before this Commission for an order of relief under the fourth section, which will entitle them to accept less on this traffic to Charleston than to Summerville, and such showing may be based on hardships arising from the competition of carriers from the same or different points of shipment which ought to be removed by such an order in justice to the carriers and in the interests of commerce; but until they do this, they are properly directed to refrain from charging rates which, in contravention of the general rule of the fourth section, fetter the business of a person or place and thereby expand the trade of another person or place. Correction of methods of rate making which tend to encourage business monopoly is a leading object of the Act; and the Commission, by its construction and application of the law, and especially the fourth section, endeavors to accomplish that object. We believe, moreover, that the true interests of the carriers would be materially advanced if they should heartily endeavor to promote this purpose of the statute.

The policy, generally adopted by southern carriers, of fixing rates to so-called competitive stations, and making rates to intermediate or local points by adding local or arbitrary rates to rates in force to such competitive points, an illustration of which is furnished in this Summerville case, generally results in preventing the development of business enterprises at the intermediate or local points, and greatly retards their growth. The carriers assert that they are forced into this policy by the competition of other carriers, and rely for their justification upon this alleged necessity.

We hold that the competition of carriers cannot justify relative rates which prevent or destroy the natural competition of communities or unduly discriminate between persons; that this policy of the southern carriers inflicts these injuries in marked degree, and is therefore unwise and unlawful. In so far as the competition of carriers promotes the welfare

of persons and places without undue injury to other persons and places, it should be encouraged; but when such competition plainly operates to destroy or prevent the growth of one town and build up another, it should be justly regulated. Due observance of the fourth section will largely accomplish both purposes; it will encourage legitimate and restrain illegitimate competition in the carrying trade.

As stated in the first part of this report, the proper construction of the fourth section is involved in a case now pending and soon to be argued in the Supreme Court of the United States.

The Southern Freight War.

At no time since the Act to Regulate Commerce went into effect has there been greater disorganization of rates in any section of the country than that which prevailed in southern territory during June and July of the present year.

The trouble is stated to have been precipitated by the cutting of rates by a steamship line running from eastern cities to southern ports and engaged largely in through transportation subject to the statute. The active causes of the war are understood, however, to have been unlawful secret reductions by several lines during a considerable period. The southern railroad carriers, acting through the head of their association, instead of calling for and aiding the enforcement of the law against those responsible for such violations of its provisions, disregarded their own obligations under the statute and ruthlessly reduced all freight rates from eastern points to so-called basing or competitive stations in southern territory. It appears that these reductions were suggested by and had the approval of the southern Railway & Steamship Association, an organization which has for one of its professed objects the maintenance of just rates.

These reductions were so hastily ordered and put in force that in many cases the three days' previous filing and public notice of the reduced rates was not given; in some instances there was only partial compliance with this requirement, and in others it was wholly omitted. At an investigation subsequently held by the Commission these omissions of duty were chiefly laid to the neglect or inadvertence of subordinate officials. This disregard of legal duty, grave as it might appear, was nevertheless comparatively unimportant beside the greater offenses against the statute which were effected by the reductions themselves. The rates to competitive points were cut considerably more than one half, some nearly or quite two thirds. For illustration, class rates from New York to Atlanta before and after June 2, 1894, were as follows:

RATES FROM NEW YORK TO ATLANTA.

	Classes.					
	1	2	3	4	5	6
Before June 2, 1894....	114	98	86	73	60	49
After June 2, 1894....	40	34	30	26	21	17

On or about June 10 these reductions, which were *via* eastern lines, were followed by similar changes *via* Ohio river points. But although

these reductions of the 2d and 10th of June were put in force to competitive or basing stations, a number of days elapsed before rates to the great majority of points were lowered at all; and when as a result of the immense cut at basing points the rates to some noncompetitive stations were changed, the reductions did not always equal those made at the basing points, nor was there any observable general attempt to preserve or re-establish the old relation of rates between basing and local stations. The entire rate situation in the south, antagonistic to the statute as it had been before, was thrown into such confusion by reductions made on and after the 2d of June, that it was rarely possible to determine with certainty what rates were actually in force to many points.

The impropriety of the method generally adopted in southern territory of determining rates to noncompetitive stations by adding a local or arbitrary rate to a through basing point rate, so as to make the lowest combination, was forcibly illustrated during this reduction period. Not unfrequently the short distance local or arbitrary, exceeded the long distance through rate to the nearest basing point; but this combination was not, on account of failure to rearrange all tariffs, always charged, as in many cases old tariffs to local points remained in effect, so that, while the reduced or new rate to Birmingham, for instance, would be applied on business to that point, rates to a local station taking combination rates, as above described, might be the old and higher Birmingham rate plus the usual local or arbitrary. Sometimes agents would disregard the old combination tariffs applying to local stations and make a new combination based on the new rate without any tariff authority whatever; while at other stations the old combination rates would be followed. At some places agents were apparently instructed to make the new combination for themselves; and sometimes shippers who kept informed would demand it. Again, on some roads changes in noncompetitive rates to suit or partially suit the new condition were made more promptly than on others in the immediate vicinity.

On the face of many tariffs, and very frequently in actual practice, it was much cheaper for a merchant at a town not favored with the designation of basing point to have his goods shipped to the nearest basing point and order them reshipped locally from such point to his place of business than to have them routed direct. About the middle of June the first class rate from Atlanta, Ga., to Columbus, Miss., was 91 cents, while the rate to Birmingham, Ala., east of Columbus, was 22 cents and that to Meridian, Miss., south of Columbus, 28 cents; and the rate from both of these places to Columbus was 60 cents. Prior to June 1, first class rates from Atlanta to Birmingham were 64 cents, to Columbus 70 cents, to Meridian 80 cents. On that date the Columbus rate was increased 21 cents, and later in the month the Birmingham and Meridian rates were reduced, as shown by filed tariffs, 42 and 52 cents respectively. If these rates were actually charged during June and July, the discriminations were manifestly arbitrary and

4 INTER S.

unjust; and if the tariff rates were not adhered to, equally grave violations of the law took place.

We think it within bounds to say that during this period rates in southeastern territory were fixed according to no coherent plan, and that grossly discriminating and relatively unreasonable charges were collected at noncompetitive points on almost every road.

One of the grave results of these sweeping reductions was the opportunity afforded to dealers in favored localities to load up their warehouses with stocks of goods at excessively low transportation charges. Competing dealers at less favored points were denied this extraordinary advantage and their business suffered accordingly. Indeed, it was frankly stated at the investigation held by the Commission that a controlling reason for the continuance of the inordinately low rates from the beginning of June until the 1st day of August was the fact that a carrier operating an important system had entered into contracts with a large number of its customers by which, as a consideration for routing goods wholly by its line, it agreed to keep these low rates in effect until the last mentioned date.

A merchant so situated as to take advantage of the reduced rates, by getting in a large stock while these rates continued, was able to compel a competitor located at a less favored point to refrain from his usual competition, or else reduce the selling price of his goods to the extent of seriously impairing if not actually destroying his profits. Such monopolizing advantage amounted to the difference between the old and the new rates. This was particularly damaging to dealers in places just outside of southern classification territory, the reductions being generally confined to roads in that section.

Considering the amount of southern traffic, it is not improbable that the reduced rates brought little or no profit to the carriers, and that their continuance in force would have been ruinous to very many of the carrying corporations. This destructive warfare between the carriers, which produced so much injury to a large number of shippers and communities, was an ill-considered and costly effort to punish one or two competing carriers; it changed nothing, taught no lessons which had not been learned before, brought about no guarantee of future observance of rates by the parties whom the sweeping cut was designed to injure—merely resulted in restoring the old rate situation and old opportunities for the secret or open cutting of rates. The carriers had an extremely costly and innocent shipper's a very disastrous experience, with no permanent or practical advantage to either. On the contrary, this substantial cutting in half of competitive point charges, and the keeping of the reduced rates in force for two months, has led the public to believe more firmly than ever that these lines are now able, to say nothing of what might be done under thoroughly impartial and economical methods, to perform transportation services for very much less than the rates in force before and since the reduction period.

The carriers can not dispel this widespread

belief by saying that the war was waged for the purpose of insuring the future maintenance of rates by competing carriers, for, first, it will not have that effect; second, the people demand lower rates if they can be afforded, and the acceptance of greatly reduced rates for a protracted period furnishes a convincing argument to shippers that lower charges are practicable. The public cannot well understand why carriers, having the general freedom to fix their own charges, should be willing or able to carry on their business for weeks and months at such great loss as must have been entailed by these great reductions, if the old rates were only reasonable.

We find in the statute no effectual means by which to prevent a recurrence of rate war conditions. There exists, it is true, the power to punish for violation of the penal provisions of the law, and we are morally certain that such violations did take place; but sufficient evidence concerning such transactions to warrant recommendation for criminal proceedings has been, as usual, extremely difficult to secure. Though it was clearly for the interest of the southern managers to fully expose, at the investigation held by the Commission, their knowledge of secret as well as open reductions, not a single representative of the carriers did more than state his general belief.

We know that when the cuts were made rate sheets were not filed with the Commission in the manner prescribed by law, and as to this failure some action might be taken; but even here the situation is beclouded with assertions that orders for such filing were duly issued and with excuses based upon the general tariff confusion which prevailed when the reductions were declared. The discriminations and prejudices resulting from the wholesale open reductions of rates to competitive points and general neglect of noncompetitive rates, as before described, might form the basis of criminal proceedings, but the greatest difficulty would be encountered in establishing the necessary fact that such discriminations and prejudices were willfully inflicted. The long and short haul clause properly applied would largely protect the prejudiced communities, but the carriers refuse to accept the Commission's construction of that provision or to obey its orders under that clause pending final determination in the courts.

One course of action which might have a deterring effect upon reckless demoralization of rates in the future would be suits for damages by injured parties. The Commission entertains such cases when the complainants also seek to regulate present rates or prevent unlawful charges in the future. But the present authority of the Commission does not extend to prohibiting carriers from reducing rates. They may, for anything contained in the statute, carry traffic to some localities for as low a sum as they please, and other places or dealers therein must seek relief in more or less tortuous legal proceedings.

The situation calls for a statutory remedy. The interests of railway stockholders, of places and dealers, of the entire public, demand protection from Congress against the damaging exercise of rate making powers by railway managers in their mad fights for temporary

carrying advantages and ruinous endeavors to punish rival carrying interests. The evils of unlimited power in the carriers to reduce their rates were fully set forth in the last report of the Commission under the head of "Limitation of Rate Reduction to Competitive Points," and the recommendation then made for such amendment of the law as will empower the Commission to limit these reductions is earnestly renewed.

Unreasonable freight rates from Chicago and Cincinnati to Southern points.

On the 29th of May last the Commission filed its report and decision in certain cases brought by the Chicago and Cincinnati freight bureaus, two mercantile associations, against carrying lines to Knoxville, Chattanooga, Rome, Atlanta, Memphis, Birmingham, Anniston, Selma, and other points in the southern states.

The complainants contended that rates from Chicago and Cincinnati to Southern points, on commodities embraced in classes 1 to 6, inclusive, of the Southern Railway & Steamship Association classification, were unreasonable in themselves, and also that, under the adjustment of rates from the east and west to the south, the eastern cities were unduly favored by the carriers as to rates on these numbered classes.

The cases presented questions of the greatest importance and involved traffic from Chicago, Cincinnati, and other western points to the south, amounting to millions of dollars annually. After due hearing and examination of voluminous evidence the Commission decided that the rates complained of were unreasonable, and directed their reduction.

The defendant carriers relied greatly upon the competition of water lines between eastern and southern seaboard points, but it was shown that the influence of such competition was not sufficient to account for the difference in rates per ton per mile from the eastern and western points of shipment to southern destinations, and that these rates per ton per mile on Chicago and Cincinnati shipments were unnecessarily high for the transportation service south of the Ohio river, or, in other words, in Southern Railway & Steamship Association territory. In addition to this it clearly appeared that the relatively higher rates from Chicago and Cincinnati and other western points to the south, on the numbered classes of freight than those in effect from the east, were the result of an agreement between eastern and western carriers, which had been brought about through the medium of the above named association, and that it was one of the avowed objects of such association to secure, by adjustments of rates, the transportation by eastern lines, from the territory set apart as theirs, of merchandise or manufactured goods covered by the numbered classes in the southern classification, and to assure to the western lines the transportation of traffic covered by the lettered or lower classes in that classification from the territory apportioned to them.

The Commission held that this division of traffic through the maintenance of unreasonable rates from Chicago, Cincinnati, and other points was unlawful. The agreement of the

Southern Association was also held to be in some respects similar to an agreement for the pooling of freights or division of earnings, which is forbidden in the fifth section of the law. It was plainly established that these adjustments of freight rates to the south were arbitrary, and not justified by considerations which properly enter into the determination of reasonable or relatively reasonable transportation charges. Therefore, and in accordance with the conclusions set forth in its report on these cases, the Commission ordered the defendant carriers engaged in transportation from Chicago or Cincinnati to the southern points mentioned not to charge more for such transportation of freight in the numbered classes than certain rates per hundred pounds which were set forth in the order.

After the Commission's opinion was filed, but before its order was issued in these cases, rates to southern territory from Chicago and Cincinnati were so greatly lowered, by the extensive rate reductions made through the Southern Railway & Steamship Association in June, as to be far below the maximum rates prescribed by the Commission.

These great reductions of southern rates, which lasted until the end of July, are discussed at length in the preceding article. During this reduction period the defendant carriers not only complied with the Commission's order in these cases, but went far beyond its requirements. The reduced or war rates in force from Chicago and Cincinnati to the south were in most instances more than 40 per cent below the maximum rates prescribed by the Commission, and more than 50 per cent less than those complained of and kept in force by the carriers up to the early part of June.

When it appeared in July, from a notice filed with the Commission by the Louisville & Nashville Railroad Company, that it intended, notwithstanding the order of the Commission, to restore the old rates, several Cincinnati firms applied to the United States Circuit Court for the Southern District of Ohio for a decree directing the Louisville & Nashville Railroad Company and the receiver of the Cincinnati, New Orleans & Texas Pacific Railway Company to obey the order of the Commission. An order was granted setting the case for hearing on October 1, and enjoining the Louisville & Nashville Railroad Company in the meantime from disobeying the order of the Commission, but with leave to move before Circuit Judge Lurton or District Judge Barr, within a specified time, for a dissolution of the injunction.

The receiver of the Cincinnati, New Orleans & Texas Pacific Railway Company, having been appointed by the circuit court, was not joined. The Louisville & Nashville applied to have the injunction dissolved, and a hearing was had before Judge Lurton, who granted the motion. The principal reasons for dissolving this injunction appear to have been that the decision of the Commission did not amount to a judicial determination, that the right of the petitioners was yet to be established, and that therefore this was not a proper case for a preliminary injunction. The opinion granting the motion for dissolution states that: "If it be assumed that upon an application for a preliminary

injunction the report of the Commission is to be regarded as making out a prima facie case of illegal rates, that effect, on such an issue, is lost when an issue is made by a sworn answer upon the principal conclusions of the report." It is also stated in that decision that no court has yet granted a preliminary injunction in cases brought to enforce the Commission's orders. We have inserted in the prayer of the petition in every such case a request for the preliminary injunction, but the point has not, on account of the adverse position taken by a court in one of the early cases, since been pressed until this petition was brought. There seemed in this case to be a difference of situation, which warranted the granting of an injunction in the first instance, and justified the expectation that it would be continued pending the trial.

The exceptional character of this case arose from the fact that the defendant roads had practically conceded the justice of the petition by having voluntarily reduced rates in effect for about two months after the Commission's order was made, which were in most instances more than 40 per cent below the rates which the Commission had ordered them not to exceed. This was deemed sufficient ground upon which to apply for the preliminary order, and it was thought that an injunction which merely restrained the carriers from increasing their rates above the much higher charges allowed by the Commission would not foreclose them of any just rights during the pendency of the case in the circuit court.

After the dissolution of the preliminary injunction, the defendants proceeded to take testimony at New York, Manhattan Beach, Chicago, Nashville, Atlanta, and other places, and the petitioners were also given the right to take rebutting testimony.

The Chicago complainants not having taken formal part in the proceedings, and only two of the defendants having been made parties thereto, it was deemed advisable that the Commission should prepare and file a petition against all of the defendants engaged in carrying south from the two places. Upon presenting this petition before Judge Sage, sitting in the same court in Cincinnati, an order was issued, upon motion of the United States attorney, requiring the defendants to answer on or before October 22 and to appear before the court on November 19 and show cause from the record made before the Commission why its order should not be enforced; and the Commission was also required to produce such record before the court. In the event of failure on the part of defendants to make such showing from the record before the Commission, they were allowed, if they should so desire, to produce additional material evidence to justify their disobedience of the Commission's order. It was further set forth in this preliminary order of the court that, in accordance with the provisions of section 16 of the Act, the proceeding should be conducted without the formal pleadings and proceedings applicable to ordinary suits in equity, and in such summary manner as to expedite the hearing and determination of the cause.

Whatever the outcome of this proceeding may be, it is clear to us that the practice, which

this order of Judge Sage was intended to modify, of permitting defendant carriers to take unlimited testimony, including so-called expert testimony of interested railroad officials, to ignore entirely the evidence which was submitted to the Commission, and disregard the primary question as to whether there was such material error in the Commission's findings of fact from such evidence, or in its conclusions based upon such findings, as would make its order thereon unlawful, was full of embarrassments and delays, and plainly at variance with the requirements of the sixteenth section.

The formal prayer used in this petition of the Commission for the enforcement of its order, together with the motion filed by the district attorney and the preliminary order issued by Judge Sage, are published in Appendix — for convenient future reference.

The following statement of rates in force when the Cincinnati and Chicago complaints were filed with the Commission, of reduced rates kept in effect by the carriers from early in June to August 1, 1894, of maximum rates prescribed by the Commission, and of rates in force since August 1, using rates to Atlanta for illustration, will show the slight regard which the carriers paid to "obtaining necessary revenue" when they determined to cut the rates, the great margin between such reduced rates and the maximum rates prescribed by the Commission, and the moderate reductions from present rates which compliance with our order would require:

CINCINNATI TO ATLANTA.

	Classes.				
	1.	2.	3.	4.	5. 6.
Rates complained of.....	107	92	81	68	56 46
Carriers cut rates.....	38	32	28	24	20 16
Commissioners' maximum rates.	86	73	60	45	35 27
Carriers' present rates.....	107	92	81	68	56 46

Since the suit to enforce our order in these cases was instituted all-rail rates from New York and other eastern cities to southern points have been advanced 4 cents per hundred pounds, on classes 1, 2, 3, 4, and H, and 3 cents per hundred pounds on the other classes, of the Southern Railway & Steamship Association. This advance makes some change in the relation of all rail rates from the east to the south, as compared with those from Chicago, Cincinnati, and other western points to southern territory. The former rates had been in effect for a number of years, and this action of the carriers may have been taken with a view to its effect upon the proceeding to enforce our order in these Chicago and Cincinnati cases, although our decision was based mainly upon facts showing that the rates complained of are unreasonable in themselves.

Unreasonable rates on wheat.

Two cases which involved the reasonableness of transportation charges on wheat from shipping points in the state of Washington to Portland, Or., were decided during the year. 4 INTER S.

Correspondingly lower rates for the carriage of food products from Kansas and Nebraska points to Chicago were used by the complainant in one of the cases to establish his claim of unreasonable charges from Pullman, Wash., to Portland, but this was held not to be a safe criterion by which to measure the reasonableness of charges in sections of the country where the expenses of transportation and other conditions of operation are widely different. Comparison was also made by this complainant with the existing rate of charges in force over a rival line from Pendleton, Or., to Seattle, Wash., and this was held to be proper; transportation rates in force on lines of rival companies or on different branches or lines of the same company have a bearing upon and are entitled to consideration in connection with the question of reasonable charges for transportation services rendered under like conditions.

Substantial reductions in the rate complained of having been made since this case was heard, and which justified the expectation of further reasonable modifications, an order directing additional reductions was not deemed justifiable; but the complainant was held entitled to a refund of charges paid on a carload of wheat between Pullman and Portland, equal to the difference between the rate complained of and the rate in effect when the case was decided.

The other case involved rates on wheat from Ritzville, Wash., to Portland, Or., over two lines, one much longer and much more expensive than the other, the longer and more expensive being operated by one carrier, while the more direct and less expensive route was over continuous lines operated by more than one carrier.

The nature of the questions in this case are shown by the Commission's rulings that it is the right of shippers to have their goods carried, and the duty of carriers to forward freights, by the least expensive routes at reasonable through rates; that the rate in question must be reasonable for the transportation by the shorter and less expensive route; that that making a uniform rate on the same product from all points in a large producing district is only justifiable under special and exceptional circumstances, and is not to be encouraged where the difference in the transportation expenses from the various parts of such district is considerable and substantial; that the same rate over a district so extensive as the one shown in this case denies to the producer nearer the market the advantages of his location, for which he receives no compensation in the fact that such rate was established to enable a railroad company to sell its lands more distant from markets at better prices; that to make railroad investments as secure as other property, reasonable rates should be liberal until earnings are sufficiently large for a fair return on actual expenditure, but where the market price of a commodity yields but scant return for labor and expense of production, the cost of transportation needs to be as moderate as may be consistent with justice to the carrier; that where a carrier leased and made the road of another company a part of its system, the agreed rental cannot be accepted as the amount which the leased prop-

erty must earn, and the lessee may retain, before any reduction can be made in rates over the leased line; that where two carriers stipulated for a division of traffic and agreed that when one carried traffic belonging to the other out one-half of the charges should be retained for the transportation service, some reduction in the rate was warranted in the light of this arrangement in connection with the other facts in the case.

UNJUST CLASSIFICATION.

In a case involving the justice of classifying window shades in class 1 of the official classification and charging first-class rates for the transportation of that commodity, it appeared that the complainants had been wrongfully billing this freight as "Window hollands," and had thereby secured a third instead of first class rating; that although this practice was known to the carriers, they failed to correct such billing by the shippers on reception of the freight at the point of shipment, or to invoke the protection of the law by reporting such wrongful billing for prosecution; that, through the agency of the carriers' inspection bureau in the west, a good deal of this improper billing by complainants had been corrected and the proper rates charged at destination; that the complainants had meanwhile been endeavoring, without success, to obtain

reduction of the window shade classification by application to the classification committee, and finally determined to seek relief before the Commission. When the case was heard, the defendants set up these apparent violations of the law by complainants as a bar to a decision in the merits. The following statement and ruling on this question is taken from the Commission's report in this case:

It is not within our province to adjudicate whether any person has or has not so demeaned himself as to violate the penal provisions of the Act to Regulate Commerce; that is matter for termination by a court of competent jurisdiction in a proceeding where the accused may avail himself of his constitutional right of trial by jury, and nothing said herein should be construed as assuming to decide any such question; but this Commission has authority to determine what effect the admitted or proven acts of parties shall have upon the standing of such parties in cases before it. We took this view in the case of *Ottinger*, a ticket broker (*Ottinger v. Southern Pac. R. Co.* 1 Inters. Com. Rep. 607) and in the case of *Slater*, a disappointed applicant for an annual pass. (*Slater v. Northern Pac. R. Co.* 2 Inters. Com. Rep. 43). The Commission refused to entertain the complainant of the ticket broker, and declined to assist complainant Slater in retaliating upon the carrier for revoking his annual pass; but the Commission did, nevertheless, for the guidance of the carrier and in the interest of the general traveling public, consider and rule upon the question presented by the acts in that case. We think this indicates the rule which should be followed in this case: Where it appears that a complainant has invoked the aid of the law for the purpose of securing what he, with the acquiescence of the carrier, had previously obtained in appar-

ent contravention of the law, such acquiescing carrier will not be held entitled to plead violations of the law by complainant in bar of a decision on the merits, nor will the individual interests of the complainant be taken into consideration; but the Commission will examine the evidence and make such report thereon as, under the provisions of the law, the rights of other shippers and the public generally may require. If, independently of any action or interest of complainants, the conduct of defendants with reference to the transportation which is the subject of the proceeding is shown by the evidence to be unlawful, it is our duty to execute and enforce the statutory provisions applicable thereto.

Upon consideration of these facts in this case, and independently of any action or interest of the complainants, it seemed clear that window shades should not be charged higher rates than the more valuable article known as window holland or shade cloth, which the carriers had placed in class 3, and defendants were ordered to reduce their rating of window shades accordingly.

The defendants did not fully comply with the order, but restricted the new rating to west bound traffic, and upon the refusal of the official classification committee to reduce window shades to class 3 in that classification, the defendant carriers rescinded the action taken by them in the direction of obedience to the order. Whereupon the Commission filed a petition for enforcement of its ruling in the United States Circuit Court for the Northern District of New York, and the case has been argued and submitted for decision.

The Form, Contents, and Publication of Rate Schedules, and the Authority for Making and Filing Joint Tariffs.

The various difficulties connected with the form and contents of tariff schedules, the importance of uniformity in their arrangement and simplicity in their statements, and the duty of bringing them into conformity with the requirements of the statute, have been matters of concern to the Commission from the time of its organization. The amending Act of March 2, 1889, empowered the Commission to "determine and prescribe the form in which the schedules required by this section (8) to be kept open to public inspection shall be prepared and arranged," and to "change the form from time to time as shall be found expedient." It was thought preferable to bring about reforms in the arrangement and contents of tariffs through the voluntary action of railroad managers rather than by issuing explicit and compulsory orders; and in pursuance of this policy, and to obviate the necessity of voluminous correspondence concerning matters of detail, the Commission published in December, 1891, a pamphlet, prepared by its auditor, which contained a statement of its views regarding the form and manner of making and filing tariff rate sheets and schedules. The pamphlet was widely distributed among railroad officials and was also set forth in appendix to our fifth annual report to Congress. The directions contained in the pamphlet were not generally followed,

however, and it became evident that something more than suggestions for improvement would be required.

The publication of tariffs in convenient form, adequate in statement and properly authenticated, is essential to the enforcement of reasonable rates and impartial treatment. So far as possible the schedules should be simple in arrangement, ample in their disclosures, and free from ambiguity. Otherwise, the opportunity is afforded for evading the law by discriminating practices and unjust exactions. This is peculiarly true of joint tariffs issued by two or more carriers whose connected roads are operated as a single and continuous line. The increased and often enormous mileage which is thus covered by joint action as to rates, the great volume of traffic which thereby receives speedy and uninterrupted movement, and the temptations to favoritism arising from competition between rival systems render it specially necessary that the public schedules under which business of this character is conducted should answer all the requirements of the statute.

That many of the joint tariffs now employed are not in accord with these provisions is practically admitted by railway managers. They are often faulty in form, imperfect or ambiguous in disclosures, and generally lacking in proper evidence of their authenticity. When such a tariff is filed by one of the associated lines only, as is usually the case, if the other participating carriers are not designated and no proof of their concurrence is furnished, it is quite possible for the latter to avoid liability, when charged with criminal misconduct in respect of a joint rate so issued, by denying knowledge of its existence or consent to its publication, although the fact that they carried traffic apparently under that tariff may be clearly established. When such avenues of escape and evasion are afforded by the rate sheets in common use, there must be something at serious fault in their contents and construction. Defects in tariff schedules provide opportunity for inhibited practices which might not otherwise be available, and tend to defeat in greater or less degree the beneficial purposes of publicity. More than this, they indicate a measure of disrespect for the law and a disposition to avoid its wholesome restraints. They render its enforcement in many cases impracticable, weaken the authority of its various restrictions, and not unfrequently prove an aid to prohibited and inequitable dealings between shipper and carrier.

The Commission determined in January last to more directly and formally exert the authority conferred by the amendment of 1889, and to this end the following circular letter was issued on the 20th of that month:

The Commission having determined to prescribe the form of schedules of rates and charges required by the Act to Regulate Commerce to be kept open to public inspection, in accordance with authority conferred by the sixth section thereof, and desiring that, while fully meeting the requirements of the law, the form adopted shall not be unnecessarily burdensome to the railways by reason of the expense or otherwise, it is thought proper to invite the carriers subject to the Act to send rep-

resentatives to a conference to be held at the office of the Commission in Washington on Monday, February 12, 1894, when opportunity will be afforded to offer suggestions regarding the preparation of such a form—especially suggested as to a form of joint tariffs—as will comply with the requirements of the statute. In the meantime the Commission will be glad to receive suggestions by letter from those interested.

The conference was held on February 12 and 14, 1894; a second conference on March 13, and on September 8 the Commission filed and subsequently issued a report containing its conclusions and order in this matter. Carriers were required by the order to comply generally with the rules laid down in the pamphlet of December, 1891, above mentioned; and to show distinctly upon all future joint tariffs, and upon future amendments and supplements to existing joint tariffs, the names of the several parties thereto; and whenever named as parties to joint tariffs, or any such amendment or supplement, filed and published by another carrier, to forthwith, upon the publication thereof, file with the Commission a statement or certificate showing their acceptance of and occurrence therein, and making themselves parties thereto. A form to be used in making such statement was added to the order. The opinion and order of the Commission in this matter are set forth in full in Appendix to this report.

Closely connected with this matter of form and contents of rate sheets is the statutory requirement that every carrier subject to the law "shall keep its schedules of rates, fares, and charges open to public inspection;" that they shall "be plainly printed in large type," and that "copies for the use of the public shall be posted in two public and conspicuous places in every depot, station, or office of such carrier where passengers or freight, respectively, are received for transportation in such form that they shall be accessible to the public and can be conveniently inspected."

We have reason to believe that this mandatory provision of the statute has been neglected to a greater extent than has been generally supposed. We have been informed that a practice of posting a notice that tariffs can be inspected on application to the agent, keeping the rate sheets in a drawer in the office of the agent, and handing them out upon the request of shippers, has been adopted by more than one carrier subject to the law.

This practice is in clear violation of the plain requirement in the statute for the posting in two public and conspicuous places of the rate sheets themselves. Agents may not be aware that they are liable to fine and imprisonment for failure to fully discharge this duty to post duplicate copies of each tariff; and the managers of roads who have charge of this branch of railroad business may not fully understand that failure on their part to have this duty performed will render them subject to like punishment. Neither is it generally appreciated that a circuit court has express statutory power, upon failure of a carrier to comply with the provisions of section 6 of the Act, to restrain, by injunction, any such common carrier from receiving or transporting interstate traffic un-

if it shall comply with such provisions. The carriers cannot neglect or evade duties required to be performed by this section and expect such neglect or evasion to be looked upon as mere disregard of directory provisions of law which are not material to any interest. Such omission or evasion constitutes a denial of public and individual rights, which the statute declares to be both neglect of a civil duty and a criminal offense.

The Commission cannot, in the nature of things, keep itself informed in regard to the proper posting of passenger and freight rates at stations on the various roads. It must depend largely, if not wholly, upon statements in relation to such posting from shippers and others who may be interested. There should not, however, be any necessity for complaint of a carrier's failure to keep its rates properly posted. This provision of the law is plain and easily understood, and its enforcement will in cases be vigorously pressed.

The malicious propensity of some persons to mutilate or destroy all kinds of public notices is sometimes advanced to excuse failure to keep tariffs properly posted. Carriers should instruct their agents to use the utmost diligence in discovering and prosecuting these offenders under local laws applicable to the case. We are aware, however, that this remedy may not always be sufficient, and that it may sometimes be difficult to impress the local court with the fact that tariffs, besides being public notices, are also a species of property, costly to construct, necessary to the carrier's business, often difficult to duplicate, and valuable for reference to the public, as well as to the carriers, even after they have ceased to be in force.

An amendment to the Federal law making it a misdemeanor for any person to mutilate, destroy or remove any tariff or schedule of rates, fares, and charges, posted by any common carrier subject to the Act to Regulate Commerce, as the rates, fares, or charges in force over its lines for the carriage of interstate traffic, whether applying to passengers or freight, and providing a suitable fine for such offenses, would go far toward insuring the safety of posted schedules.

THE CLASSIFICATIONS OF FREIGHTS.

The transportation of freight involves dealing with thousands of commodities presenting infinite variation in kind, use, weight, bulk, value, ease of handling, and risk of carriage. Dividing the general commerce of the country into classes is clearly necessary to any certain and convenient process of making rates, and so even an approximately just and reasonable apportionment of necessary transportation revenue among the kinds of traffic carried; in short, classification must be considered an indispensable feature of railroad operation.

Classification is the foundation of rate-making. The growth of the system from the original custom of an independent classification on each road to the adoption of the three classifications now in general use in eastern, southern, and western territory, respectively, and together covering the whole country, has been described in our former reports to Congress. With the development of through

transportation facilities, these consolidations of classifications mark our progress toward that harmonious railroad operation which is so desirable for the public interest, and which may be fully attained through extension of railway facilities and simplified methods of rate-making and management.

A most important step which should now be taken in this direction is to provide for the whole country a single classification of commodities, a general plan or foundation upon which to base all freight charges. That this is entirely practicable is demonstrated by the great advance which has already been made toward uniformity, and by the fact that such progress could not have been attained without the subordination of business and carrying interests in various localities to the commercial and transportation conveniences of the country at large. The accomplishment of uniform classification involves only a continuance of the work upon the line of rendering individual interest and local advantage subservient to the general welfare. That this will not require any real sacrifice or injury is proven by the absence of any proposition to retrace a single step in the work which has been done toward securing uniformity; on the contrary, all interested parties concede the great desirability, and most commercial interests urge the necessity, of a single freight classification.

There has been no appreciable advance in this direction since the report of the carriers' committee on uniform classification in June, 1890. We can ascribe much of the failure on the part of carriers to attain any material progress during the past four years to the fact that the three classifications now in use have been separately developed by associated lines operating in sections of the country corresponding to those in which the classifications respectively apply. Thus, the Trunk Line Association with its allied Central Traffic Association, which have the official classification in charge, occupy the territory east of the Mississippi and north of the Ohio and Potomac rivers; the Southern Railway & Steamship Association, through which the classification of that name is controlled, is composed of roads operating east of the Mississippi and south of the Potomac and Ohio rivers; and the Western Freight Association, with kindred organizations, assumes direction of the western classification, which is applied generally throughout the territory west of the Mississippi. The carriers so associated having brought about a practically uniform, though still unsatisfactory, classification for each of these sections, we are now confronted with the task of revising and consolidating the three classifications into one.

The fact that the existing stage in this work has been reached through independent action and control in three great sections of the country, rather than by general and gradual progress brought about through common authority, makes the last step all the more difficult. The postponed necessity of reconciling or discarding conflicting transportation customs in the east, south, and west, so far as may be requisite to the work of unification, must now be met. Though this, as before indicated, is merely continuing the old line of action in a wider field, the present necessity for such lev-

eling of sectional preferences and customs appears, in view of the virtual abandonment of effort by the carriers during the past four years, to call for the intervention of Federal authority. Each group of carriers has accomplished its separate task, but the three groups seem unable to agree upon and enforce a general plan of classification; the limit of voluntary action which the carriers of the country, thus territorially grouped and associated, can be expected to take, has apparently been reached.

This emphasizes the individual and joint appeals made to Congress by commercial bodies and railroad commissions, and the yearly recommendations of this Commission for legislative action upon this subject; and it also goes far to prove, what most railroad managers and the great body of the public generally believe, that uniform classification, though necessary to business certainty and fair treatment of railway patrons, depends upon the passage of a statute requiring its accomplishment.

Consideration of the situation leads us to believe that this dependence upon the exercise of Federal authority may lead to greater public benefits than would or could have been conferred if uniform classification had been secured through the voluntary action of the carriers. Something more than unification of the present classification is necessary to the satisfactory working of a generally applied plan. Consolidation alone would be highly valuable, because it would furnish a common basis of rate making, and infuse into the business of transportation a degree of certainty and consistency which can be secured in no other way; but connected with this is the inseparable and important circumstance that corrections of such uniform classification will be constantly sought by interested parties, and will frequently appear necessary from the needs of traffic and changes in commercial and carrying conditions. If we are to have, through Congressional action, the compulsory use of a single classification by all railroads engaged in interstate commerce, the regulating authority, charged with the direct or alternative duty of making the classification, should also be required to amend it from time to time as may appear necessary.

A statement of some of the difficulties which now attend efforts to secure necessary changes in the present classifications may not be out of place. Disobedience of orders of the Commission, involving the correction of an existing classification, are often based upon the refusal of carriers, not parties to the proceeding, but members of the classification association, to sanction the required change. While this is mere pretension of inability to obey the order, it is still, under such practical coercion of the defendants by other lines, sufficient to defeat just regulation for the very considerable time necessary to obtain enforcement of the order through judicial process. The common control exercised over classification in the east, west, and south by associated carriers in those sections has been found powerful enough to prevent compliance, otherwise easy, with requirements of the statute as set forth in the rulings of the Commission.

There are also a great many rules and reg-

ulations contained in the present classifications which, if retained in the uniform classification, ought to be simplified, and which, as now applied, are often the subject of controversy before the Commission. This involves rules as to mixed car loads, carload weights, released and unreleased shipments, character of shipment in respect to form, size, or the kind of package used, and a considerable number of other rules, the imposition of which by a body of carriers controlling the classification may tend to obstruct proper regulations when applied to particular carriers complained against in proceedings before the Commission.

These and other similar embarrassments would obviously be much more serious under a classification made and controlled by all the carriers. On the other hand, the great majority of such difficulties can and should be removed through duly authorized administrative regulation of such classification. A reasonable and suitable uniform classification, promptly amended as general experience shall from time to time demand, will operate largely to prevent unjust and unlawful charges, and will in still greater degree remove the injustice which arises from improper rules of transportation. As before stated, the statute should authorize the Commission to amend the uniform classification in such particulars as may appear needful upon investigation. Such investigation would include hearings, and conferences with sectional and general classification committees, thus utilizing the combined knowledge and experience of those who have had the classification matters in charge. The Commission has heretofore been disinclined to undertake the task of making a classification, and would be glad to avoid it now, but it has been urged upon us as a duty, after this long delay, accompanied with the suggestion that it would be more satisfactory to make the test of a uniform classification which was produced by an independent tribunal, uninfluenced by local or sectional interests.

We firmly believe that a classification can be constructed, with primary reference to the requirements of the law, which will operate with much less friction and be a decided improvement upon those now in force. There can be no doubt of the constitutional power of Congress to compel this work to be done, nor of the propriety of legislative action which shall direct it to be performed by or under the direction of this Commission. The decisions referred to in the first part of this report have removed such questions from further discussion. Moreover, prescribing a uniform classification of commodities for purposes of transportation is a peculiarly proper exercise of legislative or duly granted administrative power. What the carriers fail to do in the direction of necessary transportation reforms is generally proper for Congress, through appropriate means, to require. If two articles of commerce are justly classified together in class 4 of the eastern classification, for instance, it is difficult to understand how it can also be just to place one of the articles in class 3 and the other in class 2 of the southern.

The governing considerations in the construction of a classification are, first, the number of classes which the classification shall

contain, and, second, how the different articles of commerce shall be distributed among these classes according to their character, weight, bulk, value, ease of transportation, and risk of carriage. The rules for determining similarity of freight articles in these particulars ought to be common to all sections, and not varied, as they now are, to accommodate carrying customs or transportation methods in different sections. One of the greatest benefits which will result from a uniform classification will be the evolution of admittedly just general rules or determining the relative classification of commodities.

The necessary provision in the general classification for a number of classes sufficient to meet the commercial and carrying needs of each section will also do much to simplify the present railroad situation. All three classifications now differ in this respect. Much confusion and injustice ensues from this fact that difference in the number of classes results in the higher or lower classification of the same article. This is forcibly illustrated where classification territories overlap each other. The official classification applies from eastern points to Chicago, and also to the Mississippi river. The western classification is in force from Chicago, as well as from the Mississippi. A large manufacturer at Chicago, for instance, shipping west in competition with eastern makers of the same article, pays the western classification second class rate to the Mississippi river and beyond, while the eastern dealer is charged the lower fourth class rating under the official classification on shipments to the Mississippi river. This results in a serious discrimination against the Chicago dealer which uniformity in classification would remove.

A prominent western railway official in writing to a complaining firm said: "The solution of the whole question is a uniform classification all over the country." In another portion of the same letter it is also stated that "the movement is assuming such strength, not only among railroads, but among shippers, that unless a few roads continue to oppose it, the chances are very favorable for legislation on the subject by Congress through the Interstate Commerce Commission." We submit that the selfish opposition of a few or any number of carriers ought not to succeed in accomplishing the defeat of this almost universally demanded legislation.

A year had passed since our last report to Congress on this question, and, although it was then recommended that the carriers be given a year to agree upon a uniform classification, they have failed to take any steps or make any progress whatever in that direction. We therefore feel justified in now recommending, as was required by the resolution which passed the House of Representatives in September, 1888, that this Commission be directed to make and prescribe, prior to the 1st day of July, 1896, one uniform classification of freights for the use and guidance of the various railroads of the United States, and that, in addition thereto, the Commission be directed to amend such uniform classification from time to time thereafter as may, after investigation, appear to be necessary. Suitable penalties for failure on the part of any carrier subject to the law to con-

form to such classification should also be provided.

TRANSPORTATION AND CARRIERS SUBJECT TO THE STATUTE.

When commerce begins to move from one state to another it becomes interstate commerce; it retains that character until its destination is reached, and is not affected in that respect by treatment during the course of such movement in the matter of handling or hauling or delivering, or the amount charged for its carriage. So with transportation subject to the Act to Regulate Commerce. That statute undertakes to regulate the transportation of interstate commerce wholly by railroad or partly by railroad and partly by water, and methods which carriers may employ for the carriage of such commerce should not be allowed to determine the applicability of its provisions. The Act requires, in section 7, that the transportation shall be treated as continuous from the place of shipment to the place of destination, and that no interruption with intent to evade the provisions of the statute shall have that effect; and in the first section the transportation covered by the Act is described, and the term "transportation" is stated to include "all the instrumentalities of shipment or carriage."

These sections, construed together, show that the movement, the transportation, of passengers or property, either by continuous carriage or as a continuous shipment, however accomplished, when it does not take place "wholly within the limits of a single state," is the movement, the transportation, which makes single or connecting carriers by rail, or part rail and part water, subject to the provisions of the Act when they engage in such transportation. When a shipment begins the designation, indicated to the initial carrier, stated in the contract and the billing or the ticketing or shipping instructions, stamps the commerce with its interstate or state character. The Commission has held, and the ruling is clearly sustained by decisions of the courts, that the fact of continuous transportation of through shipments over connecting roads is sufficient evidence of an arrangement for its performance. We believe it impracticable for independently operated lines to carry out in good faith a contract for continuous shipment, or perform through transportation of traffic, without marking the service with some feature or features that will distinguish it from a shipment which is purely local to each carrier.

It has been asserted that where a connecting carrier charges and receives its local rate on a shipment billed through by an initial road the carriage by the connecting carrier is nothing more than local transportation. To admit this claim is to say that the amount of the charge made or received by a carrier determines the character of the traffic it transports, and whether such carrier is subject as to such traffic to Federal or state laws. The charge is only one of several incidents to transportation, and is not controlling upon the question of whether the carrier is subject to the statute. The application of the Act to Regulate Commerce cannot be made to depend upon the whims or

wishes or even the necessities of carriers; it is not their methods of conducting transportation, but the transportation itself, which determines their relations to the law. Broadly, then, every common carrier engaged in the transportation of traffic which is not wholly within a single state, or is not wholly by water, from the point of shipment to the point of destination is subject to the statute.

There may not be adequate machinery provided in the Act by which carriers can be compelled in all cases to join their roads so as to form continuous lines and to forward traffic thereover as a continuous shipment; but when they do carry through shipments over their connected roads they take up such burdens as their action in that relation to the traffic may impose. These considerations settle the general question of jurisdiction in the light of reason and justice, and in the only way possible to give effect to the various provisions of the statute. The degree of responsibility borne by carriers for rates, facilities, or practices under provisions applicable to specific transactions may be, and is, varied by the facts in particular cases; but the broad question whether the Act applies to a given railroad is one which is easily and necessarily determined by the single fact of participation or nonparticipation in the movement of interstate traffic.

Thus, whether a railroad company is required by the twentieth section of the law to make and file annual reports with this Commission is a question which depends solely upon the use or its railroad in the transportation of interstate commerce. The railroad so used may be one mile or a thousand miles in length; mere distance does not extend or limit the application of the law. The fact that it participates in the carriage of passengers or property of interstate commerce is the determining feature.

It has been questioned whether a carrier which owns, but does not operate, a road used for interstate traffic can be required under the twentieth section of the law to make a report of its financial affairs to the Commission. That section was designed to bring out complete information in regard to financial condition as well as the details of of railroad operation. This statistical information might, as a whole, become incomplete and inadequate if, by delegating the operation of its road to another company, the owning corporation should be permitted to refrain from reporting its financial affairs. Authoritative knowledge of capital stock, funded debt, dividends, deficits, stockholders, official organization, and general methods of financial operation would vary in reliability with the many yearly changes in railroad control; and the annual statistical reports of the Commission, which have become standard guides for investments and commercial interests generally, would be seriously deficient for uses involving comparison of year with year, and in other important respects.

That companies owning but not operating roads, and, indeed, nearly every railroad corporation, whether actually confining its operating affairs to state traffic or not, or whatever its situation, have cheerfully made these annual reports without questioning the power of the law to compel them to do so, or indulg-

ing in serious protest, has been highly gratifying to the Commission and contributed greatly to the success and generally recognized value of the statistical branch of its work.

The custom of sending grain by boats to an interstate point, where the traffic is turned with other grain into elevators and thence reshipped over a state railway to a point in the state wherein the elevator is situated, may result in the movement of commerce by independent shipments over two lines which separately are not subject to the law. This is one of several instances that might be cited of the carriage of large amounts of interstate commerce which should be made by suitable amendment clearly subject to the regulation of the statute.

The transportation of interstate commerce by quick transit over railroads subject to the Act by the method of express carriage and through the medium of independent express companies is, so far as directly regulating the charges and practices of the express companies is concerned, exempt from the provisions of the statute. This constitutes a large volume of interstate business, which is being added to yearly by the withdrawal of some railway carriers from affording favorable facilities for the shipment of some kinds of "quick freight," and the provision by the express companies of accommodations for such traffic which, though made less expensive to shippers than ordinary express charges, are still much higher than the railroad company could well charge for rendering suitable service as to freight of this description. What responsibility for unreasonable or discriminating practices or charges still inheres to the railroad company as to the transportation over its road of the business known as "express" has not been judicially determined.

RELATION OF RECEIVERS OF RAILROAD PROPERTY TO THE LAW.

The fact that several important railroad systems have recently passed into the hands of receivers naturally suggests a discussion of the relation of these officers of the courts to the administration of the statute.

The text of the statute recognizes two classes of common carriers, namely, natural persons and corporations; it in terms makes receivers of property amenable to the penal provisions of the Act (§ 10) and subordinates their management to the control of the Commission in the issuance of any order which may be declared to be lawful by the courts. (§ 16).

When a railroad passes into the hands of a receiver his possession is the possession of the court for the benefit of the parties to the suit. *Winnall v. Sampson*, 55 U. S. 14 How. 52, 14 L. ed. 322; *Taylor v. Carryl*, 61 U. S. 20 How. 583, 15 L. ed. 1028; *Davis v. Gray*, 83 U. S. 16 Wall. 203, 21 L. ed. 447; *Krippendorf v. Hyde*, 110 U. S. 276, 28 L. ed. 145; *Barton v. Barbour*, 104 U. S. 126, 26 L. ed. 672; *Gumbel v. Pitkin*, 124 U. S. 131, 31 L. ed. 374.

And while it is said that he cannot be disturbed in this possession without leave of the court appointing him, a consideration of the decided cases will show that this familiar rule of law applies to persons who have some

moneyed or other interest in the estate and does not alter the status of the property as affected by public statutes.

The first section of the Act to Regulate Commerce applies to certain common carriers, and the courts have said that a receiver is a common carrier. In a leading case, which was an action of, *assumpsit*, charging the defendants, who were receivers appointed by a court of chancery, with negligently causing loss, and seeking to recover the value of goods shipped over the line which was in possession of the receivers as such, the defendants claimed that as receivers of the court they were subject to account only in the court which appointed them, and could not be sued *in assumpsit* as common carriers without leave of such court.

The court held that in the relation which the receivers bore to the public as common carriers they were liable as such carriers precisely as if they were not receivers at all. This case has been followed by many others in the jurisdiction of Vermont, New Hampshire, Connecticut, Missouri, Illinois, and other states. Undoubtedly, after a judgment has been obtained in such a suit an execution cannot issue out of a law court to sequester the property which was already *in custodia legis*.

The question has also been presented to the courts in another form, namely, the obligations of receivers of railroad property to pay taxes assessed by the states in which the property was located. The decisions upon this subject are not harmonious, some cases holding that the state officers may levy upon the property directly without application first being made to the court in whose custody the property is. In others it is held that an application must be first made to the court appointing the receivers.

The recent case of *Re Tyler*, 149 U. S. 164, 17 L. ed. 689, may probably be considered as a controlling authority that immediate distraint cannot be made for taxes on property in the hands of a receiver without first making application to the court. The Supreme Court said, in that case, that the course to be pursued was by an intervention of the tax officials in the main case in which the receiver was appointed by an application *pro inter esse suo*. This case, however, recognizes the principle that property in the hands of a receiver is subject to the domination of public statutes, and the courts are careful to say that this principle of applying to the court "does not involve interruption in the payment of taxes or the displacement or impairment of the lien therefor, but on the contrary makes it the imperative duty of the court to recognize as paramount and enforce with promptness and vigor the just claims of the authority for the prescribed contributions to state and municipal revenue."

By the provisions of the Act of March 3, 1887 (24 Stat. at L. 552) all receivers appointed by United States courts can be sued in other courts without leave of the court appointing the receivers, and we have only to discuss, therefore, the relation of those receivers of railroad property to the law who may be appointed by state courts. The status of such a receiver is this: He is the representative of all

persons who have any interest in the property which he is appointed by the court to manage, and the courts will not suffer any interference with his possessions; but he is under a paramount obligation to operate the property in subordination of all public statutes; his appointment does not affect the corporate function or the corporate liability to conduct the business subject to statutory law, and it has accordingly been held (*Louisville, N. A. & C. R. Co. v. Cauble*, 46 Ind. 277) that where a statute made railroad companies absolutely liable for the killing of stock where the road-bed was not securely fenced, the fact that the affairs of the company had passed into the hands of a receiver constituted no defense to an action upon such liability. Many cases of this kind are to be found in the books; but the exposition of the situation as contained in the decision of the supreme court of Illinois in the case of the Ohio & Mississippi Railroad Company against Russell (115 Ill. 52) is well stated. In that case the court said:

The action is brought against the defendant for the nonperformance of duty imposed by statute against which it is apprehended no order of a court can relieve it. It is a public regulation to which the corporation is subjected by the sovereignty of the state and it is not within the rightful jurisdiction of the court, either state or Federal, to arrest its operation. . . . The fact of the appointment of the receivers is simply to give him the temporary management of the railroad under the direction of the court instead of the manager appointed by the directors of the corporation.

It is a principle well understood that all railroads or other corporations transacting business in its nature public are subject to all reasonable police regulations deemed necessary for the common welfare. The mere fact that its property may be temporarily in the hands of a receiver does not relieve a corporation from the operation of such a regulation any more than a private citizen is released from the duty to observe the law because his property may be sequestered by the order of a court for the benefit of his creditors. . . . It is sufficient that the statute has imposed the duty sought to be enforced against the corporation and it must be obeyed.

The object of the Act to Regulate Commerce is to bring within the operation of salutary and wholesome rules the operation of railroads engaged in commerce between the states. It purports to be controlling as to all common carriers thus engaged, and that term, as we have seen, includes the receivers of railroads and controls them to the same extent that it would control the corporation if it was managing its own affairs, subject, perhaps, to the limitation that if the proceedings before the Commission or before the courts in their revisory action upon the findings of the Commission should attempt to give the aggrieved party money damages, it would be necessary to resort to the court appointing the receiver in order to obtain satisfaction of the judgment. It is very clear from all the authorities, as well as from the reason of the matter, that the attitude of a receiver to the law is precisely that of the attitude of corporations whose affairs have not been taken possession

of by the court. The business they perform is public. It is, as has been stated and shown so many times, the administration of a public function. The managers of railroads, whether they are owners or receivers, are putting in operation a function of the government, and the mere fact of sequestration of the property and the appointment of receivers for the benefit of creditors does not exonerate a management from performing its public duty according to the rules and regulations which the statutes may prescribe for such business.

OVERCHARGES AND UNDERCHARGES.

While the mechanical part of railroad transportation has reached a high degree of development in this country, that branch of the service which pertains to shipping, billing, and the statement, collection, and correction of charges is, especially as to traffic over connecting roads, conducted with so much uncertainty, and is so lacking in system and regularity, as to justify charges of gross carelessness and frequent disregard of the property rights of the shipping public.

Complaints of overcharges arise from the misrouting of freight, from agents' want of knowledge of actual rates in force, from failure to correct the billing to proper rates at destination, from erroneous statement of weights, from misapprehension of rules governing minimum rates, from misapplication of classification, and other causes. Whatever the specific cause may be, the occurrence of overcharges is usually ascribed to inadvertence, insufficient information, or failure of some official to perform his duty; in short, to either the ignorance or error of railway agents. Such reasons are, in connection with declarations that all claims are promptly adjusted, given in excuse for the taking of overcharges; but the actual fact is that these overcharge claims are rarely adjusted and paid with promptness. The files of the Commission teem with complaints of delays by carriers in the settlement of overcharges which, in the nature of things, could not have been necessary.

A shipper of hay or grain in the west makes this statement:

Shipment arrives at destination with an overcharge of from \$5 to \$50, and the company, while acknowledging the claim, pass it around from six to eight months, getting authority from each line interested. In this way they keep shippers' money tied up from four months to a year without paying interest on anything. We have \$2400 in railroad companies' hands in this way, and are paying bank 10 per cent interest to handle our business.

We are satisfied that this is not an extravagant statement of the amount which a large shipper or consignee may have involuntarily invested in transportation claims for excessive charges. These amounts are, in effect, enforced loans to railroad companies, and their yearly total must represent a large sum illegitimately withheld from its rightful owners and their business.

Instances of disallowance by carriers of claims just upon their face are not wanting. A shipment of feed from a place in Ohio to a point in New York was chargeable under a plainly worded tariff at the New York City 4 INTER S.

rate of 25 cents a hundred, and this rate was properly specified in the bill of lading. But the car was erroneously forwarded by a more expensive route, and at the delivery point a higher rate was demanded and collected. The claim agent of the initial road refused to honor the claim and curtly informed the claimant that the proper charge had been collected. The claimant finally complained to the Commission. The general traffic manager, upon being notified of the facts by the Commission, ordered the overcharge refunded. Soon after, the same complainant found it necessary to bring to our attention an exactly similar claim against this company, in order to obtain a refund of the excess paid. Cases like these are well calculated to create a belief that carriers are willfully negligent in the manner of paying just claims.

The injustice occasioned by overcharges rests, first, upon the fact that they occur at all; and second, upon failure to promptly settle the claims. The taking of an unlawful charge and its retention for an unnecessarily long period has all the effect of extortion and willful discrimination. There is no justification for such delay in the settlement of overcharges. Agents at delivering stations have authority to correct freight bills containing an apparent undercharge, but they are not generally authorized to make reductions when the bills show an overcharge. The agent is deemed competent to raise the underrate, but the collection of an overrate is usually reserved for the more deliberate action of the claim agent and the red-tapism required to obtain the unnecessary consent of initial and intermediate roads. We think this a senseless distinction. The carrier should employ competent agents and keep them informed, and vest them with full authority to immediately correct errors for or against the company. There should not be, and need not be, any such thing as uncertain transportation rates or a long drawn out claim for overcharges. If the excessive character of the rate be discovered before payment of charges at destination, the agent should correct the expense bill then and there and deliver the goods on payment of what is actually due; and if not shown until after payment of the overcharge, the agent should still be authorized to refund, or at least to do so after telegraphic communication with his superior officers. When freight has been prepaid by the shipper, the agent of the initial road should have authority, upon notification and verification of the overcharge claim, to pay it. The connecting carriers would not be embarrassed by the arrangement; they would have no difficulty in making proper distribution of the corrected rate, or in levying upon each its proportion of the refund. These are matters with which shippers and consignees have no concern, and they should not be compelled to wait for an adjustment of the overcharge as between the participating carriers. The carrier who collects the freight charge should be held directly responsible for the summary settlement and repayment to the proper person of any excess above the rate which is legally in force. This obligation should be enacted into law. Such a provision would, by diminishing overcharges, tend to

allay much of the irritation now manifested by the public toward the railroads.

The ignorance or carelessness of agents in contracting for and billing freight, which results in so many instances of overcharge, often brings about the sending of goods at a rate which is less than that allowed under established tariffs of the carriers. This is likely, in some cases, to be more damaging to shippers and consignees than overcharges. In the absence of collusion between shipper and carrier for the purpose of willful rate cutting, an undercharge is almost certain to be corrected before delivery of the goods to the consignee. Contracts between the shipper and consignee based upon the underrate officially quoted by the carrier's agent to the shipper, or sometimes to the consignee, are thus often rendered wholly unprofitable, and sometimes are the occasion of considerable loss. Not infrequently the shipper of household goods or other personal effects is subjected by this careless naming of low rates, and subsequent correction to higher rates, to the payment of a sum sufficient, if known beforehand, to have deterred him from making the shipment, and possibly to change his plan of place of living, as might be the case with a prospective emigrant.

These are very serious considerations. They are in nowise answered by the fact that injured parties have a right of action in the courts for damages. Patrons of railways should never find it necessary to bring suits for the recovery of damages growing out of the use by a carrier of rates not fixed according to law. One of the main purposes of the statute was to secure the absolute certainty of railroad charges. Besides, the person injured may be hundreds of miles removed from the place where he can properly bring suit against the offending carrier, or if not, and the suit is brought, he must incur considerable expense for attorney and litigation fees, and he may even then fail on the ground of want of jurisdiction in the court, or be obliged to submit to a removal of the cause to a Federal court, and compelled to pursue his remedy there. The conflicting state of the decisions in regard to questions of jurisdiction arising out of the contract relations of shipper and carrier in matters of interstate transportation is alluded to in the first part of his report.

There is, moreover, as the Act to Regulate Commerce now stands, some room for question whether, in view of the requirements for the publication of rates, an action by a shipper or consignee can be successfully maintained when based upon the erroneous insertion in the contract of shipment or bill of lading of a charge which is less than the rate lawfully in force, and exaction of the full legal rate before delivery at destination. Recovery in such cases as been had in some state courts, while in others it has been denied on various grounds; but the question has not been directly raised and decided in any Federal court, so far as we are informed. It seems to us, however, that the existence or nonexistence of such right of recovery is immaterial to the proper remedy for his evil. What is needed is abolition of the practice of inserting in bills of lading or shipping contracts any other charge than that

which may be collected under authority of law. That charge is the one which appears in rate sheets published by the carriers themselves.

Some provision should be added to the law which would require carriers, in every instance, to specify in bills of lading or shipping tickets the routing of the freight and the rate or charge lawfully in force for the transportation service to the point of destination, previous inquiry being made for the purpose of ascertaining such rate, if the same should not be known at the shipping station, and that notice to the shipping agent of an initial or sending carrier of intention to ship certain property between named points shall be sufficient to put upon such carrier the burden of inquiry into the proper rate or sum to be charged on such shipment; that the shippers shall have the right to designate the routing, and the initial carrier shall name only rates which are lawfully in force over routes so designated, and that, in the absence of such designation by shippers, it shall be the duty of the initial carrier to route each shipment by the least expensive route, and name the rate thereon which is at the time lawfully in force for the carriage of the property in question; that violation of this provision by an initial carrier, or the diversion by any carrier of the traffic from the route indicated in the bill of lading or shipping ticket, with which the waybilling of the carriers must correspond, or any change by a carrier in the rate or charge named in such bill of lading, ticket, or waybilling, or the attempt by any carrier to collect a different rate or charge than is specified in the billing of the freight, shall render the carrier liable to a fine, which should be made sufficiently large; that production of the bill of lading, shipping ticket, or expense bill, shall, together with copies of tariffs showing rates in force, be sufficient evidence of any such variation from lawful rates. Provided, however, that it shall still be the duty of every delivering carrier, when freight charges have not been prepaid, to collect only the rate or charge which may be lawfully in force for the carriage of goods included in any shipment, and the billing may be corrected accordingly by such carrier; but in every such case the carrier issuing the bill of lading or shipping ticket showing other than the rate or charge lawfully in force shall be subject to the fine above mentioned.

Though a provision of this character may appear unduly severe at first glance, a little consideration will show that it only aims to bring about what is already sought to be accomplished in the law by the second, sixth, and tenth sections of the present law.

The requirements herein suggested would, in our estimation, substantially eliminate practices of overcharges and undercharges from railroad operation. They would do more—they would make necessary to the carriers' business the simplification of tariffs, which are now so complex as to often puzzle transportation experts, and therefore induce them to do in their own interest what they have hitherto failed to do as a matter of general duty under the law. They would do still more—they would prevent all departures from established rates, except those which result from the secret connivance of shippers and carriers, or false statements by

shippers of the contents of packages offered for transportation; and would greatly reduce the number of supposed secret violations of the law. They would even do still more—they would tend to establish that spirit of observance of law as a matter of self-interest or self-protection which is highly conducive to the satisfactory operation of any remedial legislation.

Experience in the administration and working of the prohibitory and penal features of this statute has demonstrated the necessity for further legislation upon specific subjects, so as to render evasions of its general provisions unsuccessful. In other words, having enacted into law a proper and just theory or scheme of regulation, Congress should, as occasion arises, legislate with reference to methods of practical railroad operation whenever they appear to obstruct or evade the successful application of such theory or scheme. The Commission has been working constantly toward this end, not only in recommending amendments of the law, but in the discharge of its various official duties. It has, as elsewhere described, taken up the work of securing more definite and reliable forms of rate sheets, and has, after investigation and conference with carriers' representatives, issued a general order, the observance of which will accomplish a number of necessary reforms. And in order that shippers and consignees may be supplied with information which will enable them to protect themselves in some degree against the extortion and injustice occasioned by overcharges and undercharges, the Commission hereby invites shippers and consignees, as well as carriers and their agents, to apply to it for information as to rates in force on named commodities between specified points. Such requests, sent by mail or telegraph, will receive immediate attention and prompt reply.

The Act requires all individual and joint tariffs of rates to be filed with the Commission. The parties to the making of such tariffs are also required to post the same for public inspection in two conspicuous places in every station on their roads. But this requirement does not always afford knowledge of the rate or charge which is in force for carrying to a given destination. Such destination may be beyond the initial carrier's road, and on the line of another carrier with which it has no joint tariff. Such destination may not be included in joint tariffs applicable to other shipments from the shipping station, and the agent may not be supplied with precise shipping directions. But interstate rates are supposed to be on file with the Commission, and very many purely state rates are also for various reasons necessarily included in such filing. When doubt exists as to a rate, or when the verification of a rate quoted to a shipper is thought necessary, the shipper may become informed of the actual rate, so far as shown by our files, by making written or telegraphic request therefor. He is thus able to measurably guard himself from the damage and delays attending an undercharge or overcharge before the shipment takes place, and he can forward the information so received to his consignee as a basis for his action and protection. The consignee who has a shipment on the way, or

is about to purchase commodities to be shipped from distant points, may also make similar application, and upon demand of excessive charges by the delivering carrier tender the lawful sum, and if delivery be refused take the customary legal action to secure possession of the goods. This means of information will also be of material assistance to shipping agents who are unable to secure definite and early knowledge of the through rate through his usual channels of inquiry.

These statements of rates must, of course, be rather hurriedly prepared and forwarded to be of use to shippers in most cases, and therefore the information could not be guaranteed correct in every instance, but it is believed that the statements will rarely be found inaccurate. The application should, if possible, state the route which the shipment is proposed to take. If this invitation should be freely acted upon, the constant revision and increasing perfection of our tariff files which such examinations will cause, together with reforms in the carriers' methods of preparing rate sheets, which may fairly be anticipated, will bring about precision in this service by the Commission to the public.

CHANGES IN TRANSPORTATION CHARGES.

As an Appendix to its Fourth Annual Report the Commission published an elaborate and comprehensive paper, prepared by its auditor, in which an effort was made to present, statistically, a complete exposition of the more important changes in freight rates that had taken place since the passage of the Act to Regulate Commerce. As then summarized the result of these changes was stated as follows:

Where changes of any importance have taken place in the freight rates of any section, either for local or competitive traffic, in nearly all cases lower rates are now charged than prior to the date of the Act to Regulate Commerce.

Subsequently a more extended inquiry concerning the rates charged for railway freight transportation, covering a period of forty years (from 1852 to 1892) was undertaken by the Finance Committee of the United States Senate. Fifty-second Congress, and was placed in charge of the auditor of the Commission. The results of this investigation fully justify the statement above made.

A brief résumé of the latter report, with some addition of later data, will be appropriate at the present time.

The general basis of rate making, according to present railway methods, is the classification of freight. Although certain important commodities are still carried at specific commodity rates, far the greater proportion of articles offered for railway transportation are first arranged in a limited number of classes, and the charges finally applied are fixed at certain figures for each class. Obviously, therefore, reductions may be effected either by lowering the rate for an entire class, or by transferring articles from higher to lower classes. Important and far-reaching reductions are very frequently made by the latter method, and such reductions are very likely to escape attention if, as is frequently the case, observation is limited to the established class

rate without regard to the classification of freight in force. Investigation definitely directed to classification shows that the transfer of important articles, and the constant addition of new commodities, to the list of those for which lower rates are given for carload than for less than carload quantities, have resulted in changes quite as important as any that can be cited.

With a constantly increasing number of articles in the classifications, it is shown that since 1887 the proportion assigned to first or highest class in the official classification has been reduced 4 per cent, the articles represented by this figure being now in the lower classes and accordingly carried at lower rates. Were data available as to the tonnage movement in each class more satisfactory information could be obtained bearing upon the importance of these changes. The proportion of articles under the official classification in 1887 taken at less than carload rates was 55.07 per cent; those charged carload rates were 44.93 per cent. Under the present classification only 38.45 per cent are classified as carloads, and 61.55 per cent are provided with carload rating. The variation here shown of 17 per cent indicates important changes and also represents reductions in charges through the lowering of the classification. The report referred to will show similar changes for the other principal classifications.

Following that portion of the Senate report dealing in changes of classification is an extended presentation of the decline in competitive rates, illustrated by numerous tables showing, wherever possible, the actual charges for specific commodities, rather than class rates. It is impracticable to present here sufficient examples to illustrate the extended reductions shown by that report, and it will probably suffice to say that they cover the entire country, and include all important articles commonly offered for shipment by rail. Data were also given illustrating corresponding reductions in charges for river, lake, and ocean transportation, and also summarizing the entire results of the decline in railway rates by statements showing the average charges per ton per mile during an extended period on a large number of the more important lines. These tables are supplemented by others, exhibiting for the same lines the tonnage carried each year, the aggregate transportation performed, measured by tons carried one mile, and the gross revenue from freight traffic. Numerous tables are devoted to changes in local rates, showing an equal if not greater general reduction.

Only from an extended inquiry would it be possible to accurately estimate the total reductions effected since the passage of the Act to Regulate Commerce, but that it has been very considerable is well known. During the five years from 1889 to 1893 the entire transportation performed by the railways of the United States, as shown by the reports of the statistician of the Commission, has been equal to moving 63,837,849,326 passengers and 407,837,116,623 tons of freight one mile, and the aggregate amount of revenue to the carriers from passenger and freight transportation during those years was \$5,106,302,794. The statistician

has also reported the average receipts per passenger and per ton of freight per mile for each of these years and for the year 1888. Comparing the amounts received by the railways for transportation with amounts which they would have received on the volume of traffic carried from 1889 to 1893, if the average receipts per mile for 1888 had been maintained during the subsequent five years, it appears that the public would, in such case, have paid for freight and passenger transportation by railroad from 1889 to 1893, inclusive \$525,459,587 more than was actually paid for such transportation during that period. Of this sum \$133,500,982 would have been added to passenger and \$391,958,605 to freight revenue.

These figures demonstrate the great bearing which a largely increased volume of traffic has upon railway rates. That the above-mentioned large difference between actual revenue based on the average rate of 1888 was rendered possible by the greater economies naturally incident to the continuous increase in density of traffic, is shown by the fact that the net income from operations per mile of line was greater in 1893 than in 1888. What such difference would have amounted to, or whether there would have been any reduction whatever, if the volume of traffic had, instead of increasing yearly, remained as small as it was in 1888, we cannot, of course, undertake to say. The extent of actual reductions are best indicated in the following statement of average receipts per mile on freight and passenger traffic for the years 1888 to 1894 inclusive:

Years.	Freight revenue per ton per mile.	Passenger revenue per passenger per mile.
	Cents.	Cents.
1888	1.001	2.349
1889922	2.165
1890841	2.167
1891866	2.142
1892898	2.126
1893878	2.108
1894866	1.976

But we cannot say that the reductions should not have been greater, nor that they are altogether represented by changes in published tariffs, or that they have been justly distributed among the various articles carried and between the communities served.

It should not be understood, however, that what is properly termed the tendency toward lower charges operates without important occasional exceptions and even temporary suspension. While, as shown in the above table, there are few years during which the average of all charges does not prove lower than during any which have preceded, it is not at all unprecedented to find that, as during the current year, the changes in important rates have included many advances. Without attempting to enumerate the causes which may or may not justify the evident attempt in certain sections of the country to place competitive rates upon a higher permanent basis, it is of interest to note some of the changes which have apparently had that result.

On October 15, by joint action of the lines

comprising the Southern Railway & Steamship Association, rates *via* the all-rail routes from New York, Boston, Philadelphia, Baltimore, and points taking the same rates to all points in the southern states east of a line drawn from Chattanooga, Tenn., to Meridian, Miss., and from thence to Mobile, Ala., were advanced 4 cents per hundred pounds on classes 1, 2, 3, 4, and H, and 3 cents per hundred pounds on the remaining classes. This was an advance over rates which had prevailed during practically the entire period since this Commission was created, but it did not affect the charges *via* the various steamship lines operating from the cities named to Norfolk, Portsmouth, West Point, Savannah, and Charleston in connection with rail lines from those ports to destination, which receive a large and important portion of the traffic.

Since December 20, 1887, the rates on first class freight between Chicago and points on the Missouri river have not been higher than 75 cents per hundred pounds until July 1 of the current year, when an advance was made to 80 cents per hundred pounds. Rates on the lower classes were also increased. On the same date an advance was made in the rates between St. Louis and other Mississippi river points and points on the Missouri river, from 55 cents to 60 cents, first class, with proportionate increases on the other classes. The new rates are in each case higher than any which have been in force since December 20, 1887. As they apply in both directions and are the basis of all freight charges between the east and interior points west of the Missouri river, they affect a large amount of traffic. A complaint is now pending before the Commission, in which the reasonableness of these rates is involved.

Packing house products and live hogs have been taken from the Missouri river to Chicago for a considerable period at the published rate of 22 cents per hundred pounds. On July 1 of this year this rate was increased to 23½ cents per hundred pounds, which, when the amount of the tonnage of these articles is considered, is seen to be an important advance. The rate on packing house products from the Missouri river to St. Louis was at the same time advanced from 15 cents to 18½ cents, or 8½ cents per hundred pounds.

On June 20, 1894, advance was made in the rates charged between Chicago and Colorado points, including Denver, Pueblo, Colorado Springs, etc., from \$2 to \$2.32 per hundred pounds, and in those between Mississippi river points and Colorado common points from \$1.80 to \$2.12 per hundred pounds, on first class freight, with corresponding increases on other classes.

The current year has not been characterized by many especially significant changes toward permanently lower charges. Probably the most notable change was the reduction, on February 27, of the rate on grain and flour from Chicago to New York from the normal sixth class rate of 25 cents per hundred pounds to 20 cents per hundred pounds, the reduced rate remaining in effect until November 12, a period seldom equaled in duration by any similarly low rates by the all rail routes.

This rate is not only that at which these ar-

ticles are carried from the greatest grain market in the country to its principal port of export, but is also the basis of grain and flour rates from all western territory to all points on or adjacent to the Atlantic seaboard, and this reduction accordingly affected a corresponding change in the rates charged for carrying most of the grain and flour produced in the United States and not consumed at or near the point of production.

A concurrent reduction in the rate on grain and flour from St. Paul and Minneapolis to Chicago, which is used in connection with the rate on the same articles from Chicago to New York in making rates to the East, is of interest in this connection. This rate has formerly remained at 12½ cents per hundred pounds, with but few fluctuations. On April 10 a reduction to 10 cents was made, and on May 16 to 7½ cents. The latter rate has since remained in force, but the roads have issued notice of an advance to 10 cents, to take effect December 3, 1894.

The rate on these commodities from Chicago to New York *via* the Great Lakes to Buffalo, Erie, or Fairport, and rail lines to destination has remained practically throughout the entire season at 15 cents per hundred pounds, which is 5 cents lower than the normal charge during former seasons.

It is ascertained that the receipts of wheat and corn at the four ports—New York, Boston, Philadelphia, and Baltimore—from February 25 to October 27 of the current year (during which period the all rail rate of 20 cents, above referred to, was in effect from Chicago) were as follows:

Wheat	bushels..	41,770,113
Corn	do.....	21,156,854
Total		62,926,967

This amount is of course considerably less than the amount affected by the reductions above referred to, but the fact that 5 cents per hundred pounds on this quantity amounts to \$1,845,495.30 tends to show the importance of the change. Other reductions in important rates have occurred that were apparently due to local and temporary causes, such as those noted in relation to changes on traffic from eastern and western cities to points in the southern states, which are treated of elsewhere, and in most cases the restoration of the former rates has been effected.

THROUGH ROUTES AND THROUGH RATES.

Carrying goods and forwarding passengers over connected roads under one billing or ticketing, and making a single charge for the whole service by adding rates in force on different parts of the line, are common features of railroad business, necessary to convenient and economical operation, and recognized as among the transportation requirements of commerce and trade. This kind of through routing and through rating is rarely denied to the public or refused by one connecting carrier to another, but carriers sometimes decline to take goods from or send them by another carrier under one billing and without transfer into other cars, although local rates are offered, when by so doing they can secure a

onger haul for their own lines or hold traffic on a road with which they have close and favorable running connections.

The manner in which through service is conducted enters largely into the question of through routing. Suitable facilities for the prompt interchange of traffic between connecting roads frequently include the joint use of yards, union depots, convenient switching racks, train connections for passengers, and the early forwarding of freights by connecting lines. Facilities of this character, though necessary to reasonable through routing service, are often withheld from one carrier and allowed to its competitor. Such discrimination in respect to the facilities for traffic interchange has been effectively used to injure interests of one road and favor those of another, without regard to resulting damage to business enterprises located along the road of the nonfavored road.

As shown in our former reports, the facilities clause of the third section, when invoked by one carrier as against another, has been construed by the courts to mean little, if anything, more than a duty on the part of one carrier to receive traffic from another carrier and forward it as a purely local shipment. What might be done upon complaint of interested shippers or injured localities under the general prohibition in the third section against giving undue or unreasonable preference or advantage to any person, firm, corporation, locality, or description of traffic, or subjecting any person, firm, corporation, locality, or description of traffic, to undue or unreasonable prejudice or disadvantage in any respect whatsoever, has not been determined. This general provision against injustice through affording or withholding favorable facilities or rates may operate to remedy grievances shown in some cases, but under the ruling of the courts to the effect that a carrier is not prohibited by the statute from selecting the carrier with which it will make the most favorable through routing arrangements, there is reason to fear that such right will not be held subordinate to the interests of localities or shippers on the road to which the more advantageous facilities are denied.

The provision in the latter portion of the third section, that carriers shall not "discriminate in rates between connecting lines," has been held by the Commission and by a United States circuit court to require similar rates in a case where it appeared that the facilities for interchange provided by the suing line were substantially equal to those furnished by the favored line. Whether in a suitable case this language of the statute would be judicially construed to mean more than this is extremely doubtful. Congress evidently intended those words to stand as an absolute prohibition against favors in rates to one connecting road as against another, but it is also as clear that the requirement to afford all reasonable, proper, and equal facilities for the interchange of traffic was intended to prohibit giving one road an advantage over another connecting road in the matter of routing arrangements. This intention has not been recognized by the courts as being expressed in the statute, and the prohibition against discrimination in rates between connecting lines has so far been given a limited application.

4 INTER S.

The fundamental defect in the through routes and through rates clause lies, however, in the absence of any provision in the statute under which through routing facilities and through rates, which are less than the sum of rates separately established by the connecting carriers, can be required. A provision of this character, so worded as to be capable of direct application, and yet leave open to carriers proper opportunity for agreement as to rate divisions and routing details, would enable the Commission to give due effect to the legislative intention to affirm the right of the public to continuous transportation at through rates reasonable in themselves and relatively reasonable to different localities. The simple assertion of such a right without providing specific means for its enforcement has proven inadequate. Courts are loth to require unwilling carriers to enter into traffic arrangements, which include the making of joint rates lower than the sum of separately established charges, in the absence of clear expression of the legislative will and provision for giving effect to the statutory requirement. The result is that the second paragraph of the third section of the law, the through routes and through rates provision, is practically inoperative on account of the limited meaning which has been given to its somewhat ambiguous phraseology and the fact that the statute does not provide means by which a reasonable joint through rate can be required and established.

When the rate over one connecting line is a single or joint rate, and that over another connecting line in the same territory is merely a combination of individual charges, regulation of rates, in the absence of power to require joint through rating, cannot be effectual. If a through route over connecting roads is a reasonable one, the public is entitled to a rate over such route which is based upon the whole distance and the entire service, and should not be required to pay the sum of rates established for portions of such distance and for distinct services over parts of the route. Whether this right of railway patrons to through service at such through rates shall be accorded or withheld over any such route now depends altogether upon the will of the carriers; there is no statutory provision under which a through rate over different roads based upon the through distance and through service can be determined and required to be put into effect in case the carriers refuse to make the joint rate themselves. The statute should be amended in several important particulars, but we regard this failure of the through routes and through rates clause to operate in accordance with the legislative will as one of the most embarrassing of the discovered defects in our scheme for railway regulation. The power to enforce a reasonable joint rate over a practicable through route, composed of two or more roads or rail and water lines, is indispensable to the effective and impartial operation of the provisions prohibiting unreasonable or unjustly discriminating charges, undue preference to some and prejudice to other persons, or localities, or kinds of traffic, and greater charges for shorter than for longer distances.

After spending more than sixty years in the development of a system of railway service

which shall meet the needs of an ever-increasing volume of commerce; after building and putting into operation nearly half the railway mileage of the world; after aiding the construction of long transcontinental lines by immense grants of lands and national credit, with a principal view to through transportation at relatively low charges, not only over such aided lines, but over those which might choose to connect therewith; after passing a Federal statute more than twenty-eight years since providing for the physical connection of railway tracks of different carriers so as to form continuous lines of transportation, and thereby freeing the carriers from any trammels upon the formation of such continuous lines and transportation thereover; after passing a general regulating statute in which the duty of performing such continuous transportation at duly published and reasonable rates and without undue preference or discrimination in favor of persons, communities, or kinds of traffic is distinctly imposed, after all this effort and time, we are forced to realize that the progress of communities and the prosperity of persons, which are so greatly influenced by fair or unfair railway service and railway rates over connected roads, still depends very generally upon the inclination of carriers to enter into joint through rate agreements. The location of new business enterprises is frequently settled since the passage of the Act to Regulate Commerce, as well as before, not so much by the wishes of those who control them and the advantages for economical production or trade afforded at particular places as by the favorable transportation rates which railway managers can be induced to put in force.

Joint rates over connecting roads are no longer a public convenience which the carriers are able to afford through great economies in operation and because of very considerable offerings of traffic; they have become a commercial necessity which, as a rule, the carriers find no difficulty in supplying at will with reasonable certainty of profit from rates duly adjusted to the places they serve. Neither is the joint rate of two carriers to be regarded in any sense as exceptional to the general method of rate making employed by individual carriers. Individual and joint rates are based upon the same general plan. A rate of 10 cents from one station to another station and another rate of 10 cents from the second station to the third, all on the same road, do not imply that the rate from the first to third station should be 20 cents, the sum of the two locals; it may, without wrong to any one, be 15 cents, or perhaps 12 cents. Indeed, if roads charged the sum of station-to-station rates they would be subject to the most energetic complaints of extortion, and the volume of traffic would be comparatively small. So with two roads having an individual rate of, say, 25 cents over each, the joint through rates over both roads may be 35 cents, or even less, without undue prejudice to any one, and may be necessary to the fair interest of through traffic.

The main limitation upon both the single and joint rate is that neither shall be less as a whole than any intermediate rate; otherwise

there is an obvious prejudice, which in the absence of exceptional circumstances, the law forbids. If, therefore, the joint through rate is an easily supplied commercial necessity and not exceptional to the usual rate-making methods, there can be no valid objection to vesting the regulating authority with power to order through routes and through rates which connecting carriers refuse to provide, but which appear to the Commission to be reasonable, necessary for the public welfare, and not injurious to any interest of the carriers which should be protected.

To insure reasonableness and uniformity, the scope of regulation should be coextensive with the progress of railroad operation, so that what is right may be required as well as what is wrong prohibited. The absence of any provision in the statute by which the joint route and rate can be required renders regulation halting and defective, deprives many carriers of a legitimate share of through traffic which would be created by reasonable through routes and rates, subjects trade and commerce to unnecessary restraints, and confines much of the business of numerous towns to their immediate localities. Whole sections of the country pay on some traffic the sum of rates to and from certain rivers arbitrarily used as dividing lines; places reached by a single road are often deprived of through rating facilities as to all classes of traffic, while junction points in their vicinity receive the benefit of joint traffic rates; other localities are, for carrier's reasons, denied through joint rating on some important kind of goods while it is freely afforded on other articles between the same points.

Again, the lack of procedure under which denied joint rating can be compelled often forces carriers into irregular rate-making practices not recognized by the Act to Regulate Commerce. These are covered by the phrase "proportional rates," that is, less than regular rates in force between the same points, and intended to be applied on traffic destined to a point beyond carriers own line. Thus carriers between the east and Mississippi river points have regular rates in force for traffic confined to those points, and lower or proportional rates for carrying goods destined through those points to places on the line of another carrier west of that river, such goods taking the local rates of the western carrier added to the proportional rates to the river. This practice, which results in eastern carriers having two sets of rates to the Mississippi river is also in vogue in other sections of the country, and is the subject of a complaint brought before the Commission by an eastern road against a connecting line reaching points in New York. Proportional rates result from the failure of connecting roads to make joint rates, and aside from the question of legality, the carrier making them must bear the burden of the entire reduction so made from the sum of individual rates of the connecting roads which, under an agreement for joint through rating, would be borne by both, and perhaps represent a less through charge to the public than under the proportional rate plan.

The article in our last annual report, entitled "Connecting and Continuous Lines," set forth many illustrations of this defect in the law

and specific reasons for this amendment. As is said under another heading in this report, what the carriers fail to do in the direction of necessary transportation reforms is generally proper for Congress, through appropriate means, to require. This is particularly true of the through joint rate over connecting roads, which is capriciously afforded or denied throughout the country according to prevailing notions of railway management. The through joint rate is an undeniable public benefit; it is the transportation facility which, more than any other, has enabled the products of all sections of the country to be exchanged or compete for sale in common markets; it is one of the great mainsprings of our commercial progress. But the joint-rating facility has, on account of its irregular and capricious application also been a costly benefit to the public, for being applied or withheld by the carriers at will, it has frequently promoted the competition of carriers so that carrying would be done at little or no profit, while, through exaction of much higher rates at many points to which through rating has been denied, the legitimate competition of many communities has been restricted or destroyed. So potent is the through joint-rating facility that it can, and often does, result in confining trade to channels favored by the carriers. Such a tremendously powerful instrument for good or ill to the business interests, not only of persons but of towns and localities, and even great sections of the country, and of connecting carriers also, should not henceforth be left in the hands of the carriers to be exercised without control or regulation.

This power to establish through routes and regulate through rates has been exercised by the English commission for years. The third section of our Act, which includes the through routing clause, was modeled after the English statute of 1854, and the amendment suggested in our former reports to Congress is framed upon provisions in the acts of Parliament of 1873 and 1888.

The absence of such a remedy entails upon trade and carrying interests yearly damage to the amount of many millions of dollars. The fact that needed through rating facilities can be denied with impunity in a single instance would be sufficient reason for Congressional action, so large is the amount of current railway business; and when the entire traffic conducted over nearly half the world's railway mileage is subject to such denial of continuous transportation at through joint rates without any effective legal remedy, the necessity for an amendment of the regulating statute in this respect becomes imperative. We, therefore, earnestly renew the recommendation in our last report that the following clause be added to section 3 of the Act to Regulate Commerce:

The facilities to be afforded shall include the due and reasonable receiving, forwarding, and delivering by every such common carrier, at the request of any other such common carrier, of through traffic at through rates or fares. If any one of such common carriers shall desire to form a through route for interstate traffic or any class thereof over its own line or any part thereof, in connection with the line, or any part of the line of one or more other common

carriers, it shall address a request in writing to the other common carrier or carriers, describing therein the proposed route specifically, and naming proposed through rates or fares and divisions thereof for such traffic, and shall deliver such request to such other carrier or carriers, and also transmit a copy thereof to the Commission hereinafter named. If the other common carrier or carriers shall not, within ten days after receiving such request, make and serve and file with the Commission written objections either to the proposed route or to the proposed rates, fares, or divisions, the same so far as not objected to shall be deemed agreed to; but if either the route, the rates, or fares, or the divisions are objected to, the objection shall be stated in writing and transmitted to the Commission, and the Commission shall then have power to determine whether, having regard to all the circumstances, the route proposed is demanded in the public interest and is a reasonable route for the traffic, and if the Commission shall so find, and the rate or divisions are not assented to, the Commission shall have the further power to prescribe the same; but the Commission in any case in apportioning the through rate shall take into consideration all the circumstances of the case, including any special expense incurred in respect of the construction, maintenance, or working of the route, or any part thereof, as well as any special charges which any such common carrier may have been entitled to make in respect thereof, and it shall not be lawful for the Commission in any case to compel any company to accept lower mileage rates than the mileage rates which such company may for the time being legally be charging for like traffic carried by a like mode of transit on any other line of communication between the same points, being the points of departure and arrival of the through route. Said Commission, at the request of any person interested in interstate traffic, shall institute, or on its own motion said Commission may begin, proceedings to form through routes over connecting lines in the same manner and to the same effect as though such proceeding had been instituted by a common carrier, as provided in this section.

POOLING OF FREIGHTS AND DIVISION OF EARNINGS.

It must be conceived that the vigorous effort now being made to remove the statutory prohibition against railway pooling is prompted to a great extent by the serious diminution of revenue from railway traffic which has been caused by open and secret cutting of competitive rates. It is also commonly believed that a restraint upon the competition of carriers which will prevent secret rate cutting, and such open rate reductions as are not demanded by the needs of commerce, is necessary to the successful operation of the law. The prevention of this illegitimate competition in transportation by proper amendment of the statute is therefore generally desired; but while all parties are united in a common desire to eradicate the evil, there is the widest difference of opinion as to the means to be employed.

Those who oppose pooling assert that it is

calculated to stifle legitimate as well as illegitimate competition between transportation agencies, and therefore should not be allowed. Those who most strongly favor the practice contend that pooling has no influence upon rates except to give them stability and prevent rebates to favored shippers, and that there is nothing in the practice which can operate in derogation of the public interest. Others who take less extreme views believe that pooling can be so restricted through legislative action as to produce no new evils and yet greatly benefit both the shipping and the carrying public.

The objection commonly urged against pooling, that it is in the nature of a trust and liable to operate in restraint of commerce and trade, is certainly well grounded when directed against railway combinations not formed under authority of law; but it is to be expected that a statute which shall permit any form of railway pooling will effectually eliminate from the practice all those features of the trust which in pooling might be detrimental to public interest or individual enterprise. If this cannot be done, the pooling proposition should be discarded; but if this can be accomplished, then consideration of the plan should not be refused merely because unregulated pooling would be objectionable.

Devising and putting in force an apparently safe plan of conditional pooling cannot, however, be deemed alone sufficient for present urgent needs. Though properly regulated pooling may appear to be a remedy for many transportation abuses, there are others equally grave which cannot be cured without further specific legislation. These are fully described in our reports to Congress. Moreover, it should not be overlooked that if civil and criminal violations of the statute were not so numerous, and the competitive relations of carriers merely resulted in diminishing railway revenues, the pooling proposition would receive but little countenance, and the carriers would probably be left to cure the evils resulting from their own follies in competition. The prevention of these violations must be the principal object of any amendment which may be passed, and allowing the carriers the extraordinary privilege of pooling, however carefully guarded against abuse and however desirable it may seem before trial, cannot with safety be solely relied upon to accomplish the intended purpose.

That legalized pooling would, while the agreements are respected by those who make them, tend to maintain and compel adherence to published rates may be readily admitted; but it might not be difficult for dissatisfied parties to such contracts to find legal pretexts for breaking them or compensating reasons for so doing, although the penalty for the breach should be large. The law reports disclose many instances of successful contract evasion and competitive traffic so large that railway managers will risk fine and imprisonment in order to obtain it might tempt repudiation of the most solemn agreement. It is essential that any pooling privilege however carefully conditioned, shall be supplemented with such other enactments as seem best calculated to insure general obedience to the law, and to ren-

4 INTER S.

der the Commission's present duty to "execute and enforce" the statute capable of efficient performance.

It is not easy, however, to frame a bill of this character. There is, in the first place, much difference of opinion as to what constitutes an attribute of general conformity with the provisions of the statute. Many railway managers assert that interstate transportation now being conducted in conformity with law, except where competition between themselves has forced them into violations in order to obtain or retain carrying business. In this they are mistaken. Very many civil and criminal violations of the law have been indulged in which cannot be properly traced to the carrier's competitive relations. These violations, as well as those which do arise from competitive conditions, should be prevented as far as possible in any Act which authorizes pooling.

Our reports show many instances of injustice to places whereby their legitimate prosperity has been retarded or destroyed. Rates established under pooling contracts would not be in effect at numerous places which are competing for trade with localities where the pooling rates would be in effect; and thus, by operation of the proposed law, one set of rates would be made by individual carriers, while control of the other set would be legally exercised by or through the pool. It seems to us that points not covered by the pooling contract should receive as ample protection in conditional pooling legislation as those which may be directly affected by the pool, and that any additional authority which may be conferred on this Commission to annul or modify the pooling contract, and control rates or facilities maintained under or affected by the pooling contract, should also extend to rates and facilities which are not maintained under or directly affected by the contract.

Before concluding this article we desire to call attention to the claim of pooling advocates that the pooling contracts can have no effect upon competitive rates except to promote their maintenance and observance. We do not think this a sound proposition. The mere fact that a pooling contract is in existence does not concern railway patrons or communities. That which may be done under such a contract is what vitally affects the public interest, and is what has led to the line of decisions, including a recent opinion emanating from high judicial authority, to the effect that pooling not authorized by law is contrary to public policy. A common agreement as to rates and their observance is necessary to the successful operation of a pool. It is beside the question to say that, throughout the old pooling territories, competitive rates have been agreed upon by the carriers since pooling was prohibited. Continuance of rates in force has nevertheless been voluntary, while under these contracts established rates would be kept in effect until the parties thereto agree upon a change; and it is plain, moreover, that a substantial advantage accrues from an arrangement for division of earnings which would make a carrier willing to keep rates in force that, without it, would be reduced. The division of earnings would also probably reconcile a carrier to the establishment of lower rates than would ordin-

irily be charged over its lines. The effect of a legalized pooling contract upon rates would be, therefore, to require the parties to agree, while now they only do so voluntarily.

The extraordinary and forceful powers of any combination of persons over those of an individual are to be continually borne in mind at every point in the formulation of any bill on this subject, and it is folly to suppose that a combination of carriers would not, in the absence of legislative restrictions, have immensely greater power over rates than those possessed by individual carriers, or that such power would not be exercised in the direction of higher rates, if it should appear that the private interests of the carriers would be served by such action.

Although the Commission has paid much attention to the subject of pooling in former reports, it has not taken a position in favor of or against a renewal of the practice, but has confined itself to collecting and laying before Congress the opinions and views of carriers, shippers, commercial bodies, and others interested in, or who have made a study of, the subject of transportation. In deference to such opinions, and in view of the earnest consideration which has been given the subject by the committees of Congress, and because of urgent requests by Senators and Representatives for some expression as to the policy and advisability of legalized pooling, we submit for the consideration of Congress that pooling without other remedial legislation is, we think, inadvisable. Pooling under conditions to be approved by the Commission and rendered capable of easy and direct regulation, with accompanying effective remedial legislation, we believe, might safely be tried. Amendments recommended to Congress in this and former reports should be adopted. Each of them is necessary to remedy some existing transportation evil, and some of them would accomplish reforms and public benefits indispensable to the original purposes of the Act.

ANNUAL REPORT OF COMMON CARRIERS.

Pursuant to section 30 of the Act to Regulate Commerce, reports are required to be made to the Commission by all common carriers subject to the Act, showing in detail the amount of capital stock issued by each of such common carriers, the dividends paid, its surplus fund, the funded and floating debts, the interest paid thereon, salaries paid, amounts expended, how expended, the earnings and receipts from all sources, the balance of profit and loss, and a complete exhibit of the financial operations of the carrier for each year, including an annual balance sheet.

In response to this requirement an important railroad system filed with the Commission a report, verified by the oaths of its president and auditor, for the year 1893. It subsequently appeared from a statement made by an expert accountant, who made an examination of its affairs and accounts on behalf of parties interested therein, that during the period covered by said report large sums of money had been paid out by the company by way of rebates and drawbacks, but were falsely covered under the head of legitimate expenditures.

INTER 8.

Under the existing law no indictment for perjury can be predicted upon such false and fraudulent report, though made under oath. In order to prevent the making of such false reports, offenders in this respect should be subjected to punishment for perjury. It is important also that carriers required to make reports under the law should be subject to reasonable penalty or forfeiture for failure to do so. The Commission therefore recommends that section 20 of the Act referred to be amended by striking out the first sentence and inserting in lieu thereof the following:

That the Commission is hereby authorized to require annual reports, verified by oath, from all common carriers participating in interstate commerce, and from all companies or corporations owning railroads over which interstate commerce is carried, to prescribe the manner in which such reports shall be made, and to require specific answers therein to all questions upon which the Commission may need information.

And also by adding to said section the following:

Said detailed reports shall contain all the required statistics for the period of twelve months ending on the 30th day of June in each year, and shall be made out and filed with the said Commission, at its office in Washington, on or before the 15th day of September then next following, unless additional time be granted in any case by the Commission; and if any common carrier subject to the provisions of this section shall fail to make and file said annual reports or shall fail to make specific answer, under oath, to any lawful question authorized by the provisions of this section within the time herein provided, such common carrier shall be subject to a penalty of one hundred dollars for each and every day it shall continue to be in default as aforesaid shall be deemed to be a separate offense, and the district courts of the United States for the district in which the principal office of such delinquent carriers shall be located shall have jurisdiction to enforce the penalty herein provided for upon information to be filed by the United States attorney for such district.

Such annual reports shall be verified by the oath of the president, treasurer, comptroller, auditor, or receiver of such common carrier, administered by a notary public, United States commissioner, or judge of a United States court.

GOVERNMENT OWNERSHIP OF RAILROADS.

This subject has received the attention of writers on different phases of the railroad problem, and indeed of the general public, to a considerable extent during the past year.

The Commission is inclined to the opinion that on controversial questions of this nature, not directly involving matters specifically covered by the Act to Regulate Commerce, its duty is best discharged by presenting the facts bearing upon and necessary to an intelligent determination of the question, rather than to undertake a statement of the argument pro and con.

On this line the Commission made a preliminary report in response to a resolution of the Senate passed August 24, 1894. The facts

then collected will be found in Appendix hereto.

In that preliminary report the subject was treated, as therein expressed, under four heads, as follows:

(1) Relations of Governments to the railroads of the world.

(2) The data thereon tabulated.

(3) Comparison of freight and passenger rates on Government-owned railroads and on roads within the United States.

(4) Views of various writers on the subject.

Under all of the above headings the facts are so broadly and concisely stated, and yet cover the ground so fully, that nothing would be gained by undertaking here to give an abstract of the same. The whole will be seen by turning to the Appendix.

There is, however, one consideration that should be kept in mind in connection with the facts bearing upon this question, and that is whether the more objectionable features of railroad management under private ownership which are relied upon to support the argument for public ownership, can not be remedied by legislative regulation through the instrumentality of a commission quite as effectual as by government acquisition and control.

There are some amendments to the Interstate Commerce Law, as the Commission has repeatedly pointed out, which are required to make the law express what it was generally understood to mean, and which have been found essential in order to secure reasonableness in rates and equality of treatment by railroad carriers.

There may be serious objections to government ownership, even if it is legally possible to provide for the compulsory transfer of the railroads to the government. For illustration, the railroad mileage in the United States is, in round numbers, 177,000 miles, nearly one half of all the railway mileage in the world. The amount of its stock and bonds is more than \$10,000,000,000. The employes fall but little below a million persons. To become the owner of all this property would involve the government in tremendous debt; to operate it would involve a patronage eclipsing all precedent in the civil administration of the Government. Thoughtful men believe that the creation by this government of such a debt and such a patronage should be avoided if possible, both on political and commercial considerations.

Omitting a restatement of the many other objections which writers offer to state ownership and control in this country, perhaps of less weight than the above, it may well be said that experience has not yet shown and no satisfactory reasons have been advanced why legislative and administrative regulation can not bring about all needed reforms in railway management.

No one has ever attacked the fundamental principles of the national law. It is based on the just idea of reasonable rates and equality of treatment in the broadest sense. The statutory machinery, if we may so term it, to secure these results, has been found inadequate in some measure, but this may be accounted for by the fact that the law is of recent origin and to a certain extent tentative. The time for dis-

4 INTER S.

cussion of amendments has been short. Other questions have absorbed the attention of Congress and the country. Legislators have hardly yet come to realize that this matter exceeds all others of a public nature in its importance to commercial interests and general prosperity. It is a source of encouragement, however, that discussion in and out of Congress during the past year has taken on a breadth of view and an intelligence and vigor that give promise of early and advantageous results. It is to be remembered that a statute like this, covering a new field of legislation, is generally and naturally the result of a compromise between different and conflicting theories, and that debatable questions as to the intent and interpretation of various provisions must inevitably arise, to be settled by the decisions of the courts or by amendatory enactments.

It is necessary in this matter not only to discover a remedy for existing evils, but to find one that will avoid other evils of still more dangerous character.

THE GREAT STRIKE OF 1894.

This report might be deemed incomplete if it omitted to notice the great railway strike which took place during the year. The history of this unprecedented contest between railway employes and employers has been fully detailed in the press of the country, and officially reported by the "Strike Commission" appointed by the President under the provisions of the Act of October 1, 1888. Soon after the trouble commenced, one of the large railway systems having its headquarters at Chicago requested this Commission to take such action in the premises as would remove the trammels on interstate commerce which were created by the strike. We were obliged to reply that the Commission possessed no authority to relieve the situation. The employes interested in the controversy, as a body, had determined to cease from labor pending the continuance of certain conditions, and it is conceded that this resulted not merely in interference with interstate traffic, but that it served for a time to bring transportation to a standstill in various parts of the country, and especially on lines centering in Chicago.

Although the Act to Regulate Commerce requires interstate carriers by rail to perform continuous transportation, provide reasonable and proper facilities for the prompt forwarding of traffic over connecting lines, and to refrain from subjecting shipping interests to undue prejudice; and although this Commission is required "to execute and enforce" the provisions of the statute, no power is conferred upon us to remove obstructions to interstate commerce which are not brought about by the carriers themselves. Even in cases against the carriers the statute has been judicially construed to have such limited application as to be practically valueless in matters involving the furnishing by carriers of suitable facilities for continuous carriage over connecting lines; but, whatever may be the extent of our authority in proceedings against carriers, it is clear that the law gives the Commission no jurisdiction of parties not common carriers, and that any order it might issue in regard to the strike or its con-

quences must have been directed against the carriers and not against their employes.

But while this lack of power in the Commission was evident, it was not so clear that the exercise of general investigating functions by the Commission, which is required by the statute, did not include a duty to inquire into the causes of the strike, its conduct on both sides and its results, and make a report thereon with such recommendations as might be warranted, not only for the future guidance of the carriers, but for the information of the public and as a basis for legislative action.

It was manifest early in the contest that the damage to commercial and consuming interests through the various obstructions to traffic would be almost beyond computation, and it was frequently claimed that the carriers themselves were not confining their actions during the struggle to an attitude of resistance merely, but were endeavoring in some ways to make the public believe that their inability to move traffic was greater than was actually the case. But the propriety, while the strike was in progress and the minds of all parties were inflamed, of carrying on an investigation which must take a wide range and include matters outside of our jurisdiction was extremely doubtful; besides, it seemed certain that, in the absence of express direction by Congress through resolution or otherwise, our investigation would be resisted by one side or the other, and perhaps both, according as inquiry might involve interests not subject to the Interstate Commerce Law; and this consideration was given additional force by the fact that Congress was then in session. Still another deterring reason was the law of October 1, 1888, which provides for investigation in cases of this character by a special tribunal to be appointed by the President, and the general belief that in a matter so grave as this the President would make the necessary appointments and direct an investigation through such a commission.

These facts seemed controlling at the time, but we desire to state, in the light of present knowledge, that under a recurrence of similar conditions we might feel it our duty to attempt an investigation. Innocent of criminal intention, as the strikers and employers may have been, great exertion both by the executive and judiciary was required to repress the lawlessness which attended the progress of this strike; and while any action on our part could have had no immediate result, the report of our inquiry might have added something to the knowledge of facts necessary to devising proper methods of dealing in the future with the question of labor as affecting railway transportation and public interests connected therewith.

We still think, however, that an investigation by us would have been limited to the scope of our jurisdiction, for at such a time of anger and excitement, the courtesy which could extend needed information would probably have been refused. Without making any specific recommendation, it seems to us that when contests between railway employers and employes take place, the tribunal charged with the duty of railway regulation should have express statutory powers to investigate the acts of

all parties, and not be restricted to inquiry into the methods of carriers alone.

This Commission has the care of public interests as affected by railway operation, and to this has been added by recent statute the duty of supervising the use of safety appliances on railroads. The familiarity with railway methods and requirements, and with the risks and needs of railway labor, acquired by the Commission through the exercise of its functions, would be a material aid in investigations of labor contests on railways, and such inquiries, though directly authorized by statute, need not interfere with investigations by other bodies which have for their express object the settlement of the immediate controversy. An inquiry by the Commission would be with a view of promoting the public interest, though incidentally all concerned might be benefited.

While we do not desire to embarrass other proposed measures, it seems proper to suggest that whenever strikes or lockouts are apprehended by either railway management or railway employes, or by the Commission, which would be likely to bring about serious injury to commercial interests and the public generally, that the Commission should have authority to enter upon immediate investigation, have the testimony of all persons and the aid of judicial process to compel the giving of such testimony and to enforce such recommendations, based upon the investigation, as may be constitutionally devised.

FINANCIAL CONDITION OF RAILWAYS.

In the last report of the Commission reference was made to the financial embarrassment of railways. During the last eighteen months the country has been passing through one of the most remarkable periods of commercial and financial depression in its history, and the railways have suffered in common with all other industries. Some of the largest systems in the country have passed into the hands of the courts. The extent of the disaster to railway interests resulting from the depression and other causes suggests the propriety of further reference to the matter in this report.

On June 30, 1894, there were 156 railways in the hands of receivers. The mileage of road owned by these companies was about 30,000 miles, and the mileage operated was nearly 39,000 miles. Sixty-seven per cent of the mileage owned and 80 per cent of the mileage operated is accounted for by 28 important lines with either an owned or operated mileage in excess of 300 miles. Of the remaining 128 roads, 95 were small lines of less than 100 miles in length, some of them the parts of larger systems, and a number were new lines still in process of construction.

The total capitalization of the railways in the hands of receivers was about \$2,500,000, or one fourth of the total railway capital of the country. The capitalization of the 28 important roads accounts for 79 per cent of this amount. It is, of course, impossible to make any satisfactory estimate of the actual money value of the capitalization, the amount stated being based on the par value of the securities.

Although it is probable that a majority of the receiverships of the last eighteen months

were hastened by the commercial and financial depression, it is believed that in most of the cases the primary cause of disaster may safely be attributed to other reasons. Many were the natural sequence of mismanagement, over-capitalization and ill-advised projection. A majority of the roads were weighed down with heavy loads of indebtedness, and an investigation of the reports filed with the Commission and of the best authorities available for the years previous to the creation of the Commission discloses that only 18 roads out of the entire 156 had paid any dividend to their stockholders, from 1880 to the present date, or since their organization if subsequent to 1880, their entire net earnings in prosperous times being scarcely adequate to pay the interest on their indebtedness and other fixed charges. Many of these roads, therefore, were placed in the hands of receivers, and in several cases on application of the management of the roads themselves, when the first effect of the commercial and financial depression was felt in the depletion of traffic and consequent loss of earnings. In some cases the application for the appointment of receivers were made before any great loss of traffic had obtained, caused by inability to renew loans on account of the stringency of money. They were in fact in a condition to fail at the first breath of adversity.

One reason for this condition is undoubtedly over-capitalization. It is a notorious fact that many of the lines now in the hands of receivers were capitalized out of all reasonable proportion to the actual cost of the properties. Until there is some practical restriction upon the capitalization of railway properties at fictitious values, there must still continue to be nondividend-paying stock, defaulted interest on bonds, receiverships, and foreclosure sales. It is worthy of special mention that only 1 of the 156 roads is located in the New England group, where the matter of capitalization of roads is largely under the control of the state commissions.

It is believed that another reason for the present condition is ill-advised projection and construction. Roads have been built for speculative purposes when the business of the locality did not warrant or demand them, and was found insufficient to support them when constructed. This condition has led to another source of trouble, ruinous competition, and the tendency to such competition has been greater during the period of depression than in prosperous times. The endeavor to obtain traffic has led to such fierce competition that the revenue to be derived from it and the cost of handling it have been secondary considerations, and it is probable that a large amount of competitive traffic has been handled at such low rates that it became a source of loss rather than of revenue.

In 1892 the average rate per passenger per mile was 2.126 cents, and the average rate per ton per mile .898 cent, as against 2.108 cents per passenger per mile and .878 cent per ton per mile in 1893. To illustrate the effect of even this slight reduction in average rates, it may be stated that on the basis of the traffic of 1893 it caused a decrease in revenue of the railways of over \$21,000,000. Considering the magnitude of the railway system this is a 4 INTER 8.

small amount, but it is sufficient to pay interest at the rate of 4 per cent on two thirds of the amount of funded debt upon which no interest was paid in that year.

In order to ascertain to what extent the traffic of the railways has been affected by the business depression, comparative traffic data have been compiled for the years ending June 30, 1893 and 1894, for 570 roads. This includes all roads whose reports for the year ending June 30, 1894, had been filed up to November 23, 1894, and covers an operated mileage of 149,559.21 miles. The number of passengers carried was 505,285,446, and the number of passengers carried 1 mile was 12,899,936,578, as compared with 555,918,603 passengers carried and 12,873,272,594 passengers carried 1 mile by the same roads for the year ending June 30, 1893; and the number of tons carried was 571,955,942, and the number of tons carried 1 mile was 70,426,344,965, as compared with 687,561,865 tons carried and 84,968,987,747 tons carried 1 mile by the same roads for the year ending June 30, 1893. These figures show the decrease in traffic for 1894.

It has been stated that the steady decrease in rates during the past few years has been made possible by the constant increase in traffic. The fact, then, that regardless of the large decrease in volume of traffic during the year ending June 30, 1894, the rates continued to decline, must be accepted as an indication of unusually sharp competition during that year. The average receipts per passenger per mile for 1894 were 1.976 cents, as compared with 2.108 cents for 1893, and the average receipts per ton per mile were .866 cents, as compared with .878 cent for 1893. An illustration of the effect of the slight decrease in average rates from 1892 to 1893 on the bases of the traffic for the latter year was shown above. Applying the same formula to the traffic for 1894, it is found that the maintenance of 1893 average rates would have increased the revenues of the railways in 1894 \$12,579,143, or 4 per cent on \$314,478,575, and the maintenance of the 1892 rates on the 1894 traffic \$41,886,342, or 4 per cent on \$1,047,158,550, or one fifth of the entire funded debt of the railway system.

It is possible that these average rates are in excess of the actual receipts which finally found their way into the treasuries of the companies. It is thought, and it has been openly charged, that rebates were made to shippers by some roads in disobedience of the law in a degree sufficient to amount to millions of dollars per annum. If such practices do exist, their effect on the earnings may or may not be shown by the averages above stated. It is believed, and the above figures show, that if the railways all lived up to the spirit of the law, and reasonable rates had been maintained, that although many of the disasters could not have been averted on account of other causes referred to, the revenue from the traffic for the past year would have been more nearly adequate to meet the fixed responsibility of the roads, and the extent of disaster much less.

STATISTICS OF RAILWAYS.

Mileage.

The report of the statistician to the Commis-

sion for the year ending June 30, 1893, contained in Appendix,—shows that the total mileage of railways in the United States on June 30, 1893, was 176,461.07, being an increase during the year of 4897.65. The corresponding increase during the previous year was 3160.78, from which it appears that there was some revival in railway construction during the year covered by the report. The state of Washington leads in construction, with 556.32 miles; Montana shows an increase of 409.66 miles; West Virginia of 385.01 miles, and Texas of 298.97 miles. The other states which show an increase in mileage in excess of 100 miles are California, Florida, Indiana, Michigan, Minnesota, Missouri, New York, Ohio, Pennsylvania, Wisconsin, and Wyoming. The states of Kansas, Oregon, the territory of New Mexico, and the District of Columbia show a slight decrease in mileage, due to remeasurement of main lines or abandonment of small unimportant lines. The number of roads abandoned during the year was 19. The total length of line, including all tracks, was 230,187.27, which includes 10,451.36 miles of second track and 42,048.40 miles of yard track and sidings.

Classification of Railways.

The total number of railway corporations in existence June 30, 1893, was 1890, being an increase of 68 during the year covered by the report. Of this number 752 were independent operating roads and 939 maintained operating accounts. The number of subsidiary roads which maintained financial accounts only was 178, of which 326 were leased for a fixed money rental, and 195 for a contingent money rental, the remainder being operated under some form of traffic agreement not easily subjected to classification. The tendency toward some form of consolidation during the year has been quite marked; 28 roads, representing 49.87 miles, have been merged; 20 roads, representing 1732.79 miles, have been reorganized; and 16 roads, representing 1469.19 miles, have been consolidated. These items are higher than the corresponding items of the previous year. A classification of railways according to length of line operated shows that there are 2 companies in the United States having a mileage in excess of 1000 miles; 26 companies operating a mileage between 600 and 1000 miles; 23 companies operating a mileage between 400 and 600 miles; 41 companies operating a mileage between 250 and 400 miles; and 92 companies operating a mileage of 250 miles or less. The total length of line controlled by the 42 companies operating an excess of 1000 miles was 98,385.54, being equal to 55.78 per cent of the total mileage of the country. The second class of roads controlled 11.20 per cent of total mileage, from which it appears that 68 companies controlled 66.98 per cent of the total railway mileage.

Capitalization and Valuation.

The aggregate of property classified as railway capital was on June 30, 1893, \$10,506,35,410, which shows railway capital equal to 63,421 per mile of line. The amount of stock outstanding was \$4,668,935,418, of

which \$3,932,000,602 was common stock, the remainder, \$686,925,816, being preferred stock. The funded debt outstanding was \$5,225,689,821, classified as follows: Mortgage bonds, \$4,504,383,162; miscellaneous obligations, \$410,474,647; income bonds, \$248,132,730, and equipment trust obligations, \$62,699,282. The amount of investment in the railway securities has increased during the year from \$1,891,457,053 to \$1,563,022,238, being an increase of \$171,565,180.

The amount of stock paying no dividends during the year was \$2,859,334,572, being 61.24 per cent of the total stock outstanding. Of stocks paying dividends, 5.25 per cent of the aggregate stock paid from 4 to 5 per cent, 11.62 per cent paid from 5 to 6 per cent, 5.24 per cent paid from 6 to 7 per cent, and 5.82 per cent paid from 7 to 8 per cent. The total dividends paid was \$100,929,885. The amount of mortgage bonds paying no interest was \$492,276,999, or 10.93 per cent of the total or mortgage bonds, and the amount of income bonds paying no interest was \$204,864,269, or 82.56 per cent of the total of income bonds.

Public Service.

The total number of passengers carried during the year ending June 30, 1893, was 593,560,612. Passenger mileage during the same year was 14,229,101,084. The average journey per passenger was 28.97 miles. The number of tons of freight reported by the railways for the year was 745,119,482. Ton mileage was 93,588,111,833. The average number of tons in a train was 183.97, and the average haul per ton for the entire country was 125.60 miles. Passenger train mileage was 335,618,770, and freight train mileage 508,719,506.

Earnings and Expenses.

The gross earnings from operation of the railways of the United States for the year ending June 30, 1893, was \$1,220,751,874, being an increase of \$49,344,531 over gross earnings reported of the previous year. Operating expenses during the year were \$827,921,299, being an increase of \$46,923,303 over the previous year. The income from investments reported by the railways was \$149,649,615, while deductions on account of fixed charges and other analogous items were \$431,422,156. The final net income available for dividends was \$111,058,034, being a sum less than the corresponding amount for the previous year of \$4,907,157. After deducting from this amount the dividends paid, the income account of railways in the United States for the year shows a surplus of \$3,116,745, which is less than the surplus of the previous year by \$5,919,311. The complete report shows a full income account for each of the ten territorial groups into which the country is divided. The gross amount received from carrying passengers was \$301,491,816; from carrying mail, \$23,445,053, and from carrying express matter, \$23,681,394. The gross amount received for carrying freight was \$320,053,861. The passenger service accounts for 29.49 per cent of the earnings from operation, and the freight service for 68.23 per cent of such earnings.

Equipment.

The total number of locomotives on June 30, 1893, was 84,788, being an increase of 1652 during the year. Of these, 8957 were passenger locomotives, 18,599 freight locomotives, and 4802 switching locomotives, the remainder being unclassified. The total number of cars owned by the carriers making report was 1,119,878, to which should be added 154,068 leased cars, making a total of 1,273,946 cars operated directly by the carriers. This shows an increase in the number of cars directly controlled of 58,854, during the year. Of the total number of cars, 81,384 were in the passenger service, and 1,047,577 in the freight service. The number of passengers carried per passenger locomotive was 66,268, and the number of passenger miles per passenger locomotive was 1,588,601. These figures show an increase in the efficiency of passenger locomotives. The number of tons of freight carried per freight locomotive was 40,062, and the number of ton-miles accomplished per freight locomotive was 5,081,889. These figures show no change in the efficiency of freight locomotives as compared with previous years. The number of passenger cars per 1,000,000 passengers carried was 53, and the number of freight cars per 1,000,000 tons of freight carried was 1613. The increase in equipment fitted with train brakes, or automatic couplers, as compared with the increase in equipment itself, is not so marked as in the previous year. Thus, from a total increase in equipment during the year ending June 30, 1893, of 60,506 the increase in equipment fitted with train brakes was 42,158, and the increase in equipment fitted with automatic coupler was 77,904.

Employées.

The total number of employées in the service of railways on June 30, 1893, was 873,602, being an increase of 52,187. Of this total of employées 85,884, are assigned to the work of general administration, 256,212 to maintenance of way and structures, 175,464 to maintenance of equipment, and 397,915 to conducting transportation, the remainder, 8627, being unclassified by the carriers making report. If the employées be assigned to mileage, it appears that 515 men found employment in the railway industry in the United States per 100 miles of line, 31 being assigned to general administration, 151 to maintenance of way and structures, 103 to maintenance of equipment, and 234 to conducting transportation.

Railway Accidents.

The number of railway employées killed during the year was 2727, being greater by 173 than those killed during the previous year. The number of employées injured was 31,729, being greater by 3462 than the number injured the previous year. The number of passengers killed during the year was 299, being less by 77 than the number killed the previous year, and the number injured was 3229, being 2 in excess of the number injured the previous year.

Of the total number of deaths to employées
4 INTER S.

on account of railway accidents, 433 were due to coupling and uncoupling cars, 644 to falling from trains and engines, 73 to overhead obstructions, 247 to collisions, and 153 to derailments, the remainder being due to causes not so clearly defined. An assignment of casualties to the opportunity offered for accidents shows 1 employé to have been killed for every 320 men employed, and 1 to have been injured for every 28 men employed. The most dangerous service is that of trainmen, and for these the statistics show one employé to have been killed for every 115 trainmen, and 1 employé to have been injured for every 10 engaged in this service. A similar comparison shows 1 passenger to have been killed for each 1,985,153 passengers carried, or for each 47,588,966 passenger miles accomplished, and 1 passenger injured for each 183,822 passengers carried, or for each 4,406,659 passenger miles accomplished. An assignment of accident statistics to the territorial groups shows great diversity in the relative safety of travel and railway employment in the various sections of the country.

Conclusion.

Mention is made in the report of an important step toward the realization of uniformity in railway accounts, in that the Commission has, with the assistance of the Association of American Railway Accounting Officers, revised the classification of operating expenses.

Another subject of interest touched upon in the report is the necessity of compiling freight statistics more fully than at present is the case. The statistician also renews the recommendations made in previous reports to the effect that the Act be amended so that express companies, companies or persons owning rolling stock leased to railways or shippers for use in interstate commerce, companies or persons owning depot properties (stock yards, elevators, and the like) used by railways for interstate traffic, and carriers by water lines, shall be required to render appropriate reports to the Commission.

PRELIMINARY INCOME ACCOUNT.

In addition to the statistics given above, covering the year ending June 30, 1893, a preliminary income account covering the operations of 570 roads, for the year ending June 30, 1894, has been compiled and is made a part of this report, being contained in Appendix. It includes the returns from all roads for which reports were filed on or before November 23, 1894, and covers an operated mileage of 149,559.21 miles. A similar report was prepared the two years previous and distributed in pamphlet form to meet the demand of the public for early statistics regarding the operations of railways. This report has been so much sought after and so favorably received that it has been thought advisable to continue its compilation and publication. It is of especial interest this year, as it discloses the effect of the commercial and financial depression through which the country has been passing on the revenue and traffic of the railways. It will be noted that the operations of about 15

per cent of the mileage of the country is not included in this account for the reason that the reports for many roads had not been filed by the date (November 28, 1894) on which it was necessary to close this compilation. In this connection it seems proper to again renew the recommendation made in previous reports as to the necessity for such amendment of the Act as will secure a prompt filing of reports from the railways.

SAFETY APPLIANCES ON RAILWAY EQUIPMENT.

Reference was made in the last report of the Commission to the enactment of the safety appliance Act, and statistics were given showing the extent to which the railway equipment of the country had been fitted with such safety appliances prior to the date of the Act and up to June 30, 1893.

In Appendix—will be found a similar compilation to that presented in the preceding report, covering the years ending June 30, 1889, 1890, 1891, 1892, and 1893, and showing the total railway equipment, the equipment fitted with train brakes and with automatic couplers, together with a statement of the number of passengers carried, the number of employes, and the number of accidents to each.

The increase in equipment, meaning locomotives and cars, during the year ending June 30, 1893, was 60,506; the increase in such equipment fitted with train brakes was 42,158, and the increase in the number fitted with automatic couplers was 77,904. The figures in the Appendix do not show the measure of compliance by the railways with the provisions of the safety appliance Act, since the latest figures given are for the year ending June 30, 1893, and the Act was not passed until March 2, 1893. As the date on which all equipment must be fitted with train brakes and automatic couplers is July 1, 1898, sufficient time is allowed for the changes necessary to be made to comply with the provisions of the Act in these respects. It is stated that all new cars ordered are being supplied with automatic couplers, while a very large proportion of new equipment is being fitted with train brakes.

To show the extent to which the different classes of equipment had been fitted with safety appliances up to June 30, 1893, it may be stated that 98.50 per cent of passenger locomotives, 75.59 per cent of freight locomotives, 56.88 per cent of switching locomotives, 97.88 per cent of passenger cars, and 19.18 per cent of freight cars are fitted with train brakes; 29.47 per cent of passenger locomotives, 3.52 per cent of freight locomotives, 2.54 per cent of switching locomotives, 97.01 per cent of passenger cars, and 21.89 per cent of freight cars are fitted with automatic couplers. On the basis of the whole equipment, it appears that 79.51 per cent of the locomotives and 21.30 per cent of the cars are fitted with train brakes, and 11.81 per cent of the locomotives and 24.99 per cent of the cars are fitted with automatic couplers.

The number of different kinds of train brakes in use on June 30, 1893, was 15, and the kinds of couplers, without any attempt to classify by the type to which they belong, numbered 55.

As stated in the last report, communications from the leading railroads show that the requirement of the law in regard to the establishment of a uniform height of drawbars on or before July 1, 1895, is meeting prompt acquiescence. The law also provides that hand holds shall be placed at the sides of each freight car by the date last mentioned.

The statistics of accidents which appear in detail in the Appendix show 1 passenger killed for every 1,985,153 carried, and 1 injured for every 183,822, a smaller ratio of fatal casualties than in any year for which the data have been compiled by the Commission. The ratio of injuries not resulting fatally is also less than for the two years preceding, but greater than in 1889 or 1890. The ratio of casualty to railway employes was 1 killed for every 320 employed, and 1 injured for every 28. The extra hazard of employes on trains is shown by the fact that 1 was killed for every 115 in service, and 1 injured for every 10 so employed. These ratios have remained nearly stationary for the three years prior to July, 1893, and it is not probable that they will be materially lessened until under the operation of the law greater uniformity, especially in regard to couplers, is attained.

CONVENTION OF RAILROAD COMMISSIONERS.

The sixth annual convention of railroad commissioners was held May 8 and 9, 1894, at the office of the Commission, at which seventeen States were represented by their commissioners or by accredited representatives.

Hon. George M. Woodruff, of Connecticut, was again chosen chairman, with Hon. Allen Fort of Georgia, vice chairman, and the secretary of the Interstate Commerce Commission, secretary.

Reports were read and a general interchange of views was had upon the subjects of pooling of freight and division of earnings, uniform classification of freight, abuses caused by use of shipper's cars in railway equipment, railway statistics, and accounts.

Propositions for legislation to prevent trespassing on railways by walking on the track, and to require the blocking of frogs, switches, and guard rails, were discussed at length.

A paper on "Stock and Debt Watering," by Hon. George G. Crocker, formerly of the Massachusetts railroad commission, was read and made a part of the record of the convention.

A communication from Mr. E. P. Wilson, representing the National Transportation Association, on the subject of "The Harmonizing of State and Federal Legislation in the Regulation of the Business of Common carriers," was read, and after discussion the following resolution was adopted:

Resolved. That a committee of three members be appointed by the chair to consider and report at this session concerning measures necessary to be taken in regard to pending and needed legislation in Congress upon the subject of interstate transportation, and that this committee have power to confer with representatives of other bodies.

The interest in these conventions is increasing, and with the purpose of making their proceedings still more instructive and valuable,

the last meeting adopted the plan of selecting subjects for discussion at future meetings through committees.

A complete report of this convention has been published and sent to all members of Congress and others.

GOVERNMENT AIDED RAILROADS AND TELEGRAPH LINES.

In performance of the duty imposed upon the Commission in regard to Government aided railroad and telegraph lines—Act of Congress August 7, 1888 (Acts of Fifty-first Congress, chap. 772, 25 Stat. at L. 382)—the Commission served blanks for the purpose of making annual reports upon the following companies: The Sioux City & Pacific Railroad Company, the St. Joseph & Grand Island Railroad Company, the Western Union Telegraph Company, the United States Telegraph Company, the Atchinson, Topeka & Santa Fé Railroad Company, the St. Louis & San Francisco Railway Company, the Northern Pacific Railroad Company, the Oregon & California Railroad Company, the Southern Pacific Company, the Union Pacific Railway Company, the Central Pacific Railroad Company, the Atlantic & Pacific Railroad Company.

With the exception of the St. Louis & San Francisco Railway Company, the Atchinson, Topeka & Santa Fé Railroad Company, the United States Telegraph Company, the Western Union Telegraph Company, and the Atlantic & Pacific Railroad Company the companies have furnished the information required. The Attorney General has been notified of the failure on the part of these companies to comply with the law.

RECAPITULATION OF RECOMMENDATIONS FOR AMENDMENTS TO THE STATUTE.

(1) That power be conferred upon the Commission to prescribe minimum as well as maximum rates.

(2) That section 8 of the statute be amended so as to provide a procedure for the establishment of through routes and through rates similar to that outlined on pages — of this report.

(3) That the Commission be directed to prescribe a uniform classification of freights and change the same from time to time as, after investigation may appear necessary, and that the carriers be required by suitable provisions to conform to such classification.

(4) That for the purpose of preventing overcharges and undercharges for interstate transportation the Act be amended so as to connect the contract of shipment and its performance by carriers with their duty to charge or receive only such rates as have been put in force according to law, and a provision similar to that set forth on pages — of this report is suggested.

(5) That the procedure provided in the statute for enforcement of orders of the Commission be amended as suggested in former reports.

(6) That mutilation, destruction, or removal of any tariff, or schedule of rates, fares, or charges, posted by any carrier subject to the

statute as in force over its line, be made a misdemeanor punishable by suitable fine.

(7) That corporations subject to the Act be made liable to indictment for offenses against the statute; and that the present provisions subjecting individuals engaged in railway service to punishment by fine or imprisonment for prohibited acts be retained, but that shippers, consignees, and individuals not connected with railway employment be relieved from liability to fine and imprisonment under section 10, except for such fraudulent acts as false billing, false classification, false weighing, false representation of the contents of the package, or false report of weight.

(8) That a law be enacted allowing appeals or writs of error on behalf of the Government in penal cases which involve construction of the Constitution of the United States, or in which a demurrer to the indictment has been sustained, or motion in arrest of judgment granted.

(9) That the word "line" when used in the Act shall be construed to be a physical line, not a business arrangement, and the words "any common carrier" as used in the Act shall be construed to mean one or more than one common carrier, as in the application of the law may appear to be required.

(10) That any Amendment of the fifth section or anti-pooling clause of the law shall be in accordance with the suggestions and recommendations stated under the head of "Pooling of freights and division of earnings" in this report.

(11) That the provisions of the Act be made to apply to all transportation of interstate commerce over rail or rail and water lines, and to all common carriers, corporations, companies, firms, and persons in anywise engaged in such transportation, or owning lines, cars, yards, or properties used in connection therewith.

(12) That section 20 of the Act be amended so as to fix the time within which carriers, corporations, companies, or persons subject to its provisions shall make and file annual reports with the Commission, and a money penalty for failure to file such report within the time prescribed, and also provide for the enforcement and collection of such penalty; that this section be further amended so as to require such reports to be verified by oath before an officer therein specially authorized to administer such oath, and that any person making oath to any false statement in any such report shall be liable to indictment and conviction for perjury.

In addition to the recommendations for amendment above specified, attention is respectfully called to the various considerations set forth in the body of this report as demonstrating the necessity for legislative action. We also beg to refer to the suggestions herein made in regard to legislation authorizing the Commission to investigate threatened labor contests on railways, and to require annual reports from various companies whose business is closely related to that of transportation.

All of which is respectfully submitted.

Wm. R. Morrison.
W. G. Veazey.
Martin A. Knapp.

INDEX.

ACCOMPLICE. See EVIDENCE, 20.

ACTION OR SUIT. See also TELE-
GRAPHS, 2, 3.

1. The enforcing of an order of railroad commissioners requiring a railroad company to conform to their schedule of rates is a matter of public right for which an action may be maintained in the name of the state. *Campbell v. Chicago, M. & St. P. R. Co.* (Iowa) 203

2. All the carriers which united in making a joint rate are not necessary parties in a suit for an injunction against one of them, founded on an alleged disobedience of an order of the Interstate Commerce Commission, which commanded its abandonment. *Interstate Commerce Commission v. Texas & P. R. Co.* (C.C. App. 2d C.) 408

3. The duty enjoined by the Act of Congress of Aug. 7, 1888, § 2, upon the Pacific railroad companies, of affording equal facilities to all connecting lines of telegraphs without discrimination against any, should be enforced in the mode prescribed by § 3, of application to the Interstate Commerce Commission, which is required to proceed by mandamus, rather than by bill in equity, as the remedy provided is exclusive. *Union P. R. Co. v. United States* (C. C. App. 8th C.) 705

4. The mingling indiscriminately of matters of legal and equitable cognizance in the same complaint, and the enforcement in a single suit of all the rights and duties mentioned, is not authorized by the Act of Congress of Aug. 7, 1888, § 4, providing in effect that to secure and preserve to the United States the full value and benefit of its liens upon all the telegraph lines belonging to the railroad and telegraph companies mentioned in the Pacific Railroad Companies Acts, and to have them possessed, used, and operated in conformity with the statutes, it is made the duty of the attorney general by proper proceedings to prevent any unlawful interference with the rights and equities of the United States, to have legally ascertained and adjudicated all alleged rights of all persons and corporations claiming any control or interest in any telegraph lines or property, or exclusive rights of way upon the lands of said railroad companies, and to have set aside all contracts and their provisions entered into by such companies unlawfully and beyond their powers. *Id.*

I. OF PASSENGERS.

See also *infra*, III. d.

1. The word "owner," as used in the Minnesota act regulating the sale of carriers' tickets, includes all those who operate a railroad or steamboat in the transportation of passengers, —as, for example, leasees, receivers, and the like. *State v. Corbett* (Minn.) 694

2. The Kentucky statute requiring all companies operating railroads within the state to provide separate cars or compartments for white and colored passengers is so broad as to embrace all passengers, including those whose passage commences or ends in other states, and is void as an interference with interstate commerce. *Anderson v. Louisville & N. R. Co.* (C. C. D. Ky.) 764

3. A railroad company must furnish to colored people who pay first-class fare cars to ride in that are as safe and comfortable in their conditions and appointments as the cars furnished to white passengers who pay first-class fare. *Houck v. Southern P. R. Co.* (C. C. W. D. Tex.) 441

See also CONSTITUTIONAL LAW, 13-15.

II. OF FREIGHT.

a. *In General; Contracts.*

4. A shipper is not bound by his order for a specified number of cars on a specified day, in the absence of an acceptance of the order so as to bind both parties. *Missouri P. R. Co. v. Texas & P. R. Co.* (C. C. E. D. La.) 484

5. A shipper should not be subjected to unnecessary restrictions as to the kind of case or package he shall use. *Rhode Island Egg & B. Co. v. Lake Shore & M. S. R. Co.* (Com.) 512

6. Where the weight of merchandise is uniformly the same, the carrier or the consignee may ask to have the weight verified up to the moment of delivery; and it is the weight disclosed by the scales, and not the weight mark on the bill of lading, that controls. *Baird v. St. Louis, I. M. & S. R. Co.* (C. C. E. D. Ark.) 422

7. Ark. Act Feb. 27, 1885, prohibiting the 4 INTER 8.

collection of freight in excess of that specified in the bill of lading, was not intended to give validity to stipulations in bills of lading which are the result of fraud or mistake. *Id.*

8. The shipper can base no right of recovery upon the violation of a contract between connecting railways, as to the apportionment of an agreed rate of freight. *Arkansas & L. R. Co. v. Smith* (Ark.) 415

9. Misrepresentation by a carrier as to the rate charged, but without injury, affords no ground of redress in a suit for damages. *Id.*

b. *Liability of Carrier of Goods.*

See also CONFLICT OF LAWS.

10. A railroad company in the carriage of goods is subject to the liability of a common carrier, and must answer for all losses not occasioned by the act of God or the public enemy, and cannot, in Nebraska, by special contract, limit or relieve itself from this liability. *St. Joseph & G. I. R. Co. v. Palmer* (Neb.) 494
See also COMMERCE, 9.

11. A statute forbidding common carriers within the state, on land or in boats or vessels on the waters entirely within the body of the state, to limit or restrict their liability as it exists at common law, applies to shipments purely domestic beginning and ending in the state. *Missouri P. R. Co. v. Sherwood* (Tex.) 240

12. There is nothing in the Interstate Commerce Law which, by reason of an allowance of a rebate to the agents of the owners or consignees of goods, if actually made, would invalidate the contract of affreightment or exempt a railroad company from liability on its bills of lading. *Merchants Cotton-Press & S. Co. v. Insurance Co. of North America* (U. S. Sup. Ct.) 499

13. A shipment is not within the provisions of a statute forbidding carriers within the state to limit their common-law liability, where the contract provides for the carrying of the goods to a foreign port by means of the carrier's own line, its connecting lines in another state, and an ocean steamship company. *Missouri P. R. Co. v. Sherwood* (Tex.) 240

14. The burning of cotton while awaiting compression, as provided by a bill of lading, in a compress not owned or operated by the carrier, is within a clause in the bill exempting the carrier from loss by fire while the property is on deposit in place of transshipment or depots or landings or at points of delivery. *Id.*

15. A carrier which receives cotton for transportation under a contract by which it agrees to deliver it to the consignee within a reasonable time is liable for its loss if it leaves it for eighteen days on a barge moored in a river, exposed to sparks from passing boats and engines on the levee above, by some of which it is set on fire. *Thomas v. Wabash, St. L. & P. R. Co.* (C. C. S. D. Ill.) 802

16. Permitting a shipment of cotton to lie at one station for eighteen days is negligence under a contract to transport it within a reasonable time. *Id.*

17. A carrier which receives, under a contract to transport it within a reasonable time, freight for shipment which must go through a point at which the facilities are so greatly overcrowded that a delay will be necessary at that point, will be liable for the loss of the property caused by the delay at that point. *Id.*

c. Connecting Carriers.

See also *infra*, III. j.

18. A clause limiting the liability of a railway company to its own line, which is wholly within the state, will not convert into a domestic bill of lading an instrument which purports on its face to be a through bill of lading to a foreign port, providing for the transportation of goods to their foreign destination, and fixing the through rate of freight. *Missouri P. R. Co. v. Sherwood* (Tex.) 240

19. It is the right of shippers to have their goods carried, and the duty of common carriers to receive and forward freight, by the least expensive routes at reasonable through rates. *Newland v. Northern P. R. Co.* (Com.) 474

20. A carrier which sends freight over its own line, which is much longer and more expensive to operate than another route over continuous lines operated in part by other common carriers with which it exchanges traffic, can charge only a rate which is reasonable for the transportation by the shorter and less expensive route. *Id.*

21. A railroad company receiving freight from a connecting road is under no obligation to advance to the latter the charges due it for transportation, although if it does so it has a lien for payment on the goods. *Oregon Short Line & U. N. R. Co. v. Northern P. R. Co.* (C. C. D. Or.) 249

22. A railroad which accepts freight in the cars of a connecting road, and transports it therein, when it has cars of its own not in use, is not liable for mileage upon such cars, in the absence of an arrangement to that effect; but the existing custom that when a railroad takes the freight in the foreign cars because it has none of its own out of use, or because the freight would be injured by the transfer, it shall pay certain mileage on the cars used, is reasonable and will be enforced. *Id.*

III. GOVERNMENTAL CONTROL; RATES; DISCRIMINATION.

a. Control Generally.

23. Railroad companies engaged in interstate commerce shall, unless prevented by circumstances beyond their control, run their trains in a reasonable manner and as often as the ordinary business of commerce requires, but are entitled to determine how many and what cars and engines shall constitute their trains, and are not required to divide the train and run a less number of cars upon refusal of their employees to move the usual and customary trains. *Re Charge to Grand Jury* (No. 1) (D. C. S. D. Cal.) 777

24. Several railroad companies which bill and carry freight from points in one state to

points in another will not be heard to say that the carriage by each is local and that they are not engaged in interstate commerce, for the purpose of avoiding the requirements of the Interstate Commerce Act. *Interstate Commerce Commission v. Cincinnati, N. O. & T. P. R. Co.* (C. C. App. 5th C.) 582, Rev'g 833

25. The receipt successively by two or more carriers for transportation, of traffic shipped under through bills for continuous carriage over their lines, is assent to a "common arrangement" for continuous carriage or shipment; and previous formal arrangement between them is not necessary to bring such transportation under the terms of the Interstate Commerce Law. *Trammell v. Clyde Steamship Co.* (Com.) 120

26. The successive receipt and forwarding in ordinary course of business, by two or more carriers, of interstate traffic shipped under through bills for continuous carriage over their lines, is assent to a "common arrangement" for such carriage within the meaning of the Act to Regulate Commerce, without previous express agreement between them. *Troy Bd. of Trade v. Alabama Midland R. Co.* (Com.) 348

27. The continuity of the carriage of freight over a line formed by two or more roads is not broken in fact and cannot be broken in law by the charge of a local rate by one or more of such roads as its proportion of the through rate. *Id.*

28. Where a railroad company is not restricted or inhibited by its charter or the law of the land, it is not unlawful for it to make an arrangement of rates for special purposes, on a sufficient consideration, and for the legitimate increase of its business. *Missouri P. R. Co. v. Texas & P. R. Co.* (C. C. E. D. La.) 428

29. A contract with a carrier for rates less than those on its schedule, and which is therefore unlawful as to the carrier because in violation of the Interstate Commerce Law, may nevertheless be enforced by the shipper if he had no knowledge that the schedule rate was higher than that given him. *Mobile & O. R. Co. v. Dismukes* (Ala.) 200

30. The clause in the charter of the Union Pacific Railroad Company giving Congress power over the rates of freight to be charged thereon does not preclude the several states from interfering with such rates. *Ames v. Union P. R. Co.* (C. C. D. Neb.) 885

31. Interstate shipments only are affected by the United States Act of March 2, 1889, against obtaining transportation for property over railroads at less than regular rates. *United States v. Howell* (D. C. W. D. Mo.) 818

32. A contract for interstate shipment does not come within a state law regulating rates, because made in that state, so that such law will introduce a new term into the contract, but its utmost effect would be to forbid a contract for an unreasonable rate and make the contract unlawful, leaving the transaction open to adjustment under the laws of the United States. *Swift v. Philadelphia & R. R. Co.* (C. N. D. Ill.) 638

33. A state law prohibiting the exaction by carriers of unreasonable rates is, as applied to a contract for shipment from one state to an-

other, an interference with interstate commerce, and cannot be so applied. *Swift v. Philadelphia & R. R. Co.* (C. C. N. D. Ill.) 838

84. In the absence of some prohibition or restraint, common law or statutory, a common carrier may lawfully demand or contract for such compensation for carriage as he may be able to obtain, without regard to its unreasonableness. *Id.*

85. Outside of the Interstate Commerce Act there is no law of the United States as a distinct sovereignty, imposing any restraint upon the imposition by a carrier of unreasonable rates. *Id.*

See also COMMON LAW.

86. A tariff of railroad rates fixed by a commission, which will so diminish the earnings of a road that they will not be able to pay half the interest on its bonded debt above the operating expenses, is unjust and unreasonable, where, without waste or mismanagement in construction or operation, the road has cost far more than the amount of stock and bonds outstanding, which represent money expended in its construction, and the rates have been voluntarily decreased by the company during ten years more than 50 per cent, while under these rates the stock representing two fifths of the value of the road has never received a dividend, and for the last three years the earnings above operating expenses have been insufficient to pay the interest on the bonded debt. *Reagan v. Farmers' Loan & T. Co.* (U. S. Sup. Ct.) 560

See also CONSTITUTIONAL LAW, 8.

87. A reduction of 29½ per cent by the legislature in the local freight rates of a railroad is unreasonable and void, where the new rates would result in a loss on local business to more than half of the roads affected by it, and as to the other roads the earnings from local business would not be enough to pay the proportion of the interest on the bonded debt which should be paid by such business in comparison with business of other kinds. *Ames v. Union P. R. Co.* (C. C. D. Neb.) 835

88. That railroad investments may be as secure as other property, the reasonable rates should be liberal until earnings are sufficiently large for a fair return on actual expenditure. *Newland v. Northern P. R. Co.* (Conn.) 474

89. The agreed rental cannot be accepted as the amount which leased property, part of a system, must earn and the lessee may retain before any reduction can be made in the rates over the leased lines. *Id.*

40. The fact that the freight rates are higher in one state than in another is not of itself sufficient to justify an arbitrary reduction of them by the legislature in the former state, for the purpose of equalizing rates. *Ames v. Union P. R. Co.* (C. C. D. Neb.) 835

41. A schedule of rates made by railroad commissioners, being challenged as a whole, the court must either condemn or sustain it as a whole, and cannot rearrange it or prepare a new schedule. *Reagan v. Farmers' Loan & T. Co.* (U. S. Sup. Ct.) 560

42. Division of territory between lines to a common market is without warrant in law 4 INTER 8.

when made for the benefit of the carrier without regard to the interest of shippers in the territory so divided, to whom it is in effect a denial of the privilege of shipping their goods or produce to market by the line or route they may prefer. *Cincinnati Freight Bureau v. Cincinnati, N. O. & T. P. R. Co.* (Conn.) 592

b. Rules for Fixing Rates; Reasonableness.

43. A practice of billing cotton at a proper estimated weight per bale should not be deemed unlawful when actual weights of shipments cannot be ascertained without great inconvenience to the shipper or carrier, and when transportation charges are promptly adjusted by the carrier upon the basis of actual weights furnished by the consignee. *Pelphs v. Texas & P. R. Co.* (Com.) 868

44. No departure from the rule requiring rates in all cases to be reasonable in themselves can be justified on the ground that it is necessary in order to maintain existing trade relations, or to "protect competing markets," or to "equalize commercial conditions," or to secure to carriers traffic from certain territory assumed to be exclusively theirs. *Cincinnati Freight Bureau v. Cincinnati, N. O. & T. P. R. Co.* (Com.) 592

45. The amount invested in a railroad cannot be ignored in determining the reasonableness of rates fixed by law to be charged thereon, although such amount is far in excess of the present value of the property. *Ames v. Union P. R. Co.* (C. C. D. Neb.) 835

46. In passing upon the reasonableness of rates, the question whether they afford the carrier a proper return for the service rendered is to be considered, as well as the result of the business to the shipper or producer of the traffic. *Loud v. South Carolina R. Co.* (Com.) 205

47. Rates should bear a fair and reasonable relation to the antecedent cost of the traffic as delivered to the carrier, and to the commercial value of such traffic. *Id.*

48. Where a special service is required of the carrier,—such as rapid transit and speedy delivery in cases of perishable freight,—a higher rate than for the carriage of ordinary freight is warranted; and if a carrier charging a rate based on such special service fails to render it, to the damage of the shipper and without legal excuse, the remedy of the latter would seem to be by a proper proceeding in a court of law, and not by a complaint of excessive rates. *Id.*

49. A reduction in rates by a carrier is not *per se* evidence that the former rates were unreasonable, as such reduction may, as in the present case, be accounted for because of a decrease in cost of transportation and an increase in the volume of the traffic to which such rates apply. *Id.*

50. Where the reasonableness of rates is in question, comparison thereof may be made, not only with rates on another line of the same carrier, but also with those on the lines of other and distinct carriers. *Cincinnati Freight Bureau v. Cincinnati, N. O. & T. P. R. Co.* (Com.) 592; *Morrell v. Union P. R. Co.* (Com.) 469

51. Rates maintained and which may be reasonable under the conditions existing in one section or part of the country afford no safe criterion by which to measure reasonable charges in other localities, where the expense of operating a road and other conditions affecting transportation are widely different. *Morrell v. Union P. R. Co.* (Com.) 469

52. The division among themselves which a number of connecting carriers make of a through rate should not affect the question of the reasonableness or unreasonableness of the rate as an entirety. *Florida Fruit Exch. v. Savannah, F. & W. R. Co.* (C. C. N. D. Fla.) 400

53. The fact that a rate in one direction is materially higher than that in the opposite direction does not, as in case of hauls over the same line in the same direction, establish prima facie the unreasonableness of the higher rate. This is especially true where the hauls are of great length. *Duncan v. Atchison, T. & S. F. R. Co.* (Com.) 385

54. The joint through tariff rates established by two or more carriers over their lines or any parts thereof cannot be made the basis by which the reasonableness of the local rates on either line can be determined. *Chicago & N. W. R. Co. v. Osborne* (C. C. App. 8th C.) 257

55. When great disparity exists between charges which are lower to competitive than to intermediate points much less remote, the inference is irresistible that the lower rate must be unremunerative upon any theory, or else the larger rate gives an unwarranted return for the service rendered. *Chattanooga Bd. of Trade v. East Tennessee, V. & G. R. Co.* (Com.) 218

56. The grouping of two stations by a railroad company as stations to which the freight rates from the far east may properly be made the same is a conclusive admission by it that, so far as the transportation from the east to its warehouses at such stations is concerned, it is under substantially similar conditions and circumstances. *Interstate Commerce Commission v. Detroit, G. H. & M. R. Co.* (C. C. W. D. Mich.) 722

57. When rates from any cause are made greater for shorter than for longer distances, the difference between such rates must in no instance be unreasonable. *Gerke Brew. Co. v. Louisville & N. R. Co.* (Com.) 267

58. Rates on wheat from points in North and South Dakota to Minneapolis should be adjusted upon the basis of distance over nearest practicable routes. *Minneapolis Chamber of Commerce v. Great Northern R. Co.* (Com.) 230

59. The difference between the rate on carloads and that on less than carloads must be reasonable. *Duncan v. Atchison, T. & S. F. R. Co.* (Com.) 385

60. The reasonableness of a carrier's rate on fruit is not necessarily to be determined by the question of the profit or loss which the producer receives upon his product. *Florida Fruit Exch. v. Savannah, F. & W. R. Co.* (C. C. N. D. Fla.) 400, Aff'd on 589

61. The increase of rates for the transportation of oranges from Florida points to north-

eastern cities over the line of the Savannah, Florida, & Western Railway and its connections, which was made Nov. 28, 1890, and amounted to 83½ per cent upon rates previously in effect, is unjust, unreasonable, excessive, and in violation of the Interstate Commerce Act; and it is not justified by the increased facilities which have been afforded by the carriers for handling and preserving the fruit. *Id.*

62. The rates charged on "household goods" will not be declared unlawful on the mere fact that as a condition of granting them the defendants required the shipper to release all claim for damages in case of loss to the amount of \$5 per 100 lbs., or \$1,000 per carload of 20,000 lbs., there being no proof showing that such rates are unreasonable in view of said limitation. *Duncan v. Atchison, T. & S. F. R. Co.* (Com.) 385

63. A local rate which presumably is adopted as covering both the initial and final expense of a local haul is prima facie excessive as part of a through rate over a through line composed of two or more carriers. *Troy Bd. of Trade v. Alabama Midland R. Co.* (Com.) 348

64. The practice of making one rate on the same product over a large district is only justifiable under special and exceptional circumstances, and is not to be encouraged when the difference in the transportation expense from the various parts of such district is considerable and substantial. *Newland v. Northern P. R. Co.* (Com.) 474

65. Where the roads and branches of two companies extend to and penetrate a wheat-producing district, from which they make a joint rate for distances of 480 miles, and each company makes the same rate separately from the same district, one for distances of 450 and the other for distances of 650 miles over their respective lines to the same destination, the rates so jointly and separately made must be held excessive for a shorter distance of 311 miles over a less expensive route, from the same district to the same destination. *Id.*

66. A rate which may be reasonable when applied to the transportation of egg cases as a disconnected service may be unreasonable if the carriage of returned cases at favorable rates is in fact a special service, the discontinuance of which would unduly burden the business of shipping eggs to points of sale. *Rhode Island Egg & B. Co. v. Lake Shore & M. S. R. Co.* (Com.) 512

c. Posting or Filing Rates.

67. The rates which carriers are required by the Act to Regulate Commerce, § 6, to publish, file, and adhere to without deviation, cover not merely the carriage, but services rendered in receiving and delivering property as well. *Phelps v. Texas & P. R. Co.* (Com.) 363

68. To sustain an indictment for conspiring to obtain less than established rates for the shipment of property over a railroad, it is not necessary that the rate should have been published by posting it, as required by the Inter-

state Commerce Law. *United States v. Howell*
(D. C. W. D. Mo.) 818

d. *Passenger Traffic.*

See also *supra*, I.

69. A carrier is not compelled to give special excursion rates to one political convention because it has given them to a similar convention of another political party on another date. *Cator v. Southern P. R. Co.* (Com.) 897

70. A party-rate ticket which is a single ticket covering the transportation of ten or more persons from one place to another on a railroad is not in violation of the Interstate Commerce Act, although sold at a reduction from the regular passenger rates. *Interstate Commerce Commission v. Baltimore & O. R. Co.* (U. S. Sup. Ct.) 92

71. The Interstate Commerce Act was not designed to prevent competition between different roads, or to interfere with the customary arrangement made by railway companies for reduced fares in consideration of increased mileage, where such reduction does not operate as an unjust discrimination against other persons traveling over the road. *Id.*

e. *Discrimination between Shippers.*

72. Unless within the authorized exceptions to the general rule of the statute, discriminations in charges upon like shipments of the same commodities, based solely upon the purpose or "business motive" of the shipper, are unlawful, whether effected directly or indirectly by methods of classification. *Duncan v. Atchison, T. & S. F. R. Co.* (Com.) 885

73. All charges made for any service in the transportation of any passengers or property, or for receiving, delivering, storing, or handling property, must under the Interstate Commerce Act be reasonable and just; and no discrimination can be made in rates, charges, or facilities. *Cutting v. Florida R. & Nav. Co.* (C. C. N. D. Fla.) 424

74. Railway companies are bound under the Interstate Commerce Act only to give the same terms to all persons alike under the same conditions and circumstances; and any fact which produces an inequality of condition and a change of circumstances justifies an inequality of charge. *Interstate Commerce Commission v. Baltimore & O. R. Co.* (U. S. Sup. Ct.) 92

75. In order to constitute an unjust discrimination under the Interstate Commerce Act, § 2, the carrier must charge or receive directly from one person a greater or less compensation than from another, or must accomplish the same thing indirectly by means of a special rate, rebate, or other device; but in either case it must be for a like and contemporaneous service in the transportation of a like kind of traffic, under substantially similar circumstances and conditions. *Id.*

76. Any benefit in relation to the shipment of goods, having a definite money value, conferred gratis by the carrier upon one shipper and not conferred upon another, is an undue reduction in the price of carriage to the former, 4 INTER S.

and is illegal under the Interstate Commerce Act, where the service to each is admittedly under substantially similar circumstances and conditions. *Interstate Commerce Commission v. Detroit, G. H. & M. R. Co.* (C. C. W. D. Mich.) 722

77. An advantage resulting from just rates coupled with the enterprise and outlay necessary to utilize them is legitimate; and carriers should not undertake to deprive a shipper of this advantage by a change of such rates. *Potter Mfg. Co. v. Chicago & G. T. R. Co.* (Com.) 223

78. A carrier is not free to make dissimilarities to any extent it may choose in the freight rates on foreign and domestic traffic, from the fact of the existence of some dissimilarity of conditions. *Interstate Commerce Commission v. Texas & P. R. Co.* (C. C. App. 2d C.) 408

79. The practice by a common carrier of arbitrarily determining what persons should receive a so-called "manufacturers' rate" is a violation of the Act to Regulate Commerce. *Re Louisville & N. R. Co.* (Com.) 157

80. The exercise by a railway company of the right to prepayment, or to retain a lien upon the goods until payment is made, or to hold the consignee responsible in case of delivery before payment, or the waiver of some of such rights at different times, cannot be construed to be a denial of equal facilities or a discrimination. *Little Rock & M. R. Co. v. St. Louis, I. M. & S. R. Co.* (C. C. W. D. Ark.) 587

81. A party to an interstate shipment cannot be excluded by the carrier from privileges afforded to other patrons in the same locality because of his refusal to pay excessive freight charges, even though an agreement to subsequently refund the excess should accompany the demand. *Phelps v. Texas & P. R. Co.* (Com.) 868

82. A guaranty executed to a carrier by consignees or third parties, which might be construed to enable the carrier, in consideration of freight delivery before settlement of transportation charges, to exact for services rendered in moving and delivering the freight whatever it chooses to demand, cannot be used by the carrier to force payment of charges in excess of those it would be entitled to collect or receive if previous freight delivery had not been made. *Id.*

83. Where a contract is made with a shipper by a carrier, member of a through line, for shipment of goods over the line at a less than the published lawful rate charged shippers in general, it is not a violation of the Act to Regulate Commerce within the jurisdiction of the Interstate Commerce Commission for the delivering carrier to exact payment of the full lawful rate before delivery, although if the shipper was an innocent party he might be entitled to his goods on payment of the contract rate. *Duncan v. Atchison, T. & S. F. R. Co.* (Com.) 885

84. Where oil is transported by the carrier both in barrels and tank cars, but the use of the tank cars is practically limited to one class of shippers, the charge for the barrel package in barrel shipments, in the absence of a corre-

sponding charge on tank shipments, resulting in a greater cost of transportation to the shipper in barrels on like quantities of oil between like points of shipments and destination than to the tank shipper, is a discrimination against the former in favor of the latter for which no legal justification has been shown in these cases. *Independent Ref. Asso. v. Western N. Y. & P. R. Co.* (Com.) 162

85. Ownership of a car rented to a carrier and for the use of which the carrier pays a full consideration does not of itself entitle the owner to the exclusive use of such car; and if the owner may, in the contract of hire to the carrier, stipulate for the exclusive use of the car, it must be upon such terms as shall not constitute an unjust discrimination against shippers of like traffic in cars owned by the carrier and who are excluded from the use of the car so hired. *Id.*

f. Classification; Discrimination between Articles.

86. No unjust discrimination results to the carload shipper of eggs from the equal rating of carload and less than carload lots, and the special service rendered in gathering and forwarding small shipments in "pick-up" cars, where for carload shipments ice to the amount of 6,000 pounds is furnished by the carrier without extra charge. *Brownell v. Columbus & C. M. R. Co.* (Com.) 285

87. When an article moves in sufficient volume and the demands of commerce will be better served, it is reasonable to give a lower classification for carloads than that which is applied to less than carload quantities; but the difference in such classification should not be so wide as to be destructive to competition between large and small dealers. *Id.*

88. Two west-bound carload rates from Mississippi River points to Pacific Coast terminals on goods termed "Emigrants' Movables" (including "household goods")—one a general class rate; and the other designated a "commodity" rate and less than the general rate, being published as open to "intending settlers only," but in practice given to shippers indiscriminately, and not apparently unreasonable in itself—are improper, as their retention can only serve to mislead the public and afford opportunity for the practice of favoritism and unjust discrimination as between shippers; and the rate should not be in excess of the amount of said commodity rate. *Duncan v. Atchison, T. & S. F. R. Co.* (Com.) 385

89. When an article of traffic does not move on account of burdensome rates, and the carrier is hauling a considerable number of empty cars in the direction such article would naturally move if accorded a lower rate, the carrier may be justified in carrying at a rate sufficient to induce the movement of such traffic, provided no extra or additional charge is in consequence put upon other articles carried; but the fact that freight will furnish return loads for empty cars is not a reason for the reduction of rates on such freight, when it does not appear that the rates are unreasonable. *F. Schumacher Milling Co. v. Chicago, R. I. & P. R. Co.* (Com.) 378

4 INTER S.

90. A mixed carload rate for cereal products or for cereal products and flour, that would have the effect of throwing out of the trade many competitors of complainant who manufacture only certain kinds of cereal products, and of centralizing the business in the hands of one or more dealers, should not be granted when, without it, no wrong is done to any one and the market is open to all competitors. *Id.*

91. The fact that different rates and classifications are in force in different sections of the country will not of itself, without proof of unlawful discrimination or disadvantage or of unreasonably high rates, warrant an extension of the lower rate and classification to the section where the higher rate and classification are applied. *Id.*

92. Cost of service is only one of the elements to be considered in determining proper classification and relative rates for different articles. *Id.*

93. While the difference in cost to the carrier in transporting cereal products and flour is not in itself sufficient to warrant a higher classification upon cereal products, the facts that these products range higher in value than flour, while in the matter of volume of traffic afforded there is a very wide difference in favor of flour, are some of the conditions compelling a low rate upon flour which do not apply in the transportation of cereal products. *Id.*

94. Mixed carloads of celery and cauliflower or other vegetables in the same class should be transported at no higher rate per carload than for a carload quantity of either. *Tecumseh Celery Co. v. Cincinnati, J. & M. R. Co.* (Com.) 318

95. Celery should be classed with cauliflower, asparagus, lettuce, green peas, string beans, oyster plant, egg plant, and other vegetables enumerated in Class C of the Western Classification, rather than with berries, peaches, grapes, and other fruits specified in Class III thereof. *Id.*

96. Salt requires and gets a commodity rate lower than class rates, and railroads should only be limited as to such lower rating by the rule that a commodity shall not be carried at such unremunerative rates as will impose burdens upon other articles transported, to recoup loss incurred in carrying that commodity. *Anthony Salt Co. v. Missouri Pac. R. Co.* (Com.) 33

97. The rate on unfinished cheap bedroom sets shipped knocked down from Lansing, Michigan, to Oakland, California, should not exceed 85 per cent of whatever rate may be adopted for such sets in a finished condition. *Potter Mfg. Co. v. Chicago & G. T. R. Co.* (Com.) 233

g. Long and Short Hauls.

98. Authority from the Interstate Commerce Commission is not necessary where the circumstances and conditions are substantially different, to enable a carrier lawfully to charge more for a shorter than for a longer distance over the same line, under the Interstate Com.

merce Act, §14 (24 Stat. at L. 379), providing that it shall be unlawful to make such charge for transportation of passengers or like kind of property under substantially similar circumstances and conditions, but that the Commission may, after investigation, authorize a less charge for longer than shorter distances. *Interstate Commerce Commission v. Atchison, T. & S. F. R. Co.* (C. C. S. D. Cal.) 323

99. The carrier has the right to judge in the first instance whether it is justified in making a greater charge for a shorter distance, under the Act to Regulate Commerce, § 4, in all cases where the circumstances and conditions arise wholly upon its own line or through competition for the same traffic with carriers not subject to regulation under that Act. In other cases under § 4 the circumstances and conditions are not presumptively dissimilar, and carriers must not charge less for the longer distance except upon the order of the Commission. *Trammell v. Clyde Steamship Co.* (Com.) 120

100. The total rate for through carriage over two or more lines, whether made by the addition of established locals, or of through and local rates, or upon a less proportionate basis, is the through rate that is subject to scrutiny by the regulating authority. How the rate is made, is only material as bearing upon the legality of the aggregate charge; and how any reduction may be accomplished, is matter for the carriers to determine among themselves. *Id.*

101. No violation of the long and short haul clause of the Interstate Commerce Act which will sustain an action for damages is shown by the mere fact that a larger tariff rate was collected for shipments between points on a carrier's road than the proportion of a joint through rate which such carrier received for hauling over its road similar commodities billed to points beyond its road a longer distance which included the shorter one. *Chicago & N. W. R. Co. v. Osborne* (C. C. App. 8th C.) 257

102. The fact that two carriers have established a joint tariff rate between two points will not, under the provisions of the long and short haul clause of the Interstate Commerce Act, prevent each from charging its local rates upon shipments to and between intermediate points, although the combined local rates exceed the through rate for the longer haul. *United States v. Mellen* (D. C. D. Kan.) 247

103. Comparison of the local freight rate from a terminal to an intermediate point on a carrier's line, with the share which it receives of a joint through rate established with a connecting carrier for hauling freight received from the latter between such points, is not a proper method of determining whether or not the local rate is within the provision of the Interstate Commerce Act, § 8, which prohibits undue and unreasonable preferences or advantages. *Tozer v. United States* (C. C. N. D. Mo.) 245

104. The only justification for a through rate less than an intermediate rate on the same article is the compulsion of rail carriers to accept the reduced compensation or suffer ocean 4 INTER S.

rivals to perform the service, and where the pressure of this alternative is not felt, there is no ground upon which the lower through charge can be excused. *Merchants' Union v. Northern P. R. Co.* (Com.) 183

105. Any greater charge for the transportation of like kind of property from seaboard points to Chattanooga than for the longer distance through Chattanooga to Nashville is in violation of the Act to Regulate Commerce, § 4. *Chattanooga Bd. of Trade v. East Tennessee, V. & G. R. Co.* (Com.) 218

106. That a shipper was not informed of the through tariff rates when making shipments between local points will not avail him as a basis for an action for violation of the long and short haul clause of the Interstate Commerce Act of 1887, where he made no inquiry, and no false statements were made to him, and the shipping point was a noncompeting one where no publication of the joint rate was required under the order of the Commission made June 21, 1887. *Chicago & N. W. R. Co. v. Osborne* (C. C. App. 8th C.) 257

107. The rule expressed by the Act to Regulate Commerce, § 4, that distance shall ordinarily limit the adjustment of rates, is not rendered inoperative by the existence at one point of converging lines subject to the Act, for the law applies to each of these lines, and neither can put in rates to that point which are lower than shorter-distance charges on its line until, upon a showing of special considerations grounded in justice to its patrons and itself, it obtains permission from the regulating authority so to do. This principle applies both to lines between the same points and to lines reaching the same destination from different points of consignment. *Gerks Brew. Co. v. Louisville & N. R. Co.* (Com.) 267

h. Effect of Competition.

108. Competition may constitute a circumstance or condition of dissimilarity which will prevent the operation of the long and short haul clause of the Interstate Commerce Act, § 4. *Missouri P. R. Co. v. Texas & P. R. Co.* (C. C. E. D. La.) 484

109. A carrier cannot justify a discrimination in rates merely upon the ground that, unless it is given, the traffic obtained by giving it would go to a competing carrier. *Interstate Commerce Commission v. Texas & P. R. Co.* (C. C. S. D. N. Y.) 114

110. The competition of carriers subject to the Act to Regulate Commerce does not create circumstances and conditions which the carriers can take into account in determining for themselves in the first instance whether they are justified under § 4 in charging more for shorter than for longer distances over their lines. *Trammell v. Clyde Steamship Co.* (Com.) 120

111. Active competition by water and other railroads at a terminal point, for the transportation of certain goods, renders the circumstances and conditions substantially dissimilar from those affecting an intermediate noncompeting point, and justifies a railroad company in charging a less rate to the former than to the lat.

ter point when necessary to meet such competition. *Interstate Commerce Commission v. Aichison, T. & S. F. R. Co.* (C. C. S. D. Cal.) 323

112. Water competition to justify rates must be clearly established, to be a controlling factor in the transportation of traffic important in amount from the point in question. *James v. Canadian P. R. Co.* (Com.) 274

113. Water competition in favor of the more distant point does not make the circumstances and conditions substantially dissimilar, within the implied permission of the Interstate Commerce Act to charge less under such circumstances for a longer than for a shorter haul, where the competition is not with a carrier by a parallel water route between the point of shipment and destination, but between routes from different points of shipment, and the lower rate is made for the purpose of giving the shipping point the advantage in the markets at the destination. *Interstate Commerce Commission v. Cincinnati, N. O. & T. P. R. Co.* (C. C. App. 5th C.) 582, Rev'g 332

114. The rail rate on shingles from a Canadian mill to market being fixed with special reference to the effect of a log drive down a river to the mill, and water competition for shingle traffic from the seaport below, the rate from a Maine mill higher up on the same river should be made upon the same basis. *James v. Canadian P. R. Co.* (Com.) 274

115. The competition of markets or the competition of carrying lines subject to regulation under the Act to Regulate Commerce does not justify carriers in making greater short-haul or lower long-haul charges over the same line in the same direction (the shorter being included within the longer distance), in the absence of an order of relief issued by the Commission upon application therefor and after investigation. *Behlmer v. Memphis & C. R. Co.* (Com.) 520

116. The competition of markets on different lines, for the sale of commodities at a given point served by both lines, does not create circumstances and conditions which the carriers can take into account in determining for themselves in the first instance whether they are justified under the Act to Regulate Commerce, § 4, in charging more for shorter than for longer distances over their lines. *Trammell v. Clyde Steamship Co.* (Com.) 120

117. One transportation line cannot be said to meet the competition of another transportation line for the carrying trade of any particular locality, unless the latter line could and would perform the service alone if the former did not undertake it. *Chattanooga Bd. of Trade v. East Tennessee, V. & G. R. Co.* (Com.) 218

118. Transportation by rail from eastern points to the "Pacific Coast Terminals," Portland, Tacoma, and Seattle, is affected by the competition—of controlling force and in respect to traffic important in amount—of water carriers reaching the same terminals; but such competition does not affect like transportation from said points to the city of Spokane, Washington. *Merchants' Union v. Northern P. R. Co.* (Com.) 188

119. A charge of \$3.70 per hundred pounds upon domestic traffic from New Orleans to 4 INTER S.

San Francisco, when only 80 cents per hundred between the two points is charged under substantial equality of conditions upon similar goods coming to the port of New Orleans from Liverpool, is not justified by the fact that there is competition with water routes in carrying between Liverpool and San Francisco, since the gross inequality shows that the carrier is either injuring itself by carrying without profit, or is receiving an unwarranted return from the domestic traffic for the service rendered. *Interstate Commerce Commission v. Texas & P. R. Co.* (C. C. App. 2d C.) 408

1. Discrimination between Places.

120. No dissimilarity in circumstances or conditions justifying a discrimination in rates exists between a shipment of cotton from Mobile to New Orleans by a person who receives it by vessel from Demopolis, Alabama, and a person who receives it from any other part of Alabama or by rail, where there is no question of a proportion of rates under a joint traffic arrangement. *Bigbee & W. Rivers Packet Co. v. Mobile & O. R. Co.* (C. C. S. D. Ala.) 829

121. A person who receives cotton at Mobile from any particular point on the Alabama rivers, whether it comes by boat or wagon or any other way, and desires to ship it from Mobile to New Orleans by a railroad line, is entitled to have it shipped at the Mobile rate, as much as any person who receives his cotton from any other point or who may have bought it at Mobile; and it is no objection to such right that it would give every town located on such rivers equal facilities and advantages with those of Mobile, as that is the purpose of the Interstate Commerce Act. *Id.*

122. An agreement by a railroad company with other companies within a specified territory, for the purpose of maintaining a uniform rate upon all shipments of cotton from certain points in Alabama in vessels plying the Alabama rivers and received at Mobile to be re-shipped and transported to New Orleans, to charge a certain sum per bale in excess of its regular rate from Mobile, is no justification of such discriminating charge, and contravenes the Interstate Commerce Act. *Id.*

123. The furnishing of free cartage at one place, and not at another at a less distance from the point of shipment, is a violation by a railway company of the long and short haul clause of the Interstate Commerce Act, where the transportation is under substantially similar circumstances and conditions. *Interstate Commerce Commission v. Detroit, G. H. & M. R. Co.* (C. C. W. D. Mich.) 722

124. The furnishing of free cartage by a railroad company at one place and not at another cannot be justified as analogous to the providing of a switch track for the benefit of customers whose storehouses are convenient to the railway track, since the latter is usual railway business, while cartage is something not usually undertaken by railways. *Id.*

125. That the competitors of a railway company have their stations in a certain place in the business center, while its own is at a distance, does not create a dissimilar condition which will allow such company to furnish

free cartage of goods while at another station it does not do so, if it would justify it in furnishing cartage at a price equal to that for which cartage can be obtained from the stations of such competitors. *Interstate Commerce Commission v. Detroit, G. H. & M. R. Co.* (C. C. W. D. Mich.) 723

126. The fact that the station of a railroad company is at a greater distance from the business center in one town than in another does not justify it in furnishing free cartage in the former on the ground that the circumstances and conditions are dissimilar, since in any case the consignees would have to pay cartage though the price might be less. *Id.*

127. The fact that one city is a larger place than another does not create different circumstances and conditions which will justify a railroad company in furnishing free cartage for goods transported by it in the former and not in the latter, though it may reduce the cartage cost to the shipper at the former place in so far as the greater amount of business enables it to do carting at a cheaper rate than at the latter place. *Id.*

128. The facts that one city is much larger and has more important and extensive business interests than another, and has been treated by the carriers in making rates to surrounding points as a "trade centre," is no justification for a continuation of discriminatory rates in favor of such city. *Troy Bd. of Trade v. Alabama M. R. Co.* (Com.) 348

129. Manufacturing industries should not be deprived, through a carrier's adjustment of relative rates, of advantages resulting from their favorable location in respect of cost of raw material supplied from a common source, or of distance to the common market for the finished product. *James v. Canadian P. R. Co.* (Com.) 274

130. A milling town possessing great natural, acquired, and improved advantages for the carrying on of that industry, and favorably situate in point of distance to a large grain-producing region, is entitled to the benefits arising from its location; and carriers of grain to that point and to a competing town considerably more remote from points of production and in other particulars less advantageously located are not justified in making rates on grain to the competing towns which destroy the advantage the former is entitled to enjoy. *Minneapolis Chamber of Commerce v. Great Northern R. Co.* (Com.) 230

131. A town favorably situated with respect to one through route, but competing in a common market with another town more favorably located on another through route, should not have a reduction of the local rate over roads connecting the two through routes for the purpose of overcoming the natural advantage which the latter competing town enjoys. *Id.*

132. A rate of \$1 per ton from certain mines to Nashville, charged upon coal "run of mines nut and slack," being about 1 cent per ton per mile and \$1.15 on screened coal, is not unreasonably low nor disproportionate to a rate of \$1.40 per ton to Memphis, which is a little over $\frac{1}{2}$ cent per ton per mile; and any reduction in the Memphis rate should be accompanied by a propor-

tionate reduction in the Nashville rates. *Re Louisville & N. R. Co.* (Com.) 157

133. A railroad cannot be said to discriminate against a town which it does not reach and in whose carrying trade it does not participate. *Rau Claire Bd. of Trade v. Chicago, M. & St. P. R. Co.* (Com.) 65

134. Rates should not be fixed in inverse proportion to the natural advantages of competing towns, with the view of equalizing "commercial conditions." *Id.*

135. Transportation charges need not be proportioned to the distances between different points, where those distances are greatly dissimilar. *Id.*

136. Where all the distances brought into comparison are considerable, and the differences between them relatively small, there should be substantial similarity in the respective rates, unless other modifying circumstances justify disparity. *Id.*

137. Any advantages which enure to Michigan salt manufacturers as against those of Kansas, from rates to points in Iowa, Illinois, Missouri, and Nebraska, are advantages arising from natural situation; and a low rate to Missouri River points is influenced by water competition and also by the heavy preponderance of east-bound freight over west-bound freight. *Anthony Salt Co. v. Missouri P. R. Co.* (Com.) 38

138. The advantages of distance belonging to Kansas salt fields as against those of Michigan should be given to them by a carrier in any territory supplied by its lines, which lies as near, or nearer, to Hutchinson as to St. Louis. *Id.*

j. Discrimination as to Other Carriers.

139. A railroad company is not under obligation to furnish an express company with facilities for doing an express business upon its road, such as it provides for itself or some other express company, unless it holds itself out as a common carrier of express companies. *Atlantic Exp. Co. v. Wilmington & W. R. Co.* (N. C.) 294

140. A statute making it unlawful for any common carrier to give undue or unreasonable preference to any person, company, firm, corporation, or locality, does not require equal facilities to be given to express companies for carrying on business over a railroad, unless it holds itself out as a common carrier of such companies. *Id.*

141. No power exists at common law, and none is given by the Act to Regulate Commerce, to compel connecting railroad companies to unite in a joint tariff, or to enter into a through-rate arrangement for transportation, unless they desire to do so. *Interstate Commerce Commission v. Cincinnati, N. O. & T. P. R. Co.* (C. C. N. D. Ga.) 332

142. Other connecting carriers are not entitled to through billing and rating and to the use of tracks and terminals of a carrier which has voluntarily made an arrangement giving these advantages to one connecting carrier. *Little Rock & M. R. Co. v. St. Louis & S. W. R. Co.* (C. C. App. 8th C.) 854

143. Requiring prepayment of freight charges

by a connecting carrier, without requiring it of other shippers or carriers at the same place, does not constitute an unreasonable or undue disadvantage within the meaning of the Interstate Commerce Act. *Id.*

144. Combination with the other railroads, even if it charges one railroad with some duty toward lines connecting physically with another, cannot excuse it from fulfilling its own obligations to roads which connect physically with itself, unless its union with the other combined lines is of such a character that their lines have become its own. *New York & N. R. Co. v. New York & N. E. R. Co.* (C. C. S. D. N. Y.) 116

145. An order of the Interstate Commerce Commission to one railroad company to desist from refusing to furnish another equal facilities to those furnished a third company for interchange of through traffic may be enforced by compelling a desistance from discrimination by changed arrangements, as well as by those in force at the time of the order. *Id.*

146. No common carrier can justly complain of another because it is not allowed the use of the tracks and terminal facilities of such other in the same manner and to the same extent a third carrier is. *Little Rock & M. R. Co. v. St. Louis, I. M. & S. R. Co.* (C. C. W. D. Ark.) 587

147. Refusal to permit a forwarding company to perform an act involving the use of the tracks and terminal facilities of a receiving company is not a discrimination or denial of equal facilities by one carrier to a connecting carrier. *Id.*

148. A connecting railway company desiring an interchange of passengers and freight cannot demand as a matter of right an interchange of freight at the point of physical connection, without first furnishing at such point reasonable and proper facilities for the interchange sought, and cannot rely upon the terminal facilities at another point, or compel the receiving railway to go to any expense of providing proper facilities at the point of physical connection. *Id.*

149. The fact that one connecting railway company has a contract for the interchange of interstate commerce freight, which involves the use of the receiving railway's tracks and terminal facilities, will not authorize a court of equity to compel the receiving railway to grant a like contract or compensation to another connecting company. *Id.*

150. The tracks and terminal facilities of a railroad company can be used by a connecting company for the exchange of interstate freight only with the consent of the former. *Id.*

151. A court of equity has no power under the Interstate Commerce Act to compel a receiving company which has made a contract or agreement with another connecting company to establish the same rate upon through freight in favor of another company with which there is no contract, as no power is conferred by the Act upon any tribunal to provide for the necessary divisions growing out of a through routing and a through rating. *Id.*

152. A railroad company cannot be com-

pelled to receive freight from a connecting road in cars other than its own, although it receives freight from another competing road in the cars of the latter and transports them over its road. *Id.*

153. The refusal by a railroad company to transport freight on foreign cars originating east of a certain meridian, when its own cars are not in use but are free to be employed in the transportation desired, or where a transfer of freight will not be injurious to it, is not an unreasonable discrimination against another railroad company, or a denial to it of reasonable and proper facilities, under the Interstate Commerce Act, although it accepts in such cars freight originating west of such meridian. *Oregon Short Line & U. N. R. Co. v. Northern P. R. Co.* (C. C. App. 9th C.) 718, Aff'g 249

154. The provision of the Act incorporating the Northern Pacific Railroad Company, that it shall be its duty to permit any other railroad to form running connections with it on fair and equitable terms, does not require it to permit the use of its road by the cars of other companies, or to honor tickets of such other companies. *Id.*

155. The refusal of a railroad company to honor tickets or coupons for passage issued by another company over its line does not constitute a discrimination within the Interstate Commerce Act, as, in the absence of arrangement between the companies, there is no obligation on the part of either to honor tickets issued by the other. *Id.*

156. The requirement of the agreement of a railway and steamship association, that its members apply "full local rates upon all traffic subject to the association agreement coming from or going to" connecting lines which do not maintain association rates, while to traffic from other connecting lines conforming to such rates, full local rates are not applied, is repugnant to that clause of the Act to Regulate Commerce, § 3, which forbids carriers to "discriminate in their rates and charges between connecting lines." *Cincinnati Freight Bureau v. Cincinnati, N. O. & T. P. R. Co.* (Com.) 593

157. A charter provision of a railroad, granting the power to take "tolls from all persons, property, merchandise, and other commodities transported on their road, provided only the net profits of the road shall never exceed 25 per cent per annum," does not give the company the right to discriminate between connecting steamboats in the matter of freights. *Samuels v. Louisville & N. R. Co.* (Ala.) 490

158. A common carrier has not the right to make a discrimination where the conditions are equal, between two steamboats, in delivering freight to them, on the ground that the greater charge is not unreasonable. *Id.*

159. In making contracts for through transportation of passengers, the initial carrier may lawfully prefer a road going through to the point of destination to one going only part of the way, an arrangement with which would necessitate further arrangements to reach the desired point. *Little Rock & M. R. Co. v. East Tennessee, V. & G. R. Co.* (C. C. W. D. Tenn.) 361

160. No unlawful discrimination against a railroad is effected by the traffic arrangement of a rival road running parallel with it for a considerable distance from their common initial point, by which through tickets are sold to points on the rival road beyond the point of divergence exclusively over the latter, without granting the former any facilities for securing a share of the traffic to such points for the distance which it could carry it. *Little Rock & M. R. Co. v. East Tennessee, V. & G. R. Co.* (C. C. W. D. Tenn.) 261

161. A railroad company cannot appropriate the grievance of a traffic or locality, under the Interstate Commerce Act, § 3, prohibiting preference by a carrier to persons, firms, or corporations, and to localities and traffic, and complain on account of it. *Oregon Short Line & U. N. R. Co. v. Northern P. R. Co.* (C. C. App. 9th C.) 718

k. Criminal Prosecutions; Liabilities.

See also *supra*, III. c; CONSPIRACY.

162. Officers of an interstate railroad company may be indicted under the Interstate Commerce Act, § 4, for fixing and charging a local freight rate upon the same kind of merchandise under substantially similar circumstances and conditions, greater in amount between two points on the main line than that fixed between one of them and a point also on the main line lying in the same direction but farther away than the other. *United States v. Mellen* (D. C. D. Kan.) 247

163. Collecting and receiving freight charges does not subject one who had nothing to do with fixing the rates, to indictment under the long and short haul clause of the Interstate Commerce Act, although the rates are within the prohibitions of that Act. *Id.*

164. A conviction for criminal violation of the section of the Interstate Commerce Act which prohibits undue or unreasonable preferences or advantages cannot be sustained upon the finding of a jury that a certain charge was an unreasonable preference, if no standard of comparison is established by which such unreasonableness is shown with definiteness and certainty. *Tozer v. United States* (C. C. N. D. Mo.) 245

165. The "fines" or "penalties" imposed by the provisions of the agreement of the Southern Railway & Steamship Association on members for violation of association rules appear on the face of that agreement to be available as substitutes for payment which would be exacted under a regular pooling system, and the arrangement under which they are imposed is tantamount to a combination, contract, or agreement "for the pooling of freights of different and competing railroads, or to divide between them the aggregate or net proceeds of the earnings of such railroads or any portion thereof," which are forbidden by the statute. *Cincinnati Freight Bureau v. Cincinnati, N. O. & T. P. R. Co.* (Com.) 592

166. But one overt act need be proved to sustain an indictment for conspiring to violate the United States Act of March 2, 1889, against obtaining transportation for property over rail-

roads at less than regular rates. *United States v. Howell* (D. C. W. D. Mo.) 818

167. Employers who knowingly permit their employes to obtain less than schedule rates for transportation of their property over railroads, and who receive the benefit of such conduct, either directly or indirectly, may be punished under the United States Act of March 2, 1889, against obtaining transportation at rates less than the schedule. *Id.*

168. When the refund of an excessive charge by a carrier has been unnecessarily delayed for a considerable period, the officials responsible therefor become fairly chargeable with willful intention to violate the law. *Phelps v. Texas & P. R. Co.* (Com.) 363

169. Railway companies which enter into an association to control traffic to a common market, and maintain rates higher than are reasonable, unjustly prejudicial, and preferential, if not jointly liable, are at least severally liable. *Cincinnati Freight Bureau v. Cincinnati, N. O. & T. P. R. Co.* (Com.) 592

III. IMPORTATIONS.

See also BRIDGES; CARRIERS, 13, 23, 29, 33. COMMON LAW, 2; CONSPIRACY, 15-19 21-25; CORPORATIONS, 5, 6; INJUNCTION 12-14; TAXES, 1, 2, 6.

I. INTERSTATE COMMERCE GENERALLY

1. Commerce among the states consists of intercourse and traffic between their citizens, and includes the transportation of persons and property and the navigation of public waters for that purpose, as well as the purchase, sale, and exchange of commodities. *Re Charge to Grand Jury* (No. 3) (D. C. N. D. Cal.) 784

2. Congress has plenary power, subject to the limitations imposed by the Constitution, to prescribe the rule by which commerce among the several states is to be governed. *Interstate Commerce Commission v. Brimson* (U. S. Sup. Ct.) 545

3. The grant to Congress of the power to regulate commerce among the states does not embrace that commerce which is completely internal or between different parts of the same state. *Lehigh Valley R. Co. v. Pennsylvania* (U. S. Sup. Ct.) 87

4. No state can levy a tax on interstate commerce in any form, whether by way of duties laid on the transportation of the subjects of that commerce, or on the receipts derived from that transportation, or on the occupation or business of carrying it on. *Brennan v. Titusville* (U. S. Sup. Ct.) 658

5. A state statute regulating the rights of carriers and declaring what rates shall be re-

garded as extortionate does not apply to the case of interstate shipments. *Mobile & O. R. Co. v. Dismukes* (Ala.) 200
See also CARRIERS, 2.

6. The business of insurance as ordinarily conducted by insurance companies organized under the legislation of other states is not interstate commerce so as to be exempt from state legislation as to combination by insurance companies to control rates. *State v. Phipps* (Kan.) 299

7. The regulation of the charges of a grain elevator is not a regulation of interstate commerce, although the grain passing through it is brought from another state. *Budd v. New York* (U. S. Sup. Ct.) 45; *Brass v. North Dakota*, *Stoeser* (U. S. Sup. Ct.) 670

8. In the carriage of freight and passengers between two points in one state, the mere passage over soil of another state does not render that business foreign which is otherwise domestic. *Lehigh Valley R. Co. v. Pennsylvania* (U. S. Sup. Ct.) 87; *Campbell v. Chicago, M. & St. P. R. Co.* (Iowa) 203

9. The fact that a contract was for the carriage of goods from one state to another does not relieve a corporation of the state in which the contract was made from the rule of law existing in that state, which prohibits special contracts limiting liability. *St. Joseph & G. I. R. Co. v. Palmer* (Neb.) 494

10. A state statute limiting the rates to be charged by freight carriers does not interfere with interstate commerce because it adopts a different classification for freight from that which has been established by the railroads for the section of country in which such state is located. *Ames v. Union P. R. Co.* (C. C. D. Neb.) 835

11. Limiting local rates of freight does not necessarily interfere with interstate commerce because the carriers for their own convenience rearrange the interstate rates to make them conform to the local rates prescribed by the statute. *Id.*

12. A statute prohibiting the shipment out of the state of oysters taken in the waters of the state while they are in shells, and also prohibiting the taking of such oysters by any person who is not a resident of the state, is not unconstitutional as a regulation of interstate commerce. *State v. Harrub* (Ala.) 99

13. The provision of Ga. Code, § 4578, making it a misdemeanor to run a freight train upon any railroad in that state on the Sabbath Day, is a regulation of internal police, and not a regulation of interstate commerce, even as to freight trains passing through the state from and to adjacent states, and laden exclusively with goods and freight received on board before the trains entered the state, and consigned to points beyond its limits. *Hennington v. State* (Ga.) 418

14. The imposition by a state of a condition, upon giving permission to lay railroad tracks in the streets of a city, that such tracks shall be public and open to the use of citizens; and a regulation by the state of the switching rates to be charged by such railroad in the city,—do not clearly show an unconstitutional interference with or regulation of commerce

4 INTER S.

between the states, although cars engaged in interstate traffic may be switched over such tracks. *State v. Chicago, M. & St. P. R. Co.* (C. C. N. D. Iowa) 425

15. A statute regulating the sale of transportation tickets is not an interference with interstate commerce. *State v. Corbett* (Minn.) 694

16. A state statute making railroad tickets good for six years, and giving the holder of one the right to stop off at as many stopping places as he pleases before reaching his destination, cannot, in view of the power of Congress over commerce, be applied, contrary to their terms, to tickets sold beyond the limits of the state and entitling their holders to passage from a point in a foreign state or country to one in the state which enacted the statute. *Lafarier v. Grand Trunk R. Co.* (Me.) 198

17. The doing of business—such as that of an express company—which constitutes interstate commerce, by a person who is also at the same time engaged in business of the same kind which constitutes state or local commerce, cannot be made a bar or exemption of the local or state commerce business from taxation or regulation by state authority. *Osborne v. State* (Fla.) 731

18. A state statute prescribing a penalty for failure to deliver a telegram, where the regulations of the company itself require the delivery, is not unconstitutional as a regulation of interstate commerce. *Western U. Teleg. Co. v. Tyler* (Va.) 481

19. A territorial act which regulates the order of receipt and transmission of telegraphic messages, and prescribes a penalty for its violation, but which does not attempt to regulate the delivery of messages outside the territory, or of messages sent from without the territory, is not a regulation of interstate commerce. *Butner v. Western U. Teleg. Co.* (Okla.) 770

II. PEDDLERS; DRUMMERS AND AGENTS.

20. A statute denying the right of a corporation of another state to bring an action within the state until it has filed its articles of incorporation therein is inoperative as to an action brought for the purchase price of goods sold within the state by commercial agents or drummers, as this constitutes interstate commerce. *Bateman v. Western Star Milling Co.* (Tex. Civ. App.) 260

21. A contract by which a resident of a state agrees with a foreign corporation to canvass certain territory for the sale of its sewing-machines, which the corporation thereby agrees to sell to him on credit, and a bond given to secure payment to the corporation of any sum that may become due under such contract, constitute a part of the interstate commerce carried on by the sale of such sewing-machines in accordance with said contract, and therefore cannot be affected by a state statute prohibiting business within the state by a foreign corporation which has not complied with certain requirements,—such as filing a certificate to designate an agent on whom process may be served. *Gunn v. White Sewing-Mach. Co.* (Ark.) 309

22. A regulation as to the manner of sale of subjects of commerce, whether by sample or not, whether by exhibiting samples at a store or at a dwelling-house, is a regulation of commerce. *Brennan v. Titusville* (U. S. Sup. Ct.) 658

23. That one having goods for sale is a non-resident manufacturer, and sells his goods within the state through an agent, does not, under the Federal Constitution, relieve him from the operation of the local police laws, if he keeps in the state a store containing a stock of goods for the inspection of customers, from which he makes sales to actual customers. *Com. v. Schollenberger* (Pa.) 488

24. A statute prohibiting any person not licensed by payment of a prescribed fee, from traveling from place to place within the state for sale of goods at retail or to consumers, by sample or otherwise, is invalid as an interference with interstate commerce as applied to an employé of a person carrying on business in another state, soliciting orders from sample for sale of goods then situated in such other state and constituting legitimate and proper articles of commerce. *Re Mitchell* (D. C. E. D. Wis.) 767

25. A license tax imposed by a state upon an agent of a citizen of another state, for the privilege of selling his goods in the former state, is a direct burden on interstate commerce, and therefore beyond the power of the state. *Brennan v. Titusville* (U. S. Sup. Ct.) 658

26. A manufacturer of goods which are legitimate subjects of commerce, who carries on his business of manufacturing in one state, can send an agent into another state to solicit orders for the products of his manufactory, without paying to the latter state a tax for the privilege of thus trying to sell his goods. *Id.*

27. The fact that the business of a merchandise broker chances to consist for the time being, wholly or partially, in negotiating sales between resident and nonresident merchants, of goods situated in another state, does not necessarily make a license fee involve the taxation of interstate commerce, forbidden by the Constitution. *Ficklen v. Shelby County Taxing Dist.* (U. S. Sup. Ct.) 79

28. A merchandise broker may be required, as a condition of obtaining a license for that business, to pay a license fee and in addition 2½ per cent upon his gross commissions from the business, including that which is wholly interstate. *Id.*

29. An ordinance of a city imposing a license fee upon every telegraph company or agency doing business in the city, for business done exclusively in the city, not including business done to and from points without the state, or business done for the government, its officers or agents,—is not void as an interference with interstate commerce. *Postal Teleg. Cable Co. v. Charleston* (U. S. Sup. Ct.) 687

30. A privilege tax on telegraph companies, graduated according to the value of the property of the company measured by its mileage, and imposed in lieu of all other taxes, although incidentally affecting interstate commerce, is not unconstitutional as an interfer-

ence with such commerce. *Postal Teleg. Cable Co. v. Adams* (Miss.) 416

III. IMPORTATIONS.

31. The shipment of merchandise from one state to another is interstate commerce, and any requirement of a state in respect of such commerce, in conflict with the requirements of the Interstate Commerce Act, is of no validity. *Baird v. St. Louis, I. M. & S. R. Co.* (C. C. E. D. Ark.) 422

32. It is an act of interstate commerce for a foreign corporation to sell and set up machinery in a state where it has no agency or office. *Milan Mill. & Mfg. Co. v. Gorton* (Tenn.) 851

33. A state statute requiring every person who sells nursery stock grown without the state to file an affidavit with the secretary of state and a bond of \$2,000, and exhibit to every purchaser a certificate of compliance from the secretary of state,—is invalid as imposing an obstruction to and regulating interstate commerce. *Re Schechter* (C. C. D. Minn.) 849

34. A license tax of \$500 per annum imposed on every person selling in a city any meat which is not from animals of his own raising, unless he rents a stall in a public market, while the rent of such stall is \$150 per year and the market regulations are so restricted and burdensome as to preclude the reasonable conduct of a wholesale business there,—is unconstitutional in respect to wholesale dealers in meat brought from other states, by reason of the necessarily resulting discrimination against them, although the ordinances on the subject on their face purport to apply to vendors irrespective of the place from which it comes; especially where neither sales nor inspection of meat are restricted to the market, and the regulations are clearly made for the purpose of revenue, and not merely to prevent the sale of uninspected meat. *Georgia Packing Co. v. Macon* (C. C. S. D. Ga.) 508

35. A state statute positively prohibiting the sale of oleomargarine does not apply to original packages of the article brought from another state. *Re Worthen* (C. C. S. D. Ohio) 484

36. The sale of a package of goods, entire and unbroken as imported from another state, will be protected as interstate commerce only when the form and size of the package is that usually adopted in the trade for purpose of transportation, and not when adopted with a view to unlawful interstate retail trade. *Com. v. Schollenberger* (Pa.) 488

37. Showing that a package of material to be used as food was made, stamped, and branded in another state, is not sufficient to show that it is an original package, trade in which is protected by the Federal Constitution, without showing further that it was in the form usually adopted in the trade for purposes of transportation. *Id.*

38. An original package, trade in which is protected by the Federal Constitution, is such form and size of package as is used by pro-

ducers or shippers for the purpose of securing both convenience in handling and security in transportation of merchandise between dealers in the ordinary course of actual commerce.

Id.

39. Liquors imported into a state arrive therein so as to be subject to its police power under the Wilson Act, providing that all intoxicating liquors shall, upon arrival in a state or territory, be subjected to the operation and effect of its laws enacted in the exercise of its police powers, to the same extent as if produced in such state or territory, when they reach their destination in such state, although they are not then delivered by the carrier to the consignee. *Re Langford* (C. C. D. S. C.) 487

40. A state statute forbidding the inbringing of any intoxicating liquors into the state by a common carrier engaged in interstate and foreign commerce is void as an interference with interstate commerce; and no new power to prohibit such importation is given to the states by the Wilson Act of 1890. *Ex parte Edgerton* (C. C. D. S. C.) 685

41. A sale of the contents merely of the packages in which liquor was imported into the state, the purchaser being required to open them and empty the liquor into glasses furnished by the seller, is not a sale by original packages, exempt as interstate commerce from the operations of state laws regulating the sale of intoxicating liquors. *Hopkins v. Lewis* (Iowa) 68

42. A state statute prohibiting the sale of seed unless the year in which it is grown is plainly marked on each package, except on a sale of seed in open bulk by farmers to other farmers or gardeners, is void as to seed brought from another state and sold in original packages. *Re Sanders* (C. C. E. D. N. C.) 805

COMMON LAW. See also CARRIERS, 85; STATUTES, 7.

1. Congress has not adopted the common law of England as a national municipal law. The enforcement of the common law by the courts of the United States has in every instance been as the municipal law of the state by which the subject-matter was affected. *Swift v. Philadelphia & R. R. Co.* (C. C. N. D. Ill.) 638

But see case following.

2. The duties and obligations of carriers to their patrons when engaged in interstate commerce are governed by the common law, in the absence of any legislation of Congress on the subject. *Murray v. Chicago & N. W. R. Co.* (C. C. N. D. Iowa) 806

8. The principles of the common law apply to controversies in the Federal courts in matters of national control, so far as they are applicable to the subject-matter. *Id.*

II. STRIKES AND BOYCOTTS.

III. ANTI-TRUST LAW.

See also BOYCOTT; CARRIERS, 68, 166, 167; CONTRACTS, 4; COURTS, 2; EVIDENCE, 4, 17-19; INDICTMENT, ETC., 2, 3; INJUNCTION, 5, 8-12, 14.

I. IN GENERAL.

1. Conspiracy is an agreement, combination, or undertaking entered into between two or more persons to do something which is against the law of the country. *United States v. Howell* (D. C. W. D. Mo.) 818

2. A conspiracy is a combination of two or more persons by concerted action to accomplish a criminal or unlawful purpose, or some purpose not in itself criminal or unlawful, by criminal or unlawful means. *Thomas v. Cincinnati, N. O. & T. P. R. Co.* (C. C. S. D. Ohio) 788

3. One who joins a conspiracy for the purpose of furthering its design is punishable as though he had been a party to it from the beginning. *United States v. Howell* (D. C. W. D. Mo.) 818

4. A conspiracy to drive certain competitors out of the field by violence, annoyance, intimidation, or otherwise, is not within the prohibition of the Act of Congress against conspiracies in restraint of trade, where there is no aim to engross, monopolize, or grasp the market. *United States v. Patterson* (C. C. D. Mass.) 775

5. Violence and intimidation are as much within the mischief of the Act of Congress against conspiracies in restraint of trade or commerce as negotiations, contracts, or purchases, if such means are used for the purpose of engrossing, monopolizing, or grasping a particular trade. *Id.*

6. A combination of railroad employes to compel railroad companies to injure the manufacturer of cars by breaking their contracts

with him is an unlawful conspiracy. *Thomas v. Cincinnati, N. O. & T. P. R. Co.* (C. C. S. D. Ohio) 788

7. The right of assembly and free speech secured by the constitution of Ohio cannot be used to carry out an unlawful and criminal conspiracy to obstruct the operation of a railroad by a receiver. *Id.*

II. STRIKES AND BOYCOTTS.

See also **BOYCOTT.**

8. It is not unlawful for employes to associate, consult, or confer together with a view to maintain or increase their wages by lawful and peaceful means. *Ames v. Union P. R. Co.* (C. C. D. Neb.) 619

9. Illegal combinations are not sanctioned in any degree by the Act of Congress of June 29, 1886, legalizing the incorporation of national trades unions. *Arthur v. Oakes* (C. C. App. 7th C.) 744

10. A combination of railroad employes to quit their employment, to compel their employer to withdraw from a mutually profitable relation with a third person, for the purpose of injuring the latter, when such relation has no effect on the character or reward of their services,—is an unlawful conspiracy. *Thomas v. Cincinnati, N. O. & T. P. R. Co.* (C. C. S. D. Ohio) 788

11. An unlawful combination in restraint of interstate or foreign commerce may exist among labor organizations, although their original purpose and general character is lawful. *United States v. Workingmen's Amalgamated Council* (C. C. E. D. La.) 881

12. The interdiction by Act of Congress, of contracts or combinations in restraint of trade or commerce among the several states or with foreign nations, applies to combinations of labor as well as of capital, which are in restraint of such trade or commerce. *Id.*

13. A strike is not unlawful if it is merely a combination among employes having for its object their orderly withdrawal in large numbers or in a body from their employer's service, to accomplish some lawful purpose. *Arthur v. Oakes* (C. C. App. 7th C.) 744

14. The stopping of transportation of goods and merchandise in transit from state to state and to and from foreign countries, which is caused by a strike of all the members of labor organizations in a certain city, in all kinds of business, in an attempt to compel the employment of none but union men in a certain business,—is an unlawful restraint of commerce in violation of the Act of Congress. *United States v. Workingmen's Amalgamated Council* (C. C. E. D. La.) 881

15. A combination whose professed object is to arrest the operation of interstate railroads until they accede to certain demands, whether such demands are reasonable or unreasonable, just or unjust, is an unlawful conspiracy in restraint of commerce among the states, under the Act of Congress of July 2, 1890, declaring every conspiracy in restraint of trade or commerce among the several states illegal. *United States v. Elliott* (C. C. E. D. Mo.) 798

16. A combination between railroad em-

ployes with the purpose of paralyzing the interstate commerce of the country by refusal of such employes to perform their duties is an unlawful conspiracy under the Act of Congress of July 2, 1890, declaring illegal every combination or conspiracy in restraint of trade or commerce among the several states. *Thomas v. Cincinnati, N. O. & T. P. R. Co.* (C. C. S. D. Ohio) 788

17. A combination or conspiracy that will interrupt the transportation of commodities from one state to another is within the Act of Congress of July 2, 1890, declaring illegal every combination or conspiracy in restraint of trade or commerce among the several states. *Re Charge to Grand Jury* (No. 8) (D. C. N. D. Cal.) 784

18. Any combination or conspiracy on the part of any class of men who by violence and intimidation prevent the passage of railroad trains engaged in transporting the interstate commerce of the country is a violation of the Act of Congress of July 2, 1890, declaring illegal every combination or conspiracy in restraint of trade or commerce among the several states. *Id.*

19. A combination or conspiracy to obstruct or retard the passage of the mail, or to interfere or restrain commerce between the states, is unlawful. *Re Charge to Grand Jury* (No. 1) (D. C. S. D. Cal.) 777

20. A combination of railroad employes to quit employment for the purpose of preventing their employers from running certain cars, with the intent to stop mail trains as well as others, is an unlawful conspiracy under U. S. Rev. Stat. § 3995, imposing a penalty for obstructing or retarding the passage of the mail. *Thomas v. Cincinnati, N. O. & T. P. R. Co.* (C. C. S. D. Ohio) 788

21. Any concerted action upon the part of others to demand or insist, under any effective penalty or threat, upon railroad employes quitting to the injury of the mail service or the prompt transportation of interstate commerce, is a conspiracy, unless such demand or insistence is in pursuance of a lawful authority conferred upon them by the men themselves, and is made in good faith in the execution of such authority. *Re Charge to Grand Jury* (No. 2) (D. C. N. D. Ill.) 781

22. The corrupt or wrongful agreement of two or more persons with each other, that the employes of several railroads carrying mails and interstate commerce shall quit, and that successors shall by threats, intimidation, or violence, be prevented from taking their places, will constitute a conspiracy against interstate trade or commerce. *Id.*

23. A wrongful and corrupt agreement between two or more men connected with a railroad, whatever their position, for the purpose of creating public sympathy in a threatened strike, or any other purpose, to cause the mail trains and trains carrying interstate commerce to be stopped, with acts in pursuance of such agreement,—constitutes a conspiracy. *Re Charge to Grand Jury* (No. 4) (C. C. N. D. Ill.) 801

24. An agreement between two or more men connected with a railroad, in view of a threat-

ened strike, that they will not employ men to take the place of those who quit their service, but will allow mail and interstate commerce trains to stand still, for the purpose merely of creating public sympathy or indignation against the strikers,—constitutes conspiracy, unless the circumstances and situation were such that the employment of new men, reasonably viewed, would lead to danger to them or to the railroad property or to any public interest. *Id.*

25. An agreement between two or more men connected with a railroad company, that for the purpose of creating public sympathy in a strike they will discharge men from their employ who would otherwise not have been discharged, intending that such discharge shall stop the running of mail or interstate commerce trains and thereby raise public indignation, constitutes a conspiracy. *Id.*

III. ANTI-TRUST LAW.

See also CONTRACTS.

26. An alleged violation of the Anti-Trust Act of Congress must be clearly within its provisions, as the statute is a criminal one. *United States v. Trans-Missouri Freight Asso.* (C. C. App. 8th C.) 443

27. A combination by foreign insurance companies to increase the rates of insurance is in violation of Kan. Laws 1889, chap. 257, as an unlawful trust and combination "in restraint of trade and products;" and such companies and their local agents who attempt to and do enforce such combined rates are subject to prosecution under that statute. *State v. Phipps* (Kan.) 299

CONSTITUTIONAL LAW. See also COMMERCE, I.; CONGRESS; CONSPIRACY, 7; CONTEMPT, 1; CONTRACTS, 18.

1. Investing a railroad commission with authority to make just and reasonable rules and regulations to prevent excessive charges and unjust discriminations and preferences by carriers, the reasonableness and legality of which is reviewable by the courts, is not unconstitutional as a delegation of legislative power. *Atlantic Exp. Co. v. Wilmington & W. R. Co.* (N. C.) 294

2. No delegation of the police power of the state to grant licenses to engage in a business is made by a statute allowing the sale of tickets only by agents licensed by the carrier. *State v. Corbett* (Minn.) 694

3. There is no unconstitutional delegation of power to railroad commissioners by a statute authorizing them to fix reasonable maximum rates of charges for freight and passenger traffic, where their schedule is not final, but is made merely prima facie evidence of the reasonableness of the rates established. *Chicago, B. & Q. R. Co. v. Jones* (Ill.) 683

4. The business of elevating grain is a business charged with a public interest, and those who carry it on occupy a relation to the community analogous to that of common carriers, and may be controlled by public legislation for the common good. *Budd v. New York* (U. S. Sup. Ct.) 45

4 INTER S.

5. The New York law of 1888 regulating the fees for elevating and discharging grain by elevators, fixing maximum charges therefor, and also limiting the charge for trimming or shoveling to the leg of the elevator and for trimming when loaded, to the actual cost thereof,—is a proper exercise of the police power of the state. *Id.*

6. Owners of a grain elevator are not deprived of the equal protection of the laws by a statute regulating fees and establishing maximum charges. *Id.*; *Brass v. North Dakota, Stoesser* (U. S. Sup. Ct.) 670

7. The legislature can fix a maximum beyond which any charge would be unreasonable for the use of property in which the public has an interest, but cannot compel the doing of services without reward. *Budd v. New York* (U. S. Sup. Ct.) 45

8. The fixing and enforcement by a railroad commission of unjust and unreasonable rates for transportation by railroad companies is an unconstitutional denial of the equal protection of the laws. *Reagan v. Farmers' Loan & T. Co.* (U. S. Sup. Ct.) 560, 578; *Reagan v. Mercantile Trust Co.* (U. S. Sup. Ct.) 575, 577

See also CARRIERS, III. a.

9. A classification of railroads as those which have been in operation for a certain length of time and those which have been recently built, and limiting the rates which may be charged on the old roads, is not an arbitrary classification denying such roads the equal protection of the laws, nor does it make the statute invalid as class legislation. *Ames v. Union P. R. Co.* (C. C. D. Neb.) 635

10. The Minnesota act to regulate the sale and redemption of transportation tickets of common carriers, and to provide punishment for the violation of the same, is not unconstitutional as "class legislation" granting special privileges to carriers. *State v. Corbett* (Minn.) 694

11. The provision of S. C. Act Dec. 24, 1892, § 25, subd. 2, that any servant, agent, or employé of a railroad or express company or other carrier, who shall remove any intoxicating liquors from any railroad car, vessel, or other vehicle of transportation, at any place other than the usual and established stations or places of business of such carriers within an incorporated city or town where there is a dispensary, shall be punished,—is not a valid exercise of the police power of the state, since it singles out one class of persons from the whole community for prosecution and punishment in contravention of S. C. Const. art. 1, § 12, providing that no person shall be liable to any other punishment or subjected in law to any other restrictions or disqualifications in regard to any personal rights, than such as are laid on others under like circumstances. *Re Langford* (C. C. D. S. C.) 437

12. A state statute requiring every person selling nursery stock grown in another state to file with the secretary of state an affidavit and bond of \$2,000, and exhibit to every purchaser a certificate from the secretary, is unconstitutional as depriving citizens of other states dealing in a sound article of commerce produced therein, of the valuable

privilege and immunity enjoyed by the citizens of the state, that every person shall be presumed honest and innocent of wrong. *Re Schlechter* (C. C. D. Minn.) 849

13. The Kentucky statutes requiring all railroad companies to furnish separate coaches or compartments for colored and white passengers does not violate U. S. Const. 14th amend. prohibiting discrimination by a state because of race or previous condition of servitude, as it prohibits any discrimination in the quality, convenience, or accommodations in the cars and compartments set apart for the different classes of passengers. *Anderson v. Louisville & N. R. Co.* (C. C. D. Ky.) 764

14. A statute requiring separate cars or compartments to be furnished white and colored passengers upon railroads is valid as a proper exercise of the police power of the state, when confined to the interstate commerce of the state, and not applying to interstate commerce. *Id.*

15. The prohibition contained in U. S. Const. 14th amend. against discrimination by a state because of race or previous condition of servitude, though securing to citizens certain fundamental rights as against state action, does not secure the joint and common enjoyment of such rights. *Id.*

16. A statute prohibiting more than fair and reasonable rates by a railroad corporation, being merely declaratory of a common-law rule, although penal, does not deprive the company of its property without due process of law, because the statute does not fix any limit of the rates,—especially where a provision is made in the same statute for the fixing of rates by commissioners. *Chicago, B. & Q. R. Co. v. Jones* (Ill.) 688

17. A statute prohibiting the sale of tickets except by licensed agents is not—at least as to tickets purchased after the passage of the Act—void as depriving a citizen of his property “without due process of law.” *State v. Corbett* (Minn.) 594

18. The regulation of the fees for elevating and discharging grain by elevators does not deprive the owner of his property without due process of law,—at least where the charges are not shown to be unreasonable. *Budd v. New York* (U. S. Sup. Ct.) 45; *Brass v. North Dakota, Stoesser* (U. S. Sup. Ct.) 670

CONTEMPT.

1. In matters of contempt a jury is not required by “due process of law.” Courts possess the power to punish for contempt. *Interstate Commerce Commission v. Brimson* (U. S. Sup. Ct.) 545

2. It is a contempt of court to interfere with property in the hands of a receiver, or with men in their employ. *Ames v. Union P. R. Co.* (C. C. D. Neb.) 619

3. Any willful attempt, with knowledge that a railroad is in the hands of a court through its receiver, to prevent or impede the latter from complying with the order of the court in running the road, which as between private individuals would give a right of action for damages,—is a contempt of court. *Thomas* 4 INTER S.

v. Cincinnati, N. O. & T. P. R. Co. (C. C. S. D. Ohio) 788

4. Inciting the employes of a road in charge of a receiver to quit their service, in pursuance of the plans of an unlawful conspiracy, constitutes a contempt of court. *Id.*

5. Instigating the employes of a receiver to leave their employment may be a contempt without being a crime. *Thomas v. Cincinnati, N. O. & T. P. R. Co.* (C. C. S. D. Ohio) 788

6. Imprisonment for six months was imposed as a punishment for contempt of court in interfering with the operation of a railroad by a receiver, where, after the service of the restraining order, the defendant continued in his unlawful course and aggravated his contempt by speeches to the employes of the receiver. *Id.*

CONTRACTS. See also CARRIERS, 29; CONSPIRACY, 12.

1. A contract between competing railroad companies is not necessarily “in restraint of trade” and illegal, within the meaning of the Anti-Trust Act of Congress, because it in some manner imposes a restriction upon competition. *United States v. Trans-Missouri Freight Assn.* (C. C. App. 8th C.) 443

2. An agreement of a transcontinental association to promote harmony of action between carriers and the maintenance of joint rates, with a proper division of through rates, is not on its face unlawful. *Duncan v. Atchison, T. & S. F. R. Co.* (Com.) 885

3. An association of railroad companies cannot be held to create a monopoly within the meaning of the Anti-Trust Act of Congress, where it is not intended to have any trade of its own, but to be a mere adviser of its members, who are competitors of each other. *United States v. Trans-Missouri Freight Assn.* (C. C. App. 8th C.) 443

4. An association of railroad companies for mutual protection by establishing and maintaining reasonable rates, rules, and regulations, is not illegal as in restraint of trade, under the Anti-Trust Act of Congress, merely because it incidentally tends to restrict competition in some degree, where each member of the association must still compete with other members for business, and while regular monthly meetings are provided for, at which action may be taken, five days' notice of any proposed reduction of rates or change of rules must be given, and members are bound by the decision of the association unless they give written notice in ten days thereafter to the contrary, and any member may withdraw on thirty days' notice. *Id.*

5. The provision of the Act of Congress of Feb. 4, 1887, § 8, that common carriers shall afford equal facilities for the interchange of traffic between their lines, but need not give the use of their tracks and terminal facilities to other carriers, does not affect a contract made by a railroad upon being given permission to use the streets of a city for its tracks, that it will pass the cars of other railway companies over its tracks when necessary to reach their customers' warehouses, and that it will not exceed a

certain rate in its charges for switching. *State v. Chicago, M. & St. P. R. Co.* (C. C. N. D. Iowa) 425

6. An action will not lie to compel a railroad company to pay over its earnings in excess of its share under an illegal pooling contract by which several companies agree to divide the earnings from a certain class of business by either giving each its share of the business or of the earnings, since it is not a suit merely to compel an accounting of moneys received, but is one to compel specific performance of the contract. *Chicago, M. & St. P. R. Co. v. Wabash, St. L. & P. R. Co.* (C. C. App. 8th C.) 578

7. A pooling contract between several railroad companies which control the business of a large section of country, by which all their roads are to be run as one so far as through business is concerned, and each company is to receive a certain proportion of the gross earnings by either a division of business or of receipts,—is void as against public policy. *Id.*

8. It is illegal for a railroad company to enter a "pool" whereby a parallel road has preference over it in rates, where its charter, granted by Congress, forbids discrimination against any connecting or intersecting road, and a state land grant to the railroad forbids it to enter into any combination with any parallel road in the state that will allow the latter to control rates on it. *Missouri P. R. Co. v. Texas & P. R. Co.* (C. C. E. D. La.) 428

9. A Federal court will not refuse to abrogate an illegal pooling contract of a railroad in the hands of its receiver, upon the prayer of the representatives of other lines connected with it, because the receiver is willing to enter into such combination with such objecting lines, and they may also be willing. *Id.*

10. Performance of an illegal contract on one side only does not make it an executed contract so that an action can be maintained for the consideration. *Chicago, M. & St. P. R. Co. v. Wabash, St. L. & P. R. Co.* (C. C. App. 8th C.) 578

11. In determining whether a contract of employment to procure rebates from railroads included railroads within the operation of the Interstate Commerce Act, the conduct of the parties in obtaining rebates from roads outside the state may be resorted to. *Parks v. Jacob Dold Packing Co.* (Buff. Super. Ct.) 486

12. A contract of employment for the main purpose of getting cut freight rates and rebates from railroad companies within the Interstate Commerce Act is void, and no recovery can be had for its breach, under the provisions prohibiting special rates and rebates and making it a misdemeanor for the shipper or his agent to solicit or induce the violation of its provisions. *Id.*

13. The power of railroad commissioners to make a schedule of reasonable maximum rates does not impair the obligation of the contract of a railroad company, under a statute which authorizes its board of directors to establish rates of toll from time to time, but also provides that the company's by-laws shall not be repugnant to the constitution and laws of the 4 INTER S.

state. *Chicago, B. & Q. R. Co. v. Jones* (Ill.) 663

CORPORATIONS. See also CARRIERS, 162; COMMERCE, 20, 21; COURTS, 9; TAXES, 3-5.

1. A state has the right to determine upon what conditions its laws as to the consolidation of corporations may be availed of. *Ashley v. Ryan* (U. S. Sup. Ct.) 664

2. The granting of the rights and privileges which constitute the franchises of a corporation may be accompanied with any such conditions as the legislature may deem most suitable to the public interest and policy. *Horn Silver Min. Co. v. New York* (U. S. Sup. Ct.) 57

3. A foreign corporation cannot claim a right to do business in another state, except subject to the conditions imposed by its laws. *Id.*

4. Having the absolute power of excluding the foreign corporation, a state may impose such conditions upon permitting the corporation to do business within its limits as it may judge expedient,—such as the payment of a specific license tax, or a sum proportioned to the amount of its capital. *Id.*

5. Foreign corporations selling through itinerant agents and delivering goods manufactured outside of the state are not, in view of the commerce clause of the United States Constitution, affected by state statutes requiring foreign corporations to file their articles of association with the secretary of state and pay a franchise fee as a condition of doing business within the state. *Coit v. Sutton* (Mich.) 768

6. The exaction of a charge by a state for the filing of articles of consolidation of several railroad companies forming a connecting line, only one of which is a corporation of the state, as a condition imposed by the state upon the taking of corporate being or the exercise of corporate franchises, constitutes no tax upon interstate commerce or the right to carry on the same or the instruments thereof, and its enforcement involves no attempt on the part of the state to extend its taxing power beyond its territorial limits. *Ashley v. Ryan* (U. S. Sup. Ct.) 664

7. A foreign corporation which simply contracts to furnish milling machinery and place it in a mill, without having any office or agency in the state, is not carrying on business in the state within the meaning of a statutory prohibition of carrying on business. *Milan Mill. & Mfg. Co. v. Gorton* (Tenn.) 851

COURTS. See also APPEAL AND ERROR; CARRIERS, 41; REMOVAL OF CAUSES.

1. The fact that a subject like interstate commerce is beyond state legislative control does not *ipso facto* exclude the jurisdiction of state courts from cases growing out of such commerce. *Murray v. Chicago & N. W. R. Co.* (C. C. N. D. Iowa) 806; *St. Joseph & G. I. R. Co. v. Palmer* (Neb.) 494

2. Residence within the territorial jurisdiction of a court is not necessary to render one punishable by such court for a conspiracy committed there. *United States v. Howell* (D. C. W. D. Mo.) 813

3. A Federal court having jurisdiction will not, through principles of comity, hold its hand and leave the determination of the validity of a state statute to the state courts. *Re Langford* (C. C. D. S. C.) 487

4. To give a Federal court jurisdiction on the ground that the matter in dispute arose under the Constitution, laws, or treaties of the United States, it must clearly and unmistakably appear from the record that such Federal question must necessarily be decided before the merits of the case can be disposed of. *State v. Chicago, M. & St. P. R. Co.* (C. C. N. D. Iowa) 425

5. The constitutionality of a state statute will not oust the jurisdiction of a Federal court in a suit between citizens of different states to prevent the wrongful administration of the statute by state officers, so as to make it an illegal burden and exaction upon an individual. *Reagan v. Farmers' Loan & T. Co.* (U. S. Sup. Ct.) 560

6. Although the formation of a tariff of charges for transportation by a common carrier is a legislative or ministerial, rather than a judicial, function, the court may decide whether or not such rates are unjust and unreasonable and such as to work a practical destruction to rights of property, and, if found so to be, restrain their operation. *Id.*

7. That the remedies prescribed by the Interstate Commerce Act are not applicable to a particular case arising under its provisions does not deprive the United States circuit court of jurisdiction, since by the Judiciary Act such courts are given jurisdiction of all controversies arising under any Act of Congress. *Little Rock & M. R. Co. v. East Tennessee, V. & G. R. Co.* (C. C. W. D. Tenn.) 261

8. Diversity of citizenship of the parties is not necessary to give jurisdiction to United States circuit courts of suits arising out of alleged violations of the Interstate Commerce Act. *Id.*

9. The principal office, within the meaning of the Act of Congress authorizing a circuit court where such office is situated, to enforce orders of the Interstate Commerce Commission, of a railroad corporation created by an Act of Congress which does not prescribe where such office shall be kept, is the one where its principal officers have their business domicile, the meetings of stockholders, directors, and executive committee are held, the stock books kept and the dividends declared, rather than the place where the subordinate officers in charge of the operating, traffic, and accounting departments of the business, discharge their duties. *Interstate Commerce Commission v. Texas & P. R. Co.* (C. C. S. D. N. Y.) 62

10. A proceeding to compel the attendance of a witness before the Interstate Commerce Commission, or to require him to answer questions put to him, or to compel the production of books, documents, or papers in his possession, is a case of which, under the Constitution, a court of the United States may take cognizance. *Interstate Commerce Commission v. Brimmon* (U. S. Sup. Ct.) 545

See also INTERSTATE COMMERCE COMMISSION, 1.

4 INTER 8.

11. Where a carrier has an office in one state, which is that of the executive officers, and where the stockholders' and directors' meetings are held, and the stock certificate books and the records of stockholders' and directors' meetings are kept, while the administrative offices of the carrier are in another state, the former is its principal office within the meaning of the Interstate Commerce Act, § 16, relating to the place of bringing suits to enforce orders of the Commission. *Interstate Commerce Commission v. Texas & P. R. Co.* (C. C. App. 2d C.) 408

12. A state statute duly authenticated will be regarded by the United States courts as having been enacted in full compliance with all the prescribed forms, unless the constitution or decisions of such state require a determination of the question of enactment upon different evidence. *Ames v. Union P. R. Co.* (C. C. D. Neb.) 885

13. In Nebraska a statute duly authenticated cannot be overturned by extrinsic evidence, if the journals of the two houses show that everything was done which the constitution requires should be done and recorded in the due passage of the act. *Id.*

CRIMINAL LAW. See CARRIERS, III. k; EVIDENCE, 18-23.

DAMAGES.

Damages for mental pain and suffering alone, occasioned by the negligence of a telegraph company in failing to deliver a message announcing the death of a relative, cannot be recovered. *Butner v. Western U. Teleg. Co.* (Okla.) 770

DEFINITIONS. See also COMMERCE, 1; CONSPIRACY, 1, 2; INSURRECTION, 1.

Owner, see CARRIERS, 1.

DELEGATION OF POWER. See CONSTITUTIONAL LAW, 1-3.

DEMURRER.

To complaint. 107

DISCRIMINATION.

In Rates, see CARRIERS, III.

DRUMMERS. See COMMERCE, II.

DUE PROCESS OF LAW. See CONSTITUTIONAL LAW, 16-18; CONTEMPT, 1.

ELEVATOR. See also COMMERCE, 7; CONSTITUTIONAL LAW, 4, 6, 18.

One who enters upon the business of elevating and storing the grain of other persons for profit in North Dakota becomes subject to the statutory regulations, although he also elevates and stores his own grain in the same warehouse. *Brass v. North Dakota, Stoesser* (U. S. Sup. Ct.) 670

EQUITY.

1. A state legislature cannot deprive a United States equity court of jurisdiction over an

alleged unlawful reduction of freight rates affecting citizens of other states, by itself prescribing them by direct act, instead of delegating the authority to a commission. *Ames v. Union P. R. Co.* (C. C. D. Neb.) 885

2. There is no sufficient remedy at law to deprive a United States court of equity of jurisdiction over an alleged unlawful reduction by a state statute of freight rates, by reason of the fact that the statute provides for a petition to the state court, which may in its discretion direct the board of transportation to permit the carrier to raise its rates to the former amount. *Id.*

EVIDENCE. See also STATUTES, 8.

1. The court will take judicial notice that for the first \$36,000,000 of stock issued by the Union Pacific Railroad Company it received less than 2 cents on the dollar, and that the profit on construction represented by outstanding bonds was nearly \$44,000,000. *Ames v. Union P. R. Co.* (C. C. D. Neb.) 619

2. The court will take judicial notice of the geographical location of Kansas City and Wichita, and that transportation by railroad from these places is over lines outside the State of New York. *Parks v. Jacob Dold Packing Co.* (Buff. Super. Ct.) 486

3. Fraud and illegality in contracts are not to be presumed. *United States v. Trans-Missouri Freight Assn.* (C. C. App. 8th C.) 448

4. Proof of demand and insistence, under effective penalty or threat, that railroad employes quit their service, and of consequent injury to the transportation of the mails or interstate commerce, imposes the burden upon those making such demand or insistence, of showing lawful authority conferred by the men themselves, and good faith in its execution. *Re Charge to Grand Jury* (No. 2) (D. C. N. D. Ill.) 781

5. Where a proportion of a through rate for part of a through haul is greatly disproportionate to the balance of the through rate, the burden is on the carrier to make proof of justifying circumstances and conditions. *Troy Bd. of Trade v. Alabama Midland R. Co.* (Com.) 348

6. The burden is on a carrier to justify the fact of discrimination, when that is admitted, and the service is stated to have been substantially the same and rendered under substantially the same circumstances and conditions. *Samuels v. Louisville & N. R. Co.* (Ala.) 420

7. When, on complaint of a carload shipper, unjust discrimination is alleged to result from equal rates on carloads and less than carload quantities of the same commodity, the burden of proof is upon the complainant. *Brownell v. Columbus & C. M. R. Co.* (Com.) 285

8. The burden is on a company making a departure from equal mileage rates, on different branches or divisions of a road, to show its rates to be reasonable when disputed. *James v. Canadian P. R. Co.* (Com.) 274

9. The attorney general of the United States in a suit to enforce the duty imposed upon the Pacific railroad companies by Act of Congress of Aug. 7, 1888, § 2, of affording equal facilities

ties to all connecting lines of telegraphs without discrimination, has, if such suit can be maintained, the burden of showing that some telegraph company has placed itself in a position to demand of the railway company the same facilities accorded to other companies, and that such demand has been refused, as it cannot be presumed that the railroad company intends to disregard its duty. *Union P. R. Co. v. United States* (C. C. App. 8th C.) 705

10. When the schedule of wages in force at the time a court assumes the management of a railroad is the result of mutual agreement between the company and its employes, which has been in force for years, the court will presume the schedule to be reasonable and just, and any one disputing that presumption must overthrow it by satisfactory proof. *Ames v. Union P. R. Co.* (C. C. D. Neb.) 619

11. A schedule of rates cannot be excluded from evidence under the Illinois statutes, when accompanied by a regular certificate of the commissioners as to its publication, on the ground that it never took effect because never published as required by statutes, since the statutes make the schedule and accompanying certificate prima facie evidence that the schedule offered is a schedule of the commissioners. *Chicago, B. & Q. R. Co. v. Jones* (Ill.) 683

12. Making a schedule compiled by commissioners prima facie evidence that the rates therein fixed are reasonable maximum rates of charges for railroad carriage does not infringe upon the right of trial by jury. *Id.*

13. A written notification to the consignor, by a carrier's freight claim agent, of the destruction of property received for transportation, is not admissible against the carrier to prove the loss of the property, until it is shown to have been made in discharge of the agent's duties or within the scope of his powers and while the obligation of the carrier with reference to the property yet continued. *Missouri P. R. Co. v. Sherwood* (Tex.) 240

14. Parol testimony is not admissible to impeach the validity of an act which by the record is shown to have been duly and legally passed. *Ames v. Union P. R. Co.* (C. C. D. Neb.) 835

15. That a witness did not see the fire will not preclude his testifying that it consumed certain property, where he states that he knows of his own knowledge that it did so. To exclude the evidence it must appear that his knowledge was founded so entirely on hearsay as to be inadmissible. *Missouri P. R. Co. v. Sherwood* (Tex.) 240

16. Evidence of the value of an entire lot of cotton, while not sufficient to prove the value of a portion of it, in the absence of facts showing the average weight, value, and quality, is admissible as tending to show such value. *Id.*

17. Declarations by one of the parties to a conspiracy during the pendency of the illegal enterprise is evidence against all the others when the combination is proved. *Re Charge to Grand Jury* (No. 3) (D. C. N. D. Cal.) 784

18. A conspiracy may be established by circumstantial evidence. *United States v. Howell* (D. C. W. D. Mo.) 818

19. Circumstantial evidence which is equal in proving power to the testimony of one positive, uncontradicted, creditable eyewitness, is sufficient to sustain a conviction of conspiracy to violate the United States Act against obtaining illegal shipping rates. *United States v. Howell* (D. C. W. D. Mo.) 818

20. Although a conviction may be had on the testimony of accomplices if it produces on the minds of the jury a full and complete conviction of its truthfulness, it is a prudential rule that such witnesses should be corroborated by circumstances or otherwise as to some material point of their testimony. *Id.*

21. To sustain a conviction the proof must be sufficient to establish all the material allegations in issue, so that reasonable men upon a matter of importance or concern would be satisfied of their being true. *Id.*

22. A reasonable doubt which will require acquittal must be a real and substantial one, and not a mere conjecture or a surmise as to the possibility of innocence. *Id.*

23. Variance between allegations and proof as to the point of shipment of property for which less than schedule rates was obtained is immaterial, if both points were within the same state and subject to the same rates for shipment to the points of destination in another state. *Id.*

EXCURSION. See CARRIERS, 69.

FREE SPEECH. See CONSPIRACY, 7.

IMPORTS. See COMMERCE, III.

INDICTMENT. See also CARRIERS, 162, 163.

1. Insufficient allegations in an indictment which alleges the offense with reasonable precision are only surplusage under a general demurrer. *United States v. Patterson* (C. C. D. Mass.) 775

2. An indictment for conspiracy in restraint of trade or commerce, under the Act of Congress of July 2, 1890, must declare the means by which it is intended to engross or monopolize the market; and it is not sufficient to declare the conspiracy in the words of the enactment. *Id.*

3. Allegations of what was done in pursuance of an alleged conspiracy cannot enlarge the necessary allegations of an indictment for conspiracy under a particular statute, such as the Act of Congress against conspiracies in restraint of commerce. *Id.*

4. The objection that an indictment under the long and short haul clause of the Interstate Commerce Act is an attempt by the government to interfere with the revenues of the railroad contrary to the terms of the contract 4 INTER 8.

under which it was built cannot be raised upon a motion to quash. *United States v. Mellen* (D. C. D. Kan.) 247

INJUNCTION. See also ACTION OR SUIT, 2.

1. The enforcement of city ordinances which attempt an unconstitutional interference with interstate commerce may be restrained by injunction from a Federal court. *Georgia Packing Co. v. Macon* (C. C. S. D. Ga.) 508

2. No one can have an injunction against the collection of a tax until he has paid so much of the tax assessed against him as it can plainly be seen he ought to pay. *Northern P. R. Co. v. Clark* (U. S. Sup. Ct.) 641

3. The enforcement of an unreasonable reduction, by the legislature, of freight rates, may be enjoined. *Ames v. Union P. R. Co.* (C. C. D. Neb.) 835

4. An injunction against the enforcement of unreasonable and unjust rates fixed by railroad commissioners must not extend to restraining the commission from proceeding to establish other rates. *Reagan v. Farmers' Loan & T. Co.* (U. S. Sup. Ct.) 560

5. Trade unions are not prohibited by an injunction against illegal combinations of workmen. *Arthur v. Oakes* (C. C. App. 7th C.) 744

6. Equity will not enjoin employes of a receiver of a railroad from quitting his service, although the effect of such action will be to cripple the property or prevent or hinder the operation of the road. *Id.*

7. An injunction will not be granted to prevent the employes of a railroad in the hands of a receiver from interfering with the property or other employes, since such an action is punishable as a contempt. *Ames v. Union P. R. Co.* (C. C. D. Neb.) 619

But see contra, cases following.

8. Injunction is a proper remedy to restrain threatened acts of employes of a railroad receiver, which would inflict irreparable loss upon the property, and seriously prejudice the interests of the public involved in the regular, continuous operation of the road. *Arthur v. Oakes* (C. C. App. 7th C.) 744

9. Equity will enjoin any combination or conspiracy among the employes of the receiver of a railroad, which has for its object and intent the physical injury of the property in the receiver's possession, or actual interference with the regular, continuous operation by him of the railroad. *Id.*

10. Employes of a receiver of a railroad may be enjoined from disabling rolling-stock or other property in the receiver's possession, from interfering with its possession or obstructing its management, and from using force, intimidation, threats, or other wrongful methods against the receiver, his agents or employes, or persons seeking employment. *Id.*

11. Employes of the receiver of a railroad may be enjoined from combining and conspiring to quit his service, with the object and intent of crippling the property in his custody or embarrassing the operation of the railroad. *Id.*

12. An injunction will lie against railroad employes who, continuing in employment, refuse to perform their duties, where the direct result of such refusal works irreparable damage to the employer, and at the same time interferes with the transmission of the mail and with commerce between the states, notwithstanding there is no precedent for such injunction. *Southern California R. Co. v. Rutherford* (C. C. S. D. Cal.) 800

13. A preliminary injunction will be granted to restrain threatened acts in pursuance of an unlawful conspiracy in restraint of commerce between the states. *United States v. Elliott* (C. C. E. D. Mo.) 798

14. An injunction against an unlawful combination in restraint of trade, in violation of the Act of Congress, will not be denied because, after the filing of the bill, the unlawful interference with trade ceases. *United States v. Workmen's Amalgamated Council* (C. C. E. D. La.) 881

15. An answer under oath does not preclude an injunction in the Federal courts, where the oath of the respondent is waived in the bill according to Equity Rule 41. *Id.*

INSURANCE. See COMMERCE, 6; CONSPIRACY, 27.

INSURRECTION.

1. Insurrection is a rising against civil or political authority,—the open and active opposition of a number of persons to the execution of law in a city or state. *Re Charge to Grand Jury* (No. 2) (D. C. N. D. Ill.) 781

2. One who by speech, writing, or other inducements assists in setting on foot an insurrection or carrying it along, or who gives it aid or comfort, is guilty of a violation of law. *Id.*

3. Men who gather together to resist the civil or political power of the United States or to oppose the execution of its laws, in such force that the civil authorities are inadequate to put them down, and a considerable military force is needed to accomplish that result, become, with every person who knowingly incites, aids or abets them, with whatever motives, insurgents. *Id.*

4. To constitute an insurrection against the United States, it is not necessary that there should be blood shed, or that its dimensions should be so portentous as to insure probable success; but it is necessary that the rising should be in opposition to the execution of the laws of the United States, and should be so formidable as for the time being to defy the authority of the United States. *Id.*

5. Opposition to the arrest of persons who have willfully obstructed or retarded the mails, by such a number of persons as would constitute a general uprising in that particular locality, and as threatens for the time being the civil and political authority, constitutes an insurrection. *Id.*

INTERSTATE COMMERCE. See COMMERCE.

4 INTER S.

INTERSTATE COMMERCE COMMISSION. See also ACTION OR SUIT, 8; CARRIERS, 83; COURTS, 7-11.

Eighth Annual Report.

863

1. The Act of Feb. 4, 1887, § 12, as amended in 1889 and 1891, is constitutional and valid, so far as it authorizes or requires the circuit courts of the United States to use their process in aid of inquiries before the Interstate Commerce Commission. *Interstate Commerce Commission v. Brimson* (U. S. Sup. Ct.) 545, Rev'g 315

2. A suit brought by the Interstate Commerce Commission in the United States circuit court to enforce an order of the Commission is an original and independent proceeding to be heard *de novo* upon proper pleadings and proof. *Interstate Commerce Commission v. Cincinnati, N. O. & T. P. R. Co.* (C. C. N. D. Ga.) 832, Rev'd on Other Grounds in 582

3. The provision of the Interstate Commerce Act, that the findings of fact of the Commission shall be prima facie evidence of the matters therein stated, does not make them conclusive in proceedings before the court to enforce the order of the Commission; but the court must consider all evidence submitted, and base its judgment thereon. *Interstate Commerce Commission v. Atchison, T. & S. F. R. Co.* (C. C. S. D. Cal.) 323

4. When a carrier on complaint under the Act to Regulate Commerce, § 4, avers substantial dissimilarity in circumstances and conditions as justifying its greater charge for shorter hauls, it is concluded by its pleading, and must affirmatively show that the circumstances and conditions, of which it is entitled to judge in the first instance, are in fact substantially dissimilar; but upon an application for relief under the § 4 proviso the carrier is not limited by such a rule of evidence, and may present to the Commission every material reason for an order in its favor. *Trammell v. Clyde Steamship Co.* (Com.) 120

5. The fact that the property and affairs of a carrier have been placed by a United States court in the hands of a receiver does not affect the jurisdiction of the Interstate Commerce Commission under a complaint charging such carrier with violations of the Act to Regulate Commerce. *Troy Bd. of Trade v. Alabama Midland R. Co.* (Com.) 348

6. The bona fides of a complaint of discrimination by a carrier cannot be attacked in the circuit court by impeaching the good faith of those who in the first instance induced the Interstate Commerce Commission to take action under the provisions of the Interstate Commerce Law for the lodging by any person of complaints with the Commission, and that no complaint shall be dismissed because of the absence of direct damage to the complainant, but that the Commission may institute any inquiry on its own motion, and requiring the Commission, if the law has been violated, to notify the carrier to cease from further violation, and, in case of its refusal, to apply by petition to a circuit court in equity to enforce its order. *Interstate Commerce Commission v. Detroit, G. H. & M. R. Co.* (C. C. W. D. Mich.) 723

7. The fact of a receivership for a defendant carrier subsequent to complaint should not interfere with the progress of a proceeding brought merely for the purpose of railway regulation. *Trammell v. Clyde Steamship Co.* (Com.) 120

8. If a railroad company is violating a proper order of the Interstate Commerce Commission, it should be restrained from doing so; and it cannot escape upon the objection that another wrongdoer is also violating it. *Interstate Commerce Commission v. Texas & P. R. Co.* (C. C. S. D. N. Y.) 114

9. When a local rate from a given point is alleged to be unreasonable, but it appears from the record that such local rate is also a proportion of through rates from that point, and as such is the real subject of controversy, the complaint should be directed against the aggregate through rate, not the share received by any initial carrier, and all the carriers composing the through line are necessary parties. *Minneapolis Chamber of Commerce v. Great Northern R. Co.* (Com.) 280

10. On failure of the petitioner to appear at the hearing, though duly notified thereof, or to offer proof in support of the information and belief upon which his allegations were made, the complaint must be dismissed. *Rice v. St. Louis S. W. R. Co.* (Com.) 321

11. Defendants are not entitled to a dismissal of a complaint of unlawful rates, on the ground that the petitioners, being merely commission merchants, can sustain no direct or material damage under the rates in question. *James v. Canadian P. R. Co.* (Com.) 274

12. Where a complainant has invoked the aid of the law to secure what he, with the acquiescence of the carrier had previously obtained in apparent contravention of the law, the carrier cannot plead violations of the law by complainant in bar of a decision on the merits, nor will the individual interests of the complainants be taken into consideration; but the Commission will examine the evidence and make such report thereon as, under the provisions of the law, the rights of other shippers and the public generally may require. *Page v. Delaware, L. & W. R. Co.* (Com.) 525

LICENSE. See also COMMERCE, 24-28, 30.

1. A license fee of \$200 for doing express business in a city of 15,000 inhabitants is not shown to be prohibitory or destructive of the business of express companies, even if it be that any judicial action could be based on such a showing. *Osborne v. State* (Fla.) 731

4 INTER 8.

2. A citizen doing a general business at the place of his domicile cannot escape payment of his share of the burdens of municipal government because the amount of his tax is arrived at by reference to his profits. *Ficklen v. Shelby County Taxing Dist.* (U. S. Sup. Ct.) 79

LIMITATION OF ACTIONS.

1. The statute of limitations of the state in which the offense was committed applies in actions under the Interstate Commerce Act to recover back freight paid to a carrier in excess of that charged other shippers. *Copp v. Louisville & N. R. Co.* (C. C. E. D. La.) 805

2. The concealment from a shipper of the fact that the rates charged him were excessive and that rebates were secretly given to others, and false representations as to these facts, do not take a cause of action for the recovery of the excess paid by him out of the statute of limitations, as the case is not based on fraud. *Murray v. Chicago & N. W. R. Co.* (C. C. N. D. Iowa) 806

3. An amendment to a declaration charging a common-law liability or implied contract obligation to repay money obtained by wrongful overcharges states a new cause of action within the rule as to the statute of limitations, where the original counts sought to recover treble damages as a statutory penalty. *Chicago, B. & Q. R. Co. v. Jones* (Ill.) 683

POSTOFFICE. See also CONSPIRACY, 19-25; INJUNCTION, 12; INSURRECTION, 5.

1. Failure of a railroad company to run any other trains than their regular passenger trains for carrying the mail is not a violation of law; but failure or refusal to carry mails on regular 4 INTER 8.

passenger trains, whether local or through trains, upon which they are required to carry mails, is unlawful. *Re Charge to Grand Jury* (No. 1) (D. C. S. D. Cal.) 777

2. Willful failure of railroad companies to carry the mails is within U. S. Rev. Stat. § 3995, making it an offense to unlawfully and willfully retard or obstruct the passage of the mail, although their employes refuse to move trains having certain sleeping cars thereon, where the situation is of an extraordinary character, and the interruption to commerce has been serious and long-continued, and the employes are willing to move trains without such cars. *Re Charge to Grand Jury* (No. 3) (D. C. N. D. Cal.) 784

PRESUMPTIONS. See EVIDENCE, 3-10.

PUBLIC BUSINESS. See CONSTITUTIONAL LAW, 7.

RAILROAD COMMISSIONERS. See also ACTION OR SUIT, 1; CONSTITUTIONAL LAW, 1, 8; CONTRACTS, 13; EVIDENCE, 12; INJUNCTION, 4.

1. The details of practice and pleading may be supplied by a railroad commission which is constituted a court of record, under the inherent power of every court of record to make such rules not inconsistent with the law as are necessary to the exercise of the powers conferred upon it. *Atlantic Exp. Co. v. Wilmington & W. R. Co.* (N. C.) 294

2. Authority is given to the railroad commission to hear and determine complaints of unjust discriminations and preferences, under the North Carolina Railroad Commission Act, which expressly provides that if a railroad company is guilty of a violation of the rules of the commission, and after due notice of such violation does not make full recompense for the wrong or injury done, it shall incur a penalty, and also constitutes such commission a court of record. *Id.*

REBATES. See CARRIERS, 75; CONTRACTS, 11, 12.

RECEIVERS. See also CONTEMPT, 2-6; CONTRACTS, 9; INJUNCTION, 6-11.

1. Advice and instructions to receivers on ap-

plication to the court, where *ex parte*, are probably binding only upon the receivers; but where there are parties in interest, and they have their day in court, the advice may be decisive. *Missouri P. R. Co. v. Texas & P. R. Co.* (C. C. E. D. La.) 484

2. When a court of equity undertakes, through a receiver, the conduct and operation of a railroad, the men engaged in conducting the business and operating the road become the employés of the court, and are subject to its orders in all matters relating to the discharge of their duties, and entitled to its protection. *Ames v. Union P. R. Co.* (C. C. D. Neb.) 619

3. The rate of wages to be paid to employés of receivers must be left mainly to the receivers to manage. *Ames v. Union P. R. Co.* (C. C. D. Neb.) 625

4. If employés of receivers do not receive enough compensation for the work they do they have the right to apply to the receivers or to the court to have their wages increased; and on a proper showing made, justice will be done. *Id.*

5. An order relative to wages of employés of a receiver should be for the benefit of all parties similarly situated, whether belonging to any of the labor organizations applying for it, or not. *Id.*

6. The recommendation of the majority of the receivers of a railroad will not be accepted by the court as conclusive upon the question of wage schedules, when such majority is not composed of practical railroad men. *Ames v. Union P. R. Co.* (C. C. D. Neb.) 619

7. Wage schedules are not within the class of executory contracts which receivers can renounce while relying on the power of the court to compel the employés to continue in service. *Id.*

8. Receivers must give employés an opportunity to be heard before fixing wage schedules. *Id.*

9. Receivers in possession of a railroad will not be permitted to reduce the wages of employés without giving them notice and an opportunity to be heard, as required by the contract between the men and the company, although an opportunity is given to protest against the new schedules after they are prepared. *Id.*

10. Wages of the employés of a railroad in the hands of a receiver will not be reduced below what is reasonable and just in order to pay dividends on stock for which practically no value was paid, and interest on bonds which represent profit in construction. *Id.*

11. The diminished opportunity to earn wages, induced by the same conditions which forced the railroad into the hands of a receiver, should be considered when deciding the question of reduction or maintenance of the old wage schedule. *Id.*

12. The allowance of excess mileage by railroad receivers to employés will be approved by the court for portions of the road running through mountains and desert country, where competent men cannot be kept at regular rates, but where such course was entirely successful as employed by the company. *Id.*

13. Employés of the receiver of a railroad may lawfully confer together upon the subject of a proposed reduction of wages, and, if not restrained by their contract, may withdraw in a body from the receiver's service because of such reduction, although they expect that such action will inconvenience the receiver and the public. *Arthur v. Oakes* (C. C. App. 7th C.) 744

REHEARING.

Application for. 283, 369
Decision upon. 369

REMOVAL OF CAUSES.

1. The fact that a plaintiff rests his case on a common-law liability will not deprive defendant of the right to remove it, if he bases his defense on an Act of Congress. *Lowry v. Chicago, B. & Q. R. Co.* (C. C. D. Neb.) 435

2. The Federal court will remand a cause removed to it on the ground that the matter in dispute arose under the Constitution, laws, or treaties of the United States, where the only showing to that effect in the record is that a Federal question may arise if the evidence proves certain facts. *State v. Chicago, M. & St. P. R. Co.* (C. C. N. D. Iowa) 425

3. A suit to recover damages for acts which constitute a violation of the Interstate Commerce Act, the construction of which is in dispute between the parties, presents a Federal question for which it may be removed to a Federal court. *Lowry v. Chicago, B. & Q. R. Co.* (C. C. D. Neb.) 435

4. On a motion to remand, the court will not anticipate the trial of the case by deciding a Federal question for which the right of removal is claimed. *Id.*

5. A United States court in a case removed from a state court on the ground of diverse citizenship has no jurisdiction over a question as to the reasonableness of an interstate commerce rate. *Swift v. Philadelphia & R. R. Co.* (C. C. N. D. Ill.) 633

6. The right to take steps for the removal of a cause to the circuit court of the United States, on the ground of a separable controversy, is confined to the parties actually interested in such controversy. *Merchants' Cotton-Press & S. Co. v. Insurance Co. of North America* (U. S. Sup. Ct.) 499

7. In order to justify removal of a cause from a state court to the United States circuit court on the ground of a separable controversy between citizens of different states, the whole subject-matter of the suit must be capable of being finally determined as between them, and complete relief afforded as to the separate cause of action, without the presence of others originally made parties to the suit. *Id.*

8. In a suit in equity in the nature of a creditors' bill brought by insurance companies against a railroad company and other companies who are made parties in aid of the relief asked against that company, if the suit is in fact a single cause of action against the railroad company, with incidental relief against the other companies, the railroad company is an indispensable party to the litigation, and

there is no separable controversy as to the other defendants which will allow a part of them to remove the cause from the state court to a Federal court. *Id.*

9. The voluntary joinder of parties has the same effect for purposes of jurisdiction as if they had been compelled to unite. *Id.*

10. The right of removal must be determined by the pleadings at the time the petition is filed. *Id.*

SPECIFIC PERFORMANCE.

A contract to render personal service cannot be specifically enforced. *Ames v. Union P. R. Co.* (C. C. D. Neb.) 619

STATE.

A suit to restrain the enforcement by state officers of unjust and unreasonable rates fixed for carriers by state authority is not a suit against the state within the prohibition of the 11th amendment, since the state is interested only in a governmental, and not in a pecuniary, sense. *Reagan v. Farmers' Loan & T. Co.* (U. S. Sup. Ct.) 560

STATUTES. See also COURTS, 12, 13.

1. The title of "An Act to Regulate the Planting and Taking of Oysters in the Waters of the State" is sufficient to cover provisions against the taking of oysters by nonresidents, and the transportation out of the state by any person of oysters in shells. *State v. Harrub* (Ala.) 99

2. Provisions in a statute as to unlawful discrimination in rates will, even if unconstitutional, not make invalid other provisions as to reasonableness of rates. *Chicago, B. & Q. R. Co. v. Jones* (Ill.) 683

3. The provisions of the Kentucky statute requiring separate compartments or cars for white and colored passengers to be furnished by all railroad companies operating trains within the state, in respect to interstate commerce, cannot be separated from those relating to commerce wholly within the state, and render the whole act void. *Anderson v. Louisville & N. R. Co.* (C. C. D. Ky.) 764

4. A section of a statute prescribing penalties, and another section declaring the effect as evidence of rates fixed by commissioners, may be dropped as invalid without affecting the validity of the remainder of the statute, where it appears that its prime object was the establishment of rules for the operation of railroads and the regulation of their rates,

4 INTER S.

which can be fully accomplished irrespective of the invalid sections. *Reagan v. Farmers' Loan & T. Co.* (U. S. Sup. Ct.) 560

5. A statute must be read in the light of all general laws upon the same subject in force at the time of its passage. *United States v. Trans-Missouri Freight Assn.* (C. C. App. 8th C.) 443

6. Words which have acquired a well-understood meaning by judicial interpretation must be presumed to be used in that sense in a subsequent statute, unless the contrary clearly appears. *Id.*

7. Common-law terms used in an Act of Congress creating an offense without defining the terms may be interpreted by the common law. *Id.*

8. A statute changing a rule of evidence is applicable to a pending action. *Chicago, B. & Q. R. Co. v. Jones* (Ill.) 683

TAXES. See also APPEAL AND ERROR, 2; COMMERCE, 30; INJUNCTION 2.

1. A state has power to tax all property having a situs within its limits, whether employed in interstate commerce or not. *Ficklen v. Shelby County Taxing Dist.* (U. S. Sup. Ct.) 79

2. A state cannot tax or regulate interstate commerce, or make the payment of a tax or the taking out of a license a condition precedent to carrying on interstate or foreign commerce. *Osborne v. State* (Fla.) 731

3. A tax levied only upon the franchise or business of a foreign corporation is not a tax on interstate commerce. *Horn Silver Min. Co. v. New York* (U. S. Sup. Ct.) 57

4. The statute of New York does not require that the whole business of a foreign corporation shall be done within the state, in order to subject it to the taxing power of the state. *Id.*

5. The law of Ohio requiring a corporation to pay the secretary of state for filing articles of agreement of consolidation of corporations a percentage on the capital stock of the new consolidated corporation created by such articles is valid and constitutional, when applied to the consolidation of foreign corporations with a domestic corporation of the state, forming a continuous line of railroad through several states. *Ashley v. Ryan* (U. S. Sup. Ct.) 664

6. Assessing that part of an interstate railroad which is within the state at its actual cash value on a mileage basis is not placing a burden upon interstate commerce beyond the power of the state, simply because the value of the railroad as a whole is created partly—and perhaps largely—by the interstate commerce which it is doing. *Cleveland, C. C. & St. L. R. Co. v. Backus* (U. S. Sup. Ct.) 677

7. The true value of a line of railroad for the purpose of taxation is something more than an aggregation of the values of separate parts of it, operated separately. It is the aggregate of those values plus that arising from a connected operation of the whole. *Id.*

8. It is not necessary that the assessing board of a state, in order to keep within the limits of state jurisdiction, shall treat the part of a railroad within the state as an independent line disconnected from the part without, and place upon that property only the value which can be given to it if operated separately from the balance of the road. *Id.*

9. Ascertaining the value of the whole line of a railroad as a single property, and then determining the value of that within the state upon a mileage basis, is not a valuation of property outside of the state, if no special circumstances exist to distinguish between the conditions in the two states,—such as terminal facilities of enormous value in one and not in another. *Id.*

10. A railroad corporation of a state is liable to taxation by such state upon its receipts, for the mileage within the state, from transportation by continuous carriage from a point in the state to another point in the state, but over a line which, in its course between those points, passes out of the state into another state and back again into the state. *Lehigh Valley R. Co. v. Pennsylvania* (U. S. Sup. Ct.) 87

TELEGRAPHS. See also ACTION OR SUIT, 3; COMMERCE, 18, 19, 29, 30; DAMAGES; PLEADING, 1.

1. Okla. Stat. 1890, § 543, imposing a penalty of \$50 upon carriers of messages for certain breaches of duty, does not apply to a failure to deliver a message, but only applies to the failure to receive or transmit messages in the order presented. It is a penal statute, and must be strictly construed. *Butner v. Western U. Teleg. Co.* (Okla.) 770

2. The sendee of a telegraphic message cannot maintain an action against the telegraph company for neglect, delay, or nondelivery of the message, in the absence of a showing that it was sent by his agent or was sent for his benefit, and that the carrier had actual or constructive notice that it was so sent for the benefit of the sendee. *Id.*

3. A person to whom a telegram is addressed can maintain an action for a penalty on account of failure to deliver it promptly, under Va. Code, § 1292, expressly providing that the forfeiture shall be to him or to the person sending the despatch. *Western U. Teleg. Co. v. Tyler* (Va.) 481

4. The Pacific Railroad Acts, requiring the railway companies to erect and maintain a line of telegraphs along their right of way, do 4 INTER 8.

not impose upon the company the duty of maintaining a separate line of poles upon which to string its wires, where a telegraph company lawfully in possession of a line of telegraph on the railroad right of way, and operating the same for commercial and other purposes, by contract with the railway company provides that the latter may maintain upon the former's poles wires devoted to its exclusive use, and the latter has offices at convenient points, and operators expressly required to send over such wires all such messages of a governmental or commercial character as are directed to be sent, and the right to string such additional wires as may be deemed essential or convenient. *Union P. R. Co. v. United States* (C. C. App. 8th C.) 705

5. The United States government as the holder of a lien upon the Pacific railroads and telegraph lines is entitled, under the Act of Congress of Aug. 7, 1888, to maintain a bill in equity to have its rights and equities in and to the telegraph property along the right of way of the Union Pacific Railway Company judicially ascertained, and to have the rights of other persons and corporations therein also ascertained and adjudicated, and, incidental thereto, to have set aside and annulled all provisions of contracts that are unlawful and in any manner impair the security of the United States, cloud its title, or prejudice its rights. *Id.*

6. The privilege given the United States Telegraph Company to erect and maintain a line of telegraph upon the rights of way of the Pacific railroad companies by Act of Congress of July 2, 1864, providing that such telegraph company "and their associates" may construct a line of telegraph between the Missouri River and San Francisco, and authorizing such railroad companies to enter into an arrangement with it for the transfer of its line to the line of the road in fulfillment of the obligation of the railroad companies to construct and maintain a line of telegraph,—is not personal, but may be shared by another corporation becoming lawfully associated with the United States Telegraph Company in the work of constructing a transcontinental line,—especially one with which such telegraph company became lawfully united by the process of consolidation. *Id.*

7. The privilege granted to the United States Telegraph Company by Act of Congress of July 2, 1864, to enter into arrangements with the Pacific railroad companies for the construction and maintenance of a line of telegraphs upon the railroad right of way, in discharge of the obligation of the railroad companies to construct and maintain such a line, must be presumed to have been conferred with full knowledge of the charter powers of the grantee to consolidate with other corporations engaged in like business, and is not personal so as to become lost by the merger of such telegraph company with the Western Union Telegraph Company, but passed to and became vested in the consolidated company. *Id.*

8. The provisions of the contract of July 1, 1881, between the Union Pacific Railway Company and the Western Union Telegraph Com-

pany, giving the latter access to the former's station-houses with some of its wires, and the right to avail itself of the service of the employes of the railway company, at most afford to the telegraph company some facilities for competing with the railway company in the matter of transacting a commercial business, which it would not enjoy if compelled to maintain independent offices, and do not amount to a transfer or surrender of the telegraphic franchise of the railway company, which, notwithstanding them, retains its right and capacity to do a commercial business. *Id.*

9. The provisions of the contract of July 1, 1881, between the Union Pacific Railway Company and the Western Union Telegraph Company looking to the exclusive right of the latter to maintain a line of telegraph upon the railroad right of way, do not render the contract voidable on the grounds of public policy, as they do not bind the railway company absolutely to exclude other telegraph companies from the right of way, or withhold all facilities for the construction of competing lines, as they provide for the grant of such exclusive right only to the extent that the railway company may legally do so. *Id.*
